

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Bureau of the American Republics.

The International American Conference, in session at Washington from October 2, 1889, to April 19, 1890, at which all of the independent nations of North, Central, and South America, and the Republic of Hayti were represented, recommended the establishment of an association under the title of "The International Union of American Republics for the Prompt Collection and Distribution of Commercial Information," to be represented at Washington, under the supervision of the Secretary of State, by a Bureau of the American Republics.

It was recommended that this Bureau should publish from time to time bulletins, in an attractive form, which should contain information that may be useful to producers, merchants, and manufacturers, and others interested in the development of commerce between the countries of the Western Hemisphere, including customs tariffs, official circulars, international treaties and conventions, local regulations, and, so far as practicable, statistics regarding the resources, products, and commerce of those countries.

It was considered proper, also, that the Bureau should at all times be available as a medium of communication for persons desiring reasonable information in regard to the customs tariffs and regulations, and the commerce and navigation of the American Republics. While it may be expected that the utmost care will be taken to secure accuracy in the publications of, and the information furnished by, the Bureau, the International Union will assume no pecuniary responsibility on account of inaccuracies which may accidentally occur.

It was recommended by the Conference that the Government of the United States should advance the funds necessary to pay the

expenses of the Bureau, and that the other Republics which thought proper to enter the association, should, at the close of each fiscal year, be assessed for their share of the same in proportion to their population. In accordance with this recommendation the Congress of the United States, at its last session, authorized the establishment of the Bureau of American Republics, and made an appropriation to sustain it during the current year.

This bulletin of the Bureau contains such information as is thought to be useful to those interested in the development of commerce between the American Republics, and will be followed at frequent intervals by others, which it is hoped may be found even more valuable and interesting. It is intended to publish a series of bulletins devoted to descriptions of each of the American Republics, their resources, industries, and commercial advantages, their customs laws and regulations, and such other information as may be deemed desirable.

There is also in course of preparation a Code of Nomenclature containing a list of all articles of merchandise imported and exported, with their Spanish and Portuguese equivalents. This Code, when completed, will be submitted for the sanction of the proper officers of the several Governments, and made, it is hoped, the official authority for determining the terms to be used in bills of lading, consular invoices, ships' manifests, etc. Such a uniform code, it is believed, will relieve merchants and shippers from serious annoyances and complications, which now embarrass them.

It is also proposed to publish a compilation of the tariff laws of the several American Republics and a manual of customs regulations, which will be found useful in the counting room of every merchant and manufacturer engaged in trade between North, Central, and South America.

The director of the Bureau will appreciate any suggestions that may be offered for increasing the value of the bulletins and their usefulness in fulfilling the purpose for which they are intended.

*Organized under the supervision of the Secretary of State in pursuance of the recommendations of the International American Conference.

Argentine Republic.

The Argentine Republic is bounded on the north by Bolivia, on the east by Brazil and Uruguay and the Atlantic Ocean, on the south by the Atlantic Ocean and Chile, and on the west by the Andes, which separates it from Chile. It extends from latitude 21° to 55° south, a distance of 2,400 miles, and is mostly included between 53° and 70° west longitude. Its average breadth is nearly 700 miles. The climate is generally healthy, the soil fertile and very productive; valuable forests lie along the river banks, and on the extensive plains millions of sheep and cattle roam.

By a treaty negotiated some years ago the archipelago of Terra del Fuego was divided between Chile and the Argentine Republic. The islands are inhabited mostly by tribes of wild Indians, who are supposed to be cannibals. Recently gold has been discovered in that portion of the islands belonging to the Argentine Republic, and several profitable mines are now being worked there.

The resources of the Argentine are great, and it has been one of the most prosperous of the South American Republics.

Executive Authority.—President of the Republic, chosen by an electoral college elected by the people every six years, two electors for each member of the Senate and Chamber of Deputies. Presidents are not eligible for reelection without an intervening term. Salary, \$36,000. Vice President, elected in the same manner and at the same time, is presiding officer of the Senate, but no political power; succeeds the President in case of death or incapacity. Salary, \$18,000. Both President and Vice President must be Roman Catholics, natives of the country, and over thirty years of age. Cabinet consists of five ministers, namely, of the Interior, Foreign Affairs, War, Finance, and Justice. Salaries, \$16,800 each.

Legislative Authority.—Federal Congress, consisting of Senate and House of Deputies. Senate consists of thirty members, two from the federal district, and two from each of the provinces, elected by the legislatures for nine years, divided into three classes, the term

ARGENTINE BUILDING AT PARIS EXPOSITION.

of one class expiring every three years. Under the constitution senators must have private income of \$2,000 a year. Salaries, \$8,400 per year. Chamber of Deputies, eighty-six members, elected directly by the people, one for every twenty thousand (20,000) inhabitants; must be twenty-five years of age, and have a citizenship of four years. Deputies are elected for four years, but one-half of the House retires every two years. Salaries, \$8,400 per annum. The two chambers meet annually from May 1 to September 30.

Judicial Authority.—Justice is administered by a supreme court of five judges and an attorney-general, and by a number of inferior and local courts, trial by jury being guaranteed by the constitution for criminal cases.

AREA AND POPULATION.

The area of the Republic is 1,125,086 English square miles, and the population in 1887, 4,046,654. The area and population of the fourteen provinces and nine territories are as follows:

Provinces and Territories.	Area in English square miles.	Population.
Provinces:		
Buenos Ayres	63,000	850,000
Catamarca	31,500	180,000

Total	1,125,086	4,046,654

The capital of the Republic, Buenos Ayres, had a population of 177,790 in 1869, 295,000 in 1882, and 538,385, including suburbs, in November, 1889, of whom over 150,000 are foreigners. La Plata, the new capital of the province of Buenos Ayres (founded 1884), has a population of 40,000. It is about 40 miles southeast of the city of Buenos Ayres.

Cities of over 5,000 inhabitants.

Buenos Ayres.....	568,644	Pasco.....	15,000
Cordoba.....	66,000	Sante Fè.....	10,670

Corrientes.....	15,500		

The increase of population has been greatly due to immigration. The arrivals in the last six years have been as follows: 1882, 51,503; 1883, 63,243; 1884, 77,805; 1885, 108,722; 1886, 93,116; 1887, 136,842; 1888, 180,993; 1889, 289,014, or nearly 1,000,000 immigrants in that period. Most immigrants are from the south of Europe. In 1880-'87 the Italians formed 70 per cent. of the total; Spaniards, 10.25 per cent.; French, 7.75 per cent.; and all others but 12 per cent. The emigration during this period has varied between 9,000 and 14,000 annually. The excess of immigration over emigration in the years 1871-'86 was 634,266.

In 1887 the number of foreigners in the Republic was 600,000, including 280,000 Italians, 150,000 French, 100,000 Spaniards, 40,000 English, and 20,000 Germans.

Religion.—Although the constitution recognizes the Roman Catholic religion as that of the State, all other creeds are tolerated, and there are more Protestant churches in Buenos Ayres than in any other city in South America. In 1889 the Government gave \$423,540 in aid of the Roman Catholic church. By law, in 1888, the right of civil marriage was established.

Education.—As reported by the General Government, in 1888, there were 3,227 public schools, with 7,332 teachers, and 254,608 pupils—these schools being under the control of the ministry of

education; secondary system, 15 academies, 343 professors, and 2,517 pupils; 14 normal schools for women, with 4,324 students; 13 for men, with 2,655 students, and 7 mixed, with 1,818 students, there being 730 professors employed in the normal school system. There is a well-equipped national observatory at Cordoba, museums at Buenos Ayres and La Plata, and a meteorological bureau, 2 universities, with faculties of law (203 students), medicine (414 students), engineering (126 students), and mines (30 students); also 2 practical schools of agriculture, a naval academy, and a military academy.

Total	60,224,000	74,370,000	Total	61,781,428	67,881,884.00

Army and Navy.—The army comprises 11 generals, 238 field officers, and 880 subalterns, with 1,000 artillery, 2,500 horse, and 3,500 foot; in all, 7,000 combatants. The militia comprises 236,000 men between 17 and 45 years, and 68,000 reserve, between 45 and 60 years. There is a military school with 125 cadets, and a school for non-commissioned officers. The naval school has 60 cadets, and the school of gunners, 80. In 1889 the navy of the Republic included 1 sea-going armor clad, 2 coast-defense armor clads (monitors), 1 deck-protected cruiser, 6 gunboats, 2 transports, 3 screw and 4 paddle dispatch boats, 1 torpedo school ship, 4 torpedo boats, and 4 spar torpedo boats. Several new men of war are now under construction in England, the Government having also reinforced its torpedo material. There are also a few sailing vessels. There are in all about 58 guns. The sea-going armor clad *Almirante Brown* is of 4,200 tons displacement, 5,400 horse power, and is protected by 9-inch steel-faced armor. In her central battery she carries 6 11½-ton breech-loading guns of the Armstrong type, and has 2 other

guns of the same caliber mounted at the bow and stern respectively. She is also equipped with Whitehead torpedoes and the electric light. Her design was prepared by Mr. W. H. White, now assistant controller and director of naval construction of Her Majesty's navy, and she was built in 1881 by Messrs. Samuda. The navy is manned by 1,500 officers and men, of whom 320 are officers and 370 marines.

Resources and Products.—The area of land under cultivation in 1888 in the fourteen provinces and five national territories was 2,359,958 hectares, * or 9,200 square miles. In other words, the figures barely represent 1 per cent. of the total area of the country, which is set down at 289,420,341 hectares.

The total area under wheat in 1875 was 100,000 hectares; in 1889 it was 1,035,000 hectares; maize, 850,000 hectares; flax, 140,000 hectares.

The value of the agricultural products exported in 1888 was \$16,300,000. According to recent statistics the value of the harvest in 1889 in the Republic amounted to \$100,552,000 gold.

Cattle and sheep breeding is an important industry in the Argentine Republic. In 1888 there were 4,398,000 horses, 22,869,000 oxen, and 70,453,000 sheep. The value of the wool exported in 1889 was \$56,000,000.

Railways and Telegraph.—The length of railway open for traffic in 1889 was 6,940 miles, which connects the principal cities of the Republic with the capital. There were in addition 2,990 miles in construction. The total cost of construction of the lines open for traffic at the end of 1885 was £20,000,000, being an average cost of £6,666 per mile. The receipts for 1888 amounted to \$21,000,000 and the expenses, \$12,250,000. In 1888 there were 14,700 miles of telegraph lines in operation, 7,300 miles belonging to the state and the rest to private companies. The total length of telegraph wires in 1888 was 28,550 miles. The number of telegraphic dispatches sent was 3,511,420 in the year 1889; number of offices in 1887, 668. A concession has been granted (November, 1889,) to lay a direct cable from Buenos Ayres to Europe, which must be ready within thirty months. The concessionaire made a deposit of \$100,000 in December, 1890, as a guarantee. The post office in the

* A hectare is equal to about 2½ acres.

year 1889 carried 42,965,555 letters, 965,269 postal cards, and 32,793,607 newspapers, etc. There were 659 offices.

Banking.—On November 3, 1887, a law of national banks similar to the banking law of the United States was promulgated. There are at present 40 banks in the Argentine Republic; 5 of which belong to English companies. The capital of all these banks is \$350,000,000. Mean total assets were estimated at \$137,653,868 gold, and \$460,614,226 paper; liabilities of equal amount.

COMMERCE.

The commerce of the Argentine Republic is with Great Britain, France, Germany, other European countries, the United States and with the Republics of South America.

The principal imports are wearing apparel, textiles, canned goods, and other food substances, iron manufactures, tools, furniture, liquors of all kinds, railway and telegraph materials and machinery, pottery, crockery, glassware, coal, coke, oil, etc., chemical substances and all kinds of toilet and fancy articles, besides coin and bullion.

The exports from the Argentine are wool, tallow, stearin, hides, skins, bones, cattle, sheep, agricultural produce, minerals, etc.

The following statement shows, for several recent years, the exports to the Argentine Republic of leading articles from the United States, the United Kingdom, and France.

Exports of domestic merchandise from the countries specified to the Argentine Republic by principal articles from 1885 to 1889, inclusive.

The money, weights, and measures of the Argentine Republic and the United States equivalents are as follows:

Money.—The silver peso fuerte, or silver dollar, of 100 centesimos, is the monetary unit. Its value in money of the United States is 96.5 cents (January 1891). The forced paper currency since the beginning of 1885 has caused a great depreciation in the value of the paper dollar, which was worth (December, 1889) 43 cents, gold. Other coins are, in gold, the argentine, worth \$4.824, and the $\frac{1}{2}$ argentine; and, in silver, divisions of the peso.

Weights and measures.—The quintal = 101.40 pounds avoirdupois; the arroba of 25 libras = 25.35 pounds avoirdupois; the fanega = 1.547 bushels; the vara of 3 piés = 34.12 + inches; the frasco = 2.51 quarts. Since January 1, 1887 the use of the French metric system has been compulsory.

Bolivia.

Executive Authority.—The executive power is exercised by the President of the Republic, with certain ministers of state who constitute his cabinet. The President is elected for four years by direct and secret ballot of all citizens who can read and write. He can not be reëlected to succeed himself. The first and second Vice Presidents are elected in the same manner, and they, in the absence, illness, or other inability of the President, perform his functions in turn. The annual salary of the President is \$24,000, and that of the first Vice President is \$6,000, and that of the second \$5,000. The cabinet consists of the following five ministers: Of Foreign Relations and Worship (who is usually the chief of the cabinet); of Industry and Finance; of the Interior; of Justice and Public Instruction, and of War. The salary of each minister is \$5,000.

Legislative Authority.—The legislative power is vested in the National Congress, composed of a Senate and a Chamber of Deputies; the former consists of eighteen members, two from each Department, elected by direct vote of the people. The Deputies are elected in the same manner, and number sixty-eight. Both chambers convene annually on the 6th of August in commemoration of the fact that on that day, in the year 1826, the first Congress, called together in Chuquisaca or Sucre, declared the independence of the country, which thereby was separated from Peru and took the name of Bolivia in honor of its liberator, Simon Bolivar. The salaries of Senators and Deputies amount to \$200 per month during the ninety days of the session of the chamber. They receive, besides, their traveling expenses to the capital.

Judicial Authority.—The supreme tribunal or supreme court of justice sits at Sucre, the official capital of the Republic, which is

also the seat of the Tribunal of Accounts (valores). There are also in the Republic 8 judicial districts, and in each a superior court, which sits in each of the department capitals and supervises the judges, attorneys, etc.

AREA AND POPULATION.

The Republic of Bolivia is divided into 9 departments, which are themselves subdivided into 44 provinces and 357 cantons.

According to the most recent data, the area of Bolivia is 784,554 square miles, and its population, according to the last census, is 2,333,350 inhabitants, of whom 1,000,000 are aborigines, or Indians of pure blood; 700,000 half castes, and the other 600,000 of creoles, descendants of Europeans.

Area and population of departments.

Departments.	Area in square miles.	Population.
Sucre or Chuquisaca	72,796	360,680
La Paz	44,552	642,650
Potosi	55,400	300,000
Cochabamba	36,810	450,300
Oruro	25,640	170,000
Santa Cruz	140,180	200,500
Tarija	112,545	140,560
Beni	295,681	68,650
Total	784,554	2,333,350

Internal Organization.—The civil government of the departments is vested in a prefect, who is immediately subject to the executive power. There are subprefects, who reside in the provincial capitals, as the prefect resides in the departmental capitals. The cantons are administered by corregidores and alcaldes.

Population of departmental capitals.

Sucre (capital of the Republic and of the Department of Sucre) ..	30,000	Potosi	26,000
La Paz (present residence of the Government)	80,000	Santa Cruz	14,000
Cochabamba	40,000	Oruro	12,000
		Tarija	10,000
		Trinidad	8,600

Religion.—The Roman Catholic religion is alone recognized by the State, and is the only one which can be publicly practiced, but other religions are tolerated. The government of the Bolivian church is vested in the archbishop of Sucre and the bishops of La Paz, Cochabamba, and Santa Cruz.

Education.—Public instruction is afforded by 460 primary schools, attended by 25,460 children. Secondary instruction is given in 19 colleges, of which 8 are for males, 6 for girls, and 5 are private lyceums. Besides these institutions for secondary instruction there are also 4 seminaries, the number of students being 2,658. Higher instruction is afforded by 4 universities, in which 850 youths study law, medicine, and theology.

Finance.—According to the report of the Minister of Finance, presented to the last Congress, in 1890, the internal debt amounts to \$4,450,000 and the foreign debt to \$622,121. The latter is being greatly reduced.

Army.—The regular army is at present very small, including not more than 2,000 men. There is, however, a large national guard, well organized and disciplined, consisting of not less than 20,000 men, and which can be doubled in case of war.

Resources and Products.—The natural wealth of Bolivia is very great. In the animal kingdom there are in the cold regions the alpaca, whose wool is especially fine and much esteemed in commerce, and the llama, the guanaco, and the vicuña, which are of the same species. The wool of the last named is used for very fine cloth. There are found also the chinchilla, the nutria, and other fur-bearing animals. In the temperate regions there abound the wool-bearing animals, the hairy goat; also cattle, horses, and mules. The African dromedary is acclimated in the south of Bolivia, where it lives and breeds. In the hot regions there are found, besides ordinary cattle, the sloth, the auto (or great beast), a great variety of deer, birds of all kinds, and many kinds of fish in its full-flowing rivers. The vegetable kingdom is also extremely rich and varied, furnishing very fine cabinet, dye, and building woods. The coca, whose medicinal properties the pharmacopœia utilizes as the best local anæsthetic; the coffee of Tungas, which competes with that of Mocha; the cacao, which is claimed to be superior to that of other

countries of South America; vanilla; sugar cane; gum elastic, or caoutchouc, which is found in inexhaustible quantities; corn, wheat, potatoes, sweet potatoes, yucca, plantains, and tubers of all kinds; all the fruits, grains, and vegetables known in temperate and tropical climates. Among medicinal plants there are also found cinchona, jalap, sarsaparilla, matico, tamarind, palma Cristi, copaiba, ipecacuana, gum arabic, camphor, tobacco, balsams, etc. Cotton, of three different natural colors; the cork-tree, which furnishes corks; the wax tree; the cañamo; quillay, or vegetable soap; linseed; agave; hemp, etc.

Gold and silver are found almost throughout the country in great abundance, and the copper is of superior quality. There are also many mines of tin, lead, bismuth, mercury, platinum, iron, zinc, coal, rock crystal or alum, magnetic ore, talc, etc. Of precious stones, there are found emeralds, opals, agate, lapis lazuli, alabaster, berenguela, which is a species of translucent alabaster, jasper, marbles of all kinds and colors, slates, pumice stone, granite, syenite, porphyry, basalt, chalk, saltpeter, borax, common salt, magnesia, etc.

COMMERCE.

The commerce of Bolivia is much more considerable than is usually given in the published statistics, either in Europe or in the United States, where Bolivia cuts but little figure in the commercial transactions. Bolivia has always imported most of its foreign products through the Peruvian port of Arica, and has exported from the same port all of its rich and varied products; consequently no reliable data exist as to the imports and exports of Bolivia through the several channels, whether by the Amazon, by the Plata, by the Peruvian ports, or by the ports now in the possession of Chili. During the war of the Pacific there were exported from the ports of the Argentine Republic, according to data published in Buenos Ayres in 1881, \$15,200,000 worth of unworked silver ore, and that, too, from the southern Departments only. In 1881 the value of that export rose to more than \$17,000,000, and reached to almost \$21,000,000 the following year. These facts suffice by themselves to prove that the insignificant figures set down as the Bolivian commerce are merely conjectural, the statisticians copying one another's

figures without making independent investigation. The foreign commerce of Bolivia may be estimated at more than \$35,000,000 a year, of which \$20,000,000 may be exports. The direct trade between the United States and Bolivia amounts to almost nothing, none of the Bolivian products being imported into the United States—some of them by reason of the cost of transportation, and others because of the high duties which they have to pay.

In Bolivia, on the other hand, they use a great quantity of American dry goods, drillings, hardware, machinery, and kerosene. The trade of Bolivia is principally with England, France, and Germany.

Railways and Telegraph.—Bolivia has telegraphic communication with the Argentine Republic on the south, the line extending from Tupisa to Sucre and Potosi, where it connects with a line to the port of Antofagasta on the Pacific. On the north it is connected with Peru from La Paz. Soon there will be a connection between La Paz and Sucre by way of Oruro, with a branch to Cochabamba. In this way the principal cities of Bolivia will be connected by telegraph, and through Chile and the Argentine Republic there will be connection with the rest of the world. The railway line, which starts at Antofagasta, has nearly reached Oruro, situated in the center of the elevated plateau of Bolivia, more than 400 miles from Antofagasta. A concession has just been made for the extension of a Bolivian line from Arequipa, Mollendo, and Puno as far as La Paz. The line from the Argentine Republic has almost reached the Bolivian frontier.

Money.—The Boliviano or dollar, of 100 centesimos, was struck on the basis of the 5-franc piece; present value (January, 1891), 77.1 cents in United States currency. The gold ounce is nominally equal to 17½ silver pesos.

Weights and Measures.—The libra, 1.014 pounds avoirdupois; the quintal, 101.44 pounds avoirdupois; the arroba, of 25 pounds, 25.36 pounds avoirdupois; the arroba of wine or spirits, 8.044 gallons; the gallon, 0.888 gallon; the vara, 0.927 yard; the square vara, 0.859 square yard.

United States of Brazil.

The Republic of Brazil occupies nearly half of the continent of South America. It is bounded on the north by Guiana, Venezuela, and Colombia; on the northeast, east, and southeast by the Atlantic Ocean, and on the west by Peru, Bolivia, and Paraguay. Its greatest length is about 2,600 miles, and the extent of its coast-line nearly 3,800 miles. Brazil claims the largest number of navigable rivers of any country in the world. Although situated mainly in the torrid zone, the climate is generally agreeable and not unhealthy.

Executive.—The President of Brazil is elected for a term of six years, by electoral colleges in the several States and the Federal District, but he can not be reelected to succeed himself. He appoints the cabinet ministers, and exercises much the same powers as those vested in the President of the United States.

Legislative.—The Legislature of the Republic consists of a Senate and a House of Representatives. The House of Representatives consists of members elected by the people of the States and of the Federal District in the proportion of one for each 70,000 of the population. The representatives serve during 3 years. The Senate consists of 3 senators from each State, elected by the legislature of the State, and 3 from the Federal District, elected by an electoral college elected by the people. The senators serve for 9 years, one-third going out every 3 years.

Judicial.—The judiciary consists of a Federal supreme court and of such subordinate tribunals as the Legislature may provide. The supreme court consists of 15 members, appointed by the President. There are also municipal magistrates and justices of the peace, elective officers, whose chief function is the settlement of disputes by arbitration.

AREA AND POPULATION.

The area of Brazil is estimated to be 3,209,878 English square miles, divided into a Federal District and twenty States. The census of 1872 gave the population at 9,930,478—males, 5,123,869; females, 4,806,609. This census, only a partial one, was not considered reliable.

The following table, based on an official estimate, gives the population and area of each State in 1888, and shows the present arrangement of the country's subdivision into States under the new constitution:

States.	Area in English square miles.	Population, 1888.	Density per square mile, 1888.
Federal District.....	588	406,958	756.000
Amazonas.....	732,460	80,654	0.110

Brazil was the last country in America to abolish slavery. The official return of 1887 gave the number of slaves as 723,419, of the value of 485,325,212 milreis. On May 13, 1888, slavery was abolished by law, without compensation to the slave owners. The Indian population is estimated to be about 600,000, and this element prepon-

derates in the northern States. In the seaports the population is chiefly of European descent. In four of the States the negroes are numerous.

It is estimated that 500,000 immigrants entered the ports of Rio and Santos in the 17 years from 1871 to 1888. The subjoined table gives the immigration for 8 years into the southern ports of Brazil alone :

Immigration.

1882.....	27, 197	1886.....	25, 741
1883.....	28, 670	1887.....	54, 990
1884.....	20, 087	1888.....	48, 495
1885.....	30, 135	1889.....	65, 161

BRAZILIAN BUILDING AT PARIS EXPOSITION.

Of the immigration in 1889, more than 50 per cent. (or 34,920) was Italian and about 27 per cent. Portuguese.

Below is found a list of the principal cities, with the population of each.

Cities of 5,000 inhabitants and over.

Religion.—Roman Catholicism was the established religion under the Empire, and although the Church politically had a large following, the religious feeling in the cities was not very deep. The better educated only yielded a discreet assent to the forms and observances of the Church. Under the new constitution there is a complete separation of church and state. A citizen who is in anyway bound by religious vows is ineligible to office. Monastic institutions and similar orders are forbidden. Absolute equality is decreed for all forms of religious worship. The Government, by a decree, continues to provide for the maintenance of the existing functionaries of the Catholic Church and for 1 year to support the chairs in the seminaries. Ecclesiastically Brazil constitutes a province with a metropolitan archbishop, whose seat is at Bahia, 11 suffragan bishops, 12 vicars-general, and 2,000 curates. There are 11 seminaries for the private instruction of the clergy.

Education.—Public education has been divided into primary, secondary or preparatory, and scientific or higher education. The latter is controlled by the General Government, which maintains 2 schools each of law and medicine, a school of mines, a polytechnic, a military, and a naval school. It is provided in the new constitution that all public education shall be secular. A national college at Rio, with 20 classes, has (1889) 600 pupils. In most of the chief towns of the States there is a middle class and a normal school. By the new constitution primary education is gratuitous; it is under the charge of the General Government in the capital; in the several States their respective Governments control it, and in them it is in some instances compulsory. An official announcement in 1889 gives the number of public and private schools as 7,500, with a total attendance of 300,000 pupils; 1,902,455 of the total population of 1881 were of the school age (between 6 and 15). The return gives the number of illiterates at 8,365,997, or 84 per cent. of the population.

FINANCE.

The subjoined table shows the actual revenue and expenditures from 1883 to 1889 in milreis, that of 1886-'87 being for 18 months. Since 1887 the fiscal year corresponds with the calendar year:

Revenue and Expenditures.

Fiscal year.	Revenue.	Expenditures.
	<i>Milreis.</i>	<i>Milreis.</i>
1883-'84.....	130,444,000	154,257,000

The total public debt of Brazil in December, 1889, according to an official statement, was 1,072,062,138 milreis, equal to \$585,345,927. The foreign loans of Brazil, as officially given in December, 1889, were about \$148,036,500, the redemption of which is to be accomplished by a sinking fund of 1 per cent. The internal debt is chiefly represented by *apolices* or bonds bearing 5 per cent. interest.

Army and Navy.—Under the constitution the army and navy, in its organization and distribution, is subject to congressional control. Service in the army, drawn by lot, is obligatory, and there is no exemption from military service by purchase. Under the Empire the duration of service was 6 years in the active army and 3 years in the reserve. In 1888 there were 2 battalions of engineers, 4 regiments of artillery, and 4 battalions. The infantry consisted of 27 battalions of 4 companies. The army on a peace and war footing numbered respectively 15,689 and 29,617 men in 1889. There was a reorganization thereof in February, 1890. The navy in 1889 was composed of 5 first-class, 6 second-class, and 3 third-class torpedo-boats, 4 seagoing and 6 coast-defense armor clads, and a torpedo school ship. The vessels of the unprotected class include 5 cruisers, 2 corvettes, 17 gunboats, 2 transports, and a number of auxiliary and other vessels. The navy is manned by 5,790 officers and men, including the marines. There are 5 naval arsenals.

Resources and Products.—Naturally an agricultural country, only

a small part of its soil has been brought under culture. Coffee and sugar are in the order named the chief products of the country. Both its forests and mines are of great value, but scarcely anything has been done to bring them into use. It is known that iron abounds, yet lack of coal in the vicinity prevents the working of the mines in the interior on a large scale. In 1888 the cotton mills numbered 90 and the number was increasing. There are about 17 million head of cattle. The coffee is cultivated principally in three provinces, and the value of this product therein in 1887 was in round numbers \$65,000,000.

GATHERING RUBBER.

Railways and Telegraphs.—In 1889 the railways, 84 in number, were of a total length of 5,582 English miles; 984 miles were in process of construction and about 5,000 miles projected. Fourteen of these lines belong to the State directly and 49 in all are more or less sustained by its guaranty. These railways are mostly of a single track, and about 75 per cent. of the 1-meter gauge. The telegraph

system was organized and constructed by the Government and is under its control. In 1889 there were about 11,500,000 miles of wire, and the total length of the lines was about 6,700 miles. The telegraph stations numbered 173.

There were in 1887-'88 2,019 post-offices; the business of the offices amounted in 1888 to 14,875,522 letters and about 16,000,000 newspapers.

Banking.—Nineteen banks in 1888 transacted nearly the whole banking business of the country. Their paid-up capital amounted to about 101,000,000 milreis, with a reserve of 19,500,000; the deposits were in round numbers 132,000,000. In 1889 the savings bank of the country held 22,851,000 milreis. The circulation in Brazil is almost entirely paper money, amounting in 1889 to about 200,000,000 milreis, 185,000,000 of which were treasury notes.

COMMERCE.

The commerce of Brazil is principally with Great Britain, United States, France, and Germany. The principal articles of import in the order of their value are cotton goods, wines and spirits, preserved meats and fish, woollen goods, farinaceous food, iron and steel, coal and manufactures of hides and leather. The exports of the country are coffee, India rubber, sugar, raw cotton, hides, and tobacco. In 1886-'87 the exports of coffee from the port of Rio alone were 413,756,000 pounds, valued at 106,274,358 milreis.

The following figures give the imports and exports for five years in milreis.

[The value of the milreis in the money of the United States is 54 cents.]

	Imports.	Exports.
	<i>Milreis.</i>	<i>Milreis.</i>
1883-'84.....	202,531,000	217,072,000
1884-'85.....	178,431,000	226,269,600
1885-'86.....	197,501,500	194,961,620
1886-'87 (18 months).....	310,850,000	365,592,000
1888.....	260,999,000	212,592,000

The average value of the interstate trade was for four years last past 130,000,000 milreis. The commercial intercourse of Brazil with the United States is shown in the subjoined tables from 1886

to 1890, the figures being derived from the statistics of the United States, for merchandise only.

	1886.	1887.	1888.	1889.	1890.

TRADE BETWEEN THE UNITED STATES AND BRAZIL.

The trade of Brazil is valuable. It stands next to the United States in population, having between fourteen and fifteen millions of people, and its geographical area is greater than that of the United States, without including Alaska. The total foreign trade of Brazil amounts to about \$240,000,000, being very nearly divided between exports and imports. Of the export trade the United States has altogether the largest share, taking very nearly one-half of the total in the form of coffee, sugar, hides, and rubber, while the remainder is divided between England, Germany, and other European countries.

Of the import trade England enjoys about one-half, while the rest is divided between France, Germany, and Spain, with only a few millions of merchandise purchased in the United States. England buys annually from Brazil about 5 millions, and sells her 47 millions in merchandise. France buys about 13 millions annually and sells her about 17 millions. Germany buys about 10 millions annually and sells her about 8 millions, while the United States buys from 58 to 60 millions worth of her raw materials annually, and sells her only about \$8,000,000 worth of our products.

The great reason for the present condition of our trade with Brazil is the lack of transportation facilities. Trade follows means of communication. There are five steamship lines making regular voyages and a large number of tramp steamers making irregular voyages from Brazil to the United States, bringing coffee, sugar, rubber, and hides; while there is only one line of steamers, and that sending a ship only twice a month, from the United States to Brazil. The exports from Brazil to the United States during the fiscal year 1888-'89 were brought in 71 American vessels and 497 foreign vessels. Our exports to Brazil were sent in 75 American vessels of 63,000 tons, and 151 foreign vessels, mostly sailing ships, of 83,000 tons. Most of the latter were small sailing craft and were partially loaded. Of our imports from Brazil, 43 millions were brought in foreign vessels and 10 millions in American vessels, while nearly nine-tenths of our exports to Brazil were carried on American vessels.

With the establishment of adequate means of communication, and a reciprocity treaty under which our peculiar products are to be admitted free of duty to Brazil, our trade with that country is expected to increase. Our exports to Brazil now consist chiefly of breadstuffs to the value of \$3,000,000; provisions to the value of \$500,000; cotton goods to the value of \$700,000; iron and steel to the value of \$700,000; petroleum to the value of \$800,000; and lumber and furniture to the value of \$400,000.

Statement showing the quantities and values of articles of domestic product and manufacture exported from the United States to Brazil during the years ending June 30, 1889, and 1890.

IMPORTS OF COFFEE FROM BRAZIL.

The following statement shows the quantity and the value of coffee imported into the United States from Brazil during the several years ending June 30, 1873, to June 30, 1890, and the amount that would have been paid in the way of duty had not the tariff on coffee been repealed by the act of May 1, 1872:

Years ending June 30--	Quantities.	Values.	Estimated duty if rate had contin- ued 3 cents per pound.

Average per year		34,719,922	8,841,950

Table of exports of coffee from Brazil to the countries named for 1888 (or 1889), and export duties collected thereon.

[The milreis is estimated at 44 cents, United States currency.]

Countries.	Coffee.*	Duties collected.
	<i>Dollars.</i>	<i>Dollars.</i>
United States	38,588,770	2,701,214
Great Britain	2,334,522	163,416
France	4,385,587	306,996
Germany	6,755,103	472,857
Belgium	1,616,962	113,187
Spain	42,882	3,001
Italy	530,158	37,110
Portugal	200,223	14,014

* The export duty is 7 per cent.

NOTE.—It will be observed that the amount of coffee here shown according to Brazilian statistics as exported to the United States does not agree with the amount shown in the United States statistics as imported from Brazil, the former showing some 22,000,000 pounds more than the latter. The discrepancy may be partially explained by losses at sea, change of destination, shrinkage in weight, and under-invoicing. The average valuation for customs purposes in Brazil was about 14 cents per pound, while the average value of the imported coffee according to United States statistics was about 13.9 cents per pound.

Money.—The milreis of 1,000 reis, par value 54.6 cents in United States money, is the monetary unit. The gold coins are 5, 10, and 20 milreis; the silver coins $\frac{1}{2}$, 1, and 2 milreis. The actual value of the milreis (1891) is 54.6 cents United States currency.

The English sovereign is a legal tender and was worth 8.7 milreis in 1888. Gold and silver coins have almost disappeared. The only circulating medium of recent years has been an inconvertible paper currency, consisting of treasury notes of depreciated value, together with nickel and bronze coins. In 1888 an act was passed with the avowed object of restricting the issue of paper money and restoring the credit of the country, and a decree published September 6, 1889, provides for the withdrawal of the Government notes by the end of 1894.

Weights and Measures.—The French metric system, which became compulsory in 1872, was adopted in 1862, and has been used since in all official departments. But the old weights and measures are still partly employed. They are: The libra = 1.012 pounds avoirdupois; the arroba = 32.38 pounds avoirdupois; the quintal = 129.54 pounds avoirdupois; the alqueire (of Rio) = 1.0315 bushels; the oitava = 55.34 grains; the vara = 43.307 inches.

CONSTITUTION OF THE UNITED STATES OF BRAZIL.

[Translation.]

ACTS OF THE EXECUTIVE POWER.

Decree No. 510, of June 22, 1890, making public the Constitution of the United States of Brazil.

The Provisional Government of the the Republic of the United States of Brazil, constituted by the army and navy, in the name and with the consent of the nation,

Considering the extreme urgency of hastening the definitive organization of the Republic, and of delivering into the hands of the nation as early as possible the government of itself, has resolved to form upon the broadest bases, in accordance with the lessons of experience, with the needs and principles which inspired the revolution of the 15th of November, the source of all our present public rights, the Constitution of the United States of Brazil, which is hereby made public, with the view of submitting the same to the representatives of the country soon to be assembled ; going at once into force, as far as regards the particulars below mentioned.

And, in consequence,

DECREES :

ARTICLE 1. The first National Congress of the representatives of the Brazilian people is convoked to meet on the 15th of November of the present year, and the elections for their choice will be held on the 15th of September next.

ART. 2. Said Congress shall meet, having especial powers from the electors, to pronounce upon the constitution which is published in this act, and this shall be the first subject of their deliberations.

ART. 3. The Constitution herewith published shall go at once into force only as far as regards the duality of the houses of Congress, their composition, their election, and functions which they are called to exercise of approving the said Constitution and proceeding afterwards in conformity with its requirements.

And to this end,

The Provisional Government assumes at once the obligation of

carrying out and having carried out, in these respects, the said Constitution, which is of the following tenor :

CONSTITUTION OF THE UNITED STATES OF BRAZIL.

Chapter I.—The Federal Organization.

ARTICLE 1. The Brazilian nation, adopting as a form of government the Federal Republic proclaimed by decree No. 1, of November 15, 1889, constitutes itself, by the perpetual and indissoluble union of its former provinces, the United States of Brazil.

ART. 2. Each of the former provinces shall constitute a State, and the former municipal district shall form the Federal District, continuing to be the capital of the Union until the Congress shall otherwise determine.

Paragraph. If the Congress shall decide to change the capital, as soon as the locality for the purpose shall be selected, with the consent of the State or States from whose territory the site shall be taken, the present Federal District shall constitute a State of itself.

ART. 3. The States shall have the right to incorporate themselves one with another, subdivide themselves, dismember themselves to join with others or form new States, with the consent of the respective local legislatures in two successive years, and the approval of the National Congress.

ART. 4. Each State shall, at its own expense, provide for the needs of its own government and administration, and the Union shall have the right to aid it only in cases of great public calamity.

ART. 5. The Federal Government shall not interfere in matters pertaining peculiarly to the States, *save* :

1. To repel foreign invasion, or the invasion of one State by another.
2. To maintain the federative republican form of government.
3. To reëstablish order and tranquillity in the States at the request of the local authorities.
4. To assure the execution of the laws of the Congress or obedience to the Federal decrees.

NOTE.—This was submitted to the Constitutional Convention and has been modified.

ART. 6. It is the exclusive prerogative of the Union to decree :

1. Duties on imports from foreign countries.
2. Duties of entry, departure, and stay, of vessels ; the coasting trade for national articles being free of duties ; as well as for foreign merchandise that has already paid an import duty.
3. Stamp duties.
4. Postal and telegraphic contributions.
5. The establishment and maintenance of custom-houses.
6. The creation of banks of emission.

Paragraph. The laws, acts and decrees of the authorities of the Union shall be executed, throughout the whole country, by Federal officials.

ART. 7. The Federal Government is forbidden to make distinctions and preferences in favor of the ports of any of the States against those of others, by means of commercial or fiscal regulations.

ART. 8. The States alone are competent to decree taxes :

1. On the exportation of merchandise not belonging to other States ;
2. On landed property ;
3. On the transmission of property ;

§ 1. The products of the other States are exempt from imposts in the State whence they are exported.

§ 2. From 1895 and thenceforth all duties on exports shall cease.

§ 3. It is lawful for a State to levy duties on imports of foreign goods only when intended for consumption in its own territory ; and it shall, in such case, cover into the Federal Treasury the amount of duties collected.

ART. 9. The States are forbidden to tax in any way, or embarrass with any difficulty or burden of regulation or administration, the acts, institutions or service established by the Government of the Union.

ART. 10. It is forbidden to the States, as well as to the Union—

1. To impose duties on the products of the other States, or of foreign countries, in transit through the territory of any State, or from one State to another, as also on the vehicles, whether by land or water, by which they are transported;

2. To establish, aid, or embarrass the exercise of religious worship ;

3. To enact *ex post facto* laws.

ART. 11. In matters which concern concurrently the Government of the Union and those of the States, the exercise of the authority of the former shall act as a bar to action by the latter and annul, then and thenceforth, the laws and requirements emanating from such action.

ART. 12. In addition to the sources of revenue set forth in articles 7 and 8, it shall be lawful for the Union, as well as for the States, cumulatively or otherwise, to create any others whatsoever which may not be in contravention of the terms of articles 7, 9, and 10, section 1.

ART. 13. The right of the Union and of the States to legislate in regard to railways and navigation of internal waters shall be regulated by law of the national Congress.

ART. 14. The land and naval forces are permanent national institutions, intended for the defense of the country from foreign attack and the maintenance of the laws of the land. Within the limits of the law, the armed forces are from their nature held to obedience, each rank to its superior, and bound to support all constitutional institutions.

ART. 15. The legislative, executive, and judicial powers are organs of the national sovereignty, harmonious and independent among themselves.

SECTION I.—THE LEGISLATIVE POWER.

Chapter I.—General provisions.

ART. 16. The legislative power is vested in the national Congress, subject to the approval of the President of the Republic.

§ 1. The national congress is composed of two branches: the Chamber and the Senate.

§ 2. The elections for senators and for deputies to the chamber shall be held simultaneously throughout the country.

§ 3. No person shall be senator and deputy at the same time.

ART. 17. The Congress shall assemble in the federal capital on the

3d day of May of each year, without being convoked, and shall continue in session four (4) months from the date of the opening, and may be prorogued or convoked in extraordinary session.

§ 1. Each legislature shall continue for three years.

§ 2. In case of vacancy made known in the Congress, the authorities of the respective State shall immediately order a new election.

ART. 18. The Chamber and the Senate shall hold their sessions apart and in public, unless otherwise resolved by a majority vote of those present, and shall deliberate only when, in each of the chambers, there shall appear an absolute majority of its members.

§ 1. The rules of the two chambers shall determine the means of compelling the attendance of absent members.

§ 2. Each of them shall verify and confirm the powers of its members.

ART. 19. Each of the chambers shall choose its presiding officer, organize its own government, establish penalties for violation of its rules, including that of temporary exclusion, for its respective members, select its clerks, and provide for its own police service.

ART. 20. The deputies and senators can not be held to account for their opinions, expressions, and votes in the discharge of their mandate.

ART. 21. The deputies and senators can not be arrested or prosecuted criminally, without previous permission of the respective chamber, save in the case of *flagrante delicto*. In this latter case, the prosecution having been carried to final decision, the prosecuting authority shall send to the respective chamber the court records in the case, for decision in respect to execution, unless the accused shall choose immediate judgment.

ART. 22. The members of the two chambers, on taking their seats, shall take a formal obligation, in public session, to perform their duties faithfully.

ART. 23. During the sessions the senators and deputies shall be entitled, besides their expense account, to a pecuniary emolument, fixed at the close of each legislature, for the succeeding one.

ART. 24. Members of the Congress shall not receive from the executive power any salaried office or commission, except diplomatic

missions, military commissions, or offices of legal attainment or promotion.

Paragraph. While in the exercise of the legislative functions every other shall cease.

ART. 25. The following are the conditions of eligibility for election to the national Congress:

1. The legal right to be an elector.
2. For the chamber, the candidate must have been a Brazilian citizen for more than seven years; and for the Senate, more than nine years.

ART. 26. The following persons are ineligible to the national Congress:

1. Members of religious orders, regular or lay, of whatever confession;
2. The governors of States;
3. Chiefs of police;
4. Military commanders, as well as other military officials, who exercise equivalent or superior commands of land or naval forces;
5. Commandants of bodies of police;
6. Magistrates, unless they shall have ceased the exercise of their office for more than one year;
7. Administrative functionaries who may be dismissed without sentence of justice.

Chapter II.—The chamber.

ART. 27. The chamber is composed of the deputies of the Federal District and of the States, in the proportion (which can not be diminished) of one for every seventy thousand inhabitants, and these deputies are elected by direct suffrage.

Paragraph.—For this end the Federal Government, within three years from the meeting of the first Congress, shall have taken a census of the population of the Republic, and thereafter every ten years.

ART. 28. All legislation touching the levying of duties, the disposition (raising and fixing the number) of the land and naval forces, the discussion of recommendations by the executive power, and the

decision to proceed or not in the impeachment of the President of the Republic, referred to in Art. 51, must begin in the chamber.

Chapter III.—The senate.

ART. 29. The senate is composed of citizens eligible under the terms of Art. 24, chosen by the legislatures of the States, to the number of three senators for each State, by a plurality of votes.

Paragraph.—The senators for the Federal District shall be chosen in the manner prescribed for the election of the President of the Republic.

ART. 30. The term of the senators shall be for nine years, one-third of the senate being renewed every three years.

§ 1. In the first year of the first legislature, in its preliminary labors, the Senate shall designate the first and second thirds of its members, whose term shall cease at the end of the first and second triennium.

§ 2. This division shall be made in three lists, corresponding to the three thirds, graduating the senators of each State and of the Federal District according to the respective number of votes received, so that the one first in the voting in the Federal District and in each State, shall be placed in the list for the last triennium and the others in the lists of the other triennia, according to the comparative number of votes obtained by them.

§ 3. In case of parity of votes received, the preference shall be given to the elder, and if the ages be equal the choice shall be made by lot.

§ 4. The term of a senator elected in place of another shall continue during the remainder of the term of the senator replaced.

ART. 31. The Vice President of the Republic shall be *ipso facto* the president of the Senate, where he shall vote only in case of tie, and shall be replaced, in case of absence or impediment, by the vice president of that body.

ART. 32. The Senate alone has the power to try and sentence the President of the Republic and the other federal officers designated

by the constitution, under the conditions and in the manner which it prescribes.

- § 1. The Senate, when sitting as a tribunal of justice, shall be presided over by the president of the Federal Supreme Court.
- § 2. It shall not pass sentence of condemnation unless two-thirds of its members be present.
- § 3. It shall not impose other penalties than the loss of office and prohibition from holding any other, without prejudice to the action of ordinary justice against the condemned.

Chapter IV.—Powers of the Congress.

ART. 33. The national Congress shall have exclusive power:

- 1. To estimate the revenue and fix the expenditures of the Federal Government annually.
- 2. To authorize the executive to contract loans and make other operations of credit.
- 3. To legislate in regard to the public debt and furnish means for its payment.
- 4. To control the collection and disposition of the national revenue.
- 5. To regulate international commerce, as well as that of the States with each other and with the Federal District; to establish and regulate the collection of customs duties in the ports, create or abolish warehouses of deposit.
- 6. To legislate in regard to navigation of rivers running through more than one State or through foreign territory.
- 7. To determine the weight, value, inscription, type, and denomination of the currency.
- 8. To create banks of emission, legislate in regard to this emission and its distribution.
- 9. To fix the standard of weights and measures.
- 10. To determine definitely the boundaries between the States, those of the Federal District, and those of the national territory with the adjoining nations.

11. To order the impeachment of the president of the Republic in the cases mentioned in Art. 52.
12. To authorize the Government to declare war and to make peace.
13. To decide definitively in regard to treaties and conventions with foreign nations.
14. To designate the capital of the Union.
15. To extend aid to the States in the case referred to in Art. 4.
16. To legislate in regard to postal and telegraph service.
17. To adopt the necessary measures for the protection of the frontiers.
18. To fix every year the number of the land and naval forces.
19. To regulate the organization of the Army.
20. To grant or refuse to foreign forces passage through the territory of the country to carry on military operations.
21. To mobilize and make use of the police force of the States in the cases designated by the constitution.
22. To declare a state of siege at one or more points in the national territory, in the emergency of an attack by foreign forces, or internal disturbance, and to approve or suspend the proclamations of the executive power or its responsible agents when made in the absence of the Congress.
23. To establish the conditions and methods of elections for federal offices throughout the country.
24. To codify the civil, criminal, and commercial laws and legal procedures of the Republic.
25. To fix the salaries of the cabinet ministers.
26. To create and abolish federal public offices, to fix the duties of the same, and designate their salaries.
27. To establish tribunals subordinate to the Federal Supreme court.
28. To make laws against piracy and encroachments on the rights of the people.
29. To grant amnesty.
30. To commute and pardon penalties imposed upon federal officers for offenses arising from their responsibility.

31. To make laws regarding Government lands and mines.
 32. To enact laws especially for the federal district.
 33. To govern by special legislation those points of the territory of the Republic needed for the establishment of arsenals or other establishments or institutions for federal uses.
 34. To legislate in regard to higher instruction in the Federal District.
 35. To settle cases of extradition between the States.
 36. To keep guard over the Constitution and the laws, and provide for the needs of a federal character.
 37. To enact such laws and resolutions as may be necessary for the exercise of the powers vested by the Constitution in the General Government.
 38. To enact the organic laws necessary for the complete execution of the requirements of the Constitution.
- ART. 34. It belongs likewise to the Congress, but not exclusively,
1. To stimulate in the country the progress of public education, agriculture, manufactures, and immigration.
 2. To create institutions of higher instruction and of high school education in the States.
 3. To provide for primary and high school instruction in the Federal District.

Paragraph. All other expenses of a local nature in the capital of the Republic shall be provided for exclusively by the municipal authorities.

Chapter I.—Laws and resolutions.

ART. 35. Save the exceptions named in Article 27, all bills may originate, indifferently, in the Chamber or in the Senate, and may be introduced by any of their members, or be proposed in a message of the executive power.

ART. 36. A bill, after being passed in one of the chambers, shall be submitted to the other, and if the latter shall approve the same, it shall send it to the Executive, who, if he approve it, shall sanction and promulgate it.

- § 1. If, however, the President of the Republic shall consider it unconstitutional, or contrary to the good of the nation, he shall affix to it his veto, within ten working days, counted from that on which he received it (the bill), and shall return it, within the same period, to the chamber in which it originated, with his reasons for the veto.
- § 2. The failure of the Executive to signify his disapproval within the above-named ten days shall be considered as an approval, save when the said period shall expire after the close of the Congress.
- § 3. The bill sent back to the chamber where it originated shall be discussed and voted upon by call of names, and shall be considered as passed if it obtain two-thirds of the votes of the members present ; and, in this case, it shall be sent to the other chamber, whence, if it receive the same majority, it shall return, as a law, to the Executive to be formally promulgated.
- § 4. The sanction and promulgation are effected in the following forms :
1. (a) "The national Congress enacts and I sanction the following law (or resolution)."
 2. (a) "The national Congress enacts and I promulgate the following law (or resolution)."

ART. 37. A bill from one chamber, amended in the other, shall return to the former, which, if it accept the amendments, shall send it, changed to conform with the same, to the Executive.

- § 1. In the contrary case, it shall go back to the amending chamber, where the alterations shall not be considered as approved, unless they receive the vote of two-thirds of the members present ; in the latter case, the bill shall return to the chamber where it originated, and there the amendments can be rejected only by a two-thirds vote.
- § 2. If the alterations be rejected by such vote, the bill shall be submitted without them to the approval of the Executive.

ART. 38. Bills finally rejected or not approved shall not be presented again in the same legislative session.

SECTION II.—THE EXECUTIVE POWER.

Chapter I.—The President and Vice President.

ART. 39. The executive power is exercised by the President of the United States of Brazil, as elective and supreme chief of the nation.

§ 1. The Vice President, elected simultaneously with the President, shall serve in place of the latter in case of impediment, and succeed him in case of vacancy in the Presidency.

§ 2. In case of impediment or vacancy in the Vice Presidency, the following officers, in the order named, shall be called to the Presidency: The Vice President of the Senate, the president of the chamber of deputies, the president of the Federal Supreme Court.

§ 3. The following are the conditions of eligibility to the Presidency or Vice Presidency of the Republic:

1. (a) Must be a native of Brazil;
2. (b) Must be in the exercise of political rights;
3. (c) Must be more than thirty-five years of age.

ART. 40. The President shall hold his office during six years, and is not eligible for reelection for the next succeeding term.

§ 1. The Vice President, who shall fill the Presidency during the last three years of the Presidential term, shall not be eligible to the Presidency for the next term of that office.

§ 2. On the same day on which his Presidential term shall cease, the President shall, without fail, cease to exercise the functions of his office, and the newly-elected President shall at once succeed him.

§ 3. If the latter should be hindered or should fail to do so, the succession shall be effected in accordance with sections 1 and 2 of the preceding article.

§ 4. The first Presidential term shall expire on the 15th of November, 1896.

ART. 41. On taking possession of his office, the President, in

public session of the Federal Supreme Court, shall make the following affirmation :

"I promise to maintain the Federal Constitution and comply with its provisions with perfect loyalty, to promote the general welfare of the Republic, to observe the laws and support the union, integrity, and independence of the nation."

ART. 42. The President and Vice President shall not leave the national territory without the permission of the Congress, under penalty of loss of office.

ART. 43. The President and Vice-President shall receive the salary fixed by the Congress in the preceding Presidential term.

Chapter II.—Election of President and Vice President.

ART. 44. The President and Vice President shall be chosen by the people, by indirect election, for which purpose each State and the Federal District shall constitute an electoral district, with special electors, whose number shall be double that of its respective representation in the Congress.

§ 1. With the exception of those enumerated in article 26, citizens can not be special electors, who hold salaried offices of a legislative, judicial, administrative, or military character, either under the Federal Government or that of the States.

§ 2. The election for these offices (Presidential electorate) shall be held on the first day of March of the last year of the Presidential term.

ART. 45. On the first day of May following, the election for President and Vice President shall be held throughout the Republic.

§ 1. The electors of each State and of the Federal District shall form a college, and shall assemble in the place which the respective Government shall appoint, giving timely notice of same.

§ 2. Each elector shall vote in two ballot boxes, for two different tickets, the one for President and the other for Vice President, in the persons of two citizens, one of whom at least shall be a citizen of another State.

- § 3. Of the votes properly counted there shall be made two distinct records, of which three authentic copies shall be prepared, showing the names of the citizens voted for and the respective number of votes received by them.
- § 4. Of these six authentic copies, whose tenor shall at once be made public through the press, two (one of each record) shall be sent to the governor of the State, to be deposited in the archives of said State, and, for the same purpose, to the president of the municipality in the Federal District; two to the president of the Federal Senate, and the remaining two to the national archives, all to be closed and sealed.
- § 5. The two chambers having assembled in joint session, with the president of the Senate as presiding officer, the two records shall be opened by him in the presence of the two chambers, and he shall proclaim as President and Vice President of the United States of Brazil the two citizens who, in each of said records, shall have received the absolute majority of the votes counted.
- § 6. If no person shall have received such majority, the Congress shall choose the President or Vice President by an absolute majority, voting by call of names, from among the three in each record who shall have received the highest number of votes.
- § 7. For this election each State and the Federal District shall cast one vote; and this vote shall belong to the one of the three candidates who, in the respective representation in the Congress, shall have the relative majority of the votes of said representation.
- § 8. For this purpose, the representatives of each State and of the Federal District shall vote by separate groups.

ART. 46. The joint session of the two houses shall not be considered as constituted for the purpose of verifying the election of President and Vice President of the Republic unless there be present two-thirds, at least, of their members.

- § 1. The process prescribed to this end shall begin and end in the same session.

- § 2. After the roll-call of the members in that session shall be concluded, the members present shall not be permitted to withdraw from the house, and suitable means shall be adopted to carry out this provision.
- § 3. None of the members present shall abstain from voting.

Chapter III.—The powers of the executive.

ART. 47. To the President of the Republic belongs the exclusive right to—

- 1. Sanction, promulgate, and make public the laws and resolutions of the Congress; issue decrees, instructions, and regulations for their faithful execution.
- 2. Choose and dismiss at will the cabinet officers.
- 3. Exercise supreme command over the land and naval forces of the United States of Brazil, as well as over the local police, when called to arms for the internal or external defense of the Union.
- 4. Govern and distribute, under the laws of the Congress, according to the necessities of the National Government, the land and naval forces.
- 5. Dispose of the offices, both military and civil, of a federal character, with the exceptions specified in the constitution.
- 6. Pardon crimes and commute penalties for offenses subject to federal jurisdiction, save in the cases mentioned in Art. 32, No. 30, and Art. 50, § 2.
- 7. Declare war and make peace, under the provisions of Art. 32, No. 12.
- 8. Declare war at once, in case of foreign invasion or aggression.
- 9. Give an annual statement to the national Congress of the condition of the country, with a recommendation of pressing provisions and reforms, through a message, which he shall send to the secretary of the Senate, on the day of the opening of the legislative session.
- 10. Convoke the Congress in extra session and prorogue its regular sessions.

11. Appoint the federal judges.
12. Appoint the members of the Federal Supreme Court and ministers of the diplomatic corps, with the approval of the Senate; and, in the absence of the Congress, appoint them in commission until considered by the Senate.
13. Appoint the other members of the diplomatic corps and consular agents.
14. Maintain relations with foreign States.
15. Declare, directly, or through his responsible agents, a state of siege at any point of the national territory, in case of foreign aggression or serious internal disturbance (Arts. 77 and 32, No. 22).
16. Set on foot international negotiations, celebrate agreements, conventions, and treaties, always *ad referendum* to the Congress, and approve those made by the States in conformity with Art. 64, submitting them when necessary to the authority of the Congress.

Chapter IV.—Cabinet ministers.

ART. 48. The President of the Republic is assisted by the ministers of State (cabinet officers), agents of his confidence, who sign the acts and preside over their respective departments into which the federal administration is divided.

ART. 49. The cabinet ministers shall not exercise any other employment or function of a public nature, nor be eligible to the Presidency or Vice Presidency of the Union.

Paragraph. Any deputy or senator, who shall accept the position of cabinet minister, shall lose his seat in the respective chamber, and a new election shall at once be held, in which he shall not be voted for.

ART. 50. The cabinet ministers shall not appear at the sessions of the Congress, and shall communicate with that body only in writing or by personal conference with the committees of the chambers.

The annual reports of the ministers shall be addressed to the President of the Republic, and by him communicated to the Congress.

ART. 51. The cabinet ministers are not responsible to the Congress or to the courts for advice given to the President of the Republic,

except when such advice implies complicity with him in offenses for which they (or he) are responsible under the provisions of the penal laws.

§ 1. They are responsible, nevertheless, with respect to their acts, for crimes defined in the criminal law.

§ 2. For offenses for which they are responsible they shall be prosecuted and tried by the Federal Supreme Court, and for those committed jointly with the President of the Republic, by the authority competent to judge this latter.

Chapter V.—The responsibility of the President.

ART. 52. The President of the United States of Brazil shall be brought to trial and judgment, after the chamber of deputies shall have decided that he should be tried on the charges made against him, in the Federal Supreme Court, in the case of common crimes, and in those of responsibility, in the Senate.

ART. 53. Crimes of responsibility on the part of the President of the Republic are such as are directed against—

1. The political existence of the Union.
2. The constitution and the form of the Federal Government.
3. The free exercise of the political powers.
4. The legal enjoyment and exercise of political or individual rights.
5. The internal security of the country.
6. The purity of the administration.
7. The constitutional keeping and use of the public funds.

§ 1. These offenses shall be defined in a special law.

§ 2. Another law shall provide for the charges, the trial, and the judgment.

§ 3. Both these laws shall be enacted in the first session of the first Congress.

SECTION III.—THE JUDICIARY.

ART. 54. The judicial power of the Union shall be lodged in a Federal Supreme Court, sitting in the capital of the Republic, and as many inferior federal courts and tribunals, distributed through the country, as the Congress shall create.

ART. 55. The Federal Supreme Court shall be composed of fifteen justices, appointed under the provisions of Art. 47, No. 11, from among the oldest thirty federal judges and citizens of well-known knowledge and reputation who may be eligible to the Senate.

ART. 56. The federal justices shall hold office for life, being removable solely by judicial sentence.

§ 1. Their salaries shall be fixed by law of the Congress, which shall not have the power to diminish the same.

§ 2. The Senate shall try the members of the Federal Supreme Court, and this latter the lower federal judges.

ART. 57. The federal courts shall choose their presidents from among their own members, and shall organize their respective clerical corps.

§ 1. In these corps the appointment and dismissal of the respective clerks, as well as the filling of the judicial offices in the respective judicial districts, belong to the presidents of the respective courts.

§ 2. The President of the Republic shall appoint from among the members of the Federal Supreme Court, the attorney-general of the Republic, whose duties shall be defined by law.

ART. 58. To the Federal Supreme Court belongs the duty of :

1. Trying and judging by original and exclusive jurisdiction—

(a) The President of the Republic for common crimes, and the cabinet ministers in the cases specified in article 50.

(b) The ministers of the diplomatic corps for common crimes and those of responsibility;

(c) Cases between the States and the Union, or between the States one with another;

(d) Disputes and claims between foreign states and the Union, or between foreign nations and the States;

(e) Conflicts between the federal courts one with another, or between these and those of the States.

2. Of deciding, on appeal, questions pronounced upon by the lower federal courts and tribunals as well as those mentioned in § 1 of the present article and in article 60.

3. Of reviewing the proceedings of finished trials under the provisions of article 78.

§ 1. Sentences of State courts in last appeal can be carried to the Federal Supreme Court—

(a) When the validity or application of the federal laws or treaties is called in question and the decision of the State court shall be against the same ;

(b) When the validity of laws or acts of the governments or the States, in respect to the Constitution or of the federal laws is contested, and the State court shall have decided in favor of the validity of the acts or laws in question.

§ 2. In the cases which involve the application of the laws of the States the federal court shall consult the jurisprudence of the local tribunals, and, *vice versa*, the State court shall consider that of the federal tribunals when the interpretation of the laws of the Union is involved.

ART. 59. It belongs to the federal courts to decide—

(a) Cases in which the plaintiff or the defendant shall rest the case on some provision of the Constitution of the Republic.

(b) Litigations between a State and the citizens of another, or between citizens of different States ;

(c) Suits between foreign States and Brazilian citizens ;

(d) Actions begun by foreigners, and based either on contracts with the Federal Government or on conventions or treaties of the Union with other nations ;

(e) Questions of maritime law and navigation, whether on the sea or on the rivers and lakes of the country ;

(f) Questions of international law, whether criminal or civil ;

(g) Political crimes.

§ 1. Congress is forbidden to commit any part of the federal jurisdiction to the State courts.

§ 2. Sentences and orders of the federal judges will be executed by federal court officers, and the local police shall assist them, when called upon by the same.

ART. 60. The decisions of the State courts or tribunals, in mat-

ters within their competence, shall put an end to the suits and questions, except as to—

1. Habeas corpus ; or
2. Effects of a foreigner deceased, in cases not provided for by convention or treaty.

In such cases there shall be voluntary recourse to the Federal Supreme Court.

ART. 61. The State courts shall not have the power to intervene in questions submitted to the federal tribunals, or to annul, alter, or suspend the sentences or orders of these latter.

Chapter II.—The States.

ART. 62. Each State shall be governed by the constitution and laws which it shall adopt, provided their organization be republican in form, not be in contradiction with the constitutional principles of the Union, that it respect the rights guarantied by the Constitution, and observe the following rules:

1. The executive, legislative, and judicial powers shall be defined, and separate and independent.
2. The governors and members of the local legislature shall be elective.
3. The magistrates shall not be elective.
4. The magistratess can not be removed from office, except by sentence.
5. Instruction shall be secular and free in all its grades, and in the primary, gratuitous.

ART. 63. By law of the national Congress there shall be distributed to the States a certain portion of the wild lands lying outside the zone of the frontier of the Republic, under condition of settling and colonizing the same within a determined period; said lands to revert to the Union on failure to comply with said conditions.

Paragraph. The States may transfer these lands under the same conditions to individuals or associations, by conditional or gratuitous title, when such individuals or associations propose to settle or colonize the same.

ART. 64. The States shall have the right to—

1. Celebrate agreements and conventions among themselves, if such be not of a political character. (Art. 47, No. 16.)
2. Exercise, in general, any and every power, or right, not denied expressly by the constitution, or implicitly in the political organization created by it.

ART. 65. It is forbidden to the States to—

1. Refuse to recognize public documents of the Union, or of any of the States, of a legislative, administrative, or judicial character.
2. Reject the currency or notes issued by banks, which circulate by act of the Federal Government.
3. Make or declare war, one with another, or make reprisals.
4. Refuse the extradition of criminals demanded by the justice of other States, or of the Federal District, in conformity with the laws of Congress which relate to this subject. (Art. 32, No. 35.)

ART. 66. Save the restrictions specified in the Constitution, and the rights of the respective municipality, the Federal District shall be governed directly by the federal authorities, and subject exclusively to the jurisdiction of the federal courts.

Paragraph. The organization of the Federal District shall be effected by law of the Congress.

Chapter III.—The municipality.

ART. 67. With respect to municipal government, the States, by their own laws, shall be organized on the following basis :

1. Autonomy of the municipality in respect to all that relates to its particular interests.
2. The local administration shall be elective.

Paragraph. The municipality of the Federal District shall be organized by law of the Congress.

ART. 68. In the municipal elections foreign residents shall be electors and eligible to office, under the conditions prescribed by the laws of each State.

Chapter IV.—Brazilian citizenship.

(SECTION I.—QUALIFICATIONS.)

ART. 69. The following are Brazilian citizens :

1. Natives of Brazil, though of foreign parentage (father), provided he be not in the service of his nation.
2. Sons of a Brazilian father, and illegitimate sons of a Brazilian mother, born in foreign parts, if they take up their residence (domicile) in the Republic.
3. Sons of a Brazilian father who may be in another country in the service of the Republic, although they do not make their domicile in Brazil.
4. Foreigners, who being in Brazil on the 15th of November, 1889, shall not declare, within six months from the time when the constitution enters into force, their desire to preserve their original nationality.
5. Foreigners who possess property (real estate) in Brazil and are married to Brazilian women, or have Brazilian children, unless they shall declare, before the proper authority, their intention of not changing their nationality.
6. Foreigners naturalized in any other way.

Paragraph. Laws relating to naturalization may be enacted solely by the Federal Congress.

ART. 70. Citizens of more than twenty-one years of age, and registered according to law, shall be electors.

§ 1. The following shall not be registered as electors for federal or State elections.

- (1) Beggars.
- (2) Persons ignorant of the alphabet.
- (3) Soldiers on pay, except alumni of the military schools of higher instruction.
- (4) Members of monastic orders, companies, congregations or communities of whatsoever denomination, who are subject to vows of obedience, rule or statute, which implies the surrender of individual liberty.

§ 2. Elections for federal offices shall be regulated by law of the Congress.

§ 3. Citizens who can not be registered are not eligible to office.

ART. 71. The rights of the Brazilian citizen can be suspended or lost, only in the following cases :

§ 1. The rights may be suspended—

(a) For physical or moral incapacity.

(b) For criminal conviction, during the operation of the sentence.

§ 2. They are lost—

(a) By naturalization in a foreign country.

(b) By acceptance of employment, pension, or decoration, or title, from a foreign power, without permission of the federal executive;

(c) By banishment by judicial sentence.

§ 3. The means of reacquiring lost rights of the Brazilian citizen shall be specified by federal law.

SECTION II.—DECLARATION OF RIGHTS.

ART. 72. The constitution secures to Brazilians and foreigners residing in the country the inviolability of their rights, touching individual liberty, and security, and property, in the following terms :

§ 1. No person shall be forced to do, or leave undone, anything whatever, except by virtue of law.

§ 2. Before the law all persons are equal. The Republic does not recognize privileges of birth, or ranks of nobility, creates neither titles nor decorations of rank.

§ 3. All persons and religious professions may exercise, publicly and freely, the right of worship, and may associate themselves for that purpose, acquire property, observance being had to the limitations fixed by the laws of mortmain.

§ 4. The Republic recognizes only the civil marriage, which shall in all cases precede the religious ceremonies of any form of worship whatever.

§ 5. The cemeteries shall be secular in character, and be managed by the municipal authorities.

§ 6. The instruction given in the public institutions shall be secular.

- § 7. No sect or church shall receive official aid, nor be dependent on, or connected with, the Government of the Union, or of the States.
- § 8. The Society of the Jesuits is excluded from the country, and the establishment of new convents or monastic orders is prohibited.
- § 9. All persons have the right of free association and assembly, without arms; and the police force shall not intervene, except to maintain the public order.
- § 10. Any person whatsoever shall have the right to address, by petition, the public powers, denounce abuses of the authorities, and appeal to the responsibility of the accused.
- § 11. In time of peace any person may, without passport, enter or leave the territory of the Republic, with his fortune and goods, whenever and however he may choose.
- § 12. The house is the inviolable asylum of the person; no one can enter it at night without the consent of the inhabitant, except to aid the victims of crime or disaster; nor by day, unless in the cases and in the form prescribed by law.
- § 13. The expression of opinion shall be free, in respect to whatever subject, through the press or through the tribune, without subjection to censorship, each one being responsible for the abuses he may commit, in the cases and in the form prescribed by law.
- § 14. Cases of *flagrante delictu* alone excepted, no arrest shall be made except by written order of the proper authority.
- § 15. No person shall be kept in prison without charge formally made, save the exceptions mentioned in the law, nor taken to prison, nor detained there if he give bail, in cases where such is lawful.
- § 16. No person shall be condemned, except by competent authority, and in virtue of law already existing and in the form prescribed by it.
- § 17. The law shall secure to the accused the fullest defense by all the resources and means essential to the same, includ-

ing the notice of the charge, delivered to the prisoner within twenty-four hours and signed by the authorities, along with the names of the accusers and witnesses.

§ 18. The rights of property are maintained in all their plenitude, and no disappropriation shall be made, except from necessity or public utility, and indemnity shall, in such cases, be made beforehand.

§ 19. Correspondence under seal is inviolable.

§ 20. No penalty shall extend beyond the person of the delinquent.

§ 21. The penalty of the galleys is abolished.

§ 22. The death penalty for political crimes is abolished.

§ 23. The *habeas corpus* shall always be granted when the individual suffers violence or compulsion, through illegality or abuse of power, or considers himself in imminent danger of the same.

§ 24. There shall be no privileged tribunal, except in such cases as, from their nature, belong to special courts.

ART. 73. Public offices, civil or military, are accessible to all Brazilian citizens, always observing the conditions of particular capacity fixed by the law.

ART. 74. Officers of the army and navy shall not lose their commissions, except through sentence passed in judgment of which such loss shall form a part.

The enumeration of the rights and guaranties expressed in the Constitution does not exclude other guaranties and rights, not enumerated, but resulting from the form of government established and principles settled by said Constitution.

Chapter V.—General provisions.

ART. 76. The citizen vested with the functions of either of these three powers shall not exercise those of another.

ART. 77. Any part of the territory of the Union may be declared in state of siege, and the constitutional guaranties suspended for a determined period, whenever the security of the Republic so demand in case of foreign aggression or intestine disturbance. (Art. 32, No. 22.)

- § 1. The power to execute the above provision may, if the Congress be not in session and the country be in imminent peril, be used by the Federal Executive. (Art. 47, No. 15.)
- § 2. In the exercise of this power, during the state of siege, the executive shall be restricted to the following measures of repression against persons :
1. To their detention in a place not allotted to persons accused of common crimes.
 2. To banishment to other parts of the national territory.
- § 3. As soon as the Congress shall have assembled the President of the Republic shall, on motion to that effect, make a report to that body of the exceptional measures to which he shall have had recourse, and the authorities to whom said measures are due shall be responsible for any abuses which may have been committed in that connection.

ART. 78. In criminal cases, trials concluded may be reviewed at any time, in favor of the condemned parties, by the Federal Supreme Court, for the purpose of correcting or of confirming the sentence.

- § 1. The law shall determine the cases and the form of such revision, which may be asked for by the condemned, by any one of the people, or by the attorney general of the Republic, *ex officio*.

- § 2. In such revision the penalties imposed by the sentence reviewed can not be increased.

ART. 79. Public officers are strictly responsible for the abuses and omissions that occur in the exercise of the duties of their offices, as well as for the indulgences and negligences for which they do not hold their subordinates responsible.

Paragraph. They shall all be bound by formal obligation, on taking possession of their offices, to discharge the lawful duties of the same.

ART. 80. Until revoked, the laws of the *ancien régime* remain in force, in as far as they are not, explicitly or implicitly, contrary to the system of government established by the Constitution, and to the principles laid down in the same.

ART. 81. The Federal Government guaranties the payment of the public debt, both internal and foreign.

ART. 82. Every Brazilian is bound to military service in defense of the country and the Constitution, as provided by the federal laws.

ART. 83. Recruiting for military service is abolished. The army and navy of the nation shall be made up by lot, from lists previously made, and the purchase of exemptions is prohibited.

ART. 84. In no case, either directly or indirectly, alone or in alliance with another nation, shall the United States of Brazil engage in a war of conquest.

ART. 85. The Constitution may be amended, at the initiative of the national Congress, or of the legislatures of the States.

§ 1. An amendment shall be considered as proposed, when, having been presented by one-fourth, at least, of the members of either house of the Congress, it shall have been accepted, in three readings (discussions) by two-thirds of the votes in both houses of the Congress, or, when it shall have been asked for by two-thirds of the States, represented, each one, by a majority of the votes of their legislatures, said votes to be taken in the course of one year.

§ 2. The proposed amendment shall be considered approved, if, in the following year, after three discussions, it shall have been adopted by a majority of three-fourths of the votes in the two houses of the Congress.

§ 3. The amendment adopted shall be published with the signatures of the presidents and clerks of the two chambers, and be incorporated into the Constitution as a part of the same.

§ 4. No project having a tendency to abolish the federative republican form, or the equal representation of the States in the Senate, shall be admitted for consideration in the Congress.

Temporary provisions.

ART. 1. Both chambers of the first national Congress, called to assemble on the 15th of November, 1890, shall be elected by

direct popular vote, in conformity with the regulations decreed by the Provisional Government.

- § 1. Said Congress shall receive from the electors special powers for the expression of the national will in respect to the Constitution, as well as for choosing the first President and Vice President of the Republic.
- § 2. The first Congress having been assembled, the two chambers united in joint session shall deliberate on the Constitution, and, having approved the same, shall choose at once, by an absolute majority in the first balloting, and, if such be not obtained, by a relative majority in the second, the President and Vice President of the United States of Brazil.
- § 3. The President and Vice President, thus elected, shall occupy the Presidency and Vice Presidency of the Republic during the first Presidential term.
- § 4. For said election there shall be no incompatibilities admitted.
- § 5. As soon as said election shall be concluded, the Congress shall consider as terminated its mission in joint session and, separating into chamber and senate, shall enter upon the exercise of its functions as defined by law.
- § 6. For the election of the first Congress the constitutional incompatibilities mentioned in Art. 25, Nos. 2 to 7, shall not be considered as in force; but, once elected, those who are excluded under the provisions of said article shall lose their offices unless they shall, as soon as recognized senators or deputies, choose to retain such offices instead of those to which they are elected.

ART. 2. The acts of the Provisional Government, as far as they are not contrary to the Constitution, shall be laws of the Republic until revoked by the Congress.

Paragraph. The commissions, positions, or permanent offices, concessions, and contracts made by the Provisional Government shall be guarantied in all their plenitude.

ART. 3. The State which, by the end of the year 1892, shall not have adopted its constitution, shall, by act of the federal legislative

power, be placed under that of one of the other States, which it shall judge most suitable, until the State thus subjected to said constitution shall amend the same in the manner provided in the same.

ART. 4. As fast as the States shall be organized, the Federal Government shall deliver to them the administration of the services which belong to them, and shall settle the responsibility of the federal administration in all that relates to said services and to the payment of the respective officials.

ART. 5. While, during the period of organization of their services, the States shall be engaged in regulating their expenses, the Federal Government shall, for this purpose, open special credits to them, under conditions determined by the Congress.

ART. 6. Within two years from the approval of the constitution by the first Congress, the classification of the revenues established in it shall enter into force.

ART. 7. In the first appointments for the federal magistracy of the first and second instance, the President of the Republic shall admit (include), whenever it may be advantageous to a proper choice for the courts and tribunals, justices and higher court judges of the greatest note.

ART. 8. In the first organization of their respective magistracies, the States shall consider by preference, when the interests of such organization permit, the present courts of first and second instance.

ART. 9. Members of the supreme tribunal of justice not admitted to the Federal Supreme Court, shall be retired with all their salaries.

ART. 10. Judges of higher and law courts, who, by effect of the new organization of the judiciary, shall lose their positions, shall receive, as long as they shall be unemployed, their present salaries.

ART. 11. Until the States shall be constitutionally organized, the expenses of the present courts shall be paid by the federal treasury, but as the respective courts are organized, such expense shall enter into the appropriate classification.

ART. 12. Until the regulations for the drawing of lots for military service shall be established definitely, the land and naval forces shall be made up by enlistment.

We order, then, all the authorities to whom the recognition and

execution of this decree belongs, to execute and have executed and observed the said decree in all its provisions.

The Minister of the Interior will have the same printed, published, and distributed.

Hall of the sessions of the Provisional Government of the United States of Brazil, June 22, 1890, and second of the Republic.

Chile.

Chile, a Republic of South America, stretches south of Peru to Cape Horn, extending 2,600 miles on the Pacific coast and varying in breadth from 40 to 200 miles. It is bounded on the north by Peru, on the west and south by the Pacific Ocean, and on the east by the Argentine Republic. From its situation Chile enjoys great variety of climate, from the tropical heat of Atacama to the perpetual winter of Cape Horn. The fruits of the several zones abound. Manufacturing industries are on the increase, and inducements are offered by the Government to persons introducing late inventions and such branches of industry as are not already established in the country.

Executive.—The President of the Republic is chosen by electors balloted for by the people of the Provinces in the proportion of three electors for each Deputy returned to Congress. His term is for five years and he is eligible for reelection only after an intervening term. Salary, \$18,000. The President is assisted by a Council of State composed of eleven members, six of whom are selected by Congress and five by himself, and a Cabinet of six ministers, to wit, Interior, Foreign Affairs, Worship and Colonization, Justice and Public Instruction, Finance, Departments of War and Navy, Industry, and Public Works.

Legislative.—The National Congress is composed of two houses, a Senate, elected by the Provinces for six years in the proportion of one Senator to three Deputies, and a Chamber of Deputies elected by the Departments in the proportion of one Deputy for every 30,000 inhabitants or fraction greater than 15,000.

Judicial.—The supreme court has jurisdiction over the whole Republic. Besides this there are five courts of appeal and subordinate tribunals throughout the Republic.

AREA AND POPULATION.

Chile is divided into 23 Provinces and 1 Territory, subdivided into 75 Departments. The Departments and Territory are subdivided into 855 Sublegations and 3,068 Districts.

The area covers 293,970 English square miles. Total population in 1889 (official returns), 2,665,926. This does not include an estimate of 50,000 aborigines and an estimate of about 399,889 of the population from which no returns were received, which would raise the total to 3,115,815.

Religion.—The Roman Catholic is the recognized religion of the State, but religious liberty is guaranteed in the constitution. The Roman Catholic clergy are subsidized by the State. There is one archbishop and three bishops. Civil marriage only is recognized by law.

Education.—There are 1,029 schools; 336 for males, 216 for females, and 477 mixed, with a total attendance of 84,385 pupils. A normal school for the preparation of teachers and an institute for the deaf and dumb have been established and teachers for the same have been brought from Europe. The University and National Institute of Santiago provide professional instruction. There are colleges and lyceums established in the capitals of the provinces.

The national library contains more than 70,000 printed volumes and about 25,000 manuscript volumes. Santiago has a museum of natural sciences, an academy of fine arts, a conservatory of music, a botanical garden, and other public institutions.

Seven daily papers are published in the capital, and also a number of reviews and other papers, scientific and literary. Valparaiso and other cities have a corresponding number.

Finance.—The public revenue is mainly derived from customs duties, and the chief expenditures are for the payment of the national debt, public works, and salaries. The ordinary revenue for 1889 was 54,803,464 pesos, and the expenditures for the same year were 59,387,209 pesos. The foreign debt amounts to 47,448,500 pesos, and was contracted principally for investments in railroads.

Army and Navy.—Standing Army of 5,885, divided proportionally into thirteen regiments and one battalion—artillery, cavalry, and infantry. There is besides a national guard, which in 1890 was made up of 51,090 soldiers. The navy is composed of eleven war ships, ten torpedo boats, and eight other vessels, besides seven under construction.

Resources and Products.—The products of Chile are mineral and agricultural. About 21,000,000 bushels of wheat are produced annually, besides other grains, fruits, and vegetables, and 24,000,000 gallons of wine. Valdivia is famous for its woods, and produces also a considerable quantity of cheese. The figs and grapes of Coquimbo are particularly fine. Over 500,000 head of cattle, and 2,000,000 sheep and goats are born each year. In 1888 the produce of niter was 800,000 tons. Gold, silver, copper, and coal are also mined to a large extent in Chile. There exist also mercury, iron, zinc, nickel, antimony, arsenic, bismuth, manganese, sulphur, iodide and borate of soda, cobalt, etc. The deposits of copper are said to be inexhaustible. The mining enterprises of the country have grown steadily in importance. In 1888 Chile's product of copper amounted to 31,241 tons. There are a number of flour mills and other manufacturing establishments, such as sugar refineries, woolen and paper mills, etc.

Railways and Telegraph.—Chile has 1,748 English miles of railroad, and has authorized the construction of 724 additional miles.

The length of the telegraph lines is reported in 1889 as 10,640 miles, of which 7,030 belong to the state.

In 1888 there existed 497 post-offices throughout the Republic. There were transmitted during the year, 43,558,203 letters and packets, of which 1,088,662 were sent to foreign countries and 1,812,577 were received from abroad.

Banking.—Chile has 19 banks of issue, with a joint capital of 23,111,887 pesos. There are other banks which loan money at interest on real estate. The circulation of these in 1889 amounted to 61,537,000 pesos.

Money.—The silver peso of 100 centavos is the monetary unit; its nominal value is a dollar, but it was struck on the basis of the 5-franc piece. Its equivalent in the money of the United States is 91.2 cents (1891). Ten-dollar (condor), five-dollar (medio condor, or doblón), two dollars (escudo), and one-dollar (peso) gold pieces are coined .9 fine, but the currency is practically a silver one. There are also half, fifth, tenth, and twentieth parts of a dollar in silver .9 fine. The two and a half, two, one, and one-half centavos are the copper and nickel coins.

Weights and Measures.—The onza=1.014 ounces avoirdupois; the libra=1.014 pounds avoirdupois; the quintal=101.44 pounds avoirdupois; the vara, 0.927 yard; the square vara, 0.859 square yard; the quartillo=1.1624 quarts; the fanega=2.575 bushels. The metric system has been legally adopted in Chili, but the old weights and measures are yet employed to some extent.

COMMERCE.

The foreign trade of the country for 1888 amounted to 184,000,000 pesos, of which 60,717,698 pesos, or \$55,374,540, were imports, and 73,089,935 pesos, or \$66,658,020, were exports. Great Britain has most of the trade, having exported to Chile in 1888 goods to the value of 26,351,141 pesos, whilst from the United States Chile imported for the same year 3,133,173 pesos. In 1889 the imports increased to 65,090,013 pesos, while the exports fell to 65,963,100 pesos.

The principal exports from Chile are copper, wheat, barley, wool, etc.

Imports into and exports from Chile by countries.

[The value of the peso is 91 cents in United States gold.]

Colombia.

The Republic of Colombia occupies the northwestern portion of South America. It is bounded on the north by the Caribbean Sea, on the east by Venezuela, south by Brazil and Ecuador, and west by the Pacific Ocean. It is traversed by three great Andean ranges and many fine navigable rivers. The climate varies with the elevation; the coast is hot and tropical vegetation rank, but towards the mountain tops the products of the temperate zones grow to perfection. The mineral wealth of Colombia is great; gold and silver are known to be abundant, and the best emeralds known are found in the State of Boyacá.

Executive.—The President is elected for six years. He exercises his authority through eight ministers who are directly responsible to Congress. The elective franchise is circumscribed. An elector must be a male, twenty-one years of age, and must be able to read and write or have an income of \$500. Congress elects a substitute every two years, who fills the presidency in case of a vacancy. A vice-president is elected at the same time and in the same manner as the President.

Legislative Authority.—A congress of two houses, senate and house of representatives. The senate has twenty-seven members, representing nine departments, three from each. They must be Colombians by birth, thirty years of age, with an income of not less than \$1,200. Representatives, of whom there are sixty-six, must be twenty-five years of age. No property qualification required. They are elected by universal suffrage, one representative for 50,000 inhabitants.

Area and Population.—The area is about 504,773 English square miles, and the population (1881) 3,878,600, including 220,000 uncivilized Indians and 80,000 of the population of the territories. Bogota, the capital, 8,564 feet above the sea level, has a population of over 100,000.

Departments.	Area in Eng- lish square miles.	Population.
Antioquia.....	22,816	470,000

Religion.—The Roman Catholic is the religion of the State, but other creeds are tolerated.

Education.—There are 2 universities, several colleges and technical schools, 16 normal, and 1,278 primary schools, with an average attendance of 75,029 pupils.

Finance.—The revenue is mainly derived from customs duties. The official estimate for 1890-'91 gives as revenue 19,540,700 pesos and expenditures, 24,513,232 pesos. The external debt, mostly held in Great Britain, amounts to \$14,571,318, and the whole debt, including the interior, to \$20,999,373.

Army.—The army is determined each year by congress, but is usually maintained on a peace footing of 5,500.

Resources and Products.—Gold is produced in Colombia; silver abounds, and the whole country is believed to be rich in minerals. The soil is generally fertile but only a small portion is under cultivation, owing to a lack of facilities for transportation. Coffee is most extensively grown.

Post-office.—In 1888 the post-office handled 1,063,504,411 packets printed matter, and 15,813 registered letters.

Banking.—Besides the National Bank, the Bank of Colombia, and the Bank of Bogota, there are several private banks.

RAILWAYS AND TELEGRAPH.

In 1888 there were 148 miles of railway and other railroads under construction. In the same year there were 2,800 miles of telegraph wire, and 200 miles more under construction. Means of foreign communication are by way of the port of Savanilla. There are 7 lines of steamers touching monthly at the port; of these 4 carry the English flag, 1 is German, 1 Spanish, and the other French. The inland navigation is furnished by the Magdalena River and its tributaries.

The Department of State at Washington recently received from the United States minister at Bogota an interesting statement concerning the railways of Colombia, as follows:

In view of the present interest of our people in the fortunes of the Spanish-American Republics, I have thought proper to submit some information in respect to the present and prospective railroads of Colombia.

This country is among the most mountainous of the world. As a result all communication is, and always has been, most difficult and expensive. Nearly all freight must be transported by mule as soon as it leaves the great rivers.

To illustrate the difficulties with which the commerce of the great inland cities have to contend, let a bale of goods be followed from New York to Bogota. It arrives, say, at the port of Carthagena or at the port of Port Colombia. If at the latter port, it is unloaded into a barge and towed to the shore, where it is placed in a storehouse; thence it is put upon a freight car and taken to Barranquilla. There it passes through the custom-house, is carted across the city, and loaded upon a river steamer. It then goes 600 miles up

the river to the head of navigation, Las Yeguas. There it is unloaded into a storehouse, whence it is afterwards placed in a railroad car and carried 15 miles to Honda. Again it is placed in a storehouse, again placed upon a car and carried to Arranca-plumas, where it is unloaded and carried down to the river bank by men. It is then loaded upon a ferry barge and passes to the other side of the Magdalena. There it is unloaded and carried up the steep river bank and deposited in a storehouse. Then begins the toilsome journey by mule trains over the Andes to Bogota, a journey which consumes from five to twelve days in good weather, according to the weight of the loads and the inclination of the drivers. The distance is about 80 miles.

When to the damage so often caused in making these changes is added that caused by rain, by carelessness, and by the accidents incident to mule transportation, it can be readily seen that everything is imported here at a great percentage of loss to the consumer. Freights add greatly to the cost of all articles. For bringing a cargo of 250 pounds from Honda to Bogota one must pay from \$12 to \$18, according to the state of the road.

Heavy boxes, however, are carried by steam to Cumbao, a point above Honda, and come to Bogota in ox-carts. Much more time is consumed in this way and freights are much higher.

This well illustrates what is going on all over the country. The exporter is, of course, subject to the same conditions, and is unable to compete with the producers of more favored nations.

The result is that the country's progress in developing its natural resources is not as rapid as its people desire. Nor can it be until better means of communication are established.

The people here realize their difficulties, caused by the tedious methods now employed, and with a commendable spirit of progress have made numerous contracts with various foreign companies for the construction of roads. For one reason or another, the contracts have not been productive of great results; so that to-day there are only nine railroads in the country, aggregating in length 290 kilometres, and two of these, covering about 42 kilometres, were built by native companies. I except from these remarks the Panama Railroad.

These roads are as follows:

The Antioquia Railroad was constructed several years ago, and is designed to run from Puerto Berrio, upon the Magdalena River, 125 miles, to Medellin, the capital of Antioquia. This city is the center of supply for a large and populous region, and has a reputation for commercial integrity which is unrivaled. The road now stops at Pavas, a distance of 36 kilometres from the river. It is in poor condition, and is not adequate to the demands

upon it. It belongs to the departmental government, which is now renewing its efforts to secure its completion. I regard it as a desirable enterprise.

The Cauca Railroad now runs from Buenaventura, on the Pacific, 26 kilometres, to San Cipriano. It will soon be extended to the important town of Cali, which is situated in what is said to be one of the most fertile and beautiful departments of the Republic, that of Cauca.

The Bolivar Railroad extends from Puerto Colombia, on the Caribbean Sea, to the port of Barranquilla, and is 28.9 kilometres in length. It is in fair condition and transports the great majority of the exports and the imports of the country.

The Santa Marta Railroad is now something more than 42 kilometres in length, and is being rapidly pushed through from the port of Santa Marta, on the Caribbean Sea, to the Magdalena River part of Banco, under the auspices of an English company. This road is bound to be of great benefit to Colombia, opening up a large banana and cacao trade on the line of its route, and connecting one of Colombia's best harbors with the great natural highway, the Magdalena River.

The Cucuta Railroad runs from the River Zulia to the inland port of Cucuta, and is 54.9 kilometres in length. This is an important aid to the commerce of Santander.

The Giradot Railroad is now 39 kilometres long, and extends from Giradot, upon the Upper Magdalena (the "Upper" Magdalena is that portion of the river above Honda), to Juntas de Apulo, and is designed to communicate the river with this capital. For this purpose the Government has recently made a contract with an English company for the completion of the road.

The Dorada Railroad connects Las Yeguas, the head of river navigation, with Honda, and is 22.5 kilometres in length. The recent action of Congress in respect to this road will be hereafter mentioned.

The Sabana Railroad was constructed by a Colombian company, and extends from Bogota 39.9 kilometres over the plains to Facatativa. This road is in fair condition, and is designed to serve as a link in the road between the city and the Magdalena River.

The Zipaquirá Railroad extends from Bogota over the plains to Chapinero, a distance of 4 miles. It is not yet in operation, and its extension to Zipaquirá may not be immediately expected.

It will be seen at once that Colombia has no system of railroads, but only isolated short lines. The need of more and better constructed and better managed roads is keenly felt. This situation has induced the last congress to grant several concessions to foreign companies for the construction of new roads.

By law 16 Mr. James L. Cherry, an American citizen, was granted a concession to complete the Canca Railroad to Cali and Manizales. This conces-

sion will be found as an inclosure in my No. 129 of September 4 last. Mr. Cherry is now in Canca carrying on his work with vigor and success. This road will be of immense benefit to the section through which it passes.

By law 47 a concession is granted to Messrs. Enrique Cortez & Co., an English company, to construct a railroad from Bucaramanga to Puerto Wilchen, on the Magdalena River. This would prove to be a most valuable aid to the department of the trade and agriculture of that portion of the Republic. Bucaramanga is a commercial center, and from it are exported large quantities of coffee.

By law 66 a concession is granted for the construction of a railroad from the province of Cucuta, department of Santander, to Tamalameque, on the Magdalena River.

By law 91 the Government grants to an English company the right to extend the Dorada Railroad north to a point on the Magdalena River called Conejo, and south up the river to Cambao, and thence over the mountains to Los Manzanos, upon the plains of Bogota. There the road would connect with the Sabana Railroad, which is now being extended from Facatativa to that point. This road would give direct communication between Bogota and the river, as would also the Giradot Road above mentioned. An attempt was also made during the sessions of congress to secure a concession for a road from Bogota to a point some thirty (30) miles below the rapids of Honda. But for some reason the concession was refused, although the route is regarded by many as the most feasible and satisfactory of any that has been proposed.

By law 100 a concession is granted a Colombian citizen to build a railroad from Ocana to the Magdalena River, the construction of which would benefit a large agricultural region.

In addition to these contracts one has been made with Americans for a railroad extending from the port of Carthagena to Calamar, upon the Magdalena River. The construction of this road would be of great benefit to Carthagena, which has a good harbor and is now connected with the river by a natural canal artificially enlarged.

It will thus be seen that there exists in this country an earnest desire for the day when the railroads shall supplant the tedious mule as a means of transportation. Liberal subsidies have been granted all the proposed roads.

It is a matter of regret that our own people have not interested themselves more in the development of the great resources of Colombia. As will be seen above, however, a beginning has been made. It now remains for us to foster and encourage the proposed international line. There should be no delay in this matter. Colombia is anxiously awaiting the results of the International Conference upon this subject, and I doubt not will lend to any reasonable project her efficient aid.

COMMERCE.

The value of imports into Colombia for the year 1888 reached \$11,777,624 pesos, and the exports \$16,199,718 pesos, making a total of \$27,977,342 pesos. The imports of the free ports of the Isthmus are not included. The larger part of the imports are of European manufacture, and the principal articles imported comprise cotton goods, linens, woollens, iron, wrought and unwrought, clothing, and small fancy articles. The peso is valued at 77 cents United States gold.

Exports from and imports into the United States, the United Kingdom, and France.

peso de ley is stipulated. It is nominally worth \$1 or 5 francs, but by reason of the adoption of a paper currency, the value of the Colombian dollar is much depreciated, except, of course, at Panama and Colon where paper has not yet been introduced. There the old Colombian peso or the sol or Peruvian dollar is the legal tender.

Coins.—Nickel: $1\frac{1}{4}$ cents, $2\frac{1}{2}$ cents, 5 cents; common, in everyday use, and often at a premium of 5 per cent. Silver: $\frac{1}{2}$ real, 1 real, 2 reals; not coined at present. Foreign coins have long since disappeared; and any that come in are bought up at the ports at 90 to 100 per cent. premium. The gold coins are condor, worth \$9.647 in United States values, and double condor.

Weights and Measures.—The metric system was introduced into the Republic in 1848, and the following are the only weights and measures recognized by the government: In custom-house business the kilogram, equal to 2.205 pounds avoirdupois, is the standard. In ordinary commerce the arroba, of 25 pounds Spanish or $12\frac{1}{2}$ kilos, the quintal of 100 pounds Spanish or 50 kilos, and the cargo, or 250 pounds Spanish or 125 kilos, are generally used. The Colombian libra is equal to 1.102 pounds avoirdupois. The Colombian vara, or 80 centimeters, is used as a measure of length, for retailing purposes, although the English yard is mostly employed, and the French liter is the legal standard for liquids.

Costa Rica.

The Republic of Costa Rica is one of the five States into which Central America is divided. It is situated between 8° and $11^{\circ} 16'$ north latitude and $81^{\circ} 40'$ to $85^{\circ} 39'$ of west longitude, meridian of Greenwich. Its limits are: On the northwest, the Republic of Nicaragua; southeast, the Republic of Colombia; northeast, the Caribbean Sea, and southwest the Pacific Ocean. It has a regular coast line of 300 kilometers on the Atlantic and 500 kilometers of a very indented one on the Pacific. Formerly it was a colony of Spain, but it achieved its independence on the 15th of September, 1821, and since then it has maintained republican form of government. The present constitution dates from the year 1871.

Executive.—The President, elected for four years by an electoral assembly, has the power of naming and removing at pleasure his Cabinet, composed of four ministers: Interior; Foreign Affairs, Justice, and Worship; Commerce and Finance; and War and Marine. The President is not eligible to immediate reelection.

Legislative.—Chamber of representatives elected, as is the President, by the electoral assembly, for four years, but one-half retire every two years. The Republic is divided into five provinces and two comarcas, and these are subdivided into cantons and districts. In 1889 there were 540 electors and 26 Representatives. The Representatives are elected in the proportion of one for every 8,000 inhabitants or a fraction thereof greater than 4,000.

Judicial.—The judicial authority is vested in the Supreme Court of Justice, composed of eleven judges, elected by Congress every four years. It is divided into two courts of appeals, each with three judges, who decide the cases in second instance, and the court of cassation, with five judges, whose mission is to see that the law is correctly applied in all suits. In the province of San José there are two judges of first instance and one in each of the other provinces.

Besides these are criminal courts and subordinate judges, called mayors, throughout the Republic.

There is in each province and comarca a governor and a commandant at arms, named by the President, and in each canton there is a municipality, elected by the people and a political chief, who is appointed by the President.

AREA AND POPULATION.

The area is 23,233 English square miles and the population 213,785.

The following is a table showing the divisions and population of the Republic:

Provinces.	Cantons.	Population.
San José	San José, Escazú, Desamparados, Puriscal, Asciré, Mora, and Tarrazú, with 1 city, 6 tivons, and 74 villages.	65,261
Alajuela	Alajuela, Grecia, San Ramon, San Mateo, Atenas, Naranjo y Palmares, with 1 city, 6 tivons, and 54 villages.	58,087
Cartago	Cartago, Paraiso, Unión, with 1 city, 2 tivons, and 88 villages.	35,571
Heredia	Heredia, Barba, Santo Domingo, Santa Bárbara, and San Rafael, with 1 city, 4 tivons, and 27 villages.	31,084
Guanacaste.....	Liberia, Bagaces, Nicoya, Santa Cruz, Las Cañas, and Carillo. It has 5 tivons and 15 villages.	17,191
Comarcas:		
Puntarenas...	Puntarenas, Esparta, and Golfo Dulce. Two cities, 1 tivo, and 44 villages.	8,114
Limon	Limon and the Territory of Talamanca. One city and 25 villages.	3,447
Total.....		213,785

The capital, San José, has a population of 25,000. Other important towns are:

San José	25,000	Santa Cruz.....	5,690
Cartago	12,000	Nicoya.....	5,000
Alajuela.....	9,000	Puntarenas.....	5,000
Heredia	9,000	Guanacaste.....	
Liberia	5,692	Limon	

The principal ports are Limon on the Atlantic and Puntarenas on the Pacific.

Religion.—The majority of the people are Roman Catholics, and this is the established religion of the State. The Government contributes to its support \$15,540, besides a subsidy of \$12,000, voted for religious education. A law was passed by Congress in 1884 annulling the concordat with the Holy See. The constitution guarantees tolerance for all creeds.

Education.—The constitution makes the primary education of both sexes obligatory. In 1888 there were 201 primary schools with an attendance of 12,733 pupils, besides 80 private schools with 2,500 pupils. There are three colleges in San José; a girl's school in San José and another in Alajuela. The University of Santo Tomas in San José has professorships for various courses. The normal and model schools established in 1886 are progressing admirably.

Finance.—The revenues for 1889 amounted to 5,195,865.12 pesos, and the expenditures for the same period to 4,995,343.32 pesos. The interior debt has been reduced to \$858,861.73. The foreign debt amounts to \$10,900,652.94 at 5 per cent. from January 1, 1888. There are in circulation about 820,244.75 pesos of Government paper money, and 1,952,008 issued by the Union Bank. The revenues are derived from customs duties, stamped paper, liquor and tobacco taxes, sale of lands, registration fees, etc.

Army and Navy.—The standing army of Costa Rica numbers 600 men and a militia of about 31,824 men, as every male between the ages of 18 and 50 is compelled to serve in case of necessity.

Resources and Products.—The soil is so fertile that almost anything can be grown, but coffee is considered the principal agricultural industry. Bananas are also largely exported, and maize, wheat, rice, potatoes, beans (frijoles), sugar cane, etc., are commonly cultivated. The forests abound with valuable timber, woods, and plants, among which are found rare wood for cabinet work, medicinal and oleaginous plants; dye woods, textile plants, rubber, and in fact all such as flourish in tropical zones. The live stock consisted in 1887 of 233,217 cattle, 45,662 horses and other domestic animals. Hides, skins, mother-of-pearl and caoutchouc are among the articles exported from Costa Rica. There are gold and silver mines which are worked, and some which have been abandoned. Besides these there are found in various places copper, zinc, nickel,

iron, lead, and coal. There are three breweries, several stills, one large liquor factory, an iron foundry and a tool shop.

Important Enterprises.—On the 3d of August, 1888, the Republic of Costa Rica granted a concession to the Nicaragua Canal Association for the excavation of a maritime canal between the Pacific and the Atlantic Oceans, which might cross its territory alongside of the whole or a part of the frontier of Costa Rica, on the side adjoining to the Republic of Nicaragua.

In virtue of this concession and of the one which the company had previously obtained from the Government of Nicaragua, a canal is now being excavated, in which more than \$4,000,000 have been spent, and is being pushed on with great energy. The company will have the free disposal of all lands and places within the territory of Costa Rica necessary to the construction of the canal, and the right to take, free of charge, from the lands belonging to the State whatever material may be found on them.

The term of the concession is for ninety-nine years, and at the expiration of that time all the property of the company that may be located on the territory of Costa Rica will become the property of the Government.

Under the same date of August, 1888, a contract was entered into between the Government of Costa Rica and Minor C. Keith for the construction of a railway from the river Jimenez to the river Frio, on the frontier of Nicaragua, and the necessary surveys are being made to locate the line.

Railways and Telegraphs.—There is a railway between Limon and Carrillo, 70 miles in length, and an extension to Cartago, comprising 51 miles, was opened in December, 1890, thus uniting the cities of Alajuela, Heredia, San José, and Cartago with the Atlantic Port. There is also a line 14 miles long connecting the Port of Puntarenas with the town of Esparta. The total length of the railroads in Costa Rica is 161½ miles. There are 31 telegraph offices and 600 miles of telegraph wire. There is also cable communication with the world through the office of the company in San Juan del Sur, Nicaragua. The number of dispatches sent over these lines in the year 1890 amounted to 163,967, which produced to the Government \$49,458.21. A telephone service has been established in San José. The postal service is in a most excellent

condition, there being 71 post-offices, which handled during the past year 684,091 pieces.

Banking.—The principal banking houses are: The Anglo-Costarricense, established in 1863; the Bank of Costa Rica, established in 1867, and the Union Bank, established in 1877. The Bank of Costa Rica was formerly the national bank. The usual interest on money is 1 per cent. per month on very short credit. The Union Bank has reduced the interest to 9 per cent. per annum. There are other miscellaneous associations and agencies in Costa Rica engaged in mercantile, railroad, navigation, and other monetary interests.

COMMERCE.

The commerce of Costa Rica is maintained chiefly with Great Britain, France, Germany, and the United States. The principal importations are silk, wool, linen and cotton goods, machinery and agricultural implements, tools, furniture, glassware, tinware, hardware, and fancy articles of domestic use, such as perfumes, soap, toilet articles, etc., beer, wines and liquors of all sorts; flour, sugar, canned goods, coffee sacks, clothing, shoes, saddles, harness, books, furniture, scientific instruments, etc. San José has fourteen importing houses on a large scale, besides commission houses, representing considerable capital. Value of importations in Costa Rican money for 1889-'90 was \$6,306,408, while the exportations amounted to \$6,965,371. The number of vessels that entered into the ports of the Republic in 1890, was 332, carrying the flag of the United States, Great Britain, Germany, and Spain.

Table of imports and exports for seven years.

[A peso is valued at 77 cents United States gold.]

Money.—The monetary unit is the peso, or dollar, of 100 centavos; nominal value \$1 in money of the United States; actual value, as proclaimed (1891) by the U. S. Treasury, 77.1 cents. The gold coins are the 10, 5, 2, and 1 peso pieces. Silver, peso, 50, 25, 10, and 5 centavos. Copper, 1 cent. The gold is worth 9 per cent. less than the English and 12½ less than the United States gold. The amount of specie coined, to date, in the country is as follows: Gold, \$2,351,807.87; silver, \$1,097,348.82; and copper, \$1,681.91. There are besides in the Republic 1,060,000 Chilean and Peruvian soles. The paper money of the country circulates in bills of the value of \$100, \$50, \$25, \$10, \$5, \$2, and \$1. The decimal system for moneys was adopted by decree of November, 1864.

Weights and Measures.—By decree of July 10, 1884, the French

metric system was adopted and is now in use. The following are the old weights and measures: The libra, of 16 onzas, = 1.014 pounds avoirdupois; the quintal, of 4 arrobas, = 101.40 pounds avoirdupois; the fanega, of cajuelas or cuartillos, = 1.547 bushels; the vara, of 3 pies or 36 pulgadas, = 2.742 feet.

COMMERCE OF CENTRAL AMERICA.

EQUADOR BUILDING AT PARIS EXPOSITION.

Ecuador.

Ecuador, so called from its situation on the equator, is bounded on the north by Colombia, on the south by Peru, on the west by the Pacific Ocean, and on the east by Brazil. The climate is varied. On the coast it is hot, and as the country rises the climate varies, until at last, at the height of 11,000 feet, perpetual snow is reached. The cultivated lands lie chiefly in the valleys of Quito, Ambato, and Cuenca, where reigns perpetual spring. Ecuador is rich in natural resources, but agriculture is in a somewhat backward condition, and its great mineral wealth is for the most part undeveloped, owing to the lack of transportation facilities.

Executive Authority.—The President of Ecuador is nominated by an electoral college, composed of 900 electors returned by the people. A vice-president, who fills the position of president of the council of state, is elected at the same time. The Presidential term is for four years, and the President receives a salary of 15,000 sucrés a year. The cabinet consists of four ministers, who, with seven other members, constitute a Council of State. The members are individually and collectively responsible to Congress. Each minister has a salary of 3,000 sucrés a year.

Legislative Authority.—Vested in a Congress composed of two houses, the first composed of two senators from each province, chosen for four years, one-half retiring every two years. The lower house is elected for two years, one deputy representing 30,000 inhabitants. The electors must be adult Roman Catholics and be able to read and write. Congress assembles in Quito on the 10th of June of each year.

Judicial Authority.—There are courts for the parish, canton, province, district, and a court of appeal and supreme court. These

are all under the jurisdiction of Congress. There are 4 superior courts in different parts of the Republic, 153 provincial criminal courts, and 656 parochial justices.

AREA AND POPULATION.

The Republic, divided into seventeen provinces, has an area of 118,630 square miles, with a population of 1,004,651, besides a great many uncivilized Indians. Quito, the capital, with a population of 80,000 inhabitants, has an elevation of 9,543 feet. It has some fine buildings, and is well supplied with European goods of all kinds.

Population by departments.

Total	1,004,651

Cities of over 5,000 inhabitants.

Quito	80,000	Ambato	12,000
Guayaquil	40,000	Ibarra	10,000
Cuenca	30,000	Loja	10,000
Riobamba	18,000	Esmeraldas	9,183
Latacunga	15,000	Zaruma	6,000

Religion.—Roman Catholic is the established religion, and the constitution excludes all other creeds.

Education.—There is a university in Quito and colleges in other of the cities. There are 856 schools, 1,137 teachers, and 52,839 students. The annual expense is \$243,881. Primary education is obligatory. There is a naval and a military school, commercial and technical schools, and a scientific institution in Quito with eleven professors.

Finance.—More than half of the revenue is derived from customs duties. The revenue in 1887 was 4,479,004 sucrés and the expenditures 4,428,597 sucrés. The estimated revenue for 1889-'90 is 4,252,522 sucrés and the expenditures 4,379,056 sucrés, with an addition for 1890 of 50,180 for congressional expenses.

Army and Navy.—The standing army is about 3,000 men; one battery of fortress artillery and one with field guns; 4 battalions of infantry, 2 battalions of light infantry, and one cavalry regiment. The navy consists of three steamships and two steamboats, one transport, one gunboat and one third-class cruiser.

Resources and Products.—Agriculture is in a low condition, yet the soil is capable of producing in great variety. Rice, pepper, and other semitropical fruits grow in the low lands; on the plains cotton, corn, and sugar cane flourish, and in the higher lands wheat, barley, etc. The forests are extensive and almost impenetrable.

Commerce.—The exports for the year 1887 were \$7,286,031 and the value of the imports \$8,253,016, making a total value of foreign commerce of \$15,539,047. Cocoa, India rubber, coffee, cinchona, vegetable ivory and some of the precious metals are exported, principally to Great Britain, and the principal imports consist of cotton goods and wearing apparel. In 1889 the imports and exports in sucrés were 9,681,456 and 7,910,210 respectively, or, in United States values at 69.8 cents per sucré (1890), \$6,757,656 for imports and \$5,521,327 for exports.

Exports of domestic merchandise from the countries specified to Ecuador by principal articles.

Railways and Telegraph.—There is one railway, about 50 miles in length, now in course of construction. There are about 1,200 miles of telegraph line. Ecuador is connected by wire with Colombia, and by cable with the world. There is internal river communication by way of the rivers Guayes, Daule, and Vinces, and other

streams which flow into the Amazon, which in Ecuador is called the Marañon.

Banking.—There are two authorized banks at the capital and two savings banks in Guayaquil in no way connected with the Government.

Money.—By a coinage law of March, 1884, the monetary unit is the sucre, coined on the basis of the five franc piece. Its value in money of the United States is (1891) 77.1 cents. No gold, silver, or copper money is coined in the country, the coining thereof being done in England, Chili, and Peru. There are two banks authorized to issue notes for circulation, the issue of which is conditioned on the stock of silver in the vaults of the bank; the banks are by law required to retain 30 per cent. of the value of their circulation in coin, silver, or gold.

Weights and Measures.—The French metrical system of weights and measures was adopted as the legal standard of the Republic by a law passed December 6, 1856.

THE GOVERNMENT HOUSE AT GUATEMALA.

Guatemala.

Guatemala, the northernmost of the Central American nations, is situated between the $13^{\circ} 45'$ and $17^{\circ} 45'$ north latitude and $88^{\circ} 10'$ and $93^{\circ} 12'$ longitude west. It is bounded on the north by the Republic of Mexico, British Honduras, and the Gulf of Honduras; on the east by Salvador and the Republic of Honduras; on the south by the Pacific Ocean, and on the west by Mexico. Guatemala enjoys great variety of climates; there are hot zones, temperate regions, and very cool localities. The port of Santo Tomás, on the Atlantic, is a large and safe harbor, whilst on the Pacific Coast there are three authorized ports, San José, San Luis, and Champerico. It was a Spanish colony until 1821, when it became an independent republic. Its present constitution was adopted in 1879, and amended in 1889.

Executive.—The President is elected by the people for a term of six years. He appoints the ministers of foreign relations, war, public works, interior and justice, finance, and public instruction.

Legislative.—The legislature consists of a National Assembly, composed of representatives elected by the people, one for every quota of 20,000 inhabitants or fraction thereof exceeding 10,000. The representatives serve 4 years. Each must be a citizen at least 21 years old.

Area and population.—The area of Guatemala is estimated at 46,800 English square miles. According to a census of 1880, there were at that date, 1,224,602 inhabitants.

Departments and population in 1888 (estimated).

Religion.—Roman Catholicism is the prevailing religion, but all other creeds have complete liberty of worship.

Education.—Primary education is obligatory, maintained by the State, free and secular. The sum spent on education in 1887-'88 (ending June 30) was \$525,725, of which \$253,927 was for primary education. In 1887 there were 93,627 children of school age. At the end of 1887 there were, according to official statements, 1,030 primary schools of all kinds, with 1,242 teachers, attended by 49,247 pupils. There were in addition seven high and normal schools with 1,185 pupils (315 females), a number of special schools, besides several private schools.

Products.—The main products of the country are coffee, cacao, hides, and woods. Coffee is the most important, its production having steadily increased during the last 12 years, and the estimated crop for 1890-'91 being 80,000,000 pounds. The cacao of Guatemala ranks among the best and is known as "Socamusco Cocoa."

There are nearly 60 different species of fine hard woods suitable for cabinet-making, mahogany and cedar being the most abundant.

Finance.—The foreign debt of Guatemala as reported by official returns is \$4,613,500; the internal debt, \$4,883,500. The following is the budget for 1890:

Revenue.		Expenditure.	
	Pesos.		Pesos.
Customs	2,700,000	Department of finance	1,343,074
Taxes ("contributions")	456,000	Department of "Fomento" (public works, etc.)	579,092
Stamp duties	120,000	Department of public instruction	710,364
Monopolies	1,575,000	Department of war	1,154,189
Miscellaneous receipts	209,000	Miscellaneous	823,956
Total	5,060,000	Total	4,610,675

Commerce.—The following table gives the foreign commerce of Guatemala for 5 years, in round numbers:

[The peso is worth 77 cents United States gold.]

	1885.	1886.	1887.	1888.	1889.
	Pesos.	Pesos.	Pesos.	Pesos.	Pesos.
Imports into Guatemala	3,788,000	3,537,000	4,241,000	5,460,000	7,070,000
Exports from Guatemala ...	6,070,000	6,720,000	9,039,000	7,240,000	13,248,000

The chief exports in 1889 were coffee (12,704,945 pesos), hides (207,294 pesos), rubber, sugar, bananas, and spirits.

The foreign commerce of Guatemala for the year 1890 reached a total of \$17,040,015, of which \$7,079,370 were imports, and \$9,960,645 were exports. The imports showed an increase of \$2,036,075 over the previous year; while the exports showed an increase of \$5,569,210 over the previous year. The large increase in exports was due to the high price of coffee and the abundant

crop; the value of the coffee exported being \$9,552,590 against \$5,073,215 during the previous year. The coffee was principally exported to Germany and to San Francisco. Every article of import, except flour, showed an increase; the chief increase of merchandise being cotton goods and other wearing apparel, railway supplies, hardware, machinery, agricultural implements, and liquors. The imports from the United States were \$1,337,400; from England, \$1,207,625; from France, \$923,586; from Germany, \$715,240.

The imports by articles for the same year, with their sources, were as follows:

Articles.	Value.	Countries.	Value.
	<i>Pesos.</i>		<i>Pesos.</i>
Specie	2,908,290	Great Britain	1,598,760

All other articles.....	1,308,165	Mexico	62,755
		All other countries.....	52,195
Total	7,079,370	Total	7,079,370

The subjoined table gives the commerce of the United States (derived from official sources) with Guatemala for 5 years ending June 30:

	1886.	1887.	1888.	1889.	1890.
	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>
Imports into the United States.....	1,957,632	2,648,713	2,085,467	2,346,685	2,281,681
Domestic exports from the United States.....	523,640	553,179	887,771	969,871	1,326,388

In 1890 the principal imports into the United States were coffee (\$1,988,423), hides and skins (\$106,343), bananas (\$96,813), India rubber and gutta-percha (\$57,187), and sugar (\$24,331).

The values of the leading articles of domestic export were: Iron and steel and manufactures thereof, \$346,392; wheat flour, \$202,411; cotton and its manufactures, \$100,109; explosives, \$65,972; chemicals, drugs, and dyes, \$47,346, and household furniture \$44,648.

Army.—Under a law passed May 23, 1888, all able-bodied men, white or half caste, who pay less than \$50 of annual taxes (save when they are the only sons, etc., or high officials) are bound to serve in the army from 18 to 25 years of age in active service and from 26 to 50 years of age in the militia. In 1889 the standing army numbered 33,723 men though only some 2,000 were on duty.

Shipping and communications.—In 1888, 453 vessels of 547,911 tons entered and 442 of 546,515 tons cleared the ports of the Republic. Of the former, 354 were North American and 37 English. There is a line of railway from San José through Escuintla to the capital (72 miles) and a line from Champerico to Retalhulen (27 miles). In 1889 there were in operation 161 kilometers of railways, and under construction 299 kilometers. In 1888 there were 157 post-offices, 1,888,676 letters and postal cards were carried, 58,364 registered articles, 2,576,345 papers, printed matter, etc. In 1888 there were 1,923 miles of telegraph with 93 offices and 457,009 messages were sent. There are now (1891) 1,991 $\frac{7}{8}$ miles of telegraph, 80 of which were built during 1890.

Banks.—In the capital are the "Banco Internacional," "Banco Colombiano," and "Banco Hipotecario," besides a number of banking firms. In the city of Quezaltenango there is the "Banco Occidental."

Money.—Silver coins: The dollar, or peso, of 100 centavos, par value \$1, equivalent to 77.1 cents United States coin; medio-peso, of 50 centavos, par value 50 cents; peseta, of 25 centavos, par value 25 cents; real, of 12 $\frac{1}{2}$ centavos, par value 12 $\frac{1}{2}$ cents.

Gold coins: The onza, of 16 pesos, equal to \$15.74 United States coin; a piece of 10 pesos, a piece of 5 pesos, a piece of 1 peso.

Weights and measures.—The Spanish libra of 16 ounces=1.014 pounds, avoirdupois; the arroba of 25 libras=25.35 pounds, avoirdupois; the quintal of 4 arrobas=101.40 pounds, avoirdupois; the tonelada of 20 quintales=18.10 cwt.; the fanega=1 $\frac{1}{2}$ imperial bushels.

Haiti.

The Republic of Haiti occupies the western portion of the Island formerly known as Española or Hispañola, a rich and beautiful island of the West Indies next in size to Cuba; longitude 68° to 75°, latitude 18°. Through the center of the island is a mountain range the highest peak of which, Mount Chaco, is 6,000 feet above the sea level. There are several lakes in the South, and in the West is the Artibonite River, quite a large stream. The soil is rich, well watered and productive. The population are of African, part of mixed African, and of European descent, and their language French dialect.

Executive.—According to the constitution the President of the Republic is to be elected by the people for a term of 7 years with a salary of \$24,000. He is assisted by six cabinet ministers.

Legislative.—The National Assembly is divided into a Senate and a House of Representatives. The latter is elected for 5 years by the male population engaged in some occupation. The Senators, 30 in number, are appointed by the House of Representatives from lists furnished by the Executive and the electoral college. The members are nominated for 6 years, one-third retiring every 2 years.

Area and Population.—The area of that portion of the island which comprises the Republic of Hayti is about 10,204 English square miles; the population is estimated by a native writer at about 960,000 (1887), mostly negroes and mulattoes, and a few of European descent. The most reliable authorities fix the population at 572,000.

Port au Prince, the capital, has a population of between 40,000 and 60,000 inhabitants. The language is a dialect of French known as French Creole.

Departments.—Department du Sud, Department de l'Ouest, Department de l'Altibonite, Department du Nord, Department du Nord oueste.

Religion.—Roman Catholicism is the religion of the majority of the inhabitants ; all other religions are tolerated.

Education.—Elementary education is free ; there are 14 school districts, 400 national schools, besides private schools and public lycées.

Finance.—The revenue and expenditures were estimated in 1887 at \$6,412,957. Foreign debt, \$4,320,000 ; and internal, \$9,180,000 ; total, \$13,500,000. Besides these figures there is a floating debt of \$500,000 in notes of \$5 each.

Banking.—The National Bank of Hayti has a capital of \$4,000,000, in 200 shares.

Army and navy.—The army consists of about 7,000 men, chiefly infantry. The government guard numbers 650 men, commanded by 10 generals. There is 1 gun vessel of 900 tons, a corvette, and 2 sloops.

Resources and products.—The chief agricultural products are coffee, cotton, cocoa, sugar, etc. Mahogany, logwood, cedar, and other woods, besides honey, hides, wax, some tropical fruits, goat-skins, cotton-seed, orange-peel, old metal, turtle-shell, fustic, lignum vitæ, rags, and pickled limes are exported.

Railways and telegraph.—A contract has been made with a French company for the construction of a railway from Gonaïves to Gros Morne, a distance of about 24 miles.

Commerce.—Owing to the late revolution trade was depressed during the past year. The imports amounted in 1887-'88 to 6,845,597 piasters, and exports to 10,185,366 piasters. The principal articles exported are coffee, cacao, mahogany, logwood, and cotton. The trade is mostly carried on with Great Britain, the United States, France, and Germany. The imports are mostly manufactured dry goods from Great Britain ; flour, rice, and provisions from the United States ; beer from Germany and Holland, and fancy articles and fine goods from France. The duties have been lately increased on coffee 50 cents per 100 pounds, on cocoa 25 cents per 100 pounds, and on logwood \$1 per 1,000 pounds. In 1889 the United States imports

from Hayti were \$3,757,443 and in 1890 \$2,421,221; for the same years its exports thereto, \$3,975,461 and \$5,101,464, respectively.

The subjoined table from the United States official returns indicates its commerce with Hayti for five years:

	1886.	1887.	1888.	1889.	1890.

Imports into the United States . . .	2,603,992	1,752,537	2,918,820	3,757,443	2,421,221
Domestic exports from the United States	2,968,147	3,059,318	4,322,653	3,975,461	5,101,464

In 1890 the leading articles of import into the United States were: Coffee, \$1,270,247; logwood, \$993,110, and cocoa, \$101,396. The values of the principal articles exported to Hayti in the same year are given below.

Articles.	Value.	Articles.	Value.
	<i>Dollars.</i>		<i>Dollars.</i>
Pickled pork	791,957	Lard	199,791
Wheat flour	777,974	Manufactures of iron and steel . .	197,988
Cottons	748,954	Refined sugar	129,714
Fish, dried or smoked	570,087	Butter	112,276
Soap	284,124	Leaf tobacco	98,433
Lumber and timber	270,772	Household furniture	72,302

Money.—In Hayti the monetary unit is the gourde, a silver coin, worth in the United States currency about 96.5 cents. The paper currency in the country is about 10 cents below par (gold). In 1886 silver coins of 10 centimes and 1 and 2 centime pieces of bronze were placed in circulation; there are also 50, 20, and 10 centime pieces placed in circulation by a law of 1880. The circulation consists principally of paper gourdes and copper coins. The value of the paper gourde fluctuates greatly. French gold and silver is used.

Weights and measures.—The weights are about 8 per cent. heavier than the English, and in measures the French metric system is made use of.

The Hawaiian Islands.

The group of islands constituting the kingdom lie in the Pacific Ocean between latitude 19° and $22^{\circ} 20'$ north, longitude 155° and 160° west. The principal islands are Hawaii, Oahu, Maui, Kauai, Molokai, and Lanai.

Executive.—Hawaii (the “Sandwich Islands”) is a constitutional monarchy. The present constitution was proclaimed August 20, 1864, and revised in 1887.

King Kalakaua I, who became King February 12, 1874, died at San Francisco, January 20, 1891. His successor to the throne was Princess Lydia Kamakeha Liliuokalani, the eldest sister of Kalakaua, who was born in 1838, and is married to His Excellency John O. Dominis, governor of Oahu.

Legislative.—The Parliament consists of a House of Nobles and a House of Representatives. The House of Nobles is composed of 24 members, each of whom must have an income of 600 livres a year, and who are elected for 6 years, one-third going out every 2 years. The House of Representatives consists of from 24 to 42 members, elected for 2 years. The two houses sit in joint session, and must be called together every 2 years. There is a privy council, the members of which are appointed by the King; and a cabinet, consisting of ministers of foreign affairs, of the interior, and of finance, and an attorney-general.

Army and Navy.—The naval and military forces consist of 250 men, authorized by law, and a volunteer force, the Honolulu Rifles, of 250 men. All natives are liable to serve, if called upon.

Religion.—All forms of religion are permitted and protected. Nearly all the natives are Christians. The Queen belongs to the Church of England, of which there is a bishop at Honolulu; there is also a Roman Catholic bishop, and ministers of various denominations.

Area and Population.—The total area of the islands is 6,677 square miles. By the last official census (December 27, 1884), the population of the Hawaiian Islands was reported as being 80,578, distributed as follows:

Population.

Natives.....	40,014
Chinese	17,939
Half-castes	4,218
Whites:	
Americans	2,066
English	1,282

* Including recall and cancellation of bonds.

Communications (shipping, railways, mails, and telegraphs).— Steamers connect the islands with the American continent, Australasia, and China. In the inter-island traffic, 18 steamers and a large number of schooners are constantly engaged. In 1888 there were 61 vessels belonging to the islands, of 15,406 tons. There are about 56 miles of railway in the islands of Hawaii, Maui, and Oahu. There are telegraphs in the islands of Maui, Hawaii, between Hawaii and Oahu, and round the latter island; total length, 250 miles; nearly every family in Honolulu has its telephone. In 1889 the general post-office at Honolulu received 882,094 letters and dispatched 534,576. There were 56 post-offices.

Weights and Measures.—The same as in the United States.

Currency.—Gold coins of the United States are legal tender for more than \$10, and Hawaiian and United States silver coins for smaller amounts. Paper money is not in use, except in the form of treasury certificates for coin deposited there.

Honduras.

Honduras is situated in latitude $13^{\circ} 10'$ to $16^{\circ} 2'$ north, longitude 83° to 90° west, having on the north, the Caribbean Sea and Gulf of Honduras; west, Guatemala; southwest, Salvador and the Bay of Fonseca; and on the southeast, Nicaragua. The country is, in general, mountainous but well watered, its principal rivers flowing into the Caribbean Sea on which are most of its ports. Amapala is the only Pacific coast port. Near the sources of the Goascoran and the Humuya there occurs a pass in the Cordilleras chain through which it is proposed to construct a railway from the Caribbean Sea to the Pacific Ocean.

Executive.—President of the Republic elected by a direct vote of the people for a period of 4 years. The constitution requires that the President shall be a native of Central America and a resident of Honduras for 5 years; that he be 30 years of age, not in holy orders, that he have at least one child, and at least five thousand dollars invested in real estate in the Republic. The President is assisted by two secretaries of state, appointed by himself. The secretaries of state must be natives of Central America, residents of Honduras for 2 years, 30 years of age, of recognized education and good habits, and the owners of at least \$1,000 worth of real estate.

Legislative.—This power resides in a Congress whose members are elected by the people, one for every 10,000 population. One-half of the representatives are elected every 2 years, and serve for 4 years. They are eligible for two terms only. The Congress meets every 2 years, and the sessions last 40 days. To be eligible for Congress a candidate must be a native of Central America, a resident of the State in which he is a candidate, 30 years of age, the father

of one or more children, and the owner of at least \$1,000 worth of real estate.

Judicial.—The judicial power is vested in two courts, one established at Comayagua and the other at Tegucigalpa, each having three magistrates. These officers are appointed for life or good behavior, and can not resign except after 2 years' service. Minor courts are held in the several provinces.

Area and Population.—Honduras is the second in size of the Central American Republics, having 47,090 square miles, and a population of 431,917. The country is divided into thirteen departments, as follows:

Departments.

Tegucigalpa.	Itibuca.	Yoro.
El Paraiso.	Gracias.	Colon.
Choluteca.	Copan.	Islas de la Bahia.
La Paz.	Santa Barbara.	
Comayagua.	Olancho.	

Cities of over 10,000 Inhabitants—Tegucigalpa, 12,600; Comayagua, 10,000.

Religion.—The constitution declares that the religion of the Republic shall be Roman Catholic, but tolerates all others.

Education.—There are 2 universities and several colleges, and 573 public schools, with an average daily attendance of 20,518 children. The Government is paying especial attention to public instruction.

Finance.—The revenues of the country are derived from import dues and taxes upon certain articles of Government monopoly. They amounted in 1889 to the sum of \$2,094,660, while the expenditures for the same year were \$2,077,552. The national debt contracted several years ago with European houses for the purpose of building an interoceanic railroad amounts to \$30,218,304.

Army.—The standing army consists of 500 men, with a militia force of 26,767 men. All able-bodied men between the ages of 21 and 25 must render active military service for at least 1 year.

Resources and Products.—The natural conditions of the country are such that it is said that nowhere in the world can a greater variety of products be found, as the staples of all climates grow naturally

and abundantly. The mineral resources are enormous, but are mostly idle because of lack of capital and labor and the absence of transportation facilities.

Railways.—There are 69 miles of railway connecting Puerto Cortez with San Pedro Sula, but only 37 miles are in operation at present because of the destruction of a bridge across the River Chamelicon. Three other lines are projected, one between Puerto Cortez and Truxillo, 150 miles; between Truxillo and Juticalpa, 200 miles; and the third between Truxillo and Roman River, 20 miles.

Telegraph and Postal Service.—There are 1,717 miles of telegraph lines in operation, owned by the Government; 16 offices, and an average of 93,000 messages sent annually. These lines also connect with the cable to North and South America at La Libertad, Salvador. The postal service of Honduras is being improved, but the mails are mostly carried by Indian messengers who cross the mountains on foot by trails known only to them.

Banking.—There are two banks at the capital, the Central or El Banco Centro Americano, and Banco Nacional Hondureño.

COMMERCE.

Hardware, silks, and cottons are the principal imports into Honduras. Bananas, cocoanuts, cattle, indigo, hides, India rubber, bar silver, gold bullion, sarsaparilla, and various woods are chiefly exported.

In the commercial year of 1887-'88 the exports amounted to 3,350,664 pesos, classified as mineral products to the amount of 1,673,449 pesos; vegetable products, 1,221,716 pesos; animal products, 367,379 pesos; coined gold and silver 78,853 pesos, and manufactures 9,265 pesos.

The following table indicates the destination of the exports for 1887-'88 and their value by principal articles. No data of imports are accessible, and the official returns are incomplete.

Exports, 1887-1888.

Country of destination.	Value.	Products.	Value.
	<i>Pesos.</i>		<i>Pesos.</i>
United States	2,790,405	Bar silver	1,583,085
Central America	331,959	Bananas	866,714
Great Britain	105,088	Cattle	265,368
France	81,566	Cocoanuts	110,231
Belgium	30,345	Gold bullion	78,860
Germany	6,004	Indigo	78,645
All other countries	5,297	Ox hides	57,955
		Gutta percha	58,928
		Sarsaparilla	86,282
		Mahogany and cedar	32,482
		All other articles	182,164
Total	3,350,664	Total	3,350,664

The commerce of the United States with Honduras for the last 5 fiscal years, according to the United States official returns, is as follows:

	1886.	1887.	1888.	1889.	1890.
	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>
Imports into the United States...	730,559	857,919	959,331	1,215,561	984,404
Domestic exports from the United States	428,104	425,741	672,796	618,973	522,631

Money, Weights, and Measures.—The money used in Honduras is made of gold, silver, and copper, and most of it coined in the country. The gold coins are of \$1, \$5, and \$10. The silver coins are: Un peso = 100 cents (77.1 cents United States); medio peso = 50 cents; peseta = 25 cents; diez centavos = 10 cents; cinco centavos = 5 cents; un centavo = 1 cent copper coin. The standard of measurement is la vara, which is equal to 3 feet (1 English yard = 1.0941 varas); the league has 6,666⅔ varas; the manzana = 10,000 square varas; the caballeria = 64 manzanas. The standard of weights is the pound = 16 ounces (1.014 pounds avoirdupois); the arroba = 25 pounds; the quintal = 100 pounds.

Mexico.

The Republic of Mexico is situated immediately south of the United States, extending from latitude $14^{\circ} 30'$ to $32^{\circ} 42'$ and from $86^{\circ} 46' 8''$ to $117^{\circ} 7' 8''$. The northern boundary is the United States; eastern, the Gulf of Mexico and Caribbean Sea; southeastern, Guatemala and British Honduras; and southern and western, the Pacific Ocean.

Executive.—The President is elected by popular vote for a term of 4 years from the 1st of December, upon which date he enters upon the functions of his office. He is assisted by a cabinet composed of six secretaries, to wit: Secretary of foreign affairs; Secretary of Government, who has charge of all matters relative to the political and constitutional government of the Republic and controls the Departments of public health, printing, prisons, etc., corresponding to the United States Secretary of the Interior; Secretary of justice and public instruction, Secretary of public works, Secretary of the treasury and public credit and Secretary of war and navy. Salary of President, \$30,000 a year; salary of cabinet officers, \$8,000 a year.

Legislative.—The Congress is composed of two houses. The Deputies or Representatives of the nation are elected by the people for 2 years in the proportion of one for every 40,000 of the inhabitants or a fraction over 20,000. There are two Senators from each State and two representing the Federal District; they are elected indirectly by the people for the term of 4 years, and half of the Senate is renewed every 2 years. Congress has two sessions each year, from September 16 to December 16, and from April 1 to May 31; this second session is principally devoted to the appropriation bills and the financial affairs of the nation. The members of both houses receive salaries of \$3,000 per annum.

MEXICAN BUILDING
AT PARIS EXPOSITION

Judicial.—The judicial power is invested in the Supreme Court and the circuit and district courts. The first is composed of eleven principal judges and four substitutes, one attorney-general and one solicitor-general. They are selected by popular vote and hold office for 6 years.

Area and Population.—Mexico has an area of 751,494 square miles and a population of 11,601,347. About 19 per cent. of the population are of Spanish descent, 38 per cent. Indians, and 43 per cent. are of mixed races and some foreigners.

The following tables show the area and population of the States and the population of the principal cities and towns in the Republic :

Religion.—The church is independent of the state and the constitution forbids Congress establishing or prohibiting any special religion whatever. Marriage is a civil contract, and the establishment of monasteries and religious orders is not permitted. In 1889 there were 119 Protestant churches in the Republic, but the greater part of the population profess and conform to the Roman Catholic faith. No ecclesiastical body can acquire landed property.

Education.—Great attention is being given to school matters in Mexico, and in almost all of the States education is free and obligatory. Primary education is principally at the cost of the munic-

ipalities; there are many private and sectarian elementary schools throughout the Republic. In 1888 there were 10,726 primary schools with 543,977 pupils. There are a great number of secondary schools and seminaries, colleges, and professional schools, including schools of law, medicine, military, and naval academies; engineering, commercial, and agricultural colleges, musical conservatories; an academy of fine arts, a deaf and dumb institute, a normal college, besides other schools and seminaries in nearly all of the States. The number of scholars attending the higher schools is estimated at 21,000. There are public libraries in the capital and in all the large cities of the Republic. The national library contains 150,000 volumes, and there are eight other libraries in various cities containing over 10,000 volumes each. In the national archives are stored most valuable documents and manuscripts relating to the early history of the Republic. There are many museums devoted to scientific and educational purposes. The Academy of Paintings, San Carlos, contains many fine paintings, sculptures, etc., and the Museum of Antiquities and Natural History is full of interesting specimens and objects. There are 3 meteorological observatories. About 387 newspapers and other publications are published in various parts of the Republic.

Finance.—The revenues and expenditures for 1890-'91 are as follows:

From customs duties and other taxes, \$41,770,000; expenses for the same period, \$38,452,804. The external debt contracted in London is 10,500,000 pounds, and the total debt in 22,721,335 pounds sterling.

Army and Navy.—The army consists of 17,307 infantry; 655 engineers; 1,604 artillery; 5,484 cavalry; police, 1,950; gendarm-erie, 244; a total of 27,244. There are over 3,000 officers. This number in time of war can be augmented from the reserves to 160,963 men. The navy consists of a fleet of 2 unarmored vessels and 3 small gun boats, with 79 officers and 390 men.

Resources and Products.—Owing to its geographical position Mexico enjoys climatic advantages above most countries. For the same reason her agricultural possibilities are illimitable. From the torrid coast line, where tropical vegetation is rank, to the green

slopes of the Cordilleras, where reigns everlasting spring, where the forests and woods are dense with valuable timbers, medicinal plants, dye woods, and other trees, and herbs of commercial value, thence up to the summits of her snow-capped mountains Mexico presents a variety of vegetation at once picturesque and unusual. From Vera Cruz to the City of Mexico, nearly 8,000 feet above the sea level, the plants of various zones and climates greet the eye; fields of sugar cane and groves of banana, palm, cocoanut, orange, lemon, citron, and many other similar fruits flourish under the tropical sun. At an altitude from 3,000 to 4,000 feet the vegetation begins to change; the plants, fruit trees, and flora assume the characteristics of those of the temperate zone; still farther up oaks, pine, cedar, and resinous plants mark the complete transition from a hot to a cold climate until at last scrub plants and mimosas are lost in the snow line nearly 11,000 feet above the sea level. Mines of gold, silver, mercury, lead, and copper abound. Silver mines are more largely developed than those of the other metals and furnish employment to over 100,000 men. There are some cotton and wool factories, paper-mills and earthen ware works. Live stock of all kinds is raised in Mexico. The principal crops are maize, beans, (frijoles) rice, coffee, tobacco, sugar cane, cacao, cotton, barley, and, in some States, wheat is grown. Textile plants in great variety abound.

Railways and Telegraph.—In 1889 there were open for traffic 5,812 miles of railroad and 27,861 miles of telegraph, of which 14,841 belonged to the Federal Government. There were 767 offices. There was a net work of telephone wires of 4,174 miles. There are 1,448 post-offices, and during 1889 the inland post carried 31,665,123 letters and packets, and the international 5,843,699.

Banking.—There are eleven mints in Mexico, and many Mexican silver dollars are shipped to China and other places in the Eastern Archipelago. The two most important banks are the National and the Bank of London and Mexico. The National Bank of Mexico has a capital of \$20,000,000. The Bank of London and Mexico has a capital of \$1,500,000. There are other banks, and concessions have lately been granted to State banks for the purpose of advancing loans for agricultural and mining purposes.

COMMERCE.

Mexico maintains active commerce with Germany, Spain, the United States, France, and England, and in lesser degree with Belgium, Italy, Central and South America. There are ten fine ports on the Gulf of Mexico and ten on the Pacific coast. The principal articles of export are: Silver, henequin, coffee, pearls, tobacco, vanilla, hides, gold, and copper. The imports are: Machinery, manufactures of cotton and wool, house furnishings, carpets, curtains, window shades, wall papers, fancy articles, and furniture of all kinds. England furnishes 300 per cent. more than the United States of carpets, rugs, window shades, and curtains, and the United States supplies more furniture than any other country trading with Mexico. The tables annexed show the commerce of Mexico for several years and the values of the chief articles of import and export.

Imports into five principal countries by principal articles.

Money.—The monetary unit is the silver peso of 100 centavos, 0.869 ounce in weight, 0.902 fine; its nominal value is that of the dollar of the United States; actual price about 83.7 cents (1891). The gold coins are the 20, 10, 5, 2½, and 1 dollar pieces. The silver coins are the peso, 50 centavos, 25 centavos, and 10 centavos. There are copper or nickel coins of 5, 2, and 1 centavos. The gold coinage is not in general circulation.

Weights and measures.—The metric system of weights and measures became compulsory on January 1, 1884, but the old Spanish measures are still used. The vara of 3 piés, or 36 pulgadas, = 32.95 inches; the square vara, = 1,085 square inches; the libra of 2 marcos, or 16 onzas, = 1.014 pounds avoirdupois; the arroba (¼ of a quintal) of 25 libras, = 25.357 pounds avoirdupois; the galon of 4 azumbres, or 8 cuartillos, = 0.964 gallon; the fanega of 12 almuds, or 36 cuartillas, = 1.55 bushel.

PRICES OF PUBLIC LANDS.

The President of the Republic has approved the following schedule of prices, according to which all sales of public lands in the States, the Federal District, and the Territories of Tepic and Lower California, in the Republic of Mexico, shall be made in 1891 and 1892:

Price for hectarea.

Nicaragua.

The Republic of Nicaragua is bounded on the north by Honduras, on the south by Costa Rica, on the east by the Caribbean Sea, and on the west by the Pacific Ocean. The eastern part of this territory was first discovered in 1503 by Columbus, in his fourth voyage, when, after touching at Honduras, he rounded the cape named "Cabo Gracias á Dios" and coasted south along its entire shore. The Pacific coast was discovered in 1522 by Gil Gonzalez de Avila, who at the same time penetrated to the lakes.

Executive.—This power is exercised by a President and a cabinet of 7 members. The former is elected by the people for a term of 4 years, while the latter are appointed by the President to take charge of the departments of foreign affairs, public instruction, finance, interior, justice, war, and public works.

Legislative.—This power is vested in a Congress of two houses. The members of the House of Representatives are 21, and those of the Senate 18; all of them elected by universal suffrage, for 4 and 6 years, respectively. The Congress meets every 2 years.

Judicial.—This power is vested in a supreme court composed of two chambers; one resides in Leon and the other in Granada. There are other tribunals and juries that decide civil and criminal cases.

Area and Population.—The Republic of Nicaragua is the largest of the Central American States, and has an area of 49,500 square miles, with a population estimated, in 1883, at 350,000 inhabitants. The territory is divided into nine departments, as follows:

Departments.

Segovia.
Chinandega.
Leon.

Matagalpa.
Granada.
Rivas.

Chontales.
Managua.
Masaya.

The central portion of the country is occupied by the main Cordillera, running from north to south, with an altitude hardly ever greater than 1,000 feet. West of this is a great valley about 125 feet

above the sea level; in it are situated the great lakes of Nicaragua and Managua.

Managua, the capital, contains about 18,000 inhabitants. Other chief cities are Leon, Granada, Rivas, and the principal port, Carinto.

Cities of over 1,000 inhabitants.

Leon.....	25,000	Masaya.....	10,000
Managua.....	18,000	Rivas.....	8,000
Granada.....	15,000	Realejo.....	5,000
Chinandega.....	12,500	Greytown.....	1,200

Religion.—The people of Nicaragua are mostly Catholics, but there is absolute freedom of religious worship.

Education.—A great deal has been done of late years to improve the system of education, and for that purpose teachers from the United States and Europe have been secured. There were in 1887, 251 schools, with an attendance of 11,914 children, besides a number of colleges and private schools.

Finance.—The revenues in 1888, amounting to \$3,814,140, were mostly derived from custom-house duties and government monopolies on spirits, tobacco, and gunpowder. The expenditures were \$4,024,602, for salaries of officers, interest on the public debt, and the maintenance of an army. Nicaragua has no foreign debt, and her local debt amounts to only \$1,592,000.

Army.—There are 700 soldiers in the regular army and 25,000 belonging to the militia.

Resources and Products.—The products of Nicaragua are numerous and valuable. In the regions of the northwest coffee is grown in large quantities; Brazil woods are found in abundance in the forests. Plantations of sugar, indigo, and cacao abound everywhere between the lakes and the Pacific. Potatoes and maize thrive in the uplands, while on the eastern side of the lakes is a great grazing country, supporting thousands of cattle. Dense forests, rich in rubber, cedar, mahogany, and dyewoods are common. All over the country maize, plantains, bananas, and other tropical fruits grow in abundance. The rich mines of various metals can be counted as one of the principal features of the country. By reason of the recent discovery of gold, a new mining law has just been adopted by the Government.

Railways.—There is only one line in operation. It is divided into two sections. The first, from Corinto to Momotombo, runs for 58 miles; and the second, from Managua to Granada, for 32 miles. It is proposed to build a line from San Juan del Sur via Rivas to San Jorge, on Lake Nicaragua. Also a line from Chinandega to El Viejo, 19 miles, from Matagalpa to the east side of Lake Managua; and a concession has been given to build a line which will connect Matagalpa with the eastern coast, a distance of 90 miles.

Postal and Telegraphic Service.—In 1884 the post-offices of the country carried 1,684,935 pieces, at an expense of \$25,000, while the revenues amounted only to \$12,000. In 1890 there were in Nicaragua 1,549 miles of telegraph, which united the cities of Managua, Granada, Rivas, Corinto, Masaya, Leon, San Carlos, Greytown, and San Juan del Sur. At this last point the office of the submarine cable is kept, and dispatches from any part of Nicaragua can be sent all over the world.

Banking.—There is but one incorporated bank, through which most of the business of exchanges, discounts, etc., is done, but many private capitalists carry on a banking business.

Commerce.—The imports in 1888 amounted to \$2,146,000, being the value of manufactured goods brought from the European and American markets. The articles exported during the same year were principally coffee, rubber, woods, gums, indigo, sugar, cacao, and bananas. The exports were valued at \$1,522,000.

Imports into Nicaragua in 1888 by countries.

	Dollars.
Germany	766,000
Great Britain	252,000
United States	395,000
France	351,000
Central America	268,000
Italy	42,000
Colombia	20,000
Spain	16,000
Chili	8,000
All other countries	28,000
Total	2,146,000

The exports went principally to Great Britain 665,000 pesos, to Germany 253,000 pesos, to France 246,000 pesos, to the United

States 234,000 pesos, and to Central America 196,000 pesos. The leading exports are India rubber and coffee. In 1887 bananas to the value of 249,433 dollars were exported.

The commercial intercourse of the United States with Nicaragua for 5 years ending June 30 is indicated in the following table, based upon the United States official returns :

	1886.	1887.	1888.	1889.	1890.
Imports into the United States	<i>Dollars.</i> 1,067,902	<i>Dollars.</i> 1,662,162	<i>Dollars.</i> 1,496,171	<i>Dollars.</i> 1,747,246	<i>Dollars.</i> 1,655,690
Domestic exports from the United States	471,671	701,151	861,156	900,813	1,270,073

The chief imports into the United States for the year ending June 30, 1890, were: Coffee, \$642,467; crude India rubber and gutta-percha, \$502,271; bananas, 251,063; hides and skins (other than fur skins), \$154,817, and wood, unmanufactured, \$52,060. The United States exported principally in that year iron and steel and manufactures thereof to the value of \$292,748; wheat flour, \$115,154; wood, and manufactures thereof, \$105,783; provisions (comprising meat and dairy products), \$104,489; cottons, \$99,911, and chemicals, drugs, and dyes, \$69,500.

Money, weights, and measures.—The Peruvian and Chilian sol, and the French 5 franc piece, are received in the country at their par value of \$1, and are the coins most used. The small coins of 5, 10, 20, and 25 cents are generally of American and Spanish coinage.

The standard of measurement is la vara, which is equal to 3 feet (1 English yard = 1.0941 varas); the league has 6,666 $\frac{2}{3}$ varas; the manzana = 10,000 square varas; the caballeria = 64 manzanas. The standard of weights is the pound = 16 ounces (1.014 pounds avoirdupois); the arroba = 25 pounds; the quintal = 100 pounds.

THE NICARAGUA CANAL.

A concession for this ship canal was granted by the Republic of Nicaragua to the Nicaragua Canal Association of New York in April, 1887.

The Maritime Canal Company was organized for the purpose of

executing the work, and is proceeding with the construction of the canal. This company was incorporated by the United States by act of Congress, on the 20th of February, 1889.

The Nicaragua Canal Construction Company is now executing the work under contract with the Maritime Canal Company.

There was granted to the company of execution one year in which to commence the definite surveys, and one and one-half years in which to conclude the surveys and begin the construction of the canal, and ten years additional for its completion.

On the 8th of October, 1889, Nicaragua, by formal acknowledgment, recognized the initiation of the work of construction, and in September, 1890, appointed a commission for the purpose of making an examination as to the observance by the company of the provision in its concession, which required the expenditure of at least \$2,000,000 within the last year of the second term. With the report of this commission before it, Nicaragua made formal acknowledgment of the fulfillment of the condition above referred to.

The total length of the canal route is 169.5 miles. The summit level is Lake Nicaragua, 110 feet above tide water. This is reached by means of three locks on either side. The canal is to have a bottom width of from 80 to 120 feet, and an upper width of from 80 to 288 feet. The depth is to vary from 28 to 30 feet. Of the entire route 142 miles are included in the river San Juan, the lake, and in the artificial basins. The total length of the summit-level reach is 151 miles, and will be available for rapid navigation.

The total estimated cost of the canal is \$90,000,000, exclusive of bankers' fees, commissions, and interest during the construction.

With tonnage dues at the rate charged on the Suez Canal a total of \$17,500,000 revenue is assumed as probable. It is estimated that the canal will occupy six years in its construction.

The officers of the Canal Construction Company are as follows: President, Warner Miller; Vice President, A. C. Cheney; Treasurer, Henry R. Hoyt; Secretary, J. W. Miller; Attorneys, Daly, Hoyt & Mason; Chief Engineer, A. G. Menocal; General Manager, Geo. W. Davis. The office of the company is at No. 44 Wall street, New York City.

Paraguay.

Paraguay is situated in the central part of South America between $22^{\circ} 4'$ and $27^{\circ} 35'$ south latitude and $54^{\circ} 32'$ and $58^{\circ} 40'$ of longitude west. It is divided by the Paraguay River into Eastern and Western Paraguay, or, as the latter is called, Chaco. It is completely surrounded by the Republics of Brazil, Argentine, Bolivia, and Uruguay, from which it is partly separated by the rivers Parana, Paraguay, and Pilcomayo, and from Brazil by the Apa River and a range of hills which are not over 2,200 feet above the level of the sea. Paraguay is about the size of England, and one twenty-fifth that of the United States. The result of a survey made in 1870 gave the land in miles as follows: Arable, 42,600; hills and forests, 27,000; yerba fields, 5,040, besides 15,360 miles of private lands, making a total of 90,000 miles. It is estimated that there are now about 500,000 acres under cultivation.

Executive.—The executive power is vested in a president, elected for four years by an electoral college, who can not be re-elected until after an interval of two terms. He receives an annual salary of \$9,000, and the vice-president, elected for the same term, receives a salary of \$4,500. The cabinet is composed of five ministers, to wit: Interior; foreign affairs; finance; justice, religion, and public instruction; war and marine. These ministers each receive \$3,000 per annum.

Legislative.—There are two houses of Congress, a senate and a chamber of deputies. The members are elected directly by the people by plurality of suffrages. The senators are elected for six years, but are renewed by thirds every two years and are named in the ratio of one for every 12,000 inhabitants. The deputies are

elected for four years, in the proportion of one for every 6,000 inhabitants. Salary for each senator and deputy, \$1,000 per annum.

Judicial.—The judicial or supreme court consists of three judges, the civil, commercial, and criminal, with headquarters in Asunción, and justices of the peace throughout the Republic have powers regulated by special acts. Judges hold office during four years. The Republic is divided into departments, which are subdivided into 23 cantons or electoral districts, each having its own municipal government vested with the proper authority. The Chaco, or western department, is divided into two military departments, and besides these there are four other military districts located on the frontiers and river coasts of the Republic. The civil code of the Argentine Republic is in force in Paraguay with an additional clause governing the civil condition of persons. The code of commerce of the Argentine Republic, which is based upon the Spanish, the penal code, the code of arts, sanctioned June 22, 1887, besides the law of jurors, the rural code, and the military code, were framed especially for Paraguay upon subjects pertaining to their titles. Administrative legislation comprising the laws relating to public lands, mountainous lands, yerba fields, mines, municipal regulations, money, customs duties, bridges, patents, stamp paper, telegraphs, immigration, colonization, etc., is compiled in two volumes of the official register just published and covering the period from the reorganization in 1870 to date.

AREA AND POPULATION.

The area of Paraguay is 91,970 square miles, and the population is 430,000, besides a large number of uncivilized Indians.

The following list gives the population of some of the principal towns:

Asunción	24,838	San Estanislao.....	7,000
San Pedro.....	12,000	Itangua	6,000
Concepción	11,000	Ita.....	5,000
Villa Rica.....	11,000	Paraguari.....	5,000
Caazapa	9,000	Villa Humaita.....	4,205
Luque	8,000	Villa Pilar.....	14,400
Carapegua	15,000	Jaguaron	3,106

NOTE.—The figures of the above towns, excepting the first four, include the population of the district of the same name. The first four refer only to the towns.

Religion.—The established religion is Catholic, but all others are tolerated. The head of the State church is a bishop at Asunción, and there are priests in every parochial district. The head of the church must be a Paraguayan.

Education.—The official and common language is Spanish, but the Guarani dialect is still spoken by the lower classes. Since November 1, 1881, primary education has been compulsory for children of both sexes. Besides the bureau of education, there is a council appointed to promote learning among the people. The schools are supported by a special tax levied under the educational law of January, 1888. In 1887 there were 138 schools, with an average attendance of 15,180 pupils of both sexes. In 1888 there were 160 schools, attended by 28,526 pupils. The amount expended for school purposes in 1887 amounted to \$158,459; in 1888, to \$289,968.42. The national college occupies one of the finest buildings in Asunción. The Lyceo de Niñas is in charge of a North American lady and is attended by forty young ladies belonging to some of the best families in Asunción. Asunción has a public library, five daily papers, and one illustrated monthly. There are many charitable institutions, hospitals, asylums, and mutual aid societies.

Charitable Institutions.—There are hospitals, orphan asylums, and houses of refuge for the poor, crippled, and indigent. The foreign population have various associations to attend to the necessities of their countrymen and members in cases of illness, etc. The best organized are those of the Spaniards, Italians, and Germans, which are amply equipped with funds.

Finances, Revenues, and Expenditures.—The total receipts of the Government for 1888 amounted to \$3,551,445.54. The sources of revenue were as follows: Custom dues, \$1,389,132.10; receipts from various sources, \$246,868.29; receipts from sales of public lands and "yerbales," \$1,915,445.15. Compared with the receipts of 1887 we find an excess in favor of 1888 of \$495,352.08. The national debt was reduced on January 1, 1888, to \$1,068,891.53, and is distributed as follows: Public funds, \$21,699.20; bills of exchange, \$102,962.33; fiduciary titles, \$944,230. All the interest upon this debt as well as

that accruing upon the English loans are paid with the most scrupulous punctuality. The foreign debt was reduced by treaty in London, December 4, 1885, to \$4,250,000. The interest on this debt is 2 per cent. for the first five years; 3 per cent. for the five following years, and 4 per cent. for the remainder of the time. From the eleventh year a sinking fund payment of one-half per cent. will be made. All these obligations are promptly met by the Paraguayan Government.

Army and Navy.—The army consists of 623 men organized in 1 battalion of infantry, 2 squadrons of horse, and 1 battery of artillery. There is also a national guard which may be called out in time of emergency. The navy has one screw steamer of 440 tons carrying 4 guns. There are two other small steamers in the service.

Resources and Products.—In 1887 there were 730,000 sheep, 32,000 horses, 62,000 goats and other domestic animals. Besides yerba, the principal product, tobacco, corn, rice, wheat, manioc, cotton, barley, and sugar are grown. Only about 158,100 acres of land were under cultivation in 1887. There is no country in the world with greater variety of woods of all kinds applicable to industry. Amongst those used for tanning purposes may be mentioned the algaroba and quebracho; for dyeing—algarobilla, indigo, annotto, used for coloring butter, cheese, etc., and many others. Resins, dragon's blood, copal, lignum-vitæ, etc., balsams in many varieties, gum elastic, etc., abound. Amongst the indigenous textile plants for clothing may be mentioned cotton, which gives a plentiful crop; ramie, jute, palm, pineapple, mapajo and other fibrous plants, the latter producing more luxuriantly than cotton, and used by the natives in the manufacture of clothing. Of medicinal drugs, we find copaiba, rhubarb, sassafras, jalap, sarsaparilla, nux vomica, and licorice. The fauna is similar to that of Brazil and the Argentine Republic and comprises monkeys, tapir, peccary, armadillo, carpincho, deer, tiger cat, nutria, chinchilla, and many others. Birds in endless variety fill the air with song and vie with the blossoms of the woods in brilliant coloring. The rivers swarm with fish of good quality and carry upon their surfaces many varieties of sea fowl, wild geese, and ducks. American ostrich abound.

Mineral.—Quartz, agate, onyx, granite, basalt, saltpeter, white clay, marble, carbonates, gypsum, kaolin, magnesium, iron, copper,

quicksilver, etc., exist in more or less quantities, and are all ready at hand for use in mechanics, arts, and sciences.

Manufactories.—Primitive stills for distilling the juice of the sugar cane into rum may be found in almost every village of Paraguay. There are two sugar mills and two steam flouring mills, two steam soap factories, two macaroni factories, two match factories, a manufactory of artificial ice, two breweries, a few steam sawmills, several tanneries, numerous brick factories, and two factories for making vermicelli, which is used in one of the national dishes known as *sopa de fideos*, a mixture of boiled vermicelli, tomatoes, and eggs, making a very palatable soup. An extract from Consul Hill's report will be found interesting:

The potteries of Ita produce some very curious and excellent articles. Towels and other articles are made at Aragua of native materials. The women throughout the country make very intricate puzzle rings of gold, and handkerchiefs and embroidery of nanduty lace, which are famous in this part of South America. All these are remarkable for the delicacy of work and the originality of design. An American is engaged near Aragua in the extraction of essences from oranges, and hopes for good results. The essences find a European market.

Railways and Telegraph.—From Asunción to Villa Rica there is a railway 92 miles in length, with a telegraph, and another line of telegraph connecting Asuncion with the Argentine Republic. The proposed railway to Bolivia has been partly surveyed and the work is being pushed forward. A project for a line from Villa Pilar to Paraguari is before the Paraguayan Congress. A tramway extends from the port of Asuncion to Villa Maria and there are other tramways in the Republic. Several fine lines of steamboats connect Paraguay with Buenos Ayres and Montevideo, through which ports the commerce of Paraguay is carried on. Asunción has an extensive network of telephonic wire.

Post-Offices.—In 1888 the interior postal communications numbered 256,267; exterior, 282,826—a total of 539,153 letters, newspapers, etc., transmitted.

Banks.—There are several banking houses in Asunción, the most important being the Banco Nacional, Commercial, Territorial and the Hypothecary Bank; they were all established by private

capital and pay good profits. The National Bank is the oldest, and though private, is patronized by the Government. It is authorized to issue notes and enjoys other privileges, amongst them that of establishing branches in all of the departments. According to the last report made by the director it did a business in 1887 of \$40,949,574.21, being \$12,194,471.54 in excess of the previous year. The deposits and payments of the year 1886 amounted to \$23,491,981.36, being an excess over those of the year 1887 of \$9,193,682.86. The total profits of the year 1887 were \$216,317.93, enabling the bank to pay a dividend to the stockholders of 15 per cent.

COMMERCE.

The total value of imports and exports for the year 1887 amounted to \$4,447,726.58; in 1888 it reached \$5,878,466.30, an excess over 1887 of \$1,430,639.72. The imports and exports of 1888 were divided as follows: Imports, \$3,289,757.77; exports, \$2,588,608.53; excess of imports, \$701,149.24.

The raw material produced by Paraguay is exported to, and manufactured articles are imported generally from, Montevideo and Buenos Ayres, which monopolize the trade with Paraguay. The exports may be summed up in the following articles :

	Kilos.		Kilos.
Yerba mate	6,000,000	Hides	100,000
Tobacco	7,000,000	Oranges	50,000,000
Cigars	25,000,000	Timber	500,000

In lesser quantities are also exported starch, preserved fruits, lumber, railway sleepers, essences, sarsaparilla, horsehair, ostrich plumes, deerskins, etc. The principal articles imported by Paraguay are sugar, fodder, flour, salt, sail, beer, wine, crockery, calicoes, and in fact all kinds of dry goods. The commerce of Paraguay during the seven years named shows the following values :

Year.	Imports.	Exports.	Year.	Imports.	Exports.
	<i>Dollars.</i>	<i>Dollars.</i>		<i>Dollars.</i>	<i>Dollars.</i>
1881.....	1,204,469.17	1,928,548.79	1885....	1,524,000.00	1,493,000.00
1882.....	1,320,125.97	1,650,679.19	1886....	1,621,000.00	1,571,000.00
1883.....	953,076.62	1,766,459.70	1887....	2,442,116.00	2,005,610.68
1884.....	1,448,000.00	1,572,000.00	1888....	3,289,757.77	2,588,608.53

The excess of imports over exports would be largely reduced were account taken of the exports of lumber and other productions which are free of duty, and are therefore not reported. About 500,000 pesetas worth of goods are annually imported which are free of duty, such as machinery, agricultural implements, seeds, mineral coal, bar iron, printing presses and type, books, typographical and lithographic appliances, scientific articles, art materials, soda, etc. These imports may be proportioned as follows: From England 48 per cent., and the remainder from France, Italy, Germany, Spain, Argentine Republic, Uruguay, Belgium. Navigation is very active, principally on the Paraguay River, where it is not unusual to see in the port of Asunción from thirty to forty vessels carrying the flags of nearly all countries.

Money.—The national dollar or peso equal to 5 Spanish pesetas, is equivalent to 73 cents in the United States (1890). The dollar is subdivided in 100 centavos. Gold and silver currency of all countries is received and circulates freely. Since the end of the war of 1865-'70 an extensive paper currency has been introduced into the Republic.

Weights and Measures.—One tonelada, 20 quintals = 2,028 pounds avoirdupois; 1 quintal, 4 arrobas = 101.40 pounds avoirdupois; 1 arroba, 25 libras = 25.35 pounds avoirdupois; 1 libra, 16 onzas = 1.014 pounds avoirdupois; 1 onza, 8 drachms = 1.014 ounces avoirdupois; 1 pipa, 191 frascos = 2.438 hogsheads; 1 barrel, 32 frascos = .8028 barrel; 1 frasco, 4 cuartos = .8 gallons; 1 cuarto = .8 quarts. For measuring grain, lime, salt, etc., the fanega of 12 almuds is used, which is equal to 1.547 bushels.

Long Measure.—The Paraguayan square league is equal to 4,307 acres, being 1,743 hectares. One legua, 5,000 varas = 2.6 miles; 1 cuerda of $83\frac{1}{2}$ varas = 76.2 yards; 1 vara of 3 piés = $2\frac{3}{4}$ feet; 1 pié of 12 pulgadas = 11 inches; 1 pulgada of 12 lineas = .9169 inch; 1 linea = .0763 inch.

The metric and decimal systems are in general use throughout the Republic, although the old weights and measures are still somewhat employed.

Peru.

Peru is situated between latitude $3^{\circ} 25'$ and 18° south and longitude $67^{\circ} 30'$ and $81^{\circ} 20'$ west, having Ecuador on the north, Bolivia and Brazil on the east, on the south Chili, and on the west the Pacific Ocean. The climate of Peru is agreeable and healthful in the interior. In summer the temperature ranges from 80° to 84° and in winter from 60° to 64° Fahr.; the climate of the coast is sultry and the soil for the greater part arid and destitute of timber.

Executive.—Like the United States, the Republic of Peru elects a President for four years. There are two vice presidents, elected for four years, who take the place of the President in case of death or incapacity. The President appoints his cabinet of five ministers.

Legislative.—Politically, the Republic is divided into nineteen departments, and these subdivided into provinces. There are two houses, the Senate and the House of Representatives; the former is composed of deputies from the provinces in the proportion of one for every 30,000 inhabitants or a fraction thereof exceeding 15,000. The representatives are named by the electoral colleges of the provinces of each department. The parochial electoral colleges send deputies to the provincial colleges, who send the representatives to congress in the proportion of two deputies when a department has two provinces and one other for every other two provinces.

Religion.—The Roman Catholic is the recognized religion of the State, but other religions are tolerated.

Education.—Primary public schools are maintained by the municipal governments, and high schools by the Government in the capitals of the departments. There are in existence 1,177 primary schools, of which 813 are municipal, 333 private, and 31 are maintained by charitable or religious societies. Pupils are enrolled to the number of 71,435, of whom 48,456 are boys and 22,979 girls.

Of the total, 53,276 are in the public schools. The average attendance is about 70 per cent. of the enrollment. In Lima there is a university, San Marco's, the most ancient in America. Charles V granted its charter. Jurisprudence, medicine, theology, and the sciences are taught. The library connected with the university contains over 20,000 volumes. Lima has other colleges and schools with good collections and laboratories and a public library with valuable works. There are, besides the colleges and schools in the various departments and provinces, two minor universities in Cuzco and Arequipa.

Finance.—The principal income was formerly derived from the sale of guano and from customs. There are two forms of direct taxation—a poll tax for every man between the ages of twenty-one and sixty years, and a tax on the rent from real estate at the rate of 3 per cent. The revenue for 1889-'90 was 6,275,197 soles, and expenditures for the same period 5,891,958. This revenue was derived from customs, direct taxes, railways, post office, telegraphs, and other miscellaneous receipts. Peru has a large internal debt. The foreign debt contracted in England amounted to a total of £31,579,080, but it has been wholly canceled in virtue of a contract with the bondholders.

Army and Navy.—The Peruvian army consists of 6 battalions of infantry, with 2,400 men; 2 cavalry regiments, 600 men; 2 brigades of artillery, 500 men; and a gendarmerie of 2,400 men, making a total of 5,900 men. The navy consists of three steamers.

AREA AND POPULATION.

The last census reported the area as 463,747 English square miles, and the population as 2,621,844, not including about 350,000 uncivilized Indians.

Population by departments.

Departments.	Area in English square miles.	Population.
Piura	13,981	135,502
Cajamarca	14,188	213,391
Amazonas	14,129	84,245
Loreto	32,727	61,125
Libertad	15,649	147,541

Population by departments—Continued.

Departments.	Area in English square miles.	Population.
Ancachs	17,405	284,091
Lima	14,760	226,922
Callao	10,814	34,492

Puno	22,516	256,594
Arequipa	62,825	160,282
Moquegua	17,939	28,786
Apurimac		119,246
Lambayeque		85,984
Total	468,747	2,621,844

Lima, the capital, has a population of 101,488. Other important towns are:

Cities of 5,000 and over.

Callao	35,492	Ferenafe	8,000
Arequipa	35,000	Huancavelica	8,000
Cuzco	30,000	Truxillo	8,000
Ayacucho	20,000	Lambayeque	6,000
Pasco	15,000	Moquegua	6,000
Jauja	15,000	Puno	6,000
Chilayo	14,000	Tarma	6,000
Cayamarca	12,000	Cojalambo	6,000
Piura	12,000	Chachapoyas	6,000
Tacna	10,000	Tarapota	5,350
Moyabamba	10,000	Payta	5,000
Cajamarquilla	8,000	Chucuito	5,000

Mineral resources are great and varied. The salt deposit on the coast, near Huacho, some fifty miles north of Callao, and at Sechura, on the northern coast, is perhaps sufficient for all the American Continent; and as it is formed into masses by percolation of sea water through a peculiar, porous rock, it is inexhaustible—a natural factory, with the ocean's limitless supply of material, that runs day and night.

Sulphur is found in rich deposits, at Tumbes, on the northern coast, and near Arequipa, in the Southern Mountains, samples of which have analyzed at over 99 per cent. of pure sulphur.

Gypsum has been found near Sechura, and asphalt is said to exist in vast deposits at Talara, near the port of Payta, in the north.

Petroleum exists in great quantities near the same place and near Tumbes.

Cinnabar exists in the Departments of the Sierras, probably in both Huancavelica and Ayacucho.

Coal deposits are found in the Cordilleras of the North, near Chimbote, and higher up, in the Despoblado, both bituminous and anthracite exist; but transportation to some of the richest of these deposits is yet impossible, and a great coal wealth is perhaps reserved for future development, when railway facilities are supplied to these localities.

Silver, for which the country is famous, exists at various points all through the more elevated "Despoblado" and Sierra—north, central, and south.

Gold is found in the washings of the mountain streams leading into the Amazonian rivers, and the southeastern mountain provinces of Carabaya, Cuzco, and Sandia are rich in auriferous ores. The gold deposits along the slopes of the Eastern Cordillera are too numerous for detailed mention here, though, owing perhaps to the remoteness from the coast and difficulty of transportation, the development of gold mineral has been small in comparison with that of silver.

Products and Agriculture.—The arable lands of Peru are very limited compared with the extent of desert, mountains, and thus far untenable wilderness of the "Montaña." The great bulk of lands cultivated are on the coast and in the Sierra, the largest agricultural interests being on the coast. The small amount of tillage in the Montana is of the most insignificant truck-patching kind, though that region is capable of great and varied productiveness.

Sugar is the most extensive crop planted. In the northern coast provinces the cane is set but once in six or seven years; in the latitude of Lima once in three years. The yield has been as high as one hundred thousand tons; now it is about seventy thousand tons,

some fifty thousand tons of which, worth about four million dollars, is exported. A large quantity of rum is made from the cane juice also, which is used, among other purposes, for cooking fuel and illuminating. Some of the haciendas are provided with sugar houses, costing hundreds of thousands of dollars, equipped with the most improved machinery and with narrow-gauge railways that afford steam carriage for the cane from the fields to the sugar-houses.

Cotton is quite an important crop. In the north it grows on a tree, which bears when two years old, and continues bearing perennially for a number of years. On the same plant may be seen the flower, the boll, and the full-blown pod. This growth is of a coarse texture and is used largely for admixture with wool. In the south the cotton plant grows as with us, but the principal product is from the north. The crop is valued at about three million dollars annually.

Rice also grows on the northern lowlands, and, though uncertain, it yields in good years richly.

Grapes, called the finest in the world, flourish, especially in the southern coast provinces of Ica and Mocagua. The wine produced annually is valued at about four million dollars.

Coffee, of a very fine quality, is produced in the lower levels almost anywhere, but the supply is hardly adequate to the home demand.

The Irish potato, indigenous to Peru, grows wherever planted, and in some places wild. The primitive, uncultivated potato is hardly larger than a hazel nut. But with cultivation it has developed into great perfection and size. On the great elevations of the Sierra it is a most important and in some places the staple crop and chief dependence of life.

Corn grows everywhere, except at the greatest elevations, and in some places yields two crops a year. It supplies a staple of life for all classes, and not only affords food, but a stimulant for the common people in the form of "chicha," the national drink.

Wheat grows in certain localities of the Sierra, but is little cultivated.

Barley is grown in the Sierra for pasturage; the cold does not permit it to ripen.

Alfalfa, a sort of luxuriant clover, is raised on the coast, in the valleys, and on the fields of the Sierra. It is perennial, and supplies nutritious food for stock, fed as it is in its green state.

Oats are grown to a limited extent in the mountains.

Cocoa, especially of Cuzco, is said to be unsurpassed, and it flourishes in the protected valleys of many localities.

Coca, of which cocaine is made, grows wild, and is cultivated to a considerable extent. It flourishes best in the hot, deep valleys of the Eastern Cordillera.

Wool is an important product, chiefly of the mountain districts, the export being valued at from four to five million dollars per annum.

An hacienda sometimes has from fifty to one hundred thousand sheep.

A good deal of low-grade stock is reared by the people in some districts of the mountains.

Cinchona, or Peruvian bark, originally supplied from the interior of Peru and Bolivia, has measurably failed, through wanton destruction of the trees in taking it. The chief supply now is furnished from India, where the English introduced the plant.

The coast country and the sheltered valleys of the mountains and the regions east of the Cordillera are rich in fruits and vegetables, which are abundant the year round.

Caucho, or India rubber, is the chief export from the forests of Montana, though there are many others, including sarsaparilla, tobacco, ivory nuts, etc.

While on the large estates the most improved machinery is used in cultivation of sugar, on the chacras or small farms one may still see the forked stick used as a plow, drawn by a pair of oxen. The natives are not favorably inclined to innovations, and as the soil is immensely fertile and needs but to be tickled into productive humor with a scratch of its surface, even many of the hacendados engaged in general farming still tolerate the primitive methods because of their cheapness and simplicity, and because they are suited to the stolidity of the Indian laborers.

Railways and Telegraph.—Peru has about 1,625 miles of railway, and 1,382 miles of telegraph wire. It is in cable communication

with the whole world. A telephonic system is in operation between Callao and Lima. The post office handled in 1887 1,833,689 letters, postal cards, newspapers, etc. There are 230 post offices in the Republic.

Banking.—There are several banks in Lima, and others at Piura, Trujillo, Arequipa, Tacna, and other large towns.

COMMERCE.

The commerce of Peru is mainly with Great Britain, but in late years there has been considerable trade with Germany.

The principal ports are: Callao, Paita, Eten, Salaverry, Chimbote, Pisco, Mollendo, Arica and Iquique. The main imports comprise machinery, cotton, coal, and woolen manufactures. The imports of cotton goods amounted in 1888 to \$2,393,714. The exports are guano, cubic niter, sugar, wool, ores and raw cotton. The following tables show the foreign trade of Peru with the principal countries.

* Not stated.

Money.—The monetary unit is the sol of 100 centesimos; nominally worth in the United States \$1.00, but with a real value (1891) of 77.1 cents. Other coins are subdivisions of the sol and are the medio sol of 50 centesimos, the peseta of 20 centesimos, the real of 10 centesimos and the medio real of 5 centesimos. These coins are all of silver. It was estimated in 1887 that there were 60,000,000 paper soles in circulation, issued by banks at Lima, and declared to be of government responsibility.

This money had gradually become greatly depreciated, being worth in 1887 about 5 cents on the sol. In 1888 it was withdrawn

from circulation, except as payment for customs duties to the amount of 5 per cent. at the rate of 35 paper soles for one of silver.

Weights and Measures.—The French metric system of weights and measures was legally established in 1860, but except for custom purposes, has not been generally adopted. The weights and measures in use are: The onza, 1.014 ounce, avoirdupois; the libra, 1.014 pound, avoirdupois; the arroba of 25 libras, 25.36 pounds, avoirdupois; the quintal, 101.44 pounds, avoirdupois; the arroba (of wine or spirits), 8.044 gallons, avoirdupois; the galon, .88 gallon, avoirdupois; the vara, 33.367 inches; the square vara, .859 square yard.

Salvador.

Salvador is located in Central America, between the Republics of Guatemala, Honduras, and Nicaragua, with a frontage on the Pacific Ocean of 139 miles. It is bounded on the north by Honduras and part of Guatemala; on the east by part of Honduras and the Gulf of Fonseca, which separates it from Nicaragua; on the south by the Pacific Ocean, and on the west by Guatemala.

Executive.—This power is in the hands of a president, who is elected by general suffrage for a term of four years. He appoints four secretaries to take charge of the departments of foreign relations, justice and worship, war, finance, interior, and public instruction.

Legislative.—The constitution vests the legislative power in a congress, consisting of a house of representatives and a senate. The members of the house are elected every four years; those of the senate every six years.

Judicial.—The judicial power is vested in a supreme court, with eleven magistrates, and several district courts.

Area and population.—The territorial extent of the Republic of Salvador is estimated at 7,255 square miles, while the number of the inhabitants in 1888 was estimated at 664,513, which gives 89 people for every square mile. The country is divided into fourteen departments, as follows:

Departments.

San Salvador.
Cuscatlan.
San Vicente.
La Paz.
Cabanas.

San Miguel.
Gotera.
La Union.
Usulután.
Chalatenango.

La Libertad.
Santa Ana.
Sonsonate.
Ahuachapan.

San Salvador the capital was founded in 1525. Its population in 1888 numbered 16,377. Santa Ana the capital of the department that name has a population of 2,000.

POPULATION OF THE DEPARTMENT.

San Salvador	16,377
Sonsonate	11,000
San Miguel	9,500
Santa Ana	9,000
San Vicente	8,000
Ahuachapán	7,000
Acayote	6,000

Religion.—The Catholic religion is the prevailing one in the country, although the exercise of any other is tolerated.

Education.—There were, in 1888, 375 schools for boys and 184 for girls, with 21,101 pupils in all. Three universities and several colleges give the opportunity for acquiring a higher education.

Finance.—The resources of the nation are derived principally from import duties and taxes on the articles of Government monopoly. The income from all sources for 1888 amounted to \$3,722,700.42, while the expenditures were \$3,667,782.89. The national debt is \$6,739,865.

Army.—The regular army of Salvador consists of 2,000 soldiers, while the militia numbers 20,000. The annual expenditures of war department amount to about \$756,000.

Resources and Products.—Coffee, indigo, sugar, medicinal plants, woods, etc., grow abundantly. Gold, silver, iron, copper, and mercury are the chief products of the mines. Of mines and quarries there are 180 now being worked.

Railways.—There is at present a line from Acajutla to Sonsonate, a distance of 15 miles, which is to be extended to Mate Marin, and thence to the capital, making a total length of 120 miles. There are projects to connect by rail Acajutla with Santa Ana, La Union with San Miguel, La Libertad with San Salvador, and La Union with the towns on the frontier of Guatemala.

Postal and Telegraphic Service.—The postal service is in an excellent condition, having handled 8,500,000 pieces during the year

San Salvador the capital was founded in 1528. Its population in 1888 numbered 16,327. Santa Ana the capital of the department of that name has a population of 9,000.

Cities of over 5,000 inhabitants.

San Salvador	16,327
Sonsonati	10,000
San Miguel	9,500
Santa Ana	9,000
San Vicente	8,000
Ahuachapan	8,000
Acoyapa	6,000

Religion.—The Catholic religion is the prevailing one in the country, although the exercise of any other is tolerated.

Education.—There were, in 1888, 375 schools for boys and 184 for girls, with 21,101 pupils in all. Three universities and several colleges give the opportunity for acquiring a higher education.

Finance.—The resources of the nation are derived principally from import duties and taxes on the articles of Government monopoly. The income from all sources for 1888 amounted to \$3,794,709.42, while the expenditures were \$3,667,782.89. The national debt is \$6,739,865.

Army.—The regular army of Salvador consists of 2,000 soldiers, while the militia numbers 20,000. The annual expenditures of war department amount to about \$756,000.

Resources and Products.—Coffee, indigo, sugar, medicinal plants, woods, etc., grow abundantly. Gold, silver, iron, copper, and mercury are the chief products of the mines. Of mines and quarries there are 180 now being worked.

Railways.—There is at present a line from Acajutla to Sonsonate, a distance of 15 miles, which is to be extended to Mate Marin, and thence to the capital, making a total length of 120 miles. There are projects to connect by rail Acajutla with Santa Ana, La Union with San Miguel, La Libertad with San Salvador, and La Union with the towns on the frontier of Guatemala.

Postal and Telegraphic Service.—The postal service is in an excellent condition, having handled 8,500,000 pieces during the year

1889. The total number of telegraph offices in the country is 89, and the lines 1,467 English miles.

Banking.—There are three banks, the Banco Internacional del Salvador (Salvador International Bank) and the Banco Occidental (Occidental Bank), both in the capital, and the third in Santa Ana, there called "Banco Occidental," with a branch in San Salvador. There are also a number of private banking houses.

Commerce.—The articles of exportation are principally coffee, indigo, sugar, gold, silver coin, cocoa, etc.

The commerce of Salvador, from its statistics, for 5 years has been as follows:

	1885.	1886.	1887.	1888.	1889.

* A peso is worth 77 cents United States gold.

In 1889 the values of the principal articles of export were: Coffee, 3,502,000 pesos; indigo, 1,205,000 pesos; sugar, 200,000 pesos; silver, 171,000 pesos; tobacco, 150,000 pesos, and balsam of Peru, 74,000 pesos. In the foregoing tables the values for 1889 are expressed in round numbers.

The subjoined table, derived from statistics of the United States, gives their commerce with Salvador for 5 years, ending June 30.

	1886.	1887.	1888.	1889.	1890.
	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>
Imports into the United States	1,261,275	1,059,341	1,473,430	1,662,162	1,453,958
Domestic exports from the United States	470,541	477,175	645,302	690,884	886,231

The principal articles imported into the United States in 1890 were: Coffee, \$1,305,894; sugar, \$69,846; indigo, \$36,112. The exports to Salvador for the same year were of flour, \$208,312; manufactures of cotton, \$120,481; firearms, \$95,858; iron and steel, and other manufactures of, \$130,341; wood, and manufactures of, \$46,925, and explosives, \$41,052.

Money, Weights, and Measures.—The peso of 100 centavos is equal to 77.1 cents, United States coin. The coins from England, France, Spain; United States, and particularly the Peruvian and Chilean soles, circulate freely.

The weights in use are the libra, 1.014 pounds avoirdupois; the quintal, 101.48 pounds avoirdupois; the arroba, 25.35 pounds avoirdupois; the fanega, 1½ imperial bushels. The vara is the unit of measurement.

Santo Domingo.

Santo Domingo is the name of the eastern portion of the island of Haiti, originally Española or Hispañola, which, next to Cuba, is the largest of the West India Islands. Longitude 68° to 75° , latitude 18° . The Atlantic Ocean is north and the Caribbean Sea south. Santo Domingo has more than double the area of the Republic of Haiti. The inhabitants are of Spanish, African, and Indian descent and use the Spanish language.

Executive.—President elected by universal suffrage, for 4 years. He is assisted by a cabinet composed of the secretaries of the interior and police, finance and commerce, justice and public instruction, war and marine, public works and foreign affairs.

Legislative.—The Legislature is composed of 22 deputies, chosen by indirect popular vote. Each of the 11 provinces and districts has its own governor. The governors are appointed by the President. The various communes, cantons, and sections are presided over by prefects and magistrates appointed by the governors. The municipal corporations are elected by the people, and foreigners holding real estate are eligible to office.

Judicial.—The supreme court consists of a president and 4 justices, appointed by Congress, and general-attorney appointed by the President of the Republic. These appointments are all for the presidential term. There are 11 judicial districts (each having its own tribunal), subdivided into communes, each with local justices and magistrates.

Area and Population.—Area, 18,045 English square miles; population, according to the census of 1888, 416,871. The country is divided into provinces and maritime districts, and subdivided into communes, cantons, and sections. The capital, Santo Domingo, has a population of 25,000 inhabitants; Puerto Plata, the chief port, has

15,000 inhabitants. Spanish is the prevailing language, though both French and English are spoken.

Religion.—Roman Catholicism is the religion recognized by the State, but all other religions are tolerated.

Education.—Education is obligatory. Schools, primary and technical, are provided by the Government and municipal corporations. There are also normal schools and colleges. There are about 300 schools, with about 10,000 pupils. Several literary societies exist in the capital and other towns. About 40 newspapers and periodicals are published.

Finance.—The revenue is principally from customs duties. Revenue for 1889, \$1,531,284, and expenditures \$1,408,543. Foreign debt amounts to £714,300. A new loan of £770,000 has lately been obtained.

Army and Navy.—The army consists of a small force of infantry, cavalry, and artillery. One regiment is stationed in each province. There is also a reserve corps. The Republic possesses one man-of-war.

Resources and Products.—The chief products are tobacco, coffee, cocoa, cotton, and sugar cane; the cultivation of which is increasing. There are several large sugar factories, the principal estates being in the vicinity of the capital, Macoris, and Azua. Santo Domingo is rich in mines, cabinet and dye woods, tropical fruits, and vegetables.

Railways and Telegraph.—There are about 72 miles completed of a railroad between Sanchez, Samaná Bay, and La Vegas; a road is begun between Puerto Plata and Santiago, and another is projected between Barahona and Cerro de Sal. The interior of the country has good wagon roads. The telegraph is controlled by the Antilles Telegraphic Company. There is a line between Santo Domingo and Puerto Plata. Cable communication is by means of the French Submarine Telegraphic Company, and the cable for South America crosses the island. There is steamship communication with the

West India Islands, Europe, and North and South America. Telephonic communication exists in the capital. Number of letters and parcels transmitted by the post-office in 1888 was 275,312.

Commerce.—The commerce of Santo Domingo is mainly with the United States, Spain, England, France, the Danish Antilles, and Germany. The principal exports are coffee, cacao, tobacco, and sugar. The main imports are cottons, linens, woollens, hardware, machinery, railway material, rice, bread foods, canned goods, etc. In 1888 its imports were \$1,992,884, exports \$2,520,983; being a decrease from those of the year 1887, when its imports were \$2,056,928 and the exports \$2,660,471.

In 1889-'90 the United States imported from Santo Domingo to the value of \$1,951,013, and exported thereto of domestic merchandise, \$926,651.

Santo Domingo's commerce with the United States, from the latter's official returns, for the last six fiscal years is indicated by the subjoined table:

	1885.	1886.	1887.	1888.	1889.	1890.
	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>
Imports into the United States.....	1,461,419	1,656,131	1,380,126	1,459,392	1,454,261	1,951,013
Domestic exports from the United States.....	962,428	1,017,285	1,014,414	792,560	1,150,651	926,651

Its leading imports into the United States were, in 1890: Sugar, \$1,715,364; hides and skins, \$77,279; dyewoods, \$71,031; and coffee, \$49,443.

The exports therefrom to Santo Domingo were in the same year, principally: Iron and steel and their manufactures, \$169,538; wheat flour, \$149,260; wood and its manufactures, \$117,387; cottons, \$66,525; and lard, \$49,235.

Money, Weights, and Measures.—The money in use is mainly that of the United States, Spain, Mexico, and France, though contracts have just been concluded for providing a national coinage. The metrical system is used. The old weights and measures are: The quintal of 4 arrobas, = 1,014 pounds avoirdupois; the arroba of 32 cuartillos for liquids.

DESIGN FOR U. S. GOVERNMENT BUILDING, WORLD'S COLUMBIAN EXPOSITION.

The United States.

Executive.—The President is elected for a term of four years by the electoral college, whose members are directly elected by the people. He is assisted by a Cabinet of eight Secretaries—of State, of Treasury, of War, of Navy, of Interior, of Agriculture, and an Attorney-General, and Postmaster-General. The Vice President is elected at the same time and in the same manner. The salary of the President is \$50,000, and that of the Vice President \$8,000 per year.

Legislative.—The Congress is composed of two branches—the Senate and House of Representatives—which meet annually the first Monday in December. The Representatives are chosen for two years by the direct vote of the people, and the Senators by the legislatures of the several States, who serve for six years. There are 333 Representatives and 88 Senators. The next House of Representatives will have 356 members.

Judicial.—The Supreme Court consists of a Chief Justice and eight associate justices, who are appointed by the President with the advice of the Senate.

Finance.—The revenues of the United States from all sources for the fiscal year ending June 30, 1890, were \$463,963,080; the principal sources of revenue being as follows: Customs, \$229,668,584; internal revenue, \$142,606,705; postal service, \$60,882,097; profits on coinage, etc., \$10,217,244; sales of public lands, \$6,358,272; consular, patent, and other fees, \$3,146,692; other sources, \$11,083,486. The expenditures during the same period were \$358,618,584; the principal items being, pensions, \$106,936,855; the Army and Navy, \$66,589,034; Indians, \$6,708,046; interest on the public debt,

\$36,099,284; other expenditures, \$142,385,365; leaving a surplus of \$105,344,496.

Public Debt.—The public debt of the United States July 1, 1890, was \$1,585,821,048. The debt was decreased during the fiscal year ending July 1, 1890, \$54,852,292.

Banking.—There were in 1890 3,540 national banks in the United States, having a capital stock amounting to \$650,447,235; resources, \$3,141,487,494; liabilities (exclusive of capital stock, surplus, and undivided profits), \$2,181,469,729. There were also 4,515 banking institutions not included in the national banking system, having a capital of \$326,656,607; surplus and undivided profits, \$291,545,123; deposits, \$2,539,256,699.

Railroads and Telegraph.—In 1890 there were 157,758 miles of railroad in operation and 3,150 miles of street railway. In 1890 there were 254,110 miles of telegraph lines, using 807,589 miles of wire, over which were sent 80,000,000 messages. There were 759 telephone exchanges, using 193,213 miles of wire, operated by the American Bell Telephone Company.

AREA AND POPULATION.

The area of the United States is 3,501,404 English square miles. The population in 1870 was 38,629,012; in 1880 it was 50,497,057; and in 1890 it was 62,480,540.

Population by States and Territories, with the increase since 1880.

FOREIGN COMMERCE OF THE UNITED STATES IN 1890.

[From the report of the Secretary of the Treasury. 1890.]

The value of our foreign commerce during the last fiscal year, ending June 30, 1890, was greater than for any previous year. It amounted to \$1,647,139,093, as against \$1,487,533,027 during the fiscal year 1889, an increase of \$159,606,066.

The value of imports of merchandise also during the last fiscal year was the largest in the history of our commerce, amounting to \$789,310,409, as against \$745,131,652 during the fiscal year 1889, an increase of \$44,178,757.

The value of exports of merchandise during the same period was \$857,828,684, as against \$742,401,375 for the previous year, 1889, an increase of \$115,427,309.

The exports exceeded the imports of merchandise by \$68,518,275.

The exports of domestic merchandise were \$115,011,219 in excess of the value of such exports during the preceding year. The greater portion of the increase occurred in the following articles, stated in the order of magnitude of increase: Provisions, breadstuffs, raw cotton, iron and steel and manufactures of, vegetable oils, unmanufactured tobacco, and wood and manufactures of. This increase was in the following articles: Breadstuffs, \$31,049,266; provisions, \$32,142,069; cattle and hogs, \$15,196,492; and raw cotton, \$13,193,522; a total of \$91,581,349.

The value of the imports and exports of merchandise and specie during the last three fiscal years has been as follows:

Africa.....	4,590,127	23,575	4,613,702	8,321,477	7,935,179	+ 1,292,225
All other countries.....	459,966	8,472	468,438	1,763,415	2,231,853	+ 1,294,977
Total.....	845,293,828	12,534,856	857,828,684	789,310,409	1,647,139,093	+ 68,518,275

It will be seen that our total trade in merchandise with Great Britain and Ireland amounted to \$634,384,618, of which the value of exports was \$447,895,662, and the value of imports, \$186,488,956, showing an excess in exports of \$261,406,706. Our trade with Germany showed an excess of imports of \$13,274,371; with France, of \$27,695,287.

In our total trade with Europe the excess of exports over imports was \$233,749,131.

Our commerce in merchandise with North America, including Mexico, Central America, and West Indies, amounted to \$242,469,116, of which the value of the imports was \$148,368,706, and of the exports, \$94,100,410, an excess of imports of \$54,268,296.

Our total trade with South America in merchandise amounted to \$128,758,792, of which the value of the imports was \$90,006,144, and of the exports, \$38,752,648, an excess of imports of \$51,253,496.

EXPORTS.

The total value of exports of domestic merchandise was \$845,293,828, an increase of \$115,011,219 over the preceding year, and was greater than that of any year except 1881.

The material increase or decrease in value of the principal articles of exports was as follows:

	<i>Increase.</i>	<i>Dollars.</i>
Provisions.....		32,077,117
Breadstuffs.....		31,049,266
Animals.....		15,263,323
Cotton, unmanufactured....		13,193,522
Iron and steel, and manufactures of.....		4,386,181
Vegetable oil.....		4,086,658
Tobacco leaf.....		2,578,488
Leather, and manufactures of.....		1,691,141
Mineral oils, crude.....		1,661,108
Carriages and cars.....		1,656,157
Wood, and manufactures of.....		1,355,824
	<i>Decrease.</i>	<i>Dollars.</i>
Hops.....		1,713,261
Copper ore.....		1,465,022
Clover seed.....		1,348,549
Fruits, including nuts.....		1,012,087

There was an increase in the value of domestic exports—

	<i>Dollars.</i>
To the United Kingdom	64,468,878
To Germany.....	17,746,520
To France.....	8,902,012
To South America.....	4,090,678
To West Indies.....	2,242,146
To Mexico.....	1,779,820

And a decrease—

	<i>Dollars.</i>
To British North American provinces	1,262,228
To British Australia.....	1,084,066

VALUE OF DOMESTIC EXPORTS.

The value of the principal articles of domestic exports during the three years ending June 30, 1890, was as follows:

	1888.	1889.	1890.
	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>
Cotton, and manufactures of.....	236,029,949	247,987,914	260,968,069

Spirits of turpentine.....	3,580,106	3,777,525	4,590,931
Fruits, including nuts.....	3,510,208	5,071,584	4,059,547
Total	631,599,762	672,231,841	775,297,896
Value of all domestic exports	683,862,104	730,282,609	845,293,828
Per cent. of enumerated articles to total	92.4	92.1	91.7

DOMESTIC EXPORTS CLASSIFIED.

The value of the domestic exports during the two years ending June 30, 1890, classified by groups, according to character of productions was as follows :

	1889.		1890.	
	Values.	Per cent.	Values.	Per cent.
	<i>Dollars.</i>		<i>Dollars.</i>	
Products of agriculture.....	532,141,490	72.87	629,820,808	74.51
Products of manufacture.....	138,675,507	18.99	151,102,376	17.87
Products of mining (including mineral oils)	19,947,518	2.73	22,297,755	2.64
Products of the forest	26,997,127	3.70	29,473,084	3.49
Products of the fisheries.....	7,106,388	.97	7,458,385	.88
Other products.....	5,414,579	.74	5,141,420	.61
Total	730,282,609	100.00	845,293,828	100.00

IMPORTS.

The total value of the imports was \$789,310,409, an increase of \$44,178,757 over the preceding year, of which the sum of \$9,181,551 represents free merchandise and \$34,997,206 dutiable merchandise.

The material increase or decrease in value of the principal classes of imports was as follows :

Increase.

Free of duty:	<i>Dollars.</i>
Silk, unmanufactured	4,998,638
Coffee	3,542,550
India rubber and gutta-percha, crude.....	2,467,881
Dutiable :	
Sugar, molasses, etc	8,484,839
Tobacco, and manufactures of.....	7,099,464
Wool, manufactures of.....	4,017,490
Cotton, manufactures of	3,112,118
Flax, hemp, jute, etc., manufactures of.....	2,715,726
Vegetables	2,185,575
Wood, and manufactures of.....	1,764,858
Chemicals, drugs, dyes, and medicines.....	1,758,451

<i>Decrease.</i>		<i>Dollars.</i>
Free of duty :		
Hides and skins, other than fur-skins		3,245,864
Paper stock, crude		663,599
Dutiable :		
Wool, unmanufactured		2,710,432
Barley		2,093,989
Flax, jute, etc.		2,091,818
Rice		963,151
Seeds, not medicinal		907,800

There was an increase in the value of our imports as follows :

	<i>Dollars.</i>
From Germany	17,095,287
From Great Britain and Ireland	8,219,889
From France	8,105,693
From Netherlands	6,078,890
From Japan	4,415,832
From Italy	2,837,902
From Spanish West Indies	2,017,221
From Austria-Hungary	1,689,081
From Mexico	1,437,314

And a decrease as follows :

	<i>Dollars.</i>
From British North American Possessions	3,612,493
From British Australasia	1,720,535
From Uruguay	1,232,061
From British West Indies	1,120,544
From Brazil	1,085,048

IMPORTS ENTERED FOR CONSUMPTION.

The value of imported merchandise entered for consumption and the duty collected thereon, during the last five fiscal years, has been as follows :

Year ending June 30—	Value of merchandise.		Duty collected.	Average rate collected on—	
	Free of duty.	Dutiable.		Dutiable.	Free and dutiable.
	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>	<i>Per cent.</i>	<i>Per cent.</i>
1885	192,912,234	386,667,820	177,319,550	45.86	30.59
1886	211,530,759	413,778,055	188,379,397	45.55	30.13
1887	233,093,659	450,325,322	212,032,424	47.10	31.02
1888	244,104,852	468,143,774	213,509,802	45.63	29.99
1889	256,574,630	484,856,768	218,701,774	45.13	29.50
1890	266,102,778	507,571,794	225,522,304	44.45	29.16

TRADE WITH CENTRAL AND SOUTH AMERICA.

Our total imports of merchandise from Mexico, Central and South American States, British Honduras, and the West Indies, during the fiscal year 1890, amounted to \$198,940,575, or 25.20 per cent. of our total imports of merchandise.

The value of our exports of merchandise to these same countries during the same period was \$90,886,103, or 10.59 per cent. of the value of our total exports of merchandise.

Our total imports and exports of merchandise from and to these countries, during the same period, amounted to \$289,826,678, or 17.6 per cent. of our total imports and exports of merchandise.

It will be seen that the excess of our imports of merchandise from these countries over our exports to them amounted to \$108,054,472. In other words, our imports of merchandise were 68.63 per cent. and exports 31.37 of the total trade with these countries, and we imported merchandise to the value of \$2.18 for every dollar in value exported to these countries.

The excess of imports over exports of merchandise for the fiscal year 1889 was \$117,917,883. For the fiscal year 1888 this excess was \$109,120,785.

Value of imports and exports of merchandise in the trade of the United States with Mexico, Central America, West Indies, and South America, and the excess of imports or of exports, during the years ending June 30, 1888, 1889, and 1890.

Per cent. of above group	25.20	10.59		

A comparison of our commerce with the entire group of countries for the years 1870, 1880, and 1890 shows a gradual increase of both imports and exports of merchandise.

During the year 1870 the value of imports was \$117,398,951 and of exports \$55,140,322, an excess of \$62,258,629.

During the year 1880 the value of imports was \$178,985,906 and of exports \$61,546,474, an excess of \$117,439,432.

The per cent. of our commerce with these countries, as compared with our total commerce, in 1870, was 20.82; in 1880, 15.99; and in 1890, 17.60.

In the following table the imports from the several groups of countries are given, showing what proportion of the imports of each were free and what dutiable, with the per cent. of free:

Statement showing the imports from countries south of the United States and the per cent. of imports free of duty therefrom during the year ending June 30, 1890.

Countries.	Imports.			Per cent. of free.
	Free of duty.	Dutiable.	Total.	
	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>	
Mexico.....	15,536,100	7,154,815	22,690,915	68.47
Central American States and British Honduras....	8,127,600	111,675	8,239,275	98.65
West Indies.....	10,502,738	67,501,508	78,004,241	13.45
South America.....	82,076,418	7,929,726	90,006,144	91.19
Total of group.....	116,242,856	82,697,719	198,940,575	58.44

The principal dutiable articles imported were sugar and tobacco.

From the West Indies the imports consisted mainly of these articles, and the per cent. of the value of free merchandise was only 13.45.

The principal articles imported from the entire group free of duty, in the order of their value, were: Coffee, India rubber, crude; hides and skins other than fur skins, silver-bearing ore, and fruits.

The principal articles of domestic exports from the United States to the entire southern group consisted mainly of iron and steel and manufactures of cotton, manufactures of wood, manufactures of wheat flour, mineral oil, and agricultural implements.

EXPORTS OF BREADSTUFFS.

The following table shows the movement of breadstuffs toward Latin-America during the last twenty years and the growth of the trade :

	1870.	1880.	1888.*	1890.*

* This does not include shipments by railroad.

A great deal of flour from the United States has reached Brazil and the West Indies by way of Europe, having been shipped from New York to Hamburg, Southampton, Liverpool, Lisbon, and the ports of Spain and the Mediterranean as ballast, and from there transhipped again across the Atlantic. But the quantity is impossible to ascertain. The discrimination in the import dues of the Spanish West Indies in favor of merchandise from Spain has been the cause of a very considerable commerce in flour by way of the Spanish ports. Freights by the Spanish steamers are low, and the "nationalized" Spanish flour, as it is called, has an advantage of at least \$2.50 per barrel over that which is shipped direct.

SUGAR IMPORTED INTO THE UNITED STATES.

The following table shows the amount of sugar imported into the United States during the year ending June 30, 1890, both the total values being shown and the percentage of the supply furnished by each of the countries:

Countries from which imported.	Values.	Per cent. of total value.
	<i>Dollars.</i>

Uruguay.

Uruguay, or Banda Oriental del Uruguay, is bounded on the north and northeast by Brazil, east by the Atlantic Ocean, south by the Rio de la Plata, and west by the Uruguay, which separates it from the Argentine Republic. Latitude 30° to 35° south, longitude 53° to 58° west. It is a vast undulating plain well watered by fine navigable streams. The central part of the Republic is broken by hill ranges, which are composed for the most part of clay, slate, gneiss, and granite. The climate is generally humid but temperate and healthy. The plains, so admirably adapted to agriculture, remain, for the most part, uncultivated and are roamed over by vast herds of cattle and horses.

Executive.—The President is elected for a term of four years by an electoral college whose members are directly elected by the people. He is assisted by a cabinet of 5 ministers: Interior, foreign affairs, finance, war and marine, worship, justice and public instruction.

Legislative.—The Congress is composed of two houses, the Senate and Chamber of Representatives, which meet annually from February 15 to July 15. The representatives are chosen for 3 years in the proportion of 1 to every 3,000 inhabitants of male adults who can read and write. The senators are chosen by an electoral college elected by the people; there is one senator for each department, chosen for 6 years, one-third retiring every 2 years. There are 53 representatives and 19 senators.

Area and Population.—The area of Uruguay is estimated at 72,110 English square miles, and the population 648,299 in 1888. The country is divided into nineteen provinces. The following tables will show the area and population of the various provinces and some of the principal cities and towns.

Provinces and cities.	Area in English square miles.	Population 1887.

Religion.—Roman Catholicism is the State religion, but there is complete toleration and several protestant churches.

Education.—Primary education is obligatory between the ages of 6 and 14. In 1888 there were 380 public schools, with 694 teachers and 32,731 pupils. Private schools 402, teachers 833, and 21,017 scholars. Besides the university and other colleges and academical institutions, there are religious seminaries, with a corps of 383 teachers and 4,261 pupils. In the military college there are 8 professors and 56 pupils. The normal school for girls has 19 professors and 70 pupils, and the university 59 professors and 695 students. The Government also maintains a technological school for Uruguayan orphan boys, called *La Escuela de Artes y Oficios*. It is

conducted upon a military plan, and each pupil is bound to the institution for 6 years, and must not be over 14 at the time of admission. The principal aim of the institution is to educate poor boys in trades and professions. The range is wide: from simple carpentry to the most delicate carving and working in woods and fine metals; from the fashioning of tools and instruments to the building of vessels. The fine arts are not neglected: painting, drawing, music, etc., are taught in the school. The *Rivera*, a gunboat said to be powerfully built, was entirely constructed and launched by the workmen of the school. To the delight of the boys, it did good service against the revolutionists. The shops and workrooms are well equipped, and the following list will give some idea of the great variety of employment: Carpentry, boiler constructing, clocks, watches, etc., printing, wood carving, photography, plaster modeling, work in silver, painting, tailoring, engraving, saddle making, lithography, book-binding, smith craft, shoemaking, iron casting and founding, mechanism, cartridge making, firearms, furniture making and polishing, ship building, instrument making, carving, weaving, etc. The national library contains over 20,000 volumes and more than 2,300 manuscripts. There is also a national museum with over 20,000 specimens and objects. Ninety-nine newspapers and periodicals are published in the Republic; 91 in Spanish, 2 in English, 2 in Italian, 2 in Portuguese, and one each in German and French.

Finance.—The revenue of Uruguay is mainly derived from customs duties, property or direct tax, licenses, stamps, and stamped paper. The revenue for 1889 was \$15,690,294, and the expenditures \$15,811,308. The public debt on January 1, 1890, amounted to \$81,279,752.

Army and Navy.—The standing army consists of 3,482 officers and men, including 4 battalions of infantry, 4 regiments of cavalry, and 2 of artillery. Besides, there is an armed police force of 3,980 men and a civilian force of 3,264. The navy comprises 3 gunboats, 7 small steamers, 1 coaster, and 1 steam sloop, with a force of 184 officers and men.

Resources and Products.—Cattle and sheep raising is the chief industry of Uruguay. Its mild climate and vast pasture lands show annually such an increase of stock that the great problem in Uruguay is: What shall be done with the surplus beef and mutton?

For some time large quantities of frozen meat have been exported. Wool is the chief product, and the clip is estimated at about 70,000,000 pounds per annum, worth about \$10,000,000. In 1888 773,449 head of cattle were slaughtered for their hides, tallow, etc., and the meat used in the manufacture of beef extracts and in other modes of preserving. The soil is capable of great agricultural development. Maize, wheat, tobacco, olives, and grapes are grown to some extent. There are some mines of gold and silver, copper, lead, etc., and valuable marble quarries. There are over 60 varieties of fine marble.

Railways and Telegraph.—In 1889 there were open to public traffic 445 miles of railways, and 255 miles were under construction. The principal telegraph lines in operation at the end of June, 1889, were 2,234 miles. There were 55 offices.

In 1888 the post-office carried 5,951,347 letters and packets and 56,140 postal cards, 14,164,442 printed matter, samples, etc., etc.

Banking.—There are many banking houses in Uruguay and a number of credit societies. The National Bank of Uruguay has a capital of \$12,000,000; the National Company of Credit and Public Works \$20,000,000. There are twenty-four other banks, with a nominal capital of 133,000,000 pesos. The peso is equivalent to about \$1.04 of United States money.

COMMERCE.

Europe has almost the monopoly of the trade with Uruguay. In Paysandú there is an American firm having connections in Baltimore, which is doing a successful business. This firm imports pitch-pine, white pine, spruce, kerosene, rosin, shooks, cotton goods, sugar ropes, and, among other things, machinery for factories, mainly from Chicago. The principal exports to the United States are bones, bone-ash, dry cowhides, dry kips, salted hides, calf-skins, horsehair, etc. The following table will give the value of imports and exports for five years :

	1884.	1885.	1886.	1887.	1888.
	<i>Pesos.</i>	<i>Pesos.</i>	<i>Pesos.</i>	<i>Pesos.</i>	<i>Pesos.</i>
Imports	24,550,000	25,275,476	20,194,655	24,616,000	29,477,448
Exports	24,759,480	25,253,000	23,811,986	18,672,000	28,008,254

In 1889 the imports amounted to 36,823,863 pesos, and the exports were of the value of 25,954,107 pesos.

The trade for two years with the principal countries with which Uruguay has commercial relations is indicated in the subjoined table :

Countries.	1888.		1889.*	
	Imports from.	Exports to.	Imports from.	Exports to.
	<i>Pesos.</i>	<i>Pesos.</i>	<i>Pesos.</i>	<i>Pesos.</i>
Great Britain	9,526,774	5,088,208	10,472,000	3,552,000
France	4,531,988	4,557,908	5,516,000	5,224,000
Brazil	2,623,939	5,432,002	2,505,000	3,295,000
Belgium	1,594,266	3,429,743	1,626,000	4,111,000
United States	1,584,908	2,326,999	3,412,000	1,441,000

* Not specified.

Money.—The monetary unit is the peso or dollar of 100 centenas and is equivalent to \$1.0352 of the United States money.

Weights and measures.—The libra, 1.014 pounds avoirdupois; the arroba of 25 libras, 25.35 pounds avoirdupois; the quintal of 4 arrobas, 101.40 pounds avoirdupois; the fanega, dry measure, 7.776 bushels; the fanega, 30 gallons; the square league, 10 $\frac{1}{2}$ English square miles. The metric system has been legally adopted, but is not in general use.

Venezuela.

Venezuela is situated in the torrid zone, between $1^{\circ} 40'$ south, and $12^{\circ} 26'$ north latitude. Its longitude, from the meridian of Caracas, is $10^{\circ} 20'$ east and $6^{\circ} 25'$ west. It is bounded on the north by the Caribbean Sea and the Atlantic Ocean, on the south by the Republic of Brazil and territory in dispute between Colombia, Ecuador, and Peru; on the west by Colombia, and on the east by British Guiana.

Legislature.—The National Legislature consists of a Senate and a Chamber of Deputies. The Senate consists of three senators from each State, elected, respectively, by the legislature of the State which they represent. The Chamber of Deputies consists of deputies elected by the people of the States, each State electing one for every group of 35,000 inhabitants and an additional one for a surplus, if any, exceeding 15,000. Both senators and deputies are elected for 4 years, and substitutes or alternates, to fill any vacancy during the term, are elected at the same time and in the same manner as the senators and deputies themselves.

Executive.—Every second year the Congress elects out of its own body a federal council of 17 members, made up of 1 senator and 1 deputy from each of the States, and one deputy from the federal district. The federal council, from its own number, elects a President and a vice president of the Republic. These officers, like the council itself, hold office during two years. Neither the President nor a member of the council can be reelected to succeed himself. Most executive acts have to be considered by the federal council. The President appoints cabinet ministers, with whom he holds cabinet councils, for the acts of which all are jointly respon-

COFFEE CULTURE.

sible. The President may, on occasion, appeal to the State legislatures as to the constitutionality of the acts of the National Congress; and, if a majority of said legislatures sustain his objection, the supreme court registers the acts in question as suspended, pending a full report of the matter to the Congress at its next session.

Judiciary.—Justice is administered by the supreme federal court and the supreme court of appeal, by special local courts for civil and criminal cases separately, and by district, borough, and municipal judges. The supreme federal court "consists of as many members as there are States in the union, and for their appointment Congress meets on the 15th day of its ordinary session, so that the representatives of each State may draw up a list of principal members and one of substitutes;" and out of the list for each state "Congress chooses a principal member and a substitute."

AREA AND POPULATION.

The Republic of Venezuela has an area of 632,695 square miles, it being thus three times the size of France and of Germany, five times that of Italy, and, excepting Russia, larger than any of the European nations.

Its coast line has an extent of 1,500 miles, indented by five gulfs. The territory of the Republic is divided into three belts, viz: the cultivated, the pastoral, and the wooded. In the first there are cultivated coffee, cocoa, sugar cane, bananas, cotton, indigo, cocoanuts, Indian corn, and all the products of the torrid zone, and many of those of the temperate zone, such as rice, wheat, barley, etc. The cultivated regions are mostly made up of extensive valleys, surrounded by high mountains and watered by abundant rivers. The pasture lands are vast plains where many kinds of grasses abound, and which are in many places traversed by rivers, some of which are navigable. The wooded belt is situated near the Orinoco, and contains very rich gold mines. Here are produced, without the necessity of cultivation, caoutchouc, the tonka bean, copaiba, and other articles much prized in foreign markets. The great mountain chain of the Andes, which commences to the west of the straits of Magellan, after skirting the entire Pacific coast of South America, sends out two of its ranges towards Venezuela, their great altitudes furnishing varied climates. In the 1,500 miles

of her coast line Venezuela has 50 coves and 32 ports, besides numerous anchorages. Among these ports there are some which could well give anchorage to the combined fleets of Europe. The territory of Venezuela is traversed by 1,059 rivers, the greatest of all being the Orinoco, which is one of the greatest of the world. Its length is 1,300 miles, almost entirely navigable, and in some places being 12 miles wide. Its narrowest part is in front of Bolivar City, and it there measures 3,000 feet in width, which is one-fourth of its average width. The Orinoco has many tributaries, rendering navigation to the neighboring republic of Colombia easy, and the branch called the Casiquiare unites it with the Negro River, a great tributary of the Amazon, so that from the mouth of the Orinoco on the Atlantic there is established the extensive water communication which crosses Venezuela, Colombia, Ecuador, Bolivia, Peru, and which goes as far as Brazil.

There are only two seasons in Venezuela—summer and winter. The first is dry and the latter rainy, but the trees retain their verdure and produce the entire year as if it were a perpetual spring.

The climate of Venezuela is varied. On the coast it is hot, but there are never-failing breezes, and on the highlands it is cool and delightful, and there are localities where the mountains are covered with eternal snows. Although Venezuela is situated in the tropic zone, the temperature does not rise as much as it does in the corresponding latitudes of the north of Africa. The average heat reaches 80° on the coasts, and the highest temperature felt on the highlands is 71° F. In some parts of the coast the climate is not healthy, but in the rest of the country it could not be surpassed.

Venezuela is one of the richest Republics of South America as regards natural resources and easy means of developing them, for although its territory is crossed by three mountain systems their configuration presents many practicable means for communication with the plains and valleys. The greatest wealth of Venezuela consists in her agriculture, and coffee and cocoa are her principal products. The value of the annual export of coffee is estimated at \$12,000,000, and that of cocoa at more than \$3,000,000. The breeding of cattle is another source of wealth for Venezuela. There are at the present time in the country 11,000,000 head of cattle. The exportation of hides amounts to \$1,200,000 a year.

The population of Venezuela is about 2,500,000, of which 326,000 are native Indians. It is divided into 8 large States (each subdivided into sections or districts), a Federal district, 8 Territories, and 2 national settlements. The table below gives the area and population of each in 1889 :

Venezuela abounds in mines of gold, silver, copper, iron, lead, quicksilver, coal, petroleum, asphalt, kaolin, and several other minerals. The hand of man has hardly touched the smallest part of that great wealth. There are only in actual operation some gold mines in Guiana, belonging to native and foreign companies; those of copper in Tucacas, which belong to an English company; the coal mines of Naricual, owned by the family of the ex-President, J. G. Monagas, and those of copper of Carupano, worked by an American company. The gold mines of Yuruary, in Guiana, are considered among the richest of the world. It may be said that their working is just beginning, and nevertheless their annual output amounts to \$11,000,000.

Education.—The nation maintains 1,346 public schools, and there are besides municipal and private schools, national and private colleges, universities, and the academy of arts and trades. The proportion of those receiving education in Venezuela is 46 for each 1,000 inhabitants.

Railroads.—There are several lines already completed and others are being actively constructed by English, American, and German companies. Among these are the Central Railroad (Ferrocarril Central), which will unite Caracas with the capital of the State of Carabobo, and will be 240 kilometers in length; and the great Venezuelan Railroad (Gran Ferrocarril de Venezuela), also 240 kilometers in length, starting from Caracas, with its terminus in the city of San Carlos, on the plains of the Republic. An American company has already undertaken to build a cable road between Caracas and the near-by port of La Guayra, cutting through Mount Avila by a costly tunnel. Venezuela has, furthermore, good telegraph and telephone service, and is connected by cable with Europe and the United States.

Venezuela having reached the period of firm and fruitful peace, with the assurance of her liberties, begins to attract to her rich soil a current of industrious immigrants, to whom the Government offers great inducements. Agriculture, cattle raising, mining, and commerce attract not only laborers, but also great capital, to which some American corporations contribute. Foreigners are very well received and treated in Venezuela. The greatest fortunes in the country have been made by foreigners.

Money.—The coinage law now in force is that of May, 1887. Under it the monetary unit of the Republic is the bolivar, coined on the basis of the *peseta* or *franc*; its value in money of the United States is 15.4 cents. The denominations of the gold coins are 100, 50, 20, 10, and 5 bolivares respectively; the silver coins are the 5, 2, 1, and $\frac{1}{2}$ bolivar pieces, and the 20 centavo. Foreign gold pieces are considered as commodities, and are accepted in commercial transactions at the following rates: the United States 20-dollar gold piece at 104 bol., and the English pound sterling at 25.25 bol. There is no national paper currency, but three private banks enjoy the privilege of issuing bank notes.

Weights and Measures.—The libra, = 1.014 pounds avoirdupois; the arroba of 25 libras, = 25.35 pounds avoirdupois; quintal of 4 arrobas, = 101.40 pounds avoirdupois. The above are some of the old weights and measures in general use, but the legal ones are those of the French metric system.

COMMERCE.

Commerce with the United States.—Venezuela is one of the South American Republics which have most largely increased their commerce with the United States in the last decade. In 1880 Venezuela exported products to the United States to the amount of \$6,040,000 and imported merchandise to the value of \$2,270,000. In 1889 her exports to the United States amounted to more than \$10,000,000, and she bought in the same period merchandise valued at \$5,000,000, which is more than she annually sells to, and buys from, England, Germany, France, and other nations of Europe. The direct steamship communication existing between Venezuela and the United States has brought this about, and the friendly relations, daily growing closer, which unite the two Republics, efficaciously contribute to the progressive growth of their mutual commerce. The trade of Venezuela in 1887 and 1888 was divided among the leading countries as follows:

Value, in Bolivares, of the imports and exports into and from Venezuela from and to the several countries named, during the years specified.

[A bolivar is worth 15.4 cents in United States money.]

British Colonies.

The British West Indies are scattered throughout the Caribbean Sea and Atlantic Ocean. They are divided into six main groups: (1) Bahamas, consisting of 26 islands and 2,387 rocks, which stretch from the eastern coast of Florida to the northern coast of Santo Domingo, a distance of 600 miles; (2) Barbados, the most eastward of the Caribbee Islands, situated in latitude $13^{\circ} 4'$ north and longitude $59^{\circ} 37'$ west; (3) Jamaica, with Turks Island, west of Hayti and 90 miles south of Cuba; (4) Leeward Islands, which comprise Antigua, the Virgin group, St. Kitts, Nevis, Anguilla, Barbuda, Montserrat, and Dominica, lying north of the Windward Islands and southeast of Puerto Rico; (5) Trinidad, with Tobago, situated between $10^{\circ} 3'$ and $10^{\circ} 50'$ north latitude and longitude $61^{\circ} 39'$ and 62° west; (6) Windward Islands, lying between Trinidad and the Island of Martinique, and consisting of Grenada, St. Vincent, the Grenadines, and St. Lucia.

The Bermudas lie about 580 miles to the east of North Carolina and consist of a group of 360 small islands, about 20 of which only are inhabited.

British Honduras is situated in the Northeastern extremity of Central America, south of Yucatan and about 660 miles from Jamaica.

British Guiana, situated in the northern part of South America, is bounded by Venezuela, Brazil, Dutch Guiana, and the Atlantic Ocean, and its extent is from 9° to 1° north latitude and 57° to 52° west longitude.

The Falkland Islands, situated in the South Atlantic, 90 miles

east of Magellan Straits, include about 100 small islands, and are claimed by the Argentine Republic.

These possessions are noticed separately, but the commercial statistics of the United States being with the West India Islands as a group, some figures of their trade in merchandise with the United States are here inserted.

British West Indies.

	1886.	1887.	1888.	1889.	1890.

BAHAMAS, WEST INDIES.

Executive.—The governor, Sir Ambrose Shea, is assisted by an executive council of nine members, appointed by the Crown. Salary of governor, £2,000.

Legislative.—The legislature is a representative assembly of 29 members and a legislative council of 9 members. Electors are required to own property to a small amount.

Area and Population.—The area is 5,450 square miles and population about 49,500.

Of the 700 islands comprising the group, only about 20 are inhabited.

The capital is Nassau, in the island of New Providence; it has a population of 5,000.

San Salvador (Cat's Island), one of the group, is claimed to have been the first land discovered by Columbus in 1492.

Religion.—All sects are tolerated, but the majority of the inhabitants are members of the Church of England (Episcopal).

Education.—There are 36 Government and 38 private schools, with an attendance of 6,000 pupils. The Government schools are controlled by a school board. There are two English newspapers besides other periodicals published in Nassau. The garrison is stationed at Nassau.

Finance.—The finances of the Bahamas in 1889 were: Revenue, £46,230; expenditures, £48,476, and the public debt amounted to £83,126. The customs revenue, the chief source of income, was (in 1888) £38,372.

Army and Navy.—A small garrison is stationed at Nassau and cruisers of the British fleet visit the islands, from time to time.

Resources and Products.—Up to within a few years the principal industry of the Bahamas was fruit culture and fishing. At present the cultivation of sisal hemp is being vigorously carried on, and bids fair to supersede all other industries of the islands. English capitalists have invested large sums in the cultivation of the fiber. Private lands in New Providence sell at from \$4 to \$12 per acre, and for less in the other islands, which are equally suitable to the cultivation of the fiber. Sponge, turtle, conch, and pearl fishing is engaged in by a large number of the negro inhabitants.

The Bahamas have communication with the world by lines of steamers and by cable.

Banking.—There is a post-office savings bank, the receipts of which in 1888 were £2,950. On June 1, 1889, a joint-stock bank went into operation.

Commerce.—The exports of the Bahamas including fruits, sponges, pearls, shells, and ambergris amounted in 1888 to about \$591,425. These figures will be much increased by the shipment of sisal hemp. In 1888, 546,343 dozen pineapples, valued at \$204,812, were exported. The imports into these islands were of the value of \$926,606 for the same year.

The money, weights, and measures are identical with those of Great Britain.

BARBADOS.

Executive.—The governor (Sir Walter J. Sendall) is appointed by the Crown, at a salary of £3,000. He is assisted by an executive council of 9 members, also appointed by the Crown.

Legislative.—Legislative council, consisting of 9 members, appointed by the Queen, and a house of assembly, of 24 members, elected annually by the people. There are about 4,200 electors.

There are eleven parishes.

Judicial.—The supreme court holds its grand sessions once in every four months.

Area and Population.—Barbados has an area of 166 square miles, 100,000 acres being devoted to the cultivation of sugar cane.

The population of the island, 180,000, is claimed to be the largest of any of the islands in proportion to the area, being over 1,000 inhabitants to the square mile. Bridgetown, the capital, has a population of 25,000; Speightstown, 2,500. Bridgetown has a tramway, water, gas, and complete telephonic communication.

Religion.—Church of England; but all other religions are tolerated. The bishop and 38 incumbencies are supported by the State. Churches are numerous. The legislature grants to the Church of England, the Wesleyan, Moravian, and Roman Catholic Churches each a certain sum per annum.

Education.—The schools are under the direction of the Government. There were in 1888, 199 primary schools and 13,663 pupils; 5 second-grade schools, with 184 pupils; 2 first-grade schools, with 185 pupils; government high school, 74 pupils; Codrington College, connected with Durham University, 18 students.

There are one weekly and four bi-weekly newspapers.

Finance.—In 1888 the revenue and expenditures in Barbados were as follows: Revenue, £162,713, of which £88,736 were derived from customs; the expenditures were £149,710. The public debt in 1889 amounted to £30,100.

Army and Navy.—Fort Charles, mounted with a few guns, is the only fortification on the colony. It is garrisoned by 43 officers and 765 men.

Resources and Products.—The resources of the country are mainly agricultural; sugar, molasses, and rum being the chief products and articles of export; tobacco is indigenous; arrowroot, cassava, vegetables, and fruits in great varieties; fish supplies abundant and cheap food, and furnishes employment to about 1,500 of the inhabitants. Experiments are being made with some of the many fibrous plants which abound, such as cactus, silk-grass, etc.

Railways and Telegraph.—There are $23\frac{1}{4}$ miles of railway and 482 miles of roads.

Telephonic communication exists throughout the island.

Several lines of steamers, besides those of the Royal Mail and the Brazilian Mail from the United States, stop regularly at the island.

Banking.—The Colonial Bank has a paid-up capital of £600,000; coin in circulation, £50,000; 5-dollar paper notes, £60,000; Government savings bank, over 8,000 depositors and deposits of over £100,000.

Commerce.—The foreign commerce of Barbados for the five years from 1884 to 1888 was as follows:

Imports.	Value.	Exports.	Value.
1884	£1,156,230	1884	£1,318,879
1885	880,690	1885	1,003,894
1886	863,492	1886	739,912
1887	983,188	1887	1,063,898
1888	1,058,491	1888	1,074,584

The principal articles of export in 1888 were raw sugar, molasses, wheat flour, and dried fish; the imports were principally linens and cottons, wheat and rye flour, rice, and butter. The table subjoined gives the commerce of the island in detail:

COMMERCE OF BARBADOS.

NOTE.—The foregoing tables are reduced to United States values, at \$4.84 to the pound.

Money, Weights, and Measures.—In Barbados, the money, weights, and measures are the same as in Great Britain.

BERMUDAS.

Area and Population.—This group of islands and reefs has an area of about 20 square miles and a population of about 15,534.

Executive and Legislative.—The governor, appointed by the Crown, with a salary of £2,946, is assisted by a privy council of 9, nominated by the Crown, and a house of assembly of 36 members; 4 elected from each of the 9 parishes. There are 1,044 voters. The electoral qualification is the possession of property of not less than £60.

Religion.—The majority of the inhabitants belong to the Church of England.

Education.—Education is compulsory. In 1888 there were 47 schools with an attendance of 1,400 pupils; 23 schools receive grants from the Government.

Finance.—The revenue for 1888 was £29,372, and the expenditures for the same year were £30,147. The revenue for 1890 was £29,005 and the expenditures £30,076. The chief source of revenue is from customs duties. Public debt in 1889, £8,614. It has a savings bank with deposits amounting to £14,528.

Army.—The garrison averages 1,500 troops. Garrison town, St. George. Hamilton, the chief town, has a population of 8,000.

Resources.—The resources of the Bermudas are chiefly agricultural. It furnishes early vegetables and fruits and flowers to the markets of the United States, Canada, and Great Britain.

Telegraph.—There are 32 miles of telegraph. Bermuda is connected with Halifax by cable. There is also telephone service, with over 300 miles of wire and 120 subscribers.

Commerce.—The commerce is principally with the United States and Great Britain.

The exports of the islands for 1888 were £99,650 and the imports £299,990.

Money, Weights, and Measures.—The currency, weights, and measures of Great Britain are used on the island.

GUIANA.

Area and Population.—British Guiana, situated on the northern coast of South America, has an area of 109,000 square miles, and a population of 278,477, comprising Europeans, Indians, West Indians, Portuguese, Africans, Chinese, and Coolies, or East Indians.

Georgetown, the capital, has a population of 55,299.

Executive.—The governor is appointed by the Crown at a salary of £5,000. He is assisted by a court of policy, composed of 10 members, of which he is one; 4 of the members are appointed by the Crown and 5 nominated by the electoral college.

Legislative.—The colony is divided into 5 electoral districts, each represented by a member of the electoral college, which selects the 5 members of the court of policy. There are 1,400 regular electors.

Judicial.—There is a chief justice and judge of the vice-admiralty court, a puisne judge, attorney and solicitor-general, and numerous lesser magistrates.

Religion.—All religions are tolerated. Guiana is the chief bishopric of the Anglican Church in the British West Indies.

Education.—The schools all receive Government aid and are inspected by a Government official. There are 159 schools, semi-official, with 21,384 pupils and private schools with 6,500.

Finances.—The revenue of the colony for 1888 was £461,941, and expenditures £490,556, and that for 1889-'90 was estimated for revenue £484,000 and for expenditures £480,674; debt over £200,000.

Banking.—There are two banks, with a circulation of £139,218, and a savings bank, with deposits to the amount of £204,347.

Resources and Products.—Sugar is the chief product of Guiana; cotton, owing to the scarcity and high price of labor, has not been cultivated to any extent of late years; cocoanuts abound, and about 1,000,000 are annually exported. Coffee, cacao, and all the tropical fruits flourish, especially the banana, which is well adapted to the soil. The country is rich in fine timbers and cabinet woods, fiber plants, gums, oils, barks, gum animi, which is in some respects superior to gutta-percha. Cassava is the staple food product of the Indian. Cassareep, which is a preparation made from the root of the cassava, is a wonderful antiseptic, much used by the natives and throughout the British West Indies in their famous national dish, *pepper pot*, which it not only preserves for months, and even years, but adds to the dish an aromatic flavor much appreciated. The cassareep is made only for home consumption in Guiana and in a few of the islands, St. Lucia being the one most celebrated for the preparation of the extract. Should its preserving properties ever become generally known, it will undoubtedly prove a source of revenue to any cassava-growing country that learns the secret of eliminating the poisonous and retaining the preserving qualities of the root. There are fictions told and believed of pepper pots which were handed down as heirlooms from one generation to another in West India families.

Railways and Telegraph.—There are 23 miles of railway and 280 miles of telegraph, 275 miles of river navigation, and a number of well-made roads. There are 52 post-offices.

Commerce.—Commerce is mainly with Great Britain and the United States. The exports are principally sugar, molasses, and some rum, and the imports machinery, manure, cotton and linen goods, crockery, glass, furniture, household utensils, etc.

The following tables will give the amounts of exports and imports.

Imports into the countries specified, from British Guiana by principal articles.

NOTE.—The above tables are reduced to United States values at \$4.84 to the pound sterling.

Money.—The currency of the country is United States dollars and cents; British gold and silver coin is also current.

Weights and Measures.—The weights and measures of Great Britain are in use in the country.

BRITISH HONDURAS.

British Honduras is situated in Central America, between the parallels of $15^{\circ} 53'$ and $18^{\circ} 29'$ north latitude, and $88^{\circ} 10'$ and $89^{\circ} 9'$ west longitude; about 900 miles south of New Orleans. It is bounded on the north by the Rio Hondo and Yucatan; on the south by Guatemala, from which it is separated by the river Sarstorn; on the east by the Caribbean Sea, and on the west by Guatemala and Mexico. The climate is similar to that of the West Indies and the products tropical.

Executive.—As in the other colonies, the chief executive is a governor, appointed by the Crown, with a salary of £1,800.

Legislative.—The governor is assisted by a legislative council, consisting of five official and five unofficial members. The official members, appointed by the Crown, are the chief justice, the colonial secretary, the senior military officer, the treasurer, and the attorney-general. The six districts have each a chief magistrate.

Area and Population.—Area, 7,562 square miles, with a population of 27,452. Belize, the capital, has a population of 5,800 inhabitants.

Religion.—All religions are tolerated and the various sects well represented. The Anglican Church in British Honduras belongs to the diocese of the Bishop of Jamaica.

Education.—The schools are denominational, and receive aid from the Government. In 1889 there were 28 schools, of which 11 were Roman Catholic and 12 Wesleyan; number of pupils on the rolls, 2,569, and average daily attendance 1,781. The instruction is purely elementary. There are five newspapers and periodicals published in the colony.

Finance.—The revenue for the year 1889 amounted to \$381,838.19 and the expenditures for the same year to \$344,057. The total estimate of revenue for 1890 was \$369,003.95 and the expenditures \$312,971.77; total assets January 1, 1890, \$119,118.87; total liabilities January 1, 1890, \$164,896.99. The chief sources of revenue are derived from customs duties, excise licenses, land tax, and the sale and lease of crown lands.

Army and Navy.—In 1887 the British troops were removed and the protection of the colony entrusted to the constabulary force,

which numbers five commissioned, ten noncommissioned officers, and about 165 men. Detachments of the Second West India regiment are also stationed in the colony at times. Naval vessels visit the colony from time to time.

Resources and Products.—The agricultural resources of Honduras are very great. All tropical plants, fruits, and vegetables flourish. The timbers, fine cabinet and dye woods are all too well known to need mention here. A fine species of the cacao of commerce is a native of Honduras and is found growing wild in the forests along the banks of the Rio Grande and the other water courses. The cultivated cacao produces the largest and finest nibs grown anywhere. The coffee, both wild and cultivated, is of good quality and flavor. Among the most interesting plants are the *balata*, gum tree, called by the natives "toono," and the pita, or silk grass. The first abounds in some districts and produces a gum not unlike the gutta-percha. It is largely exported to England and Germany, where it is used as a substitute for India rubber. The second is a grass, producing a silky fiber, said to contain over 30 per cent. of silk as fine as that produced by the silkworm. It is known also by the name of juta, and is used by the natives in the manufacture of hammocks, cordage, etc., for which purposes it is claimed to be superior to either flax or hemp, on account of its durability. There are other fibrous plants, which grow wild and are utilized somewhat by the natives.

The drawbacks to the agricultural development of British Honduras are insufficient labor and inadequate transportation facilities. Besides these, the system of advance to the laborer keeps him in a condition of poverty and discontent, and ordinances have been enacted to do away with the pernicious system as far as practicable. Associated with the advance system is the truck system, which requires the laborer to take part of his wages in provisions and goods from the store of their employers. While the store system may be necessary in districts remote from settlements, it has the effect of keeping the laborer in debt to his employer and causes him to resort to all kinds of illicit measures to free himself from a state of semi-servitude.

Railway Schemes and Telegraphs.—There are several schemes for the establishment of one or more railways, in order to facilitate the

transportation of mahogany and other woods, for which the demand is great, and for the comfort and convenience of settlers and agriculturists who are remote from Belize and the coast. One scheme is to connect with the railway systems of Guatemala, and another with those of Mexico, passing through the logwood country, where there are vast tracts of crown lands not settled. Telegraphic communication with the United States and Europe is by way of New Orleans. There are several lines of steamers between the United States, England, and other countries.

Banking.—The savings bank at Belize has two branches; one at Corosal and one at Orange Walk.

Commerce.—The commerce of Honduras is mainly with the United Kingdom and the United States; considerable trade is also carried on with the neighboring Republics and with the West India Islands. The principal imports are cigars, malt liquors, spirits, sugar, tea, tobacco, wines, which in 1889 amounted to \$1,863,327. The principal exports are sugar, rum, mahogany, cedar, logwood, rosewood, fustic, ziricote, India rubber, sarsaparilla, turtle, cocoanuts, bananas, plantains and other fruits, amounting in 1889 to \$1,085,280. The exports from the United States for the year ending June 30, 1890, were \$354,468, and the imports into the United States for the same period were \$186,831. The following table will indicate its commerce with the United Kingdom and the United States for several years.

DOMESTIC EXPORTS.

Domestic exports from the United States and the United Kingdom to British Honduras.

	1885.	1886.	1887.	1888.	1889.

Total	1,123,899	1,073,798	1,132,410	1,117,548	1,298,007

Money.—The standard of value is the Guatemalan silver dollar, which, by the U. S. Treasury circular of January, 1891, is worth in the United States 77.1. The current coins are the Guatemalan dollar and its subdivisions, the Chilian dollar or sol, and the Peruvian sol, with their subdivisions. There is a 1-cent piece of the country in circulation also. The average rate of exchange with London during the year 1889 was \$6.75 to the pound sterling. There is no paper money in circulation.

Weights and Measures.—The British weights and measures are in common use, but the following Spanish ones are also employed, viz: The arroba, of 25 pounds; the quintal, of 100 pounds; the almud, of 5 quarts, for corn, etc.; the cargo, of 60 quarts; the barrel, of 110 quarts; the benequen, of 55 pounds, for lime; the vara, = $\frac{1}{11}$ yard (nearly); the mecate, of 24 varas, = 22 yards (nearly).

JAMAICA, WEST INDIES.

The Island of Jamaica, aboriginal name *Xaymaca*, a word supposed to imply "many rivers," is situated between 17° 43' and 18° 32' north latitude, and 76° 11' and 78° 20' 50" west longitude; about 90 miles south of Cuba. It is 144 miles in length and its greatest width 49 miles. The surface is mountainous, and the climate is greatly diversified, ranging from a tropical temperature of 80° to 86° on the sea coast to 45° and 50° on the mountain tops.

Executive.—Governor appointed by the Crown at a salary of £6000. He is assisted by a privy council and a legislative council, partly nominated and partly elected. Present governor, Sir Henry Arthur Blake.

Legislative.—The council consists of five members nominated by the Crown and nine elected members, presided over by the governor and four *ex officio* officers. The island is divided into three counties and fourteen parishes. The duration of the council is limited to five years, but the governor may dissolve it at any time.

Judicial.—There is a high court of justice, district courts, and a resident magistrate in each parish. The court consists of one chief justice and two puisne judges. All the judges must be members of the bar of England, Scotland, or Ireland of at least 5 years' standing.

The full court holds a session in Kingston on the first Monday of February, April, June, August, October, and December.

Area and Population.—Jamaica is 144 miles long and 49 to 21 $\frac{1}{2}$ miles wide, with an area of 4,200 square miles and a population of 585,582. Qualified electors, 28,176. The island is divided into 3 counties and 14 parishes. Kingston, the capital, has a population of 40,000. The following tables will give the area of the counties by parishes and the population of the important towns :

Surrey.		Middlesex.		Cornwall.	
Parishes.	Square miles.	Parishes.	Square miles.	Parishes.	Square miles.
Kingston	7 $\frac{1}{2}$	St. Catherine	450	St. Elizabeth	471
St. Andrew	169 $\frac{1}{2}$	St. Mary	229	Trelawny	332 $\frac{1}{2}$

Portland	310 $\frac{1}{2}$	St. Ann	464	Hanover	166
		Manchester	310	Westmoreland	308 $\frac{1}{2}$
Total	767 $\frac{1}{2}$	Total	1,920	Total	1,505 $\frac{1}{2}$

Population.

Kingston	40,000
Spanish Town	5,689
Montego Bay	4,651
Port Maria	6,741

Religion.—There is no established church, but the greater part of the inhabitants are members of the Church of England. Most of the denominations are also represented.

Education.—In 1888 there were 771 elementary schools, with an attendance of 71,643 pupils. There is a high school in Kingston and several training colleges for teachers, and a large number of free, private, and parochial schools. The 771 elementary schools received, in 1888, from the Government a grant of £23,323. Five daily newspapers are published in Kingston; there are published besides, in the island, 3 weekly, 2 semi-weekly, 7 monthly, 3 fortnightly, and 2 tri-weekly papers, and a quarterly review.

Finance.—The revenue and expenditure for the year 1888 may be summed up as follows: Public revenue, £576,147; expenditure, £546,092; parochial revenue, £103,624; parochial expenditure, £107,482; immigration revenue, £11,478; immigration expenditure, £4,553.

Army and Navy.—There is usually a standing force in the island of 1,276 officers and men, and a volunteer force of 610. Thirteen ships of the Royal Navy are kept on the North American and West India stations.

Resources and Products.—The principal products are agricultural. Sugar cane, coffee, corn, cacao, cocoa, pimento, nutmeg, and all kinds of tropical fruits and vegetables. In Kingston there are three or four factories, one for soap, one for matches, and several for canning fruits and turtle. Fish abounds. About 2,000,000 bushels of salt are raked and exported annually from Turk's and Caicos Islands, dependencies of Jamaica.

Railways and Telegraph.—There are 93 miles of railway and 698 miles of telegraph. Cable communication with all parts of the world. There are several lines of steamers which stop regularly at the island, the Atlas and Anchor Line leaving New York and Kingston every fortnight.

Post-office.—Letters to the number of 1,408,453 passed through the post-office in 1888.

Banking.—The Government Savings Bank has branches throughout the island. In 1888 there were 18,311 depositors, with deposits to the amount of £393,220. At the same time the Colonial Bank had a circulation of \$2,030,562. The legal coinage is that of Great Britain, but American coins are current. Colonial Bank notes circulate as currency.

Commerce.—The commerce of Jamaica is principally with Great Britain and the United States. Consul Hill, of Kingston, Jamaica, has furnished the Department of State with a complete table of imports from the United States and of exports from Jamaica to the United States for the year ending September, 1889; and Consul Estes, under date of July 10, 1890, makes some very pertinent remarks as to the trade between Jamaica and the United States, and suggestions as to the means of promoting the same.

NOTE.—These tables are reduced to United States values at \$4.84 to the pound.

Money, Weights, and Measures.—The money, weights, and measures of Jamaica are the same as those of Great Britain. American coins are current, and there are notes of the Colonial Bank which are used as a circulating medium.

LEEWARD ISLANDS.

The Leeward Islands, or Lesser Antilles, include the Virgin Group. Denmark, Holland, and France own some of the group, though the greater number are British possessions. Antigua, Barbuda, and Redonda, the Virgin Group, Dominica, St. Kitts, Nevis, Anguilla, and Montserrat are the most important.

Government.—These Islands are divided politically into five presidencies with independent legislatures, under one governor, whose residence is at the seat of government, St. Johns, in the Island of Antigua. The Legislature meets once a year, and as in the other British West India Islands, the members are partly appointed by the crown and

partly elected. Present Governor, Sir William Frederick Haynes Smith, salary, £3,000. Antigua is the most important of the group. St. Johns, the capital, has a population of 10,000 inhabitants, several good schools—public, private, and parochial. It is also the bishopric of the Church of England in the West Indies.

Religion.—All religions are tolerated in these islands, but the greater number of the inhabitants are members of the Church of England, or of Rome.

Education.—The denominational schools are aided by the Government. Including the private schools there are 104, with an average attendance of 8,000 pupils.

Area and population of the Leeward Islands.

Islands.	Square miles.	Population, 1886.
Antigua.....	170	35,000
Barbuda and Redonda.....	62	
Virgin Islands.....	58	5,000
Dominica.....	291	29,500
St. Kitts.....	65	45,000
Nevis.....	50	
Anguilla.....	35	11,680
Montserrat.....	82	

Resources and Products.—The products are mainly sugar, molasses, pine apples, and other fruits; salt, phosphate of lime, cocoa, cattle raising, etc.

Banking.—There is a branch of the Colonial Bank at Antigua and a Government Savings Bank.

Commerce.—Is mainly with Great Britain and the United States; in 1888 the exports were \$2,480,105 and the imports \$1,971,891.

The money, weights and measures of Great Britain are used; but American coin is to a slight extent current in some of the islands.

TRINIDAD AND TOBAGO.

Executive and Legislative.—The executive of Trinidad is vested in a governor, appointed by the crown. He presides over the legislative council, which is composed of 8 official and 8 unofficial members,

and the executive council—all nominated. Salary of the governor, £5,000.

Judicial.—The judicial power is similar to that of the other colonies—a supreme court and subordinate courts.

Area and Population.—The area is 1,754 square miles, with a population of 189,566. Port of Spain, the capital, has a population of 31,900. Tobago, annexed in 1889 to Trinidad, has an area of 114 square miles and a population of 19,937.

Religion.—Religious toleration prevails, but the majority of the population is Episcopalian and Roman Catholic.

Education.—One hundred and ninety-one schools, 16,000 pupils. Government grant, £16,783. Many private schools exist. There is a queen's college with 65 students, and a Roman Catholic college with 220 students.

Finance.—The revenue of Trinidad for the year 1888 was £480,523. Expenditures for 1888 was £463,346. For Tobago, revenue for 1888, £10,489; expenditures for 1888, £8,155.

Army and Navy.—Volunteer corps, 235; police force, 435.

Tobago has a commissioner appointed by the governor and two members of the legislative council.

The judges are the same for both islands.

Resources and Products.—Sugar is the chief staple, but the cultivation of cacao, coffee, and tobacco gives employment to the somewhat scant laboring population. Tobago grows sugar and cotton. The pitch lake, which is about 90 acres in extent, is an indirect source of income to the island of Trinidad. It has been leased for 21 years from 1888 to Messrs. A. L. Barber & Co. for \$48,000 per year, payable to the government of Trinidad. The fruits of both these islands are the same as those of the other Antilles.

The island of Tobago is claimed by some to have been the scene of the famous story of Robinson Crusoe.

Railways and Telegraph.—There are 54 miles of railway in Trinidad and 717 miles of telegraph. The steamship service is very good. The importance of the colony may be estimated by the

number of the steamers arriving at the Port of Spain from all parts of the world. Some of these are: •

Royal Mail steamers	per month..	4
Royal Mail cargo boats	do.....	2
Compagnie Générale Transatlantique	do.....	2
West India and Pacific Line	do.....	2
Harrison Line.....	do.....	1
Liverpool Line	do.....	1
London Line	do.....	4
Clyde steamers	do.....	1
Quebec and Gulf	do.....	2
Atlantic and West Indian	do.....	3
Venezuelan	do.....	4

Banking.—There is a colonial bank with a note circulation of £130,000. Government Savings Bank had in 1888 5,350 depositors and deposits to the amount of £122,763.

Commerce.—Is principally with Great Britain, the United States, and South America. The subjoined tables will give the imports and exports of Trinidad for the years 1886-'88. The exports from Tobago were as follows: 1884, £41,416; 1885, £38,379; 1886, £18,891; 1887, £32,907, and 1888, £38,900. Principal articles of export are, in the order named, sugar, cocoanuts, cattle, and molasses. The imports into Tobago were £20,499 in 1886, £23,117 in 1887, and £28,847 in 1888.

Exports and imports of Trinidad.

NOTE.—Reduced to United States values at \$4.84 to the pound.

Money, Weights, and Measures.—Are those of Great Britain.

WINDWARD ISLANDS.

This group consists of Grenada, St. Vincent, St. Lucia, and the Grenadines.

Executive.—These islands unite for certain common purposes, but each has its own separate institutions, legislative councils, and its own administrator and colonial secretary. The governor and commissioner in chief of the group is Sir W. F. Hely-Hutchinson; salary, £2,500.

Legislative.—The legislative members are, as in the other colonies, partly nominated and partly elected. The parish public boards for the transaction of local affairs are partly appointed and partly elected.

Grenada, the most populous of the group, has an area of 120 square miles with a population of 49,337. Capital, St. George's.

Education.—In 1888 it had 29 Government schools with 4,440 pupils, and a grammar school with 35 pupils.

St. Vincent has an area of 122 square miles and a population of 46,872. The capital is Kingston, with a population of 5,393.

Education.—Forty-eight schools, 4,968 pupils.

St. Lucia has an area of 245 square miles; population (1888), 42,504. Chief town is Castries; population, 4,555.

Education (1888).—Twenty-six schools, 14 of which were Protestant and the others Roman Catholic. The number of pupils was 3,351.

The Grenadines are small islands of no especial importance. The largest, Carriacou, has an area of 6,913 acres and a population of 5,154.

Banks and Money.—The three principal islands have each a Government savings bank, and there are colonial bank agencies. The legal currency is British sterling, doubloons, United States coins, and colonial bank notes.

Religion.—All religions are tolerated; in Grenada and St. Lucia the majority of the inhabitants are Roman Catholics, and in St. Vincent the majority are members of the Church of England.

Finance.—The table below indicates the financial condition of these islands in 1889.

	Public debt.	Revenue.	Expenditure.
Grenada.....	£44,475	£50,441	£51,086
St. Lucia.....	141,260	47,509	46,085
St. Vincent.....	14,180	27,522	21,830

Resources and Products.—The staple products of most West India islands are sugar, molasses, rum, and fruits, and vegetables in great variety. In late years the low prices of sugar have caused many planters to turn their attention to the cultivation of other plants, and Grenada is successfully competing with Java and Sumatra in the production of cloves, nutmegs, and other spices, and with Trinidad in the quality of its cocoa.

St. Vincent is falling into decay for want of capital and energy on the part of the inhabitants. Besides sugar, molasses, and rum in small quantities, very little else is cultivated but arrowroot and cassava, and such fruits as grow without special attention. The timber is fine, but the means of transportation limited. It is the chief coaling station of the West Indies.

St. Lucia, though never rich and prosperous, has never suffered extreme poverty. It is the second station of the British fleet in the West Indies. Castries Harbor is in many respects superior to that of Jamaica. It has a fine usine or central sugar factory, well equipped with machinery; it produces a fine quality of sugar, but much of the land suited to this industry has never been planted. Tropical fruits, cacao, spices, etc., abound.

The roads in most of these islands are very poor.

There is some regular steamship communication. Castries is in the direct steamship route.

Commerce.—The commerce of these islands is principally with Great Britain and the United States.

The principal imports are flour and other food products, hardware, crockery, cotton goods, and wearing apparel, linens, machinery, etc. The exports are sugar, rum, molasses, arrowroot, logwood, cocoa, coffee, spices, and fruits.

The following figures will show the amount of commerce of the above-named islands for 3 years:

	Imports.			Exports.		
	1886.	1887.	1888.	1886.	1887.	1888.
St. Lucia.....	£122,283	£115,686	£140,858	£105,207	£117,743	£122,229
St. Vincent.....	91,185	79,702	79,777	70,476	85,770	81,836
Grenada.....	129,838	143,185	162,437	180,691	217,949	229,263

Money, Weights, and Measures.—The currency, weights, and measures of Great Britain are used almost entirely in these islands, but the United States gold coins pass current as well as doubloons. The Colonial Bank, in St. Lucia, issues \$5 notes.

Danish Colonies.

The Danish possessions consist of three small islands of the Virgin group of the Leeward Islands, lying between the seventeenth and eighteenth degree of north latitude and in about the sixty-fourth degree of longitude.

Area and Population.—St. Croix, or Santa Cruz, the largest, has an area of 74 square miles, and a population of 18,430, of which about 5,000 are white. St. Thomas has an area of 23 square miles, and a population of 14,389, and St. John, with 21 square miles, has a population of 944.

Executive.—The colony has a governor, appointed by the King, at a salary of \$10,500. The present seat of government is in St. Thomas; but the governor, Christian Henrik Arendrup, who has held the office since 1881, resides six months in St. Croix and six months in St. Thomas.

Legislative.—The Governor is assisted by a staff composed of members appointed by the King, and a burgher or colonial council, five members of which are appointed by the Crown; the other members are elected. Each island elects its own colonial councilors, and those of St. John attend the council of St. Thomas, while at St. Croix there is a separate council.

Religion.—The Lutheran is the established church of the colony, but all religions are tolerated and well represented.

Education.—There are Government free schools in each island. There are also private and denominational pay schools. As education is compulsory, most of the inhabitants can read and write. English is the prevailing language.

Finance.—The estimated revenue of the islands for the financial year 1891-'92 is \$113,300, and the expenditures \$179,271.

Army and Navy.—Small garrisons of Danish troops are kept in St. Croix and in St. Thomas, and a ship of the royal navy cruises about the islands. The Brand corps, or militia, is mainly composed of the negro population.

Resources and Products.—The staple products of St. Croix are sugar, rum, and molasses. St. Thomas is a free port and is the commercial depot of many of the West India Islands. St. John is also a free port. It grows a good quality of coffee and of tobacco; sugar is also produced, but in small quantities; the soil is rich, and fruits and vegetables abound.

Communications.—The colony is connected by cable with the rest of the world. St. Thomas is one of the principal stopping places of the various European and American steamship lines trading with the Americas.

Banking.—There is a branch of the Colonial Bank in each of the islands of St. Thomas and St. Croix. St. Thomas has besides a savings bank and the Bank of St. Thomas.

Towns.—The town of the island of St. Thomas, Charlotte Amalia, has a population of 13,000. The principal towns of St. Croix are Christiansted, population 5,127, and Fredericksted, 3,817. Cruz Bay, the town of St. John, has a population of about 100. Coral Bay is a good harbor.

Commerce.—Commerce is principally with Denmark, Great Britain, and the United States, but the goods of almost all the countries of the world may be obtained in St. Thomas. In the harbor it is common to see the flags of nearly every nation, and on the streets to hear spoken every language of the world.

For the year ending June 30, 1890, the United States imported from the Danish West Indies merchandise to the value of \$588,739, and its exports thereto amounted to \$794,293.

The principal articles of export to these islands were: Bituminous coal, \$155,000; wheat flour, \$137,000; whiskies, \$45,000; corn meal, \$40,000, and various meat and dairy products. In 1889 Great Britain's exports thereto were \$393,826, and its imports from there were

\$24,474. For the year ending March 31, 1889, the United States consul gives the total imports into St. Thomas at \$1,126,000, of which \$343,000 was from the United States and \$343,300 from Great Britain.

Money, Weights, and Measures.—The standard coin is the rix-bank dollar, but English, American, Spanish, and French coins are current. The English weights and measures are generally employed.

Dutch Colonies.

CURAÇAO.

The colony comprises the islands of Curaçao, Bonaire, Aruba, part of San Martin, St. Eustache, and Saba. The executive authority rests in a governor, attorney-general, and a council of three members, all appointed by the Sovereign.

The legislative or colonial council is composed of members elected by the different districts and of eight members appointed by the Sovereign. Except Curaçao, where the governor resides, the islands have each a "*gezaghebber*" or chief officer appointed by the Sovereign.

Area and population

	Square miles.	Population.
Curaçao.....	210	25,667
Bonaire.....	95	4,259
Aruba.....	69	6,990
San Martin.....	17	4,198
St. Eustache.....	7	2,335
Saba.....	5	2,505

Religion.—All religions are tolerated, but the Roman Catholic predominates.

Finance.—The revenues of the colony are derived from import, export, and excise duties and some land and indirect taxes. The revenue and expenditures of 1889 appear to balance at 702,094 guilders.

Army and Navy.—The colony is garrisoned by 9 officers and 231 men; the militia consists of 18 officers and 263 men. A vessel of the royal navy cruises about the colonies.

Resources and Products.—The chief products are corn, beans, cattle, salt, lime, pulse, and fruits. The rind of the orange, from which the famous liqueur which bears the name of the island is made, is shipped in large quantities to Holland, where the liqueur is manufactured.

Commerce.—Commerce is mainly with The Netherlands, the colonies on the Spanish Main, France, and Great Britain. The imports in 1887 were valued at 3,240,006 guilders and the exports to 510,200 guilders.

In 1887, 2,993 vessels entered the various ports of the colony.

The imports from the Dutch West Indies into the United States for year 1889-'90 were of the value of \$194,036, and the exports therefrom to these islands for the same period \$609,693. Crude opium to the amount of \$44,000, goatskins \$28,000, and coffee \$25,000, are the chief articles of import into the United States from there; and the exports from the United States consist principally of the following: Wheat flour, \$99,000; manufactures of cotton, \$72,000; tobacco, \$44,000; corn \$40,000.

Money, Weights, and Measures.—The same money, weights, and measures are employed as in The Netherlands, which has adopted the metric system. The gulden, or guilder, equals 40.2 cents in United States values.

DUTCH GUIANA.

Dutch Guiana, or Surinam, is on the north coast of South America, between the French and British colonies.

Executive.—A governor, assisted by a council, of which the governor is president, composed of a procureur-general as vice president, and three members, all appointed by the court. The colonial States form the representative body of the colony. Four members are chosen every year by the governor, and the other members are elected in the proportion of 1 to every 200 electors. The colony is divided into 16 districts and subdivided into communes. It has an

area of 46,060 English square miles and a population of 57,141. Paramaribo, the capital, has 27,422 inhabitants.

Judicial.—The court of justice is composed of a superior court and canton and circuit courts. The president, members, and recorder of the superior court are appointed by the Sovereign.

Religion.—All religions are tolerated and all more or less represented in the colony, the Reformed Lutheran and Moravian churches having the largest following. Among the sects are 4,731 Hindoos and 114 Buddhists.

Education.—In 1887 there were 48 schools with an attendance of 5,386 pupils and 103 teachers. Besides the primary, there are some denominational schools and a Moravian training school for teachers.

Finance.—The revenues are derived from import, export, and excise duties, taxes on houses and estates, besides other imposts and indirect taxes. The colony receives a subvention from the Netherlands. The revenue for 1890 was estimated at 13,408,130 guilders and the expenditures 1,628,541 guilders.

Army and Navy.—The garrison in 1887 consisted of 20 officers and 366 men; the militia, 27 officers and 486 men; the civic guard, 64 officers and 771 men. The navy consists of a few guard ships and a few vessels belonging to the royal navy.

Resources and Products.—Sugar is the staple product of Surinam; bananas, cacao, coffee, cotton, and other tropical fruits and vegetables grow abundantly. Gold mining is one of the industries of the country. In 1887 the export of gold was 1,006,904 grammes. These exports were mainly to the Netherlands, Great Britain, and France. The colony has just been connected by cable with the French West India colonies. It has some other telegraphic connections. In 1887 453 ships entered the ports. Communication between the districts of the colony is carried on by vessels.

Banking.—A colonial savings bank is established at Paramaribo.

Commerce.—Commerce is principally with the Netherlands, France, and Great Britain. In 1888 the imports amounted to 4,346,840 guilders, and the exports for the same period to 3,316,377 guilders. The imports into the United States for the year ending June 30, 1890, were of the value of \$574,114, and the exports from that country to Dutch Guiana of domestic merchandise \$273,203.

The table below indicates its commerce with the three leading commercial countries for several years, the data for France, including its commerce with St. Eustache, Curaçao also.

* Not stated.

Money, Weights, and Measures.—The money weights and measures are the same as in the Netherlands, which country has adopted the metric system. The monetary unit is the gulden or guilder = 40.2 cents in United States values.

French Colonies.

GUADELOUPE.

Guadeloupe, one of the lesser Antilles, has an area of 360 square miles and a population of 182,182. It is divided into two parts by a natural canal, called River Salée (Salt River), and surrounded by a number of small islands.

Government.—The governor, appointed by the French Government, is assisted in his duties by an elected council. The garrison is composed of French soldiers.

It is politically divided into arrondissements, cantons, and communes. The chief towns are Pointe à Pitre, with a population of 15,172, and Basse Terre, the capital, with a population of 9,500.

Education.—There are 49 primary schools, with an attendance of 9,753 pupils.

Religion.—All religions are tolerated, but the majority of the inhabitants are Roman Catholics.

Finances.—Finances for the year 1889 are reported as balanced at 5,027,130 francs; debt, 1,000,000 francs; expenditure of France (1890), 2,122,085.

Resources.—The resources and products of Guadeloupe are similar to those of the other West India Islands. Chief cultures: Sugar cane, coffee, cacao, vanilla, spices, manioc, bananas, sweet potatoes, rice, Indian corn, vegetables, tobacco, cotton, ramie fiber, India rubber, forest timbers of fine quality, and annatto, of which large quantities are annually exported, principally to France. Large numbers of sheep and swine are raised. The island is well supplied with cattle, horses, etc.

There are 60 miles of railway in Guadeloupe. Several lines of steamers touch monthly at the principal ports. Trade is mainly with France and the United States. The value of imports in 1887 was 14,196,966 francs and 21,519,696 value of exports for the same year.

MARTINIQUE.

Martinique is situated in the Carribbean Sea, opposite to the Isthmus of Panama. It is about 45 miles long and from 10 to 15 wide. The island is well watered and fertile, and some of the mountain slopes are covered with primeval forests, while their summits are craters of extinct volcanoes. Mt. Pelée, the highest, rises to an altitude of 4,450 feet, in the extinct crater of which is a large lake known as Palmistes.

Executive.—Martinique is under a French governor and municipal councils, with an elected general council. It is divided into 32 communes, 9 cantons, and 2 arrondissements. Population, 1888, 175,391.

There are several primary schools with an attendance of 8,320 pupils. Chief town, St. Pierre, 18,707 inhabitants; capital, Fort de France, population 8,548. Chief culture is sugar cane. All the tropical fruits, vegetables, etc., grow abundantly, and large numbers of bananas are exported.

Commerce.—The imports in 1887 were valued at 23,461,450 francs, and were principally manure, salt fish, rice, cotton, etc. The exports were mainly sugar and liquors, which amounted in 1887 to 20,859,310 francs.

The island is garrisoned by French troops. Cable communication has just been opened with Paramaribo, the capital of Dutch Guiana, on the Spanish main.

GUIANA.

Guiana, which is poorly cultivated, has a population of about 25,000. Cayenne, the principal town, has a population of 8,500. The colony is under a governor. Trade is insignificant.

ST. PIERRE AND MIQUELON.

Two islands lying near the southern coast of Newfoundland. Population about 6,000, mainly engaged in codfishing. The governor is appointed from France and the colony is garrisoned by French troops.

COMMERCE OF THE FRENCH COLONIES.

Value of exports for 1887 (principally for France and her colonies) were 18,230,272 francs, and imports 13,746,587, of which a large proportion was from North America:

Commerce for the year 1888.

In Martinique, by a decree of April, 1855, foreign money ceased to be a legal currency in that island. The Spanish quadruple, or doubloon, had formerly been much used in commercial transactions. In the same island a colonial decree of 1844 finally established the metric system of weights and measures only.

Money.—The monetary unit is the franc of 100 centimes, and its value, in terms of the United States gold dollar, is 19.3 cents.

Weights and Measures.—The metric system of weights and measures is used. It derives its name from the metre, which is the primary base or unit from which the other units of the system are derived; it was based upon the length of the fourth part of a terrestrial meridian; the ten-millionth part of this arc was chosen as the unit of measure of length and called a metre; the other units are the litre and the gramme, and the multiples of these units, proceeding decimally, are distinguished by the employment of the prefixes deca, hecto, kilo and myria, from the Greek, and their subdivisions by deci, centi, and milli, from the Latin. The metre (the unit of length) = 39.37079 inches; the kilometre = 1,093.63 yards, about 4.971 furlongs, or .62138 of a mile. The gramme (the unit of weight) = 15.43234 grains; the kilogramme = 2.20462 pounds avoirdupois, or 2.67922 pounds troy; the quintal-métrique = 220.46212 pounds avoirdupois, or 267.92272 pounds troy; the millier or tonneau = 2,204.62124 pounds avoirdupois. The litre (the unit of capacity) = .9081 quart, United States dry measure; the hectolitre = 2.83791 bushels, United States dry measure; the litre = .26418 gallon, United States liquid measure; the kilolitre = 264.186 gallons, United States liquid measure; the are or 100 square metres = 119.6033 square yards; the hectare (the measure of land) = 2.47114 acres; the kilomètre, carré, or square kilometre (the measure of area) = 247.1143 acres or .3861161 English square mile; the metre cube, kilolitre, or stère = 35.3165 cubic feet; the litre (measure of volume) = 61.027 cubic inches.

Spanish Colonies.

CUBA.

Cuba, a colony of Spain, is the largest of the West India Islands. It is situated at the mouth of the Gulf of Mexico, 130 miles from Florida, from which it is separated by the Bahama Channel. On the east it is separated from Hayti by the Windward Passage; on the south from Jamaica by a portion of the Caribbean Sea, and on the west from Yucatan by the Yucatan Channel. It extends from longitude $74^{\circ} 6'$ to $89^{\circ} 59'$ west of Greenwich, and is in latitude $19^{\circ} 49'$ to $23^{\circ} 13'$ north. The island is about 600 miles long and 21 miles wide in the narrowest part and 111 in the widest. The mean temperature is from 70° to 73° Fahr. The hottest averages from 84° to 85° ; the coldest 70° .

Government.—The government of the colony is administered by a governor-general appointed by the Crown, and responsible directly to the Colonial Secretary (*Ministro de Ultramar*) at Madrid. There is a Council of Government (*Consejo de Administracion*) established at Havana, the members of which are appointed by the Crown, and the governor-general is bound in some cases to ask for its advice but never to follow it. He has viceregal powers and faculty of suspending the execution of any law or decree transmitted to him from Madrid, should he deem it to be advisable.

The island is divided into 6 provinces, namely: Havana, Matanzas, Pinar del Rio, Santa Clara, Puerto Principe, and Santiago de Cuba. Their capitals bear the same names. At the head of each province there is a civil governor appointed by the Crown, and depending directly from the governor-general, and subsequently from the Colonial Secretary.

The island is represented in the Spanish Parliament, or *Cortes*. Each province sends 2 men to the Senate, but the University of

Havana and the "Royal Society of Friends of the Country" have the right to select each one a Senator, making in all 14 representatives in the Spanish Senate.

The representation in the lower house, or *Congress of Deputies*, is according to the population. Havana sends 9 members, Santa Clara 6, Matanzas and Santiago de Cuba 5 each, Pinar del Rio 4, and Puerto Principe 1. Total, 30 Deputies.

Each province has a kind of legislative assembly, with very limited powers, called "*Diputación Provincial*," the members of which are elected by the people.

Each city, or town of some importance, has a mayor (*alcalde municipal*) and a city council (*ayuntamiento*). Both the mayor and the members of the council are elected.

Area and Population.—The area of Cuba is, according to the *Cuadro estadístico* official of 1846, 34,233 square miles; but the isle of Pinos has 810 square miles and the other islands and keys 970. Total, 36,013 square miles. The population, according to the official apportionment made for the election of deputies in December, 1890, and published in the *Gaceta Oficial de la Habana*, is 1,631,687 inhabitants. Sixty-five per 100 are white, and the balance of 35 per 100 includes all colored people and the Chinese. Havana, the capital, has a population of 250,000. Other important towns are Matanzas, 87,760; Santiago de Cuba, 71,307; Cienfuegos, 65,067; Puerto Principe, 46,641; Holguin, 34,767; Sancti Spiritu, 32,608; Guana-bacoa, 16,402; Sagua la Grande, 9,632.

Religion.—Roman Catholicism is the prevailing religion, but all other creeds are tolerated.

Education.—There were in Cuba in 1890, 777 public and 538 private schools. There is an official *instituto* of secondary or collegiate instruction in each province and the famous University of Havana at the capital. Forty-five thousand and twenty-eight children attend the primary schools. Thirty-five and eleven-hundredths per cent. of the white population and 12.28 per cent. of the colored can read and write.

Finance.—The estimates of revenue for 1890-'91 were \$25,699,102.80 and the expenditures \$25,622,656.82. The public debt is stated at £37,200,000. The so-called debts of 1878 and 1880, and

the floating debt up to 1886, amounting to \$124,000,000, were consolidated by royal decree of May 10, 1886. The customs revenues and other revenues of the island are pledged to secure the payment of these bonds and interest. The annual income of the inhabitants is estimated at \$80,000,000 and the taxes, direct and indirect, at \$25,000,000, besides a sum of \$8,000,000 levied in local taxation by 153 municipalities.

Army and Navy.—The armed force consists of infantry, cavalry, and artillery, and the volunteer organization, the former numbering 19,000 men and the latter 63,115. War ships of the royal navy cruise about the island.

Resources and Products.—Sugar and tobacco are the staples. About 656,719 tons of sugar were produced in 1888 and of molasses 157,791 tons. The yearly production of tobacco is about 300,000 bales. The whole island is wonderfully fertile; it abounds in forest woods and is capable of producing all the fruits of the tropics and some of those of the temperate zones. The mineral wealth of the country, consisting of gold, copper, iron, and manganese mines, is immense. Asphalt is found in abundance, and there are beautiful marble quarries, especially in the isle of Pinos.

Railways and Telegraphs.—There are 1,000 miles of railway and 2,810 miles of telegraph. A loan of \$40,000,000 has been authorized to complete the railways of Cuba.

Banking.—There are several banks in Havana with branches in the larger cities.

Commerce.—The commerce is principally with Spain, the United States, and Great Britain. The principal exports are unrefined sugar, molasses, and tobacco, and the principal imports are flour, salt provisions, cotton, linen, and woolen goods, hardware, glass, crockery, machinery, etc. The United States in 1889 imported from Cuba over one billion pounds of sugar, of the value of \$36,277,489, molasses to the value of \$3,416,754, tobacco and its manufactures worth \$9,237,836, and fruit and nuts \$1,576,751. Its principal exports to Cuba with their values were meat and dairy products, \$3,257,883, iron and steel and manufactures thereof, \$1,988,018, breadstuffs, \$1,336,047, wood and its manufactures, \$1,110,946, and coal, \$581,095.

PUERTO RICO.

The Spanish colony of Puerto Rico is the fourth in size of the Antilles. It lies east of Hayti and west of the Virgin Islands. Its latitude is $17^{\circ} 56'$ north, and longitude $67^{\circ} 10'$ west. It is 90 miles in length and 36 in breadth. A range of mountains extends through the center of the island, the highest peak reaching an altitude of 3,678 feet. The climate is healthful and agreeable, the thermometer hardly ever reaching 84° and never falling below 50° F. The soil is fertile and tropical vegetation luxuriant.

Executive.—Puerto Rico is governed by a Captain-General, appointed by the Crown, and is assisted by a junta of military officers, also appointed by the Crown. The Captain-General is the president of the royal audiencia or assembly of the island. The colony is divided into seven departments, represented in the Cortes in proportion to the number of inhabitants.

Area and Population.—The area of Puerto Rico is 3,550 square miles, and population 784,709, of which about 300,000 are negroes. San Juan de Puerto Rico, the capital, has a population of 23,414; other important towns are: Ponce, 37,545; San German, 30,146; Mayaguez, 12,000; Arecibo, 11,187; Guayama, 5,400.

Religion.—The majority of the inhabitants are Roman Catholic, but other religions are tolerated.

Finance.—The estimated expenditure for the year 1888-'89 was 3,973,491 pesos, and the estimated income 3,863,100 pesos.

Army and Navy.—There are 3,566 regular troops garrisoned on the island, besides a reserve militia. A man-of-war of the royal navy cruises in the Caribbean Sea.

Resources and Products.—The principal agricultural products of Puerto Rico are sugar, molasses, tobacco, coffee, rice, cotton, plantains, bananas, and other tropical fruits. The mineral resources are but little known. Gold is often found in the washings from the hills; copper, iron, and lead have also been found. There are several natural salt ponds worked by the Government, and much fine timber and valuable cabinet woods. The climate is healthful, and the soil is claimed to be the most fertile of the Antilles.

Railways and Telegraph.—There are about 470 miles of railroad in the island, and a good service of telegraph to the principal towns.

Banking.—San Juan possesses a banking institution which has branches throughout the Island.

Commerce.—Commerce is mainly with Spain, Great Britain, the United States, and the other West India Islands. The total exports for 1887 were \$10,181,291, and the imports \$10,198,006. The chief exports are sugar, molasses, cotton, tobacco, coffee, honey, dye-woods, etc. The number of vessels which entered the ports during 1887 were 1,344 of 1,023,656 tons, and 1,303 of 877,582 tons cleared during the same year. In 1889 the imports into Puerto Rico were \$13,128,436, and its exports \$10,247,749. In 1889 the United States imported from Puerto Rico brown sugar \$2,966,232, and molasses \$804,391; other imports therefrom were coffee, fruits, and nuts. Its exports to Puerto Rico and their values were, wheat flour, \$638,210; meal, and dairy products, \$631,622; and wood and its manufactures, \$311,804. Other exports were iron and steel, and manufactures thereof; mineral oils, paper, and manufactures thereof; and chemicals, drugs, and dyes.

In 1890 (June 30) the United States exports to Cuba were \$12,669,509, and to Porto Rico \$2,247,700. Its imports amounted from Cuba to \$53,801,591, and from Porto Rico to \$4,053,626.

Money.—The monetary unit of the Spanish West Indies is the peso or silver dollar, worth in United States currency 92.6 cents. There is also a doubloon (gold) of the United States value of \$5.01. The money of Spain is also used in the island, the peseta being most generally current.

Weights and Measures.—The metric system has been established by law, but is little used. The weights and measures are, the quintal, of 4 arrobas; the arroba, of 25 libras; the libra, of 16 onzas; the vara, of 3 pies; the pie, of 12 pulgadas; the arroba (liquid measure) and fanega (dry measure) of 12 almudes.

Reciprocity Treaty with Brazil.

PAPERS RELATING TO THE COMMERCIAL ARRANGEMENT BETWEEN THE UNITED STATES OF AMERICA AND THE UNITED STATES OF BRAZIL

Concluded January 31, 1891 ; proclaimed February 5, 1891.

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA.

A PROCLAMATION.

Whereas, pursuant to Section 3 of the Act of Congress approved October 1, 1890, entitled "An Act to reduce the revenue and equalize duties on imports, and for other purposes," the Secretary of State of the United States of America communicated to the Government of the United States of Brazil the action of the Congress of the United States of America, with a view to secure reciprocal trade, in declaring the articles enumerated in said Section 3, to wit, sugars, molasses, coffee, and hides, to be exempt from duty upon their importation into the United States of America ;

And whereas the Envoy Extraordinary and Minister Plenipotentiary of Brazil at Washington has communicated to the Secretary of State the fact that, in due reciprocity for and consideration of the admission into the United States of America free of all duty of the articles enumerated in Section 3 of said Act, the Government of Brazil has, by legal enactment, authorized the admission, from and after April 1, 1891, into all the established ports of entry of Brazil, free of all duty, whether national, state, or municipal, of

the articles or merchandise named in the following schedule, provided that the same be the product and manufacture of the United States of America :

I.—SCHEDULE OF ARTICLES TO BE ADMITTED FREE INTO BRAZIL.

Wheat ;
Wheat-flour ;
Corn or maize, and the manufactures thereof, including corn meal and starch ;
Rye, rye-flour, buckwheat, buckwheat-flour, and barley ;
Potatoes, beans and peas ;
Hay and oats ;
Pork, salted, including pickled pork and bacon, except hams ;
Fish, salted, dried or pickled ;
Cotton-seed oil ;
Coal, anthracite and bituminous ;
Rosin, tar, pitch and turpentine ;
Agricultural tools, implements and machinery ;
Mining and mechanical tools, implements and machinery, including stationary and portable engines, and all machinery for manufacturing and industrial purposes, except sewing-machines ;
Instruments and books for the arts and sciences ;
Railway construction material and equipment.

And that the Government of Brazil has, by legal enactment, further authorized the admission into all the established ports of entry of Brazil, with a reduction of twenty-five per centum of the duty designated on the respective article in the tariff now in force or which may hereafter be adopted in the United States of Brazil, whether national, state, or municipal, of the articles or merchandise named in the following schedule, provided that the same be the product or manufacture of the United States of America :

2.—SCHEDULE OF ARTICLES TO BE ADMITTED INTO BRAZIL WITH A REDUCTION OF DUTY OF TWENTY-FIVE PER CENTUM.

Lard and substitutes therefor ;
Bacon hams ;
Butter and cheese ;

Canned and preserved meats, fish, fruits and vegetables;
Manufactures of cotton, including cotton clothing;
Manufactures of iron and steel, single or mixed, not included in the foregoing free schedule;
Leather and the manufactures thereof, except boots and shoes.
Lumber, timber, and the manufactures of wood, including cooperage, furniture of all kinds, wagons, carts, and carriages;
Manufactures of rubber;

And that the Government of Brazil has further provided that the laws and regulations, adopted to protect its revenue and prevent fraud in the declarations and proof that the articles named in the foregoing schedules are the product or manufacture of the United States of America, shall place no undue restrictions on the importer, nor impose any additional charges or fees therefor on the articles imported.

And whereas the Secretary of State has, by my direction, given assurance to the Envoy Extraordinary and Minister Plenipotentiary of Brazil at Washington that this action of the Government of Brazil in granting exemption of duties to the products and manufactures of the United States of America, is accepted as a due reciprocity for the action of Congress, as set forth in Section 3 of said Act :

Now, therefore, be it known that I, BENJAMIN HARRISON, President of the United States of America, have caused the above stated modifications of the tariff law of Brazil to be made public for the information of the citizens of the United States of America.

In testimony whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the City of Washington, this fifth day of February, one thousand eight hundred and ninety-one, and of the Independence of the United States of America the one hundred and fifteenth.

BENJ. HARRISON.

By the President:

JAMES G. BLAINE,

Secretary of State.

PRECEDING DIPLOMATIC CORRESPONDENCE.

Mr. Blaine to Senhor Medonça.

DEPARTMENT OF STATE,
Washington, November 3, 1890.

SIR: The Congress of the United States of America, at its late session, enacted a new tariff law, in the third section of which provision was made for the admission into the ports of the United States, free of all duty, whether national, state, or municipal, of the following articles:

Sugars—all not above number 16, Dutch standard in color, all tank bottoms, all sugar drainings and sugar sweepings, sirups of cane juice, melada, concentrated melada, and concrete and concentrated molasses;

Molasses;

Coffee;

Hides—raw or uncured, whether dry, salted or pickled. Angora goat-skins, raw, without the wool, unmanufactured. Asses' skins, raw or unmanufactured, and skins, except sheep-skins with the wool on.

In the law providing for the free admission of the foregoing articles, Congress added a section declaring that these remissions of duty were made "with a view to secure reciprocal trade with countries producing those articles;" and that, whenever the President should become satisfied that reciprocal favors were not granted to the products of the United States in the countries referred to, it was made his duty to impose upon the articles above enumerated the rates of duty set forth in the section of the law above cited, of which I have heretofore transmitted you a copy.

The Government of the United States of America being desirous of maintaining with the United States of Brazil such trade relations as shall be reciprocally equal, I should be glad to receive from you an assurance that the Government of Brazil will meet the Government of the United States in a spirit of sincere friendship, and that it may prove to be the happy fortune of you, Mr. Minister, and

myself to be instrumental in establishing commercial relations between the two Republics on a permanent basis of reciprocity, profitable alike to both.

To this end I should be glad if you could advise me of the changes which Brazil would be willing to make in her system of tariff duties, in response to the changes proposed in the tariff of the United States which are favorable to your country.

In case the Government of Brazil should see proper to provide for the free admission into its ports of any of the products or manufactures of the United States, or at a specified reduction of the existing rates of duty, your Government may be assured that no export tax, whether national, state, or municipal, will be imposed upon such products and manufactures in the United States.

It may be further understood that while the Government of the United States of America would reserve the right to adopt such laws and regulations as should be found necessary to protect the revenue and prevent fraud in the declarations and proof that the articles herein enumerated, and whose free admission are provided for by the tariff law above cited, are the product or manufacture of Brazil, the laws and regulations to be adopted to that end would place no undue restrictions on the importer, nor impose any additional charges or fees upon the articles imported.

In the happy event of an agreement between the two Governments, the same can be notified to each other and to the world by an official announcement simultaneously issued by the executive departments of the United States of America and the United States of Brazil; and such an agreement can remain in force so long as neither Government shall definitely inform the other of its intention and decision to consider it at an end.

Accept, Mr. Minister, the renewed assurances of my highest consideration.

JAMES G. BLAINE.

The Honorable SALVADOR DE MENDONÇA,
*Envoy Extraordinary and Minister Plenipotentiary
of Brazil, on Special Mission.*

Senhor Mendonça to Mr. Blaine.

LEGATION OF THE UNITED STATES OF BRAZIL,
Washington, January 31, 1891.

SIR: I have the honor to acknowledge the receipt of your note of the 3d of November, 1890, in which you inform me of the action of the Congress of the United States of America, at its late session, in the enactment of a new tariff law, in which provision was made for the admission into the ports of the United States, free of all duty, whether national, state, or municipal, of the articles enumerated in your note; that said action was taken "with a view to secure reciprocal trade with countries producing those articles;" and that, as the Government of the United States of America is desirous of maintaining with the United States of Brazil such trade relations as shall be reciprocally equal, you express the hope that you may receive from me the assurance that the Government of the United States of Brazil will meet the Government of the United States of America in a spirit of sincere friendship.

I am pleased to be able to inform you, in reply, that the United States of Brazil are equally animated by a desire to strengthen and perpetuate the friendly relations which happily exist between them and the United States of America, and to establish the commercial intercourse of the two countries upon a basis of reciprocity and equality; and I heartily participate in the hope which you express, that it may prove to be the happy fortune of you, Mr. Secretary, and myself to be instrumental in establishing commercial relations between the two Republics on a permanent basis of mutual profit.

It is, therefore, a matter of great gratification to me to be able to communicate to you the fact that the Government of the United States of Brazil, in due reciprocity for, and in consideration of, the admission into the ports of the United States of America, free of all duty, whether national, state, or municipal, of the articles enumerated in your note of the 3d of November, 1890, has, by legal enactment, authorized the admission into all the established ports of entry of Brazil, on and after the 1st of April, 1891, free of all duty, whether national, state, or municipal, of the articles or merchandise named in the following schedule, provided that the same be the product or manufacture of the United States of America:

SCHEDULE OF ARTICLES TO BE ADMITTED FREE INTO BRAZIL.

Wheat;
 Wheat-flour;
 Corn or maize, and the manufactures thereof, including corn-meal and starch;
 Rye, rye-flour, buckwheat, buckwheat-flour, and barley;
 Potatoes, beans and peas;
 Hay and oats;
 Pork, salted, including pickled pork and bacon, except hams;
 Fish, salted, dried, or pickled;
 Cotton-seed oil;
 Coal, anthracite and bituminous;
 Rosin, tar, pitch, and turpentine;
 Agricultural tools, implements, and machinery;
 Mining and mechanical tools, implements, and machinery, including stationary and portable engines, and all machinery for manufacturing and industrial purposes, except sewing-machines;
 Instruments and books for the arts and sciences;
 Railway construction material and equipment.

And the Government of the United States of Brazil has, by legal enactment, further authorized the admission into all the established ports of entry of Brazil, with a reduction of 25 per cent. of the duty designated on the respective article in the tariff now in force or which may hereafter be adopted in the United States of Brazil, whether national, state, or municipal, of the articles or merchandise named in the following schedule, provided that the same be the product or manufacture of the United States of America :

SCHEDULE OF ARTICLES TO BE ADMITTED INTO BRAZIL WITH A
 REDUCTION OF DUTY OF 25 PER CENT.

Lard and substitute therefor ;
 Bacon hams ;
 Butter and cheese ;
 Canned and preserved meats, fish, fruits, and vegetables ;
 Manufactures of cotton, including cotton clothing ;

Manufactures of iron and steel, single or mixed, not included in the foregoing free schedule ;

Leather and manufactures thereof, except boots and shoes ;

Lumber, timber, and the manufactures of wood, including coo-
perage, furniture of all kinds, wagons, carts, and carriages ;

Manufactures of rubber.

I inclose herewith tables compiled from the latest published statistics, showing the state of trade of Brazil in the articles enumerated in the foregoing schedules.

The Government of the United States of Brazil has also provided that no increase shall be made in the export tax now in force, whether national, state, or municipal, on the articles enumerated in your note of the 3d of November, 1890, nor upon any article, the product of Brazil, now on the free list of the tariff of the United States of America so long as such article continues to be admitted free of duty ; and it has further provided that if any reduction is made by Brazil in the export duty on any of its products, such reduction shall immediately apply to said products when exported to the United States of America.

The Government of Brazil reserves the right to adopt the necessary laws and regulations to protect its revenue and prevent fraud in the declarations and proof that the articles enumerated in the foregoing schedules are the product or manufacture of the United States of America ; but the laws and regulations to be adopted shall place no undue restrictions upon the importer, nor impose any additional charges or fees therefor upon the articles imported.

I confidently hope that the foregoing action of my Government will satisfy the President of the United States of America that the United States of Brazil have met the liberal legislation of the Congress of the United States in a spirit of sincere friendship and reciprocity ; and, in that happy event, I shall hold myself ready to agree with you upon a time when an official announcement of this legislation may be simultaneously issued by the executive departments of the two Governments, with the understanding that the commercial arrangement thus put in operation shall remain in force so long as neither Government shall definitely, at least three months in advance, inform the other of its intention and decision to consider it at

an end at the expiration of the time indicated ; provided, however, that the termination of the commercial arrangement shall begin to take effect either on the 1st day of January or on the 1st day of July.

I improve the opportunity to renew the assurance of my highest consideration.

SALVADOR DE MENDONÇA.

Hon. JAMES G. BLAINE,

Secretary of State of the United States of America.

Mr. Blaine to Senhor Mendonça.

DEPARTMENT OF STATE,

Washington, January 31, 1891.

SIR : I have great pleasure in acknowledging the receipt of your note of this date, in which you inform me that the Government of the United States of Brazil, in due reciprocity for, and in consideration of, the free admission into the ports of the United States of the products of Brazil enumerated in my note of November 3, 1890, has by legal enactment authorized the free or privileged admission, on and after the 1st of April, 1891, of the articles, the product or manufacture of the United States of America, named in your note ; that your Government has further provided that no increase shall be made in the export tax on the articles admitted free into the United States, and that all future reduction in the export tax shall immediately apply to such articles when sent to the United States, and that the laws and regulations adopted by Brazil to prevent fraud shall not impose any additional charges or fees therefor on the articles named in your note, imported from the United States.

I am directed by the President to state to you that he accepts this action of the Government of Brazil, in granting exemption of duties to the products of the United States, as a due reciprocity for the action of the Congress of the United States, as set forth in my note to you of November 3, 1890, it being noted that the date fixed by Congress for the free admission of sugars is the 1st day of April, 1891.

I shall be pleased to meet you at the Department of State at your early convenience to agree upon the time and manner of making

public announcement of this commercial arrangement, which it is understood shall remain in force so long as neither Government shall definitely, at least three months in advance, inform the other of its intention and decision to consider it at an end at the expiration of the time indicated; provided, however, that the termination of the commercial arrangement shall begin to take effect either on the 1st day of January or the 1st day of July.

Congratulating you, Mr. Minister, on the valuable service which you have rendered in bringing about this important and satisfactory result, I renew to you the assurance of my highest consideration.

JAMES G. BLAINE.

The Honorable SALVADOR DE MENDONÇA,
Envoy Extraordinary and
Minister Plenipotentiary of Brazil.

Mr. Blaine to the President.

[Details of reciprocal arrangement.]

DEPARTMENT OF STATE,
Washington, February 7, 1891.

To the PRESIDENT :

In response to your direction, I herewith submit two tables, A and B, which clearly exhibit the facts of the commercial arrangement between the United States of America and the United States of Brazil, completed on the 5th of this month.

Table A will show the articles from the United States which will be entitled to free admission into all the ports of Brazil after the 1st of April next.

It will also show the average annual value, as compiled from the Brazilian statistical reports for the last three years, of the imports of said articles into Brazil from the United States, and the average annual value, during the same period, of the imports of said articles into Brazil from other countries, and the rates now charged thereon.

TABLE A.—Imports into Brazil, in dollars, to become free of duty when exported from the United States.

Articles.	From the United States.	From all other countries.	Total imports.	Rate of duty.
	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>	<i>Per cent.</i>
Wheat.....	150.00	547,845.84	547,995.84	*5
Wheat-flour.....	2,778,858.00	814,329.24	3,692,682.24	15
Corn or maize and the manufactures thereof, including corn-meal and starch.....	21,869.00	695,285.57	716,654.57	15
Rye and rye-flour.....		555,737.60	555,737.60	15
Barley and buckwheat and buckwheat flour.....		193,286.08	193,286.08	15
Hay and oats.....	531.00	541,693.80	542,224.80	20
Beans and peas.....	478.00	1,039,522.00	1,040,000.00	20
Potatoes.....	36.00	905,053.12	905,089.12	15
Pork, salted and pickled, and bacon, except hams.....	44,809.00	751.00	45,560.00	20
Cotton-seed oil.....	4,376.00	331.20	4,707.20	48
Fish, salted, dried, or pickled.....	23,278.00	1,629,724.00	1,653,002.00	20 to 48
Coal, anthracite and bituminous.....		6,067,380.80	6,067,380.80	*5
Resin, tar, pitch, and turpentine.....	98,310.00	69,653.33	167,963.33	15
Agricultural implements, tools, and machinery.....				*5
Mining and mechanical machinery, tools, and implements, including stationary and portable engines, and all machinery for manufacturing and industrial purposes, except sewing-machines.....	184,652.00	2,320,627.92	2,505,279.92	15 to 48
Instruments and books for arts and sciences.....	82,752.00	492,904.50	575,656.50	15
Railroad material and equipment.....	155,539.00	635,180.76	790,719.76	5 to 15
Total.....	3,394,633.00	16,609,306.76	20,003,939.76	

* Port and Provincial charges, equivalent to 5 per cent. duty.

From this table (A) of articles to be admitted free, it will be seen that of the total annual average importations into Brazil of \$20,003,939.76 of the said articles, the United States have heretofore only furnished articles to the value of \$3,394,633, while other countries have furnished articles to the value of \$16,609,306.76.

Table B will make a similar exhibit of the articles from the United States entitled to admission into all the ports of Brazil after the 1st of April next, at a reduction of 25 per cent. of the duty designated on the respective articles in the tariff now in force in Brazil, or which may hereafter be adopted in Brazil.

It will also show the average annual value, taken from the Brazilian reports for the last three years, of the imports of said articles into Brazil from the United States; and also the average annual value, during the same period, of the imports into Brazil from other countries, and the rates now charged thereon.

TABLE B.—*Imports into Brazil, in dollars, the duties on which will be reduced 25 per cent. when exported from the United States.*

Articles.	From the United States.	From all other countries.	Total imports.	Rate of duty.
	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>	<i>Per cent.</i>
Lard and substitutes of lard.	371,399.00	348,166.60	719,565.60	15 to 30
Bacon hams.....	556.00	103,610.66	104,166.66	48
Butter and cheese.....	12,941.00	2,000,507.91	2,013,448.91	48
Canned and preserved meats, fish, fruits, and vegetables.....	13,894.00	606,197.89	620,091.89	20 and 48
Manufactures of cotton, including cotton clothing..	665,986.00	26,571,188.50	27,237,124.50	15 to 48
Manufactures of iron and steel, single or mixed, not included in the foregoing schedule.....	522,096.00	2,361,211.00	2,883,307.00	{ 15, 30, and 48
Leather and the manufactures of leather, except boots and shoes.....	20,196.00	3,195,185.62	3,215,381.62	30 to 50
Lumber, timber, and the manufactures of wood, including cooperage, furniture of all kinds, wagons, carts, and carriages.....	417,761.00	1,098,927.02	1,516,688.02	30 to 60
Manufactures of rubber....	11,070.00	310,398.50	321,268.50	48
Total.....	2,035,899.00	36,595,343.70	38,631,242.70	

From this table (B) it will be seen that, of the total average importations into Brazil of \$38,631,242.70 of said articles, the United States have hitherto furnished articles to the value only of \$2,035,899, while other countries have furnished articles to the value of \$36,595,343.70.

Taking the two schedules together, it is shown that, of a total annual importation into Brazil of \$58,635,182.46 of all these articles, only \$5,430,532 came from the United States, as against \$53,204,650.46 from other countries.

In return for these concessions the United States admits into its markets free of duty the sugar, molasses, coffee, and hides, the growth and product of Brazil.

Respectfully submitted,

JAMES G. BLAINE.

BRAZILIAN DECREE.

The following is the decree of the Brazilian Government promulgating the treaty :

Decree No. 1338, of the 5th of February, 1891. Exempting certain articles imported from the United States of America from payment of import duties, and establishing a reduction of 25 per cent. on the duties imposed on certain other articles imported from the same country.

The Marshal Manoel Deodoro da Fonseca, Chief of the Provisional Government established by the army and navy in the name of the nation, considering that the said Government and that of the United States of America, in virtue of the agreement celebrated on the 31st of January, 1891, by their plenipotentiaries, Salvador de Mendonça and James G. Blaine, have stipulated the concession of reciprocal favors to certain products of the respective countries, decrees :

ARTICLE I. From the 1st of April of the current year thenceforward, in accordance with the said agreement, the following articles imported from the United States shall be exempt from payment of import duties :

Wheat in the grain ;

Wheat flour ;

Corn and the manufactures of corn, including corn meal and corn starch (maizena);

Rye and rye flour, buckwheat and buckwheat flour and barley;
Potatoes, beans, and peas;
Hay and oats;
Salted pork, including pork in brine, and bacon, except hams;
Salted fish, dried or in brine;
Cotton-seed oil;
Coal, anthracite and bituminous;
Rosin, tar, pitch, and turpentine;
Agricultural tools, implements, and machinery;
Mining and mechanical tools, implements, and machinery, including steam engines for manufactures and industries, except sewing machines;
Instruments and books for the arts and sciences;
Railroad material.

ART. II. From the 1st of April, 1891, and thenceforward, the following American articles shall enjoy a reduction of 25 per cent. on the import duties of Brazil:

Lard and the substitutes of lard;
Hams;
Butter and cheese, canned and preserved meat, fish, fruits, and vegetables;
Manufactures of cotton, including cotton clothing;
Manufactures of iron and steel, alone or combined, not comprised in the preceding list of free articles;
Leather and manufactures of leather, except boots and shoes;
Lumber, timber, and manufactures of timber (wood), including cooperage, furniture of all kinds, wagons, carts, and carriages;
Manufactures of rubber.

ART. III. All regulations to the contrary are hereby revoked.

Hall of the sessions of the Provisional Government of the United States of Brazil, on the 5th day of February, 1891, in the third year of the Republic.

MANOEL DEODORO DA FONSECA,
TRISTÃO DE ALENCAR ARARIPE.

For the better understanding and execution of the foregoing decree, and to show the favors granted to Brazilian products by the

United States, the Minister of the Treasury has issued the following circular:

"Tristão de Alencar Araripe, President of the tribunal of the National Treasury, makes known, for the proper ends, that, in virtue of an agreement celebrated on the 31st of January, 1891, between the Governments of the Republics of the United States of Brazil and of the United States of America, the following modifications were made in the customs tariff of the latter country:

"From the 1st of April, 1891, thenceforward, the following articles of Brazilian production or manufacture shall be admitted in the ports of the United States of America free of all duties, whether national, state, or municipal:

"Sugar of all grades which in respect to color can not be classed above No. 16 Dutch Standard; all kinds of tank bottoms, all sugar drainings and sweepings, sirups of cane juice and cane, melada of all kinds, concentrated and concreted;

"Coffee;

"Hides, raw or undressed, whether dry, salted, or pickled, kid and Angora goat skins, raw, without the wool, unmanufactured; asses' hides, raw or unmanufactured, and skins, except sheepskins with their wool.

"It is further stipulated that the laws and regulations adopted by the United States of America for the protection of its revenues and the prevention of fraud, in the declarations and proofs that the above enumerated articles are manufactures of Brazil, shall not impose unjust restrictions on the importer, or any additional tax or charge on the articles imported."

TRISTÃO DE ALENCAR ARARIPE.

LIST OF ARTICLES AFFECTED BY THE BRAZILIAN TREATY.

The following shows in detail the list of articles which are to be admitted into Brazil under this arrangement. It must be taken, however, as purely unofficial and provisional, because the Government of Brazil has the right to indicate what articles are to be thus affected, and there has not been time to receive the official list.

Wheat.

Wheat flour.

Corn or maize and the manufactures thereof, including corn meal and starch.

Rye and rye flour.

Barley and buckwheat and buckwheat flour.

Hay and oats.

Beans and peas.

Potatoes.

Pork, salted and pickled, and bacon, except hams.

Cotton-seed oil.

Fish, salted, dried, or pickled.

Coal, anthracite and bituminous.

Rosin, tar, pitch, and turpentine.

Agricultural implements, tools and machinery.

Instruments and books for arts and sciences.

Railroad equipment and material.

Under the head of agricultural machinery the Brazilian tariff specifies:

Machines for the cultivation and preparation of agricultural products.

Under agricultural implements and tools are mentioned:

Plows of all kinds, harrows and other implements for stirring and preparing the soil, sowing, mowing, and reaping and similar uses, or for any other agricultural purpose not elsewhere specified.

The free list in the tariff also embraces:

Molds, filtering apparatus and crystallizers for sugar refining.

Machine cards, in pieces or strips.

Machines or engines for mining, for the use of factories or workshops, for navigation, moved by steam, water, gas, air or wind, or electricity, by animal power, or any motors whatsoever, fixed, movable or portable, these same being included.

Hoisting cranes, moved by steam, hydraulic and the like.
 Printing presses of every description.
 Presses for baling or packing, gilding or silvering paper, for lithography and similar purposes.
 Large lathes, moved by steam-power.
 Parts or pieces of machinery, imported separately, which are destined to replace worn-out or broken parts, or as extra pieces to replace such as may become useless.

Articles on which the duties will be reduced 25 per cent. under the terms of the same agreement.

NOTE.

Since this volume left the press, the new tariff of Brazil, which was adopted at the recent session of Congress, has gone into effect; and the rates here given do not apply to very many important articles of commerce.

A translation of the revised tariff will soon be ready for distribution and copies may be obtained by applying at the Bureau of the American Republics.

Duck (fine), cassinets, reps, etc.....	0.27½ per pound.	0.20½ per pound.
Flannels, plushes, etc. (plain).....	0.27½ per pound.	0.20½ per pound.
Cambrics, muslins, etc.:		
Weighing 4 kilos per 100 metres or less.	1.81 per pound.	1.36 per pound.
Weighing more than above.....	0.90 per pound.	0.68 per pound.
In dress patterns, skirts, trimmings, etc	2.70 per pound.	2.04 per pound.

Silk-covered articles of furniture pay 50 per cent. more.

Wool or hair covered articles of furniture pay 40 per cent. more.

Leather-covered articles of furniture, 30 per cent.; linen or cotton, 20 per cent.

Furniture imported to be upholstered in the country is entitled to a reduction of 30 per cent.

World's Columbian Exposition.

Under the authority of the Congress of the United States, the Four Hundredth Anniversary of the Discovery of America by Christopher Columbus will be celebrated by holding an International Exhibition of Arts, Industries, Manufactures, and the Products of the Soil, Mine, and Sea, in the city of Chicago, Illinois, United States of America, opening May 1, 1893, and closing October 31, 1893.

The site selected is at Jackson Park, a beautiful location near the southern limits of the city, adjoining Lake Michigan, and the buildings are in course of erection.

OFFICERS.

Director-General: George R. Davis, of Illinois.

President of the National Commission: Thomas W. Palmer, of Michigan.

Secretary: John T. Dickinson, of Texas.

President of the World's Columbian Exposition: Lyman J. Gage.

Secretary: Benjamin Butterworth, of Ohio.

President of the Board of Lady Managers: Mrs. Potter Palmer.

Secretary: Miss Phoebe W. Couzins, of Missouri.

Committee on Foreign Exhibits: William T. Baker, Chairman; M. A. Ryerson, H. N. Higinbotham, James W. Ellsworth, T. J. Lefens.

The following is the proclamation of the President of the United States :

PROCLAMATION OF THE PRESIDENT.

Whereas, satisfactory proof has been presented to me that provision has been made for adequate grounds and buildings for the uses of the World's Columbian Exposition, and that a sum not less than ten million dollars to be used and expended for the purposes of said Exposition has been provided in accordance with the conditions and requirements of Section ten of an Act entitled "An Act to provide for

3

Celebrating the Four Hundredth Anniversary of the Discovery of America by Christopher Columbus by holding an International Exhibition of Arts, Industries, Manufactures, and the Products of the Soil, Mine and Sea, in the City of Chicago, in the State of Illinois," approved April twenty-fifth, eighteen hundred and ninety:

Now, therefore, I, BENJAMIN HARRISON, President of the United States, by virtue of the authority vested in me by said Act, do hereby declare and proclaim that such International Exhibition will be opened on the first day of May, in the year eighteen hundred and ninety-three, in the City of Chicago, in the State of Illinois, and will not be closed before the last Thursday in October of the same year. And in the name of the Government, and of the people of the United States, I do hereby invite all the nations of the earth to take part in the commemoration of an event that is pre-eminent in human history, and of lasting interest to mankind, by appointing representatives thereto, and sending such exhibits to the World's Columbian Exposition as will most fitly and fully illustrate their resources, their industries, and their progress in civilization.

In testimony whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the City of Washington, this twenty-fourth day of December,
[SEAL.] one thousand eight hundred and ninety, and of the Independence of
the United States the one hundred and fifteenth.

BENJ. HARRISON.

By the President:

JAMES G. BLAINE,
Secretary of State.

The LATIN AMERICAN DEPARTMENT has been organized, with an office at No. 2 Lafayette Square, Washington, D. C., under the direction of which Commissioners have been sent to Mexico and to all the countries of South and Central America and the West Indies, William E. Curtis in charge. The following is a list of the Commissioners:

Mexico: Lieut. Asher C. Baker, U. S. Navy, care of United States Legation, City of Mexico. Henry C. Payne, Commercial Commissioner, care of Robert C. Boker, 6 Calle Angel, City of Mexico.

Guatemala, Salvador, Nicaragua, Costa Rica: Lieut. George P. Scriven, U. S. Army, care of United States Legation, Guatemala City, Guatemala.

Honduras, British Honduras, Mosquito Nation: Capt. Gilbert P. Cotton, U. S. Army, care of United States Consul, Tegucigalpa, Honduras.

Colombia: Edmund W. P. Smith, United States Consul-General, Bogota, Colombia; Lieut. Henry R. Lemly, U. S. Army, care of United States Legation, Bogota, Colombia.

Venezuela, Guiana Colonies, Trinidad, Barbados: Ensign Roger Welles, jr., U. S. Navy, care of United States Legation, Caracas, Venezuela.

Ecuador: Willard P. Tisdell, care of United States Consul-General, Guayaquil, Ecuador (until June 1, 1891).

Peru, Bolivia: Lieut. W. E. Safford, U. S. Navy, care of United States Legation, Lima, Peru.

Chile: Lieut. Charles H. Harlow, U. S. Navy, care of United States Legation, Santiago, Chile.

Argentine Republic, Paraguay, Uruguay: Surg. D. N. Bertolette, U. S. Navy, care of United States Legation, Buenos Ayres, Argentine Republic. Willard P. Tisdell, care of United States Legation, Buenos Ayres, Argentine Republic (after June 1, 1891).

Brazil: Capt. Alexander Rodgers, U. S. Army, care of United States Legation, Rio de Janeiro, Brazil.

Brazil (Amazon Provinces): Lieut. Frank E. Sawyer, U. S. Navy, care of United States Consul, Para, Brazil.

Cuba, Jamaica, Porto Rico, Haiti, San Domingo, and other West India Islands: Frederick A. Ober, care of United States Consul-General, Havana, Cuba.

CLASSIFICATION OF THE LATIN AMERICAN DEPARTMENT.

GROUP I.

PERIOD OF THE DISCOVERY.

A. *Geographical knowledge and the science of navigation at the time of Columbus.*—(1) Maps, charts, and globes. (2) Nautical and astronomical instruments. (3) Models of vessels of the period. (4) Evidences of pre-Columbian discoveries in America by the Norsemen, Welshmen, and Phoenicians.

B. *The Court of Ferdinand and Isabella.*—(1) Portraits, autographs, and other relics of the principal personages who aided Columbus. (2) Manuscripts, printed volumes, charts, maps, armour, and weapons of the time.

C. *Illustration of the life-history of Columbus.*—(1) Model of the house in which he is said to have been born. (2) Portraits of Columbus* and his associates. Portraits of his family. (3) Photographs of the University of Pavia, where Columbus studied nautical astronomy and navigation. (4) Tableau or picture of the Salamanca Conference. (5) Model and photographs of the convent of La Rabida. (6) Models of the "Santa Maria," Columbus's flagship, and the two caravels, "Pinta" and "Niña," with figures of the crews in the costumes of the period. Facsimiles of charts, nautical instruments, arms of officers and crews, etc. Copies of the "Imago Mundi," and other volumes which formed his cabin library on the first voyage, now in the Chapter Library, Seville. Assortment of articles used by Columbus for barter with the natives: "Hawks' bells," beads, coins, metals, knives, colored cloths, brass helmets, crosses, mirrors, and nails. (7) Scene showing Columbus's reception at the court of Ferdinand and Isabella on his return from his first voyage (Barcelona, March, 1493). (8) Other scenes in the life of Columbus. (9) Scene of the

* It is confidently asserted that there are no genuine portraits of Columbus, but a collection of pictures purporting or intended to be such should be made.

egg. (10) Scene showing Columbus's return from his third voyage in chains. (11) Illustrations of the last days of Columbus. (12) Photographs or model of the house at Valladolid in which he died. Relics associated with the place. (13) Photographs and models of the coffin, the tombs, and the numerous monuments and statues erected to the memory of Columbus. Tombs of his sons.

D.* *Relics of Columbus and his family.*—(1) Armor, equipments, autograph letters either in facsimile or the originals, and a collection of early publications relating to the discovery, maps, charts, etc. (2) Relics of Americus Vespucci, the Cabots, and other early discoverers and voyageurs. (3) Copies of facsimiles of the maps and books in which the name "America" appears for the first time. Evidence to show how the continent was christened.

E. *The voyages of Columbus.*—(1) Photographs of Palos, Andalusia, from the roadstead near which Columbus set sail on his voyage of discovery (August 3, 1492). (2) Chart showing approximately the course sailed, with the position of Guanahani, Salvador, or Watlings Island conspicuously marked.† (3) Model in relief of the West Indies, showing the routes of the several voyages made by Columbus. (4) Photographic views of the islands first visited by him. (5) Old engravings illustrating the condition of the Indians as he found them. (6) Photographs and models of pure blooded Caribs, with background of natural scenery. (7) Photographs and models of Columbian remains in the West Indies. Models of ruins of towns and fortresses erected in his time.

GROUP II.

PERIOD OF THE CONQUEST.

I.—*Epoch of the Conquest of Mexico.*

A. *Civilization of the Aztecs.*—(1) Costumed figures of Mexican Indians, as found by the Conquistadores. (2) Models of their houses, temples, and palaces. Palaces of Mexico and Tezcuco and the island of Cozamel. (3) Arts and industries: Metal work; gold, silver, and bronze, cast and hammered; bronze and stone implements; ornaments of metals and of green chalchihuitl; textile fabrics; feather work; pottery. (4) Agricultural methods and products; food and economic plants; pulque. (5) Mexican picture-writing. (6) Religion. Sacrificial stones; religious ceremonies, funerals, etc. Mexican idols, (7) Their political and military organization. (8) Arms and armor. Bows and arrows, spears, clubs armed with flakes of obsidian, metal and quilted armor, shields, helmets. (9) Models and photographs of ancient Mexican fortifications. (10) Prehistoric civilization in Yucatan, Nicaragua, Honduras, and other parts of Central America, illustrated by models and relics of Maya cities, ancient temples, carvings in stone, pottery, etc.

B. *The Conquistadores.*—(1) Models of the ships in which Cortez sailed. (2) Arms, armor, and equipment of the Conquistadores, with costumed figures. (3) Portraits, paintings, engravings, maps, manuscripts, and printed volumes relating

*This section should contain a large and interesting historical collection of the period from 700 to 1600.

†There is, and probably always will be, a controversy as to the actual "landfall" of Columbus.

to the conquest of Mexico, Portraits of Marina, the guide and mistress of Cortez, and his descendants. (4) Maps and charts of the period of the conquest, showing the advancement in geographical knowledge since the discovery of the New World. (5) Relics of Cortez. [His sword and armor are now in the Royal Armory at Madrid; his banner is in the Museo Nacional, City of Mexico, and his remains also repose in Mexico.]

II.—*Epoch of the Conquest of Peru.*

A. *The Civilization of the Incas.*—(1) Models and photographs of ancient architectural monuments of Peru. (2) The roads of the Incas, tambos and bridges. (3) Irrigation in ancient Peru. (4) Illustrations of the arts of the Peruvians: (a) Metal work: gold and silver ornaments and utensils; copper work, with cutting tools tempered to wonderful degree of hardness. (b) Pottery; vases and jars. (c) Stucco ornamentation. (d) Textile fabrics and *quipus*. (e) Economic, medicinal, and narcotic plants. (5) Costumes, armor, arms, implements, utensils, and other collections, illustrating the customs and habits of life, religion, etc., of the ancient Peruvians. (6) Mummies; manner of burial. (7) Portraits, paintings, engravings, maps, manuscripts, and printed volumes relating to the conquest of Peru.

B. *Relics of Pizarro and his men.*—(1) Portrait in the palace of the viceroys at Lima and other relics. (2) Armor, arms*, equipment, banners, etc., and other relics. (3) Tomb of Pizarro. He is buried in the church of Santa Maria de la Concepcion. His armed effigy kneels in a niche, and the helmet in front of him is said to have been that worn by him.

III.—*Epoch of the Conquest in other portions of America.*

A. *Relics of the Aborigines.*—(1) Collections showing the condition of the natives of other portions of Central and South America. (2) Relics of discoverers and early voyageurs. (3) Maps, charts, manuscripts, and printed volumes showing the progress of civilization and the growth of geographical knowledge. (4) Collections of antiquities from Brazil, Chile, the Argentine Republic, Colombia, Venezuela, and other countries.

GROUP III.

THE COLONIAL PERIOD.

A. *Epoch of the Spanish Viceroys.*—(1) Collections showing the development of the Southern Continents from the time of the Conquests to the epoch of the Revolution. (2) Portraits of the viceroys, prominent ecclesiastics, and other famous men of this epoch. (3) Illustrations of the treatment of aboriginal tribes by the Spaniards during the régime of the viceroys. (4) Portraits and relics of Las Casas, "the apostle of the Indies," and other characters. (5) Relics of the Inquisition in South America.

* His sword is in the Royal Armory of Madrid. It is in a steel sheath. The banner of Pizarro, said to have been embroidered by Queen Isabella, was presented to General Bolivar after the independence of Peru, in 1821. It was cut in half; one part being deposited in Bogota, Colombia, and the other in Caracas, Venezuela.

PLAT OF JACKSON PARK, SHOWING LOCATION OF BUILDINGS AT WORLD'S COLUMBIAN EXPOSITION.

B. *Epoch of the Revolution.*—(1) Illustrations and relics of the principal insurrections of the Southern peoples. (2) Portraits and relics of Miranda, Bolivar, Lord Cochrane, O'Higgins, General San Martin, and other great liberators. (3) Historical pictures and papers relating to the revolutions, and the originals or facsimiles of the declarations of independence of the several Republics. (4) Weapons and military equipments of the time. (5) Relics of the struggle for freedom. (6) Collections* of papers, pictures, and objects illustrating the struggle which resulted in the separation of the colonies from the Crown of Spain.

GROUP IV.

PERIOD OF THE PRESENT.

A. *Man and his Habitations.*—(1) Photographs and representations by models illustrating race and tribal characteristics of natives from the Rio Grande to Cape Horn; from the Pueblo Peons of Mexico to the canoe Indians of Tierra del Fuego.† (2) Typical habitations: Construction and materials used; river and lake dwellings, and tree dwellings of the Amazon and Orinoco; cave and cliff dwellings; house boats, bongas, and bolsas; photographs of estancias, quintas, and ranches; hospitals and public buildings. (3) Wearing apparel and costumes; ornamented jewelry, headdresses, rebozas, veils, scarfs, sashes, shoes, sandals; various styles of dressing the hair; sombreros, alpargata, etc.; illustrate how children are cared for, dressed, and carried in infancy; specimens of cradles. (4) Equestrian equipments: Saddles, bridles, blankets, spurs, saddlebags, riatas, saddlecloths, pouches, foragebags, cinchas, holsters. (5) Weapons of all kinds: Arms, armor, shields, spears, lances, bows, arrows, machetes, helmets, ancient armor, cannon, projectiles, darts, and tubes used by the Indians for war or for the chase; illustrations of the methods adopted for defensive purposes, models and photographs of same. (6) Household implements and utensils, culinary or otherwise: Vessels used for the transportation and storage of water; interior decoration and ornamentation of the homes of the people; samples of furniture manufactured from native woods; specimens of inlaid work; mats, screens, and basketwork, or photographs of such. (7) Ceremonial costumes: Those worn in religious celebrations, processions, at fiestas, funerals, weddings, and baptisms, also those used in the national dances; war costumes and headdresses of the Indians; distinctive dresses and adornments worn by women to indicate condition of life and caste; masques and masquerade costumes. (8) Objects of interest, not otherwise specified, relating to the daily life of the people; how they eat, sleep, work, and amuse themselves; their national games, specimens of articles used in them; how they dispose of their dead; illustrations of the tombs and monuments erected to the memory of the dead.‡

* A very large and valuable historical collection of the period from 1811 to 1824 can be secured.

† In photographs taken for physical characters it is desirable that the body should be as little as possible concealed by clothing, and three portraits should be taken of each individual, front, profile, and back.

‡ Photographs or models of the different races composing a community, whether belonging to one of the grand divisions of the human family or not, or to a mixture of several, i. e., the Indians, mestizos, cholos, zamboes, mulattoes, negroes, etc. Illustrations by photographs showing their general characteristics and civilization.

B.—*Man and his Occupations.*

(1) Articles of food supply: Natural or wild food ; methods of its preparation and use.

(2) Collections of cereals, fruit, and vegetables: Wheat, corn, yams, mandioca ; fruit, preserved specimens; living trees bearing fruit; edible nuts and roots, including tubers of all kinds, etc.

(3) Modes of plowing, fertilizing, and preparing land for crops ; manner of cultivation, sowing, planting, shading, transplanting, harvesting crops, and storing same ; system of irrigation and rotation of crops.

(4) Coffee: Methods of raising and curing coffee ; samples of machinery used for pulping, drying, cleaning, and grading the berries ; models of the appliances used in preparing coffee ; samples of coffee of various grades ; living coffee plants.

(5) Sugar: Methods of making sugar, illustrating the ancient and modern systems ; the manufacture of molasses ; models of complete modern sugar mills and the ancient horse or ox power presses for comparison ; samples of the crude material and various grades of sugar.

(6) Chocolate: Collections of cacao beans and pods ; living trees bearing fruit ; methods of making chocolate ; illustrations of the various methods of pulping, drying, grading, and coating the beans and preparing the same for shipment ; photographs of the shade trees necessary to insure a crop of cacao pods ; collections of manufactured chocolate.

(7) Coca: Methods of cultivating, collecting, and curing coca leaves ; manner of use ; the various preparations of coca wines, cordials, elixirs, etc. ; materials used by the Indians when preparing the leaf for chewing ; pouches used by them on long journeys.

(8) Yerba maté: Methods of collecting and preparing yerba maté or Paraguayan tea ; the different kinds of yerba cups, gourds, calabashes, and bombillas used for drinking the tea ; methods of preparing guarana, aguadiente, chicha, and other beverages.

(9) Cinchona: Methods of gathering, drying, and preparing cinchona barks ; samples of the bark of various trees of the cinchona family, as packed for export ; samples of quinine.

(10) Collections of medicinal plants, barks, roots, gums, seeds, and flowers, with their native as well as botanical names; methods of their preparation and application, the diseases for which they are used as remedies, and all legends, superstitions, etc., attaching to them.*

(11) Collections of fiber and fiber-plants, dressed and undressed, the method of their preparation, uses to which they are applied; samples of hats, hammocks, cigar-cases, etc.

(12) Woods: Collection of tanning and dye-woods; timber and cabinet-woods.†

* Living specimens should be secured in each case if possible, with explanations of their methods of cultivation, climatic conditions, etc. It is important to secure the flowers of the plant in every case. Local botanists and pharmacists should be invited to cooperate in securing this collection.

† These collections should be considered from a commercial standpoint, and the cost of procuring and transporting medicinal and fiber plants and woods should be fully explained.

(13) Rubber gathering: The methods of obtaining and treating the sap; complete samples of the several kinds and qualities of rubber; materials used for coagulation.

C.—*Mechanical Arts.*

(1) Trades: Illustrations of the principal trades exercised in each country, with specimens of their proficiency.

(2) Raw materials employed and the finished product; also information as to the sources—foreign or domestic—from which the raw materials are derived.

(3) Metal work, leather work, and tools employed in these industries.

(4) Textile fabrics: Specimens of raw material employed in their manufacture; yarns, thread, dyes, and finished fabrics; looms, spindles, etc.

(5) Pottery: Specimens of ancient and modern pottery, illustrating the various forms and qualities manufactured and the use to which they are applied.

(6) Hunting and fishing: Fish traps; vegetable poisons for killing fish; spears and arrows; fish hooks, artificial and natural bait, nets, baskets, and boats. Various appliances for trapping and hunting animals: Guns, clubs, lassoes, bolas, bows and arrows, decoys, and all kinds of traps and snares.

(7) Literature, music, arts, newspapers; maps, charts; engravings, etchings.

(8) Musical instruments of all kinds, those used by the Indians are especially desirable; written or printed music, the national anthems of various countries, the war songs and chants of the natives.

(9) Examples of painting and sculpture, wood and ivory carving, lace making, enameling, inlaid work; decorative art, and specimens of all artistic work.

(10) In and out door amusements indulged in by the people: Photographs of their feasts, games, and sports; celebrations and public gatherings, groups of dancers; specimens of dolls and toys used by the children, illustrate how they are dressed and manufactured; games of chance.

(11) Coins and medals: Ancient and modern; those awarded for military or naval services, or struck in honor of individuals; all articles that circulate as money.

(12) Flags and banners, especially those of historical interest.

D.—*Education and Religion.*

(1) Models of school-houses; collections of school-books and other articles illustrative of the educational system of each country.

(2) Methods of teaching children by object lessons; samples and particulars of prizes awarded successful scholars; statistics relating to the educational facilities possessed by various countries and the progress of education among the Indians.

(3) Churches: Models and photographs of the interior of cathedrals and churches; shrines, chapels, monumental effigies, altars, fonts, plate, ecclesiastical robes, paintings, and specimens or reproductions of ancient bells and books, mural tablets, and gifts of penitents; historical relics, etc.; processional banners and chairs, canopies, etc., for the religious ceremonials and celebrations; facsimiles of inscriptions on memorial tablets or tombs in the churches.

(4) Sacred music; missals; transcriptions of manuscript chants, anthems, masses (ancient and modern), and printed scores of music composed for special services; processional hymns, etc.

E.—Transportation Facilities.

(1) Specimens of ox-carts and other vehicles; sillas; photographs of native carriers, carts, trucks, and wagons adapted to districts where there are no regular roads; photographs of mule trains laden with produce; llamas and other beasts of burden.

(2) Roads and bridges: Photographs or models of bridges (ancient and modern), and those improvised in the dense forests of unexplored or undeveloped countries.

(3) Navigation: Specimens of canoes, rafts, balsas, piraguas, bongas, etc., with their equipment, and all other native craft not otherwise specified.

(4) Maps and models of railroads; method of management; character of equipment used, gauge, grades; models of depots, tunnels, etc.; illustrations of the tram-car service of the larger cities; photographs of the drivers and conductors, male and female.

F.—Resources and Products.

(1) Precious minerals and gems, uncut, cut, and polished; diamondiferous soil; gold and silver ores.

(2) Useful metals: Coal; ore of all kinds; mineralogical, metallurgical, and geological collections.

(3) Models of mines, mills, smelting and refining works, where practicable; models of the ancient mines and samples of miners' tools, ancient and modern; furnaces: illustrations of placer mining as practiced by Indians.*

(4) Pastoral: Specimens of all leaves and grasses used as food for cattle, horses, and mules.

(5) Botanical, horticultural, forestry: Collections of ferns, living plants, dried, pressed, and herbarious; orchids and decorative plants; palms, living if possible: photographs of those not removable.

(6) Natural history: Specimens of animals, living if practicable, photographs of others when not; skins of wild animals suitable for the taxidermist; specimens of snakes, alive or preserved, and skins of same; collections of fish from the sea, rivers, and lakes, including turtles of various species; photographs of same; prepared and mounted specimens; reptiles, insects, butterflies, and beetles; pachyderms, tapirs, etc.; cabinets of all entomological specimens, prepared, mounted, and classified; shells and fossils.†

GROUP V.

COMMERCIAL.

(1) Articles of import into the Latin-American countries; collections showing the class of goods best adapted to the wants of the people in each country and district.

(2) The most popular patterns and styles of dress goods, and other fabrics for wearing apparel, boots and shoes, hats, gentlemen's furnishing goods, millinery, hosiery, underwear, manufactures of silk goods, and articles of adornment.

(3) Agricultural implements, plows, rakes, harrows, cultivators, mowers, reapers; harness and saddles; and samples of artificial fertilizers.

* There should be a complete exhibit showing the mineral resources of each of the Latin-American countries.

† See instructions from Director of Zoological Garden at Washington.

- (4) Labor-saving machinery of all kinds.
- (5) Drugs, chemicals, pharmaceutical preparations, dyes, colors, tanning materials, assayers' and analysts' supplies, including glassware used for scientific purposes; scales and balances.
- (6) Samples of all merchandise known as "trade goods" or "barter," as used by traders on the great rivers and in the interior of each country, with the fullest particulars as to the districts in which they are best appreciated.
- (7) Provisions, breadstuffs, crackers, fancy biscuits—include samples of labels and state size of tins best appreciated; fish, dried, smoked, and packed; canned meats; dairy products; fruits, dried and preserved, and vegetables; prepared cereals and all other articles of food supply not otherwise specified.
- (8) Earthen, stone, and china ware for domestic or manufacturing purposes; glassware, sheet glass, lamp glasses, bottles, etc.
- (9) Hardware: Builders' hardware, castings, car wheels, nails and spikes, railroad bars or rails, "barbed" and other wire, stoves and ranges, camp ovens, and all other manufactures of iron and steel in demand; brass fittings, doors, sashes, and blinds; sewing-machines; roofing materials.
- (10) Jewelry and manufactures of gold and silver, watches and clocks, lamps and chandeliers; all devices for illuminating purposes, electrical supplies; candles for religious and other purposes.
- (11) Wines, spirits, and malt liquors, pure and blended; cordials, in wood and in bottles; samples of labels; flavoring extracts.
- (12) Perfumery: Toilet and fancy goods, soaps, cosmetics, etc.
- (13) Musical instruments; toys and notions, games.
- (14) Umbrellas, parasols, sun-shades, rubber coats, rugs, waterproof clothing, suited to the requirements of each country; trunks, valises, and traveling bags.
- (15) Paper, wrapping and printing; stationery, plain and fancy; books; works of art, lithographs, advertising cards; paper-hangings, etc., and all other printed matter in demand.
- (16) Furniture, and all forms of articles for household decoration and use.
- (17) Packing: Examples showing how goods should be packed to insure safe transit over the roads of each country; dimensions and maximum weights permissible, so as to suit methods of local transportation.
- (18) Materials for packing most desirable: Cases, bags, bales, kegs, or barrels, and when same should be tin-lined or hermetically sealed. Where the actual articles can not be obtained as samples, sketches and photographs of same will be given.

CUSTOM-HOUSE REGULATIONS.

All packages intended for exhibition should be addressed to "The Collector of Customs, Chicago, Illinois. For the Latin-American Department, Exposition, _____, Commissioner."

All merchandise so addressed will be admitted free of duty, un'less it is sold during the progress of the Exposition, when the regular duty will be collected.

All steamships sailing under the United States flag will carry packages intended for the Exposition for one rate of freight; that is, if the full rate of freight is paid to New York, New Orleans, or San Francisco they will convey the packages on the return voyage free of cost.

Commercial.

*The monetary unit is nominally a dollar, 985 of which are worth 1,000 American dollars, and 480 = 100 sovereigns.

COINAGE OF MEXICO.

The metric system of weights and measures became compulsory in Mexico January 1, 1884.

The principal coinage is of silver, consisting in every 12 dineros of 10½ dineros of pure metal (1,000 fine) and 1½ dineros of alloy—that is, it is 0.902777 fine. The monetary unit is the peso. The gold coinage is not in general circulation. The fineness of the “old doubloon” is 870; the “twenty pesos” of the republic (new), 873, and the “twenty pesos” of the empire, 875 fine. The so-called nickel coins vary from 20 to 25 per cent. of nickel and 75 to 80 per cent. of copper. Pesos continue to be struck with the legend 8R, meaning 8 reales. The piece of 50 centavos is called 4 reales, also tostón; that of 25 centavos, 2 reales, also peseta.

Coinage of Mexico.—Continued.

Denomination.	Fine- ness.	Value in pesos.	Weight in—		Diameter in—	
			Grammes.	Troy ounces.	Milli- metres.	Inches.
Gold coins: *						
Double hidalgo	875	20.00	33.841	1.0860	34	1.33858
Hidalgo	875	10.00	16.920	.5430	27	1.06299
Medio hidalgo	875	5.00	8.460	.2715	22	.86614
Cuarto hidalgo	875	2.50	4.230	.13575	18	.70866
Decimo hidalgo	875	1.00	1.692	.05430	15	.59055
Silver coins: *						
Peso	901	1.00	27.073	.866	37	1.45669
50 centavos	901	.50	13.536	.433	30	1.18110
25 centavos	901	.25	6.768	.2165	25	.98425

Nickel and copper coins: *						
5 centavos	(†)	.05	5	.16075	20	.78740
2 centavos	(†)	.02	3	.09645	18	.70866
1 centavo	(†)	.01	2	.06430	16	.62992

* There were formerly coined in gold the onza, = \$16 in silver; the real, = \$0.12½; medio real, = \$0.06¼; cuartilla, = \$0.03¼. And in copper the tlaco, = \$0.01½; centavo, = \$0.01. The grano, as a monetary unit, was ⅓ of a peso, or ⅓ of a real.

† See note above.

There is now a project for a revision of the monetary laws and coinage of Mexico under consideration by the Government of that Republic. The finance minister submitted to the Congress recently a plan for a system of gold, silver, copper, and brass coins of new designs and somewhat different in value from that now in use.

CHIEF FOREIGN COMMERCIAL UNITS.

[Reduced to United States and metric standards. Countries which have not yet (or have not entirely adopted the metric system.)]

ARGENTINE REPUBLIC.

Weights and measures.	United States.	Metric.
Libra.....	1.0127 pound.....	.4598 kilo.
Arroba = 25 libras.....	25.3175 pounds.....	11.4413 kilos.
Frasco.....	2.5096 quarts.....	2.3749 litres.
Vara = 3 pies.....	34.1208 inches.....	.8667 metre.

CENTRAL AMERICA.

Libra.....	1.043 pound.....	.4731 kilo.
Cantara = 4 caurtillos.....	4.2631 gallons.....	16.1371 litres.
Fanega = 4 cuartillos.....	1.5745 bushel.....	55.479 litres.
Vara.....	33.874 inches.....	.8349 metre.

CHILE.

Libra.....	1.043 pound.....	.4731 kilo.
Quartillo.....	1.624 quart.....	1.1007 litres.
Fanega.....	2.575 bushels.....	90.733 litres.
Vara.....	33.367 inches.....	.8475 metre.

Chief foreign commercial units—Continued.

CUBA.

Weights and measures.	United States.	Metric.
Libra = 16 onzas.....	1.0161 pound.....	.4609 kilo.
Arroba = 25 libras.....	25.4024 pounds.....	11.5226 kilos.
Arroba = 32 quartillos.....	4.263 gallons.....	16.1369 litres.
Fanega = 12 almudes.....	1.599 bushel.....	56.3425 litres.
Vara = 3 pies.....	33.384 inches.....	.8479 metre.

MEXICO.

Libra.....	1.0142 pound.....	.46 kilo.
Arroba = 25 libras.....	25.3645 pounds.....	11.5054 kilos.
Frasco.....	2.5 quarts.....	2.3672 litres.
Fanega.....	1.55 bushels.....	54.6159 litres.
Vara.....	32.9 inches.....	.8380 metre.

PERU.

Libra.....	1.0143 pound.....	.46 kilo.
Vara.....	33.367 inches.....	.8475 metre.

URUGUAY.

Libra.....	1.0143 pound.....	.46 kilo.
Fanega.....	7.776 bushels.....	274 litres.

VENEZUELA.

Libra = 16 onzas.....	1.0161 pound.....	.4609 kilo.
Arroba = 25 libras.....	25.4024 pounds.....	11.5226 kilos.
Arroba = 32 quartillos.....	4.263 gallons.....	16.1369 litres.
Fanega = 12 almudes.....	1.599 bushel.....	56.3425 litres.
Vara = 3 pies.....	33.384 inches.....	.8479 metre.

NOTE.—Sandwich Islands, same as the United States.

COMPARISON OF THE METRIC AND UNITED STATES STANDARDS.

[Length: 1 metre = 100 centimetres.]

Metric.		United States.	
Millimetre =	.0893 inch.	1 inch =	2.5399 centimetres.
1 centimetre =	.3937 inch.	1 foot =	30.4794 centimetres.
1 metre =	39.3707 inches.	1 yard =	.9143 metre.
1 kilometre =	0.6213 mile.	1 mile =	1.6093 kilometre.
1 geographical mile or knot = 1.152 mile = 2,027 yards = 1,854 metres.			
60 geographical miles = 1 degree.			

[Square: 1 are = 100 square metres.]

1 square centimetre =	.1550 sq. in.	1 square inch =	6.4513 square cent.
1 square metre =	10.7642 sq. ft.	1 square foot =	.0929 square metre.
1 are =	119.6033 sq. yds.	1 square yard =	.8360 square metre.
1 hectare =	2.4711 acres.	1 acre =	.4046 hectolitre.

[Cubic: Cubic metre, also called "stere."]

1 cubic metre =	35.3165 cubic feet.	1 cubic foot =	.02831 cubic metres.
1 United States ton of shipping = 40 cubic feet = 32.143 United States bushels = 1.1326 cubic metres.			
Minimum freight charged on a SS. B. L. is on 20 cubic feet.			

[Weight: 1 kilogramme = 1,000 grammes.]

1 gramme =	15.4323 grains.	1 pound =	.4535 kilo.
1 kilogramme =	2.2046 pounds.	1 cwt. =	50.8023 kilos.
1 tonneau =	2,204.62 pounds.	1 ton =	1,016.0475 kilos.

[Dry measure: 1 litre = 100 centilitres.]

1 centilitre =	.0181 pint.	1 pint =	35.0590 centilitres.
1 litre =	.9081 quart.	1 quart =	1.1011 litres.
1 hectolitre =	2.8379 bushels.	1 bushel =	35.2371 litres.

[Liquid measure: 1 litre = 100 centilitres.]

1 centilitre =	.0211 pint.	1 pint =	47.3150 centilitres.
1 litre =	1.0567 quarts.	1 quart =	.9463 litre.
1 hectolitre =	2.64186 gallons.	1 gallon =	3.7852 litres.

The metric system is now recognized by the following countries: Argentine Republic, Austria, Belgium, Bolivia, Brazil, Chile, Costa Rica, Ecuador, Egypt, France, Germany, Greece, Italy, Mexico, Netherlands, Portugal, Spain, Switzerland, United States of America, and United States of Colombia.

UNITED STATES CUSTOM HOUSE STANDARDS.

Bushel is estimated as per following weights:

	<i>Pounds.</i>		<i>Pounds.</i>
Barley.....	48	Linseed.....	56
Barley malt.....	34	Oats.....	32
Buckwheat.....	42	Pease.....	60
Castor beans.....	50	Potatoes.....	60
Coal.....	80	Rye.....	56
Corn.....	56	Wheat.....	60
Corn meal.....	48		

Ton.—The English ton of 2,240 pounds avoirdupois.

Oils.—Cotton-seed, flax or linseed, $7\frac{1}{2}$ pounds to the gallon.

Sugars and molasses are tested by the polariscope.

Vinegar.—That strength which requires 35 grains of bicarbonate of potash to neutralize 1 ounce troy of vinegar.

Proof spirit is understood to be that alcoholic liquor which contains one-half its volume of alcohol of a specific gravity of .7939 at 60° Fahrenheit.

The *hydrometer* is an instrument constructed to determine the specific gravity of fluids. The standard hydrometer actually in use by the customs and internal revenue is that of G. Tagliabue.

MEASURES.

The following tables exhibit the various designations of weights and measures under the metric system, and their equivalents in existing American or English weights and measures, as legalized by act of Congress, July 27, 1866:

MEASURES OF LENGTH.

Metric denominations and values.		Equivalents in denominations in use.
Myriametre.....	10,000 metres	6.2137 miles.
Kilometre.....	1,000 metres	0.62137 mile, or 3,280 feet 10 inches,
Hectometre.....	100 metres	328 feet, 1 inch.
Decametre.....	10 metres	393.7 inches.
Metre.....	1 metre	39.37 inches.
Decimetre.....	$\frac{1}{10}$ of a metre	3.937 inches.
Centimetre.....	$\frac{1}{100}$ of a metre	0.3937 inch.
Millimetre.....	$\frac{1}{1000}$ of a metre	0.03937 inch.

MEASURES OF CAPACITY.

Metric denominations and values.			Equivalents in denominations in use.	
Names.	No. of litres.	Cubic measure.	Dry measure.	Liquid or wine measure.
Kilolitre, or stere.	1,000	1 cubic metre.....	1.308 cubic yard.	264.17 gallons.
Hectolitre....	100	$\frac{1}{10}$ of a cubic metre.	2 bushels 3.35 pecks.	26.417 gallons.
Decalitre.	10	10 cubic decimetres.	9.08 quarts	2.6417 gallons.
Litre.....	1	1 cubic decimetre..	0.908 quart....	1.0567 quarts.
Decilitre.....	$\frac{1}{10}$	$\frac{1}{10}$ of a cubic decimetre.	6.1022 cubic inches.	0.845 gill.
Centilitre.....	$\frac{1}{100}$	10 cubic decimetres.	0.6102 cubic inch.	0.338 fluid ounce.
Millilitre.....	$\frac{1}{1000}$	1 cubic centimetre.	0.061 cubic inch.	0.27 fluid ounce.

MEASURES OF SURFACE.

Metric denominations and values.		Equivalents in denominations in use.
Hectare	10,000 square metres	2.471 acres.
Are	100 square metres	119.6 square yards.
Centare	1 square metre	1,550 square inches.

Trade-mark Laws of America.

The following is a summary of the trade-mark laws of the American Republics, prepared by Francis Forbes, esq., United States Trade-Mark Association, 137 Broadway, New York City:

ARGENTINE REPUBLIC AND URUGUAY.

Date of law.—August 19, 1876, Argentine Republic; March 1, 1877, Uruguay.

Who may register.—Any manufacturer or merchant, Argentine Republic; interested party, Uruguay.

What are registrable as trade-marks.—Names of objects and persons in a special form, emblems, monograms, engravings or prints, seals, vignettes and reliefs, letters and figures of a special design, the receptacles or wrappers of objects and every other sign employed to distinguish the products of a factory or article of commerce. (Art. 1.)

Use of mark is optional, but it may become obligatory when public convenience demands it. (Art. 6.)

What are not registrable as trade-marks.—1. Letters, words, names, or distinctions used by or pertaining to the state. 2. The form of the article given by the manufacturer. 3. Color of products. 4. Terms or designations which may be in general use. 5. Designations usually employed to indicate the nature of products or the class to which they belong. 6. Designs or expressions contrary to morals. (Art. 3.)

Ownership and transfer.—Absolute property in the mark and the right to oppose the use of any other which may cause confusion directly or indirectly between the products shall belong to the manufacturer or merchant who may have complied with the requirements of the law. (Art. 4.) Ownership extends no further than industries of the same kind. (Art. 5.) Ownership passes to the heirs and may be transferred by contract. (Art. 7.) Ownership passes with the sale of the establishment, unless otherwise excepted. (Art. 8.) Transfers must be recorded in the office in which registered. (Art. 9.) Only those marks for which the office has given certificates of proprietorship shall be considered effective under the law. (Art. 10.) The right of preference for the property in a mark shall be determined by the date of application. (Art. 15.)

Duration.—Ten years. Can be renewed for the same period repeatedly by the same formalities, etc., paying the same fees. (Art. 11.) (Argentine Republic.) Ten years. Renewable for same period indefinitely. (Uruguay.)

Formalities necessary to obtain ownership of trade-mark.—Application to the patent office accompanied by two copies of the mark. 2. Description in duplicate of the mark or sign, if figures or emblems. Designation of the class of objects to which the mark or sign is intended to be applied, and whether to be applied to products of a factory or to articles of commerce. 3. Receipt from the general treasury of the payment of forty piasters. 4. Power of attorney whenever the applicant does not appear in person. (Art. 13.)

Office regulations.—A summarized entry of the applications shall be made, giving in substance their contents, with mention of the date and hour of presentation. This entry shall be signed by the chief of the bureau, the secretary, and the applicant, who shall be entitled to copies without other expense than the stamped paper. (Art. 14.)

The patent office shall keep a book in which shall be inscribed grants of marks according to the order of their delivery.

The chief of the bureau shall furnish every three months to the executive government a statement of the certificates granted and refused, with their respective dates, which shall be published. (Art. 18.) Marks shall be classed in the files of the patent office. In case of litigation the record shall be exhibited. (Art. 20.) Marks may be examined at the patent office by the public. (Art. 21.)

Form of certificate.—The certificate delivered by the patent office shall consist of a certificate of grant accompanied by a duplicate of the description and the design. It shall be attested in the name of the nation by authority of the government and shall be countersigned by the signature of the chief of the bureau and the secretary, and the stamp of the bureau. (Art. 16.)

Appeal.—Appeal may be taken within 10 days to the minister of the interior from a decision of the bureau refusing to accord property in a mark. The minister, after having heard the attorney of the treasury, shall confirm or reverse the decision. (Art. 17.)

Fees.—Registration, 40 hard dollars. Recording and certificate of transfer, 20 hard dollars. For each attested copy, 4 hard dollars in addition to the stamp on the paper. (Art. 19.) (Argentine.) Fifty dollars in gold. For registering transfer, \$25 in gold. (Uruguay.)

Names of individuals and firms.—The merchant's name, the firm name, the sign or the designation of a house dealing in particular articles, constitute industrial property. (Art. 22.) If a merchant or manufacturer wishes to carry on an industry already initiated by another person bearing the same name he must adopt a distinct modification thereof. (Art. 23.) The injured party must protest within a year. (Art. 24.) Corporations have the same rights to their names as individuals and are subject to the same conditions. (Art. 25.) The exclusive right to the name as an industrial property ceases with the house or with the failure of that branch of industry. (Art. 26.) It is not necessary to register the name in order to enjoy the rights accorded by this law, except in cases where it forms part of the mark. (Art. 27.)

Punishment for infringement.—Shall be punished by a fine of from 20 to 500 hard

dollars or by imprisonment from 15 days to 1 year: 1. Those who falsify or forge in any manner a factory or commercial mark. 2. Those who affix to their products or articles of commerce a mark belonging to another. 3. Those who knowingly sell, offer for sale, acquiesce in the sale or circulate articles bearing marks counterfeited or fraudulently applied. 4. Those who knowingly sell, offer for sale, or accept the sale of counterfeit marks as well as authentic marks without the knowledge of the proprietor. 5. Those who with fraudulent intent place or cause to be placed upon merchandise a statement or any other designation which is false relative to either the nature, quality, quantity, number, weight, or measurement of the same or the country in which it has been manufactured or from which it has emanated. 6. Those who knowingly sell, offer for sale, or accept the sale of merchandise bearing the false indications mentioned in the preceding clause. Double penalty second offence. (Art. 28.)

Infringement.—To make a crime it is not necessary that the counterfeit extend to all the objects; the application to one object is sufficient. (Art. 29.)

Information to be given by infringer.—Those who sell or offer for sale articles with an infringing or counterfeit mark shall give to the proprietor complete written information of the name and address of those to whom he has made sales or attempted to make sale as well as the date when the transactions commenced, and in case of refusal to supply such information they shall be compelled by law under the penalty of being adjudged accomplices. (Art. 31.)

Disposition of infringing goods and labels.—Articles bearing counterfeit marks found in the possession of the falsifier or his agents shall be seized and sold; and the product after paying costs and indemnity established by law shall be applied to the service of the public school of the province where seized. (Art. 32.)

The false marks found in the possession of the infringer as well as the instruments employed in the falsification shall be destroyed. (Art. 33.)

Proceedings against infringers.—Only the person injured shall institute criminal proceedings, but once commenced they may be continued by the fiscal department. The complainant may discontinue the proceedings at any time before sentence is passed. (Art. 34.)

Persons damaged may bring civil actions for damages against the authors of the fraud and accomplices. The sentence shall be published at expense of defendant. (Art. 35.)

Limitation of action 3 years after offence and one year after notice received by complainant. (Art. 36.)

Infringements of names governed by same rule as of trade-marks. (Art. 37.)

BRAZIL.

Date of law.—October 14, 1887.

Who may register.—Any manufacturer or merchant. (Art. 1.)

What are registrable as trade-marks.—A trade-mark may consist of anything not prohibited by this law which distinguishes an object from the same or a similar object of different origin. Every name, necessary or common, a denomination, signature or firm name, as well as all letters or figures can only serve for this purpose when of a distinctive form. (Art. 2.)

What are not registrable as trade-marks.—Marks containing or consisting of: (1) Arms, crests, medals, or public or official distinctive signs, whether native or foreign, when for their use proper authorization shall not have been obtained; (2) the signature or name of a commercial firm of which the applicant cannot legally make use; (3) indication of a determined locality or establishment which is not that of the origin of the object, whether or not there be joined to this indication a fictitious or another's name; (4) words, pictures, or allegories which involve offence to either individuals or the public decorum; (5) reproduction of another mark already registered for objects of the same species; (6) complete or partial imitation of a mark already registered for products of the same species which may lead to error or confusion of the buyer; the possibility of error or confusion shall be considered verified whenever the differences between the two marks cannot be recognized without careful comparison or examination. (Art. 8.)

Ownership and transfer.—Registration, deposit, and publication under the present law are indispensable for the guarantee of the exclusive use of trade-marks. (Art. 3.) The mark can only be transferred with the business. Transfer shall be noted on the registry book on the exhibition of the document. The same note shall be made if the mark remains after a change of firm. In such case publication is necessary. (Art. 13.)

Duration.—Fifteen years. Can be renewed for same term repeatedly.

Lapses on failure to use for three years. (Art. 12.)

Formalities necessary to obtain ownership of trade-mark.—The Junta Commercial of the place of the house, or of the principal house (when branches) and of Rio de Janeiro for foreign marks and for those registered in other Juntas, are empowered to register. (Art. 5.)

The interested party or his special attorney must make a petition, accompanied by three copies of the mark, and containing a description of the mark and all its accessories and explanations of the same, a designation of the kind of industry or of commerce to which it is to be applied, the profession of the applicant and his residence. (Art. 5.)

Appeal.—Appeal to the court of second instance from decision refusing registration, and also in case of decision admitting to registration by whoever may consider himself prejudicially affected. (2) The interested party in cases 2 and 3, Art. 8. (3) The injured individual in case 4, Art. 8. (4) The public prosecutor in cases 1 and 2, last part Art. 8. Term of appeal 5 days for residents, 30 days for nonresidents. (Art. 10.)

Names of individuals and firms.—Every personal or firm name can only be used as a trade-mark when clothed in a distinctive form. (Art. 2.)

Punishment for infringement.—Shall be punished by a fine of from \$500 to \$5,000, or by imprisonment from one to six months, who: (1) Reproduce, in entirety or in part, a mark duly registered and published without authority from its proprietor or his legal representative; (2) make use of another's mark or of a counterfeited mark in the terms of No. 1; (3) sell, or expose for sale, objects bearing another's mark or counterfeited in whole or in part; (4) imitate a mark so that it may mislead the buyer; (5) use the mark thus imitated; (6) sell, or expose for sale, objects bearing the imitated mark; (7) use a commercial name or signature not belonging to them, whether or not it form part of a registered mark. (Art. 14.)

Shall be punished with fines of from \$100 to \$500, in favor of the State, who: (1) Without proper authority, use native or foreign arms, crests, public or official distinctive signs; (2) marks which are offensive to public decorum; (3) a mark containing indication of a locality or establishment which is not that of the origin of the object, whether or not there be joined to this indication a supposed or another's name; (4) sell or expose for sale, merchandise or products bearing marks as described in Nos. 1 and 2 of this article; (5) sell or expose for sale merchandise or products marked as in No. 3. (Art. 15.)

He who uses a mark containing personal offence, or sells or exposes for sale articles bearing such a mark, shall suffer the penalties of article 237, sec. 3, of the criminal code. (Art. 16.)

Infringement.—To constitute the imitation referred to in Nos. 4 and 6 of this article it is not necessary that the resemblance to the mark be complete, it sufficing, whatever the difference may be, that there exist a possibility of mistake or confusion, as laid down in the latter part of article 8.

The usurpation of a name or commercial signature treated of in No. 7, whether the reproduction be entire, or with additions, omissions, or alterations, shall be considered to exist if there be the said possibility of mistake or confusion by the buyer. (Art. 14.)

Disposition of infringing goods and labels.—The interested party may solicit: (2) Seizure and destruction of counterfeited or imitated marks in the workshop where they are prepared, or wherever they may be found, before being used for criminal purposes. (3) Destruction of the counterfeited or imitated marks on the packages or objects bearing same before their dispatch by the fiscal department (custom-house) even though the wrapper and the merchandise and produce be thus damaged. The objects seized shall serve to guarantee the payment of the fines and damages for which they shall be sold by auction during the progress of the action if they be of a substance which quickly deteriorates, and otherwise at the execution of the sentence. (Art. 21.)

Proceedings against infringers.—Criminal action against delinquents, stated in Nos. 1, 2, and 4 of Art. 15, shall be instituted by the public prosecutor of the district in which the objects bearing the marks treated of be found.

Those competent in the cases Nos. 3 and 5 are, any merchant or manufacturer of a similar article residing in the place of its production and the owner of the establishment falsely indicated; and against those delinquents referred to in Art. 14 and 16, the injured or interested parties. (Art. 17.)

CANADA.

Date of law.—May 15, 1879.

Who may register.—Proprietor. (Art. 6.)

What are registrable as trade-marks.—All marks, names, brands, labels, packages, or other business devices which may be adopted for use by any person in his trade, business, occupation, or calling, for the purpose of distinguishing any manufacture, product, or article of any description by him manufactured, produced, compounded, packed, or offered for sale, no matter how applied, whether to such manufacture, product, or article or to any package, parcel, case, box, or other vessel or

receptacle of any description whatever containing the same, shall be considered and known as trade-marks and may be registered for the exclusive use of the party registering the same. (Sec. 8.)

What are not registrable as trade-marks.—A mark identical with or which resembles a trade-mark already registered, or calculated to deceive the public, or which contains any immorality or scandalous figure, or which does not contain the essentials necessary to constitute a trade-mark properly speaking. (Sec. 5.)

Ownership and transfer.—Every registered trade-mark is assignable in law, and on production of assignment and payment of fee for recording same (§2) assignment shall be entered on the margin of the register of trade-marks. (Sec. 14.)

Duration.—A general trade-mark shall endure without limitation. A specific trade-mark for a special class of merchandise twenty-five years, subject to repeated renewals by reregistration. (Sec. 10.)

Formalities necessary to obtain ownership of trade-mark.—Forwarding to the minister of agriculture a drawing and description in duplicate of trade-mark, together with a declaration that the same was not in use to his knowledge by any other person than himself at the time of his adoption thereof. (Sec. 6.)

Office regulations.—Minister of agriculture shall register trade-mark and return to the proprietor one copy of the drawing and description, with a certificate (see form of certificate). (Sec. 7.)

In case of application for registration of trade-mark like one already registered the minister of agriculture may bring the parties before him for the purpose of establishing who is entitled to the mark. The minister may make an entry or cancellation, or both. (Sec. 15.)

Form of certificate.—Copy of drawing and description with certificate signed by the minister to the effect that the said trade-mark has been duly registered and the date in the register. (Sec. 7.)

Fees.—General trade-mark, \$30; specific trade-mark, \$25. Renewal of specific, \$20. Separate copy of certificate, \$1. Recording assignment, \$2.

Punishment for infringement.—Marking goods with registered trade-mark or any part thereof, or using package with genuine mark with intent to deceive without consent of owner, or knowingly selling, or offering for sale, any article marked with a registered trade-mark or any part thereof, with intent to deceive and to induce persons to believe that such article was manufactured, produced, compounded, packed, or sold by the proprietor of such trade-mark, is a misdemeanor, punished by forfeiture for each offense not less than \$20 nor more than \$100, which shall be paid to the proprietor of the mark, together with the cost. (Sec. 16.)

Proceedings against infringers.—Suit against person using registered trade-mark or any fraudulent imitation thereof, or selling articles bearing such trade-mark or any imitation thereof, or contained in packages being or purporting to be his, contrary to the provisions of act. (Sec. 17.)

Any complaint under section 16 for misdemeanor shall be made by the proprietor of the trade-mark. (Sec. 16.)

CHILI.

Date of law.—November 12, 1874.

Who may register.—Manufacturer, agriculturist, or merchant.

What are registrable as trade-marks.—Commercial or factory labels, proper

names, emblems, or any other sign adopted by the merchant or manufacturer to distinguish the objects he sells or makes shall be considered trade-marks. (Art. 3.)

What are not registrable as trade-marks.—

Ownership and transfer.—He who registers a commercial or factory mark has exclusive right to the same. (Art. 5.) The transfer of a mark, as well as the authorization given to another to use same, shall be noted on the trade-mark register after publication for ten days. (Art. 6.)

Duration.—Ten years. Can be renewed for the same term repeatedly.

Office regulations.—The entry in the register must show the date and hour on which it is made, the name of the proprietor of the mark, his profession, residence, and the place of his factory or business house, the nature of the industry or business to which the mark is to be applied, and also a facsimile of the mark. The entry shall bear an order number corresponding to that upon the mark and all other indications which may become necessary. Both the entry in the register and the copy thereof given to the interested party shall be signed by the interested party before two witnesses. (Art. 9.)

Fees.—Twelve dollars for each factory mark, \$3 for each commercial mark, and \$1 for a copy of entry. (Art. 10.)

Names of individuals and firms.—The name of an agricultural establishment, mill, foundry, or factory shall be the exclusive property of the owner of such agricultural establishment, mill, foundry, or factory. (Art. 4.)

Punishment for infringement.—Whoever falsifies or makes fraudulent use of the marks or labels treated of in this law shall incur the penalties imposed by the Penal Code, Arts. 185, 190, and 191. (Art. 11.)

Disposition of infringing goods and labels.—The objects bearing the false marks shall be forfeited in favor of the injured party. The apparatus employed in the falsification shall be destroyed. (Art. 12.)

PERU.

Date of law.—November 8, 1877–February 10, 1885.

What are registrable as trade-marks.—Marks for liquors, sirups, soda-water, drugs, perfumery, and cigars.

Manufacturers of liquors are bound to attach to the packages thereof a special label unlike those used by others. (Law of 1877.) Id. Syrups, soda water, drugs, perfumery, and brands of cigars. (Law of 1885.)

What are not registrable as trade-marks.—Anonymous labels are forbidden. Each must mention the name of the owner or manufacturer answerable therefor and the place of the works or manufactory where products are produced. (Art. 7.)

Formalities necessary to obtain ownership of trade-mark.—The registry of labels shall be made by the board of health, with the previous permit of the lord mayor. The label must be presented in writing to the lord mayor with two copies.

Office regulations.—Labels shall be entered in a special book, signed by the owner or manufacturer, to whom a certified copy of the register shall be given, stamped with the seal of the board of health, and signed by the inspector of the board with the words "Registered at folio ——. book."

Fees.—One hundred soles for registering each label.

Punishment for infringement.—Any one counterfeiting a mark is liable to a fine of 5 to 20 soles, which shall be doubled in case offense is repeated. (Law of 1885.)

Infringement.—It is absolutely forbidden to any establishments to use labels of others, either foreign or domestic.

UNITED STATES.

Date of law.—March 3, 1881.

Who may register.—Owners. (Sec. 1.)

What are registrable as trade-marks.—Trade-marks used in commerce with foreign nations or with the Indian tribes, provided the owner shall be domiciled in the United States or located in a foreign country, which, by treaty, convention, or law, affords similar privileges to citizens of the United States. (Sec. 1.)

(No definition of trade-mark is given.)

What are not registrable as trade-marks.—No alleged trade-mark shall be registered unless the same appear to be lawfully used as such by the applicant in foreign commerce, or is within the provisions of a treaty, convention, or declaration with a foreign power; nor which is merely the name of the applicant; nor which is identical with a registered or known trade-mark owned by another and appropriate to the same class of merchandise, or which so nearly resembles some other person's lawful trade-mark as to be likely to cause confusion or mistake in the mind of the public or to deceive purchasers. (Sec. 3.)

Ownership and transfer.—Registration shall be *prima facie* evidence of ownership. (Sec. 7.) Commissioner of Patents is authorized to make rules and regulations and prescribe forms for the transfer of the right to use trade-mark and for recording transfers in his office. (Sec. 12.)

Duration.—Thirty years, except in case article is not made in this country and trade-mark receives protection under the laws of a foreign country for a shorter period, in which case it shall cease to have any force by virtue of this act at the same time it ceases to be exclusive property elsewhere.

Renewable during six months prior to expiration for like period. (Sec. 5.)

Formalities necessary to obtain ownership of trade-mark.—Causing to be recorded in the Patent Office a statement specifying name, domicile, location, and citizenship of party applying; class of merchandise and particular description of goods comprised in such class to which the particular trade-mark has been appropriated; a description of the trade-mark itself, with facsimiles thereof, and a statement of the mode in which affixed to goods and length of time used. (Sec. 1.)

Application shall be accompanied with a written verified declaration to the effect that the party has at the time the right to use the trade-mark, and no other person, firm, or corporation has the right to such use, either in the identical form or in such near resemblance thereto as might be calculated to deceive; that it is used in commerce with foreign nations, and that the description and facsimiles presented for registration truly represent it. (Sec. 2.)

Office regulations.—Time of receipt shall be noted and recorded. The Commissioner of Patents shall decide the presumptive lawfulness of claim to the alleged trade-mark. In case of dispute, he shall follow the practice of the courts of equity of the United States in analogous cases. (Sec. 8.)

A record of the registration, together with printed copies of the specification, shall be kept in books. (Sec. 4.)

Form of certificate.—The certificate shall be issued in the name of the United States of America, under the seal of the Department of the Interior, and shall be signed by the Commissioner of Patents. (Sec. 4.)

Fees.—Twenty-five dollars.

Names of individuals and firms.—No alleged trade-mark shall be registered which is merely the name of the applicant. (Sec. 3.)

Punishment for infringement.—Civil action by owner of trade-mark for damages. (Sec. 7.)

Proceedings against infringers.—Any person who shall reproduce, counterfeit, copy, or colorably imitate any trade-mark registered under this act and affix the same to merchandise of substantially the same descriptive properties as those described in the registration shall be liable to an action on the case for damages for the wrongful use of said trade-mark at the suit of the owner thereof, and the party aggrieved shall also have his remedy according to the course of equity to enjoin the wrongful use of such trade-mark. (Sec. 7.)

No suit shall be maintained in any case where the trade-mark is used in any unlawful business or upon any article injurious in itself, or which has been used with the design of deceiving the public in the purchase of merchandise, or under a certificate of registry fraudulently obtained. (Sec. 8.)

Fraudulently procuring registration—Any person who shall procure the registry of a trade-mark by a false or fraudulent representation or declaration shall be liable to pay any damages sustained in consequence thereof to the injured party, to be recovered by an action on the case. (Sec. 9.)

VENEZUELA.

Date of law.—May 24, 1887.

Who may register.—Any person or firm domiciled in the Republic and any corporation created by the national authority, as well as every person, firm, or corporation resident in a foreign country which by treaty or convention accords to citizens of Venezuela the same rights as granted by the present law, or analagous rights can obtain protection for every legitimate factory or commercial mark, for whose usage there exists an exclusive use, or which they may adopt with this character on condition of fulfilling the requirements of the present law.

These works on foreign products or merchandise registered out of the Republic may be registered at the Ministry of the FOMENTO, although there be no treaty or convention on the subject when the products are involved whose utility is known to the Republic.

What are not registerable as trade marks.—That which is not a lawful trade mark, or which consists of the name of a person, firm, or corporation only, without a distinguishing characteristic sufficient to distinguish it from the same name employed by others, or which is identical with another mark already applied to the same class of objects and registered or presented for registration, or which shall have such resemblance to another trade mark under the above conditions that there will be probability of error on the part of the public. (Art. 4.)

Ownership and transfer.—Registration gives the right of exclusive use to the registrant. (Art. 8.)

Duration.—Thirty years, except that in case the mark is applied to articles made outside of the Republic, and guaranteed by the laws of a foreign country for a shorter period, the protection granted shall cease with that accorded by the foreign country. (Art. 7.) Renewals may be demanded by the same formalities as originally within six months prior to expiration of registration. (Art. 9.)

Formalities necessary to obtain ownership of trade-mark.—A petition to the Minister of *Fomento* on stamped paper of the 7th class, containing the name of the applicant, his residence and place of business, the class of articles or merchandise and the particular objects in the class to which the mark is applied; a description of the mark, with fac-similes representing its application. (Art. 2.)

The petition shall be signed by the applicant or his attorney duly authorized in writing, and accompanied by a written declaration that the applicant has the right to its use, and that the mark has no such resemblance to any other analogous mark already registered as to be confounded with it and deceive the public. Besides, the applicant shall prove that the description or fac-simile which is to be registered is an exact copy of the trade mark which he seeks to protect. (Art. 3.)

Office regulations.—The date of application shall be registered at the Ministry of *Fomento*. (Art. 5.) The National Executive through the Ministry of *Fomento* shall send the applicant if there be no opposition, a certificate (see form of certificate). (Art. 6.) Whatever pertains to registration under the present law shall be in charge of the Direction applicable to patents in the Ministry of *Fomento*. (Art. 13.) The Direction shall provide a book of entry for commercial marks and one for manufacturing marks. (Art. 14.)

Form of certificate.—A certificate upon stamped paper of the third class which shall be countersigned by the applicant declaring that the latter is the proprietor of the registered trade mark with all its specifications; this certificate, which shall serve as a title to the registration, shall bear the signature of the Minister of *Fomento*, and be sealed with the seal of the said Minister. (Art. 6.)

Names of individuals and firms.—The Minister of *Fomento* shall not register that which consists of the name of a person, firm, or corporation only, without a distinguishing characteristic sufficient to distinguish it from the same name employed by others. (Art. 4.)

Punishment for infringement.—Whoever shall reproduce, falsify, copy, or imitate any registered trade mark or apply to any merchandise marks having substantially the same description, properties, and qualities as those referred to in the registration shall be subject to respond in court for the damage caused by the unlawful use of the mark, without prejudice in the case of fraud to the penalties established by the penal code. (Art. 12.)

Proceedings against infringers.—No action to registrant on a trade mark employed or which may be employed for an illegitimate object or upon some object dangerous in itself or upon a mark, obtained fraudulently or which has been formed with the intention of deceiving the public in the same or use of any merchandise. (Art. 10.)

Fraudulently procuring registration.—False or fraudulent statements made in application for registration punished under penal code, without prejudice to civil action by injured party.

Patent Laws of America.

[Collated from Patent Office Gazette.]

BRAZIL.

To obtain a patent the proponent addresses a petition to the Government, asking for a patent or privilege, and transmitting full explanations of models according to law. This is referred by the Minister of Agriculture to the Auxiliary Society of National Industry, which is subventioned by the Government and holds bimonthly sessions. They report on the utility of the inventive process or invention. It is then submitted to the "Procurador da Curoa," or Attorney-General, who endeavors to decide as to its originality, and as to its non-interference with anterior rights. Should it not be of a nature also to require reference to the Sanitary Board, or "Junta de Hygiene Publica," or other similar technical authorities, it is then discussed and reported on by the Council of State.

Should it not be necessary to refer it to the legislative body whose authority must be obtained to insure any remittance of customs dues for the articles proposed to be imported, or any similar sacrifice of public resources or funds, it is then returned to the Minister of Agriculture, and the privilege granted or refused.

The actual legitimate official expenses involved by the stamps, documents, &c., varies between £9 (\$45) and £14 (\$68), the patent being granted gratuitously.

The full text of the Brazilian Patent Law, adopted in 1882, is subjoined:
The General Assembly decrees:

ARTICLE I.

In the concession of a patent to the author of any invention or discovery the law guarantees the right of property and exclusive use.

SECTION 1. For the effects of this law the following shall constitute an invention or discovery.

1. The invention of new industrial products.
2. The invention of new processes or the new application of known processes for obtaining an industrial product or result.
3. The improvement of an invention already privileged if it shall facilitate the manufacture of the product or the use of the privileged invention, or if it shall increase its utility.

Those industrial products, processes, applications, and improvements shall be considered new which, up to the application for a patent, have never, within or without the Empire, been employed or used, and of which can neither be found descriptions nor publications of the method by which they can be employed or used.

SEC. 2. The following inventions cannot be made the object of a patent:

1. Those contrary to law or morality.
2. Those dangerous to public security.
3. Those noxious to public health.
4. Those which do not offer a practical industrial result.

SEC. 3. The patent will be conceded by the Executive power after the fulfillment of the formalities prescribed in this law and in its regulations.

SEC. 4. The exclusive privilege of a principal invention will only be valid to fifteen years, and that of an improvement to the invention conceded to the author will terminate at the same time with it.

If public necessity or utility require the free use (*vulgarisação*) of an invention, or its exclusive use by the State during its privilege, the patent can be disappropriated in conformity with the legal formalities.

SEC. 5. The patent is transmissible by any of the modes of cession or transference recognized by law.

ARTICLE II.

Inventors receiving privileges in other countries can obtain a confirmation of their rights in this Empire, provided that they fulfill the formalities and conditions of this law and observe the further dispositions in force applicable to the case. The confirmation will give the same rights as a patent conceded in the Empire.

SEC. 1. The priority of the property right of that inventor who, having solicited a patent from a foreign country, shall make a similar petition to the imperial government within seven months, will not be invalidated by facts which may occur during this period—to wit, another similar petition, the publication of the invention, and its use or employment.

SEC. 2. To the inventor who, before obtaining a patent, desires to experiment in public with his inventions, or wishes to exhibit them in an exposition, official or officially recognized, will be granted a title provisionally guaranteeing to him his right of property for a specified time and with the formalities required.

SEC. 3. During the first year of the privilege only the inventor himself or his legal successors can obtain a privilege for improvements on his own invention. It will be permitted to third parties, however, to present their petitions within the said period in order to establish their rights. The inventor of an improvement cannot engage in the industry benefited while the privilege for the principal invention lasts without an authorization from its author. Nor can the latter employ the improvement without an accord with him.

SEC. 4. If two or more persons solicit a privilege at the same time for an identical invention, the government, except in the hypothesis of section 1 of this article, will require that they shall previously determine the priority either by means of an accord or in a competent court.

ARTICLE III.

The inventor who seeks a patent will deposit in duplicate in the department which the government shall designate, within a closed and sealed envelope, a report, in the national idiom, describing the invention with accuracy and clearness, its purpose and the method of using it, with the plans, designs, models, and samples which may contribute to an exact understanding of the invention and the elucidation of the report, so than any person cognizant of the subject can obtain or apply the result, means, or product of which it treats. The report shall clearly specify the characteristic feature of the invention, (*privilegio*.) The extension of the right of patent will be determined by the said features, mention of this being made in the patent.

SEC. 1. With the document for deposit will be presented the petition, which should be limited to one single invention, specifying its nature and its purposes or applications in accordance with the report and with the documents deposited.

SEC. 2. If it shall appear that the subject of the invention involves an infraction of section 2, article I, or has for its object alimentary, chemical, or pharmaceutical products, the government will order a previous and secret examination of one of the copies deposited, in conformity with the regulations to be issued, and in accordance with the result it will or will not concede a patent. From a negative decision there will be recourse to the Council of State.

SEC. 3. With the sole exception of the cases mentioned in the preceding paragraph the patent will be issued without previous examination. In it the object of the privilege will always be designated in a concise manner, with a reserve of the rights of a third party and of the responsibility of the government, in respect to the originality or utility of the invention. In the patent of an inventor privileged outside of the Empire it will be declared that it is valid so long as the foreign patent is in force, never exceeding the specified period of section 4, article I.

SEC. 4. Besides the expenses and fees incurred, the patentees shall pay a tax of twenty dollars for the first year, thirty dollars for the second, forty dollars for the third, increasing ten dollars for each year that shall ensue over the preceding annuity for the whole privilege. In no case will the annuities be refunded.

SEC. 5. To the privileged inventor who improves his own invention will be given a certificate of improvement, which will be appended to the respective patent. For this certificate the inventor will pay, once for all, an amount corresponding to the annuity which has become due.

SEC. 6. The transfer or cession of patents or certificates will not enter into effect until it has been registered in the bureau of agricultuae, commerce, and public works.

ARTICLE IV.

The patent having been issued, and within a period of thirty days the opening of the deposited envelopes will take place with the formalities which the regulations shall specify. The report shall be immediately published in the *Diario Oficial*, and one of the copies of the designs, plans, models, or samples will be opened for the inspection of the public and for the study of interested parties, it being permitted to take copies.

SEC. 1. In case the previous examination, of which section 2, article III, treats, has not taken place, the government, having published the report, will order a verification by means of experiments of the requisites and conditions required by law for the validity of the privilege according to the method established for such examination.

ARTICLE V.

A patent will become of no effect if it is annulled or shall lapse.

SEC. 1. The patent will become null—

1. If in its concession any one of the requirements of sections 1 and 2 of article I has been infringed.

2. If the patentee did not have priority.
3. If the patentee shall have falsified the truth or concealed essential matter in the report descriptive of the invention, whether in its object or in the manner of using it.
4. If the name of the invention shall be, with fraudulent purpose, diverse from its real object.
5. If the improvement shall not have the indispensable relation with the principal industry, and can be constituted a separate industry, or there shall have been priority (*preterição*) in the preference established by article II, section 3.

SEC. 2. The patent will lapse in the following cases:

1. The patentee not making effective use of the invention within three years, counting from the date of patent.
2. The patentee suspending the effective use of the invention for more than one year, except by cause of *force majeure* judged sufficient by the government after consulting the respective section of the Council of State. By use is understood, in these two cases, the effective exercise of the privileged industry, and the supply of the products in proportion to their employment or consumption. It being proved that the supply of the products is evidently insufficient for the needs of employment or consumption, the privilege can be restricted to a zone determined by an act of the government with the approval of the legislative power.
3. The patentee not paying the annuity within the terms of the law.
4. The patentee residing outside of the Empire not constituting an accredited agent to represent him before the government or in court.
5. Through the express renunciation of the patent.
6. The patent or foreign title upon an invention also privileged in the Empire being discontinued.
7. The term of the privilege having expired.

SEC. 3. The nullity of a patent or of a certificate of improvement will be declared by a decision of the commercial court (*jurzo commercial*) of the capital of the Empire by means of the summary process of decree No. 737 of November 25, 1850.

The following are competent to promote an action for nullity: the Solicitor of the Treasury (*procurador dos fertos da fazenda*) and his assistants, to whom will be forwarded the documents and proofs corroborative of the infraction and any interested party, with the assistance of that official and his assistants. An action of nullity in the cases of article I, section 2, Nos. 1, 2, and 3, having been begun, the execution of the patent and the use or employment of the

invention will remain suspended until the final decision. If the patent shall not be annulled, the patentee will be reinvested in its enjoyments with the integrity of the term of privilege.

SEC. 4. The lapse of patents will be declared by the Minister and Secretary of State for the Affairs of Agriculture, Commerce, and Public Works, with recourse to the Council of State.

ARTICLE VI.

The following will be considered infractors of the privilege:

1. Those who, without license from the patentee, manufacture the products or employ the processes or make the applications which are the object of the patent.

2. Those who import, sell, or expose for sale, conceal, or receive for the purpose of sale counterfeited products of the privileged industry, knowing what they are.

SEC. 1. The infractors of a privilege will be punished, in favor of the public coffers, with a fine from five hundred dollars to five thousand dollars, and in favor of the patentee, with from ten to fifty per cent. of the damage caused or which may be caused.

SEC. 2. The following will be considered as aggravating circumstances:

1. The infractor to be or to have been an employé or workman in the establishment of the patentee.

2. The infractor to associate with an employé or workman of the patentee for acquiring knowledge of the practical method of obtaining or employing the invention.

SEC. 3. The cognizance of infractions of a privilege belongs to the *juizes de direito* (district judges) of the *comarcas* (districts) where they reside, who will issue, on the petition of the patentee or his legal representative, the warrants of search, apprehension, and deposit, and will prescribe the preparatory or preliminary proceedings of the process. The sentence will be governed by law No. 562 of July 2, 1850, and by decree No. 707 of October 9th of the same year so far as they apply to the case. The products of which Nos. 1 and 2 of this article treat, and the respective instruments and apparatus, will be adjudged to the patentee by the same sentence which condemns the authors of the infractions.

SEC. 4. The process will not hinder an action by the patentee to secure indemnification for damage caused or which may be caused.

SEC. 5. Commercial jurisdiction is sufficient for all the causes relative to industrial privileges in conformity with this law.

SEC. 6. The following will be punished with a fine of from one hundred dollars to five hundred dollars in favor of the public coffers:

1. Those who announce themselves as possessors of a patent, using the emblems, marks, inscriptions, or labels upon products or objects prepared for commerce or exposed for sale, as if they had been privileged.

2. Those inventors who continue to exercise an industry as privileged, the patent being suspended, annulled, or lapsed.

3. Those privileged inventors who in prospectuses, advertisements, inscriptions, or by any mode of public notice shall mention patents without designating the special object for which they were obtained.

4. Those professional men or experts who in the hypothesis of section 2 of article III cause the general diffusion of the secret of the invention, without prejudice in such case to the criminal or civil actions which the laws permit.

SEC. 7. The infractions of which the preceding paragraph treats will be prosecuted and judged as political crimes, in conformity with the legislation in vigor.

ARTICLE VII.

When a patent shall be conceded to two or more co-inventors, or when it becomes common by a title of gift or succession, each one of the co-proprietors can use it freely.

ARTICLE VIII.

If a patent shall be given or left in usufruct, the usufructuary will be obliged, when his rights cease through the extinction of the usufruct or termination of the term of privilege, to give to the owner of the property the value at which it shall be estimated, calculated with relation to the time which the usufruct has lasted.

ARTICLE IX.

The patents of inventions already conceded will continue to be governed by the law of October 26, 1830, there being applied to them the dispositions of article V, section 2, Nos. 1 and 2, and of article VI of this present law, with the exception of pending processes or actions.

ARTICLE X.

All dispositions to the contrary are hereby revoked.

CHILE.

Article 152 of the Chilean constitution, dated May, 1833, accords to every author or inventor the exclusive proprietorship of his discovery or invention for the time which the law may cede to him, and further authorizes the payment of a proper indemnity should it be found necessary to publish the invention.

In 1840 a law was passed which expressly limits the privileges which should be ceded in Chile to patentees of an invention, and lays down the formula and conditions under which such privileges shall be granted. A new invention or discovery must be laid by the inventor before the Home Minister, who has to name a commission for the examination of the samples, models, or drawings produced. On the report of the commissioners, who are sworn to secrecy, the Minister grants or withholds the patent.

The term of a patent can not exceed ten years.

The patentee pays a sum of about \$50 into the treasury as a contribution towards the museum in which the model of his invention is kept, together with a full explanation of the use and method of the article or matter he has invented, which is preserved closed under private seal of the inventor until the term of his patent has expired.

By the same law and under the same conditions, a patent is allowed for inventions of arts or industries which may appear in foreign countries, but are unknown in Chile; but such patents are granted for shorter periods, not exceeding eight years.

The transfer of patents, or the privileges thereon, to another party is permitted, unless fraudulency be suspected.

Forgeries of an article already patented are subject to a fine of from \$100 to \$1,000, and the forfeiture not only of the article itself produced, but also of the establishment and implements used in the manufactory; the proceeds of such a fine and forfeiture being equally divided between the treasury and the patentee, after payment of the loss calculated as suffered by the latter.

Should a patent be fraudulently obtained—that is, by false pretenses—or by any other but the inventor himself, such a person is liable to a fine of from \$100 to \$1,000, or an imprisonment of from three to twelve months.

In cases of disputes arising between parties who may obtain privileges sanctioning the issue of the same article, the law provides the settlement of such causes by arbitration, an arbitrator being named by each party and a third by the Home Minister of the government.

Patents may be granted as effective throughout the country, or be confined to one or more provinces.

Terms exclusive of the period allotted for the patent are granted for the purpose of installing the establishment, machinery, or industry for the issue of the invention, but should this term expire without the object for which it is intended being carried out, all privileges allowed for the patent are annulled; and in the same manner is all exclusive privilege disallowed if such establishment is abandoned for more than a year, or if the article produced is inferior to the original sample.

Extension of the term ceded for patents or exclusive privileges of production are allowed when the patentee is judged worthy of such an extension of his patent, but for which he must have applied six months before the expiration of his first license.

In August, 1851, a law was decreed which obliges the commissioners who take cognizance of the petition for a patent or introduction of an industry to report, not only on its utility, but also on the hindrances which might result to industry or commerce by the cession of an exclusive privilege, as also to report on the difficulties or expenses to which the petitioners may be subjected in their undertaking, with a view to determine the allotted time for the introduction of the art or invention, in order that full knowledge may be taken of the industry which may be prejudiced by any cession of exclusive privilege. Special mention must also be made whether the petition is for a patent of invention or for introducing into the country some new article.

Under date of August 16, 1856, a law was promulgated which makes it obligatory on the petitioner for the introduction of inventions already known in other countries, that the privileges for which he solicits be published in the official journal during the term of thirty days, in order that those parties who may have already brought into the country, or established such conventions or industries, or have taken steps for their introduction or establishment, and thereby incurred expense previous to the petition for such exclusive privilege, shall have a right to oppose the cession of the monopoly.

COLOMBIA.

The power to grant privileges in Colombia, conveying the sole right to make, use, or dispose of any new invention or discovery, is limited and defined by the law of the 13th of May, 1869. This exclusive right is guaranteed by the national executive power of the union by means of an instrument called "patent of invention."

A patent may, in the terms of the law, be granted in respect of any "invention or improvement of a machine, mechanical apparatus, combination of materials, or method of proceeding of useful application to industry, arts, or sciences," and for the making and sale of any manufacture or industrial product, for a term of years not exceeding twenty nor less than five.

No privilege is given for the importation of foreign productions, whether natural or manufactured.

Inventors in possession of a foreign patent may also obtain one in Colombia for the same invention on the condition that its expiration shall coincide with that of the foreign patent.

Patents of invention are obtained upon petition to the executive power, setting forth with clearness the nature of the invention or improvement. In the event of a favorable decision, and in order to obtain the patent, the inventor must furnish the government, within forty days, with a design or model of the machine or mechanical apparatus, or with a circumstantial and complete description of the new method or process, together with a sample of the manufacture or production. Such model, design, or description, as the case may be, is enrolled and deposited in the proper department of state for the twofold purpose of serving as a reference in the event of any controversy as to the genuineness of the invention, and of giving copies thereof to whomsoever may apply for them at the expiration of the patent.

In the patent, reference is made to the law on the subject. In it is embodied the executive decree granting the privilege and stating the nature of the invention, as well as the term to which the duration of the concession is limited. Such decree must be published twice at least in the official gazette.

A patent is granted without any previous examination as to the novelty or utility of the invention. The government does not declare that the invention is new or useful, nor that the patentee is the real inventor, nor that the models or descriptions of the invention are accurate. But it is open to any one whose rights may have been encroached upon by the concession to appeal to the tribunals for its reversal, and in fact the right so to do is expressly reserved in the patent itself.

Thirty days before the issuing of a patent the government is by law required to publish the inventor's petition in the official gazette.

Patents of invention are withheld in the following cases: When the provisions of the law are not faithfully complied with by the petitioners, or when the invention endangers the public salubrity or security, or encroaches upon proprietary rights already acquired.

The moment a patent expires everyone is at liberty to profit by it. The descriptions of the invention are published, and copies of the models or designs

given to any applicant on payment of the necessary expenses. The same publicity is given to the invention in the event of the patent becoming void from any cause.

An injunction may be obtained for the infringement of a patent, the offender being dealt with in conformity with the penal laws of the union.

A patent is void when it violates vested rights, the decision in such cases resting with the courts of justice. It also lapses if during a whole year no use is made of the invention, unless it be from accidents beyond the control of the patentee.

To secure a privilege a fee of from \$5 to \$10 (£1 to £2) for every year of its duration must be paid to the government, the entire sum being levied when the patent is granted. In soliciting a patent, the number of years for which it is desired to take it out is mentioned in the petition, but no petition is entertained unless preceded by a payment into the treasury of \$10, (£2,) which the petitioner forfeits if the application is refused, or if granted is computed as part payment of the fee.

COSTA RICA.

The power of granting patents is exclusively confined to Congress by Article XX of the Constitution, which provides that "it belongs to Congress to promote the progress of the arts and sciences, and to secure, for limited time, to authors or inventors the exclusive right of their writings and discoveries."

According to this, everyone that believes himself to have a right to a patent of invention must solicit it from the constitutional Congress.

ECUADOR.

The Congress of the Republic of Ecuador consider that it is important to regulate the mode and form of grant of patents of invention in order to avoid their being transformed into a species of monopoly and to facilitate the acquisition of them if useful to science, art and industry. It is decreed—

ARTICLE 1. The law assures to every inventor the full and entire enjoyment of his own invention, provided that it be not contrary to the laws or good morals.

ART. 2. The following shall be considered as inventions,—the means or methods which may be discovered for the improvement of any manufacture or industry.

ART. 3. The following shall not be considered as inventions,—those which consist in theoretical modifications or objects of pure ornament.

ART. 4. The State shall have power to buy for public use the secret of any invention useful to industry.

ART. 5. To assure the author of an invention or of an improvement, the enjoyment of his exclusive property, a patent is to be conceded to him of which the duration shall not be less than ten (10) years or more than fifteen (15).

ART. 6. It is unlawful to grant patents to inventors of secret remedies; they ought to publish the compositions of these under the reserve of a just indemnity.

ART. 7. The introducers of machines or of new methods of manufacture, or industry unknown heretofore in the Republic, will have the right of obtaining exclusive patents which will be conceded upon the following scale:

ART. 8. If the establishment of the machine or industry imported requires a capital or an advance of 25,000 pesos the patent will be granted for three years; if this capital be raised to 50,000 pesos it will be granted for six years; and if the same capital amounts to 100,000 pesos or more, it will be granted for ten years.

ART. 9. The patent conceded to introducers of machines or of novel methods of manufacture or of industry already known and employed abroad will only effect for the locality where the machine will be worked or the territory necessary for its exploitation.

MANNER OF OBTAINING PATENTS OF INVENTION, IMPROVEMENT, OR IMPORTATION.

ART. 10. The applicant for a patent in any one of these classes must present to the Executive an application in which he will explain what the invention or improvement consists in, reserving to himself the secret of the method of the substances or of the ingredients which he makes use, or of the instrument which he employs. This application must be accompanied by a specimen of the article, of the metal worked, or of the improved invention.

ART. 11. When an application is made for a patent of importation the interested party will add to his application drawings or models of the machine which he proposes to establish or a detailed specification describing the principles, methods, and processes of the industry which he desires to establish in the territory of the Republic as well as the product which he proposes to manufacture.

ART. 12. The government will then name a commission of three competent persons to judge of the matter and examine the process or secret constituting the invention, improvement, or importation.

ART. 13. This commission will be always presided over by the political chief of the canton where the patent is to be worked; and if the patent be taken for

the entire Republic, by the chief of the canton where the application shall be presented and by two members of the municipal council who will proceed to the examination of the matter set forth in the preceding article.

ART. 14. The two members of the municipal council and the three members of the commission named by the government will take before the same political chief an oath not to reveal the secret of the invention or improvement and to conscientiously perform their mission.

ART. 15. The commission and the two members of the municipal council will then discuss (the interested party not being present) the advice which they ought to present, taking care to set forth all the divergences of opinion which may occur between themselves.

ART. 16. The advice or report mentioned in the preceding article will be remitted under sealed cover with "communication réservée" to the Minister of the Interior. In the same envelope will be inclosed the description of the manufacture, machine or other details which constitute the invention, the improvement, or importation.

ART. 17. Within a maximum period of three months after the receipt of the report of the commission charged to examine the invention, improvement, or importation of the new industry, the Executive Power will remit to Congress the papers furnished by the applicant as well as the report cited above.

The Congress after examination will concede or refuse the patent. In the first case it will return the papers presented by the Executive Power, and the latter will send the patent upon stamped paper of the 10th class, and cause to be registered at the Ministry of the Interior the application or specification spoken of in Art. 11.

ART. 18. In order to avoid the abuse which owners of patents can make of their patents the Government will declare upon the same that it does not guarantee either the reality, the merit, or the utility of the invention, improvement, or importation, and that the interested party will work the same at his own risk and peril.

ART. 19. The owner of a patent who shall desire to make changes in his invention or in his original application before obtaining his patent or before the expiration of the term of his patent must make a declaration in writing accompanied by the description of his new methods in the form and fashion prescribed in Art. 10 in order to obtain a corresponding alteration in his patent of which the duration shall not in the meantime be prorogued.

THE RIGHTS OF OWNERS OF PATENTS.

ART. 20. The owner of a patent shall enjoy exclusively the benefit of an invention, improvement, or importation made the object of his patent.

ART. 21. He shall have the right of forming establishments in all parts of the Republic, if his invention is taken for the whole extent of it, or all of the localities to which he shall be limited or to authorize parties to employ his methods as well as to dispose of his right as personal property.

ART. 22. The owner of a patent shall not be able to assign it in whole or in part except by a notarial act under pain of losing all rights to his patent.

ART. 23. In case of an interference or doubt between the authors of two applications, the priority of application for a patent shall be decided by the certificate of the Under Secretary of State for the Interior, who shall inscribe the date and hour of the presentation of the respective applications.

ON THE DURATION OF PATENTS.

ART. 24. The duration of patents of invention, improvement, or importation shall commence to run from the date of the decree of their grant.

ART. 25. The Letters Patent once accorded by the Government shall be registered in a special book at the Ministry of the Interior. At the same Ministry shall remain also filed until the expiration of the term of the patent the original application, the specification and other papers spoken of in Art. 10.

ART. 26. The grant of patents shall be communicated officially by the Minister of the Interior to the governors of the cantons and published in the Official Journal, it shall also be transcribed in the collections of laws and decrees.

CONCERNING THE RIGHTS OF THE NATION AT THE EXPIRATION OF THE TERM OF THE PATENT.

ART. 27. When the term of duration of a patent has expired the invention, the improvement or the importation of the new industrial process for which such patent has been granted will become public property.

ART. 28. At the expiration of a patent the specification and other documents mentioned in Art. 10 will be published and deposited in the public library of the Capital of the Republic.

ART. 29. When a patent shall be declared void from any of the causes mentioned in the law it shall likewise be published and deposited in the Public Library with the object mentioned in Art. 27.

ART. 30. The Government will print the specifications and drawings required for the understanding of the process when it shall become public property and will forward a sufficient number of copies to the governors of Provinces.

CONCERNING GUARANTEES FOR THE PATENT AGAINST FRAUD.

ART. 31. The patentee, if he can show sufficient cause, may, by provisional mandate, require the sequestration of machinery, instruments, or products, used or manufactured in infringement of his rights; observing with regard thereto the provisions of the law as in force.

ART. 32. The proprietor of such goods shall, if proved guilty of fraud, be condemned to the confiscation of the goods seized, for the benefit of the patentee, and also to the payment, to the latter, of damages and interest in proportion to the importance of the fraud.

ART. 33. If the offense be not proved the (patentee) plaintiff shall pay the defendant for the damages caused by the seizure, and further a fine equal to that which would have been imposed on the defendant if he had been convicted of fraud.

ART. 34. If the patentee be disturbed in the exercise of his exclusive rights he may bring any persons so disturbing him before the ordinary tribunals by which the penalties provided by the preceding articles may be imposed. But if he shall raise any discussion as to the validity of the patent judgment must be given by the administration in the person of the Minister of the Interior.

ART. 35. In case of dispute between two patentees, with regard to two exactly similar inventions, the patent first granted shall be considered valid.

ART. 36. The second patentee shall in this case be considered as improver of the invention.

CONCERNING GUARANTEES FOR THE NATION AGAINST ABUSES BY THE
PATENTEES.

ART. 37. Shall be declared void, all patents granted for an invention, improvement or importation which the tribunals shall condemn as contrary to the laws of the State, to public safety or to police regulations. The patentee will in this case forfeit all claim to an indemnity.

ART. 38. The patents shall also be declared to have lapsed in the following cases: 1st. If the inventor be proved to have concealed in his specification the true method of working his invention. 2nd. If the inventor be proved to have used secret processes which have not been detailed in his specification nor in the declaration which, by Art. 19, he is allowed to make to modify the same. 3rd. If the inventor or one pretending to be such be proved to have obtained a patent for an invention which has already been described and published through the press in the Republic or elsewhere. 4th. If the patentee has allowed a year and a day to pass from the date of granting the patent without having worked his invention and without having justified himself in

view of the circumstances as allowed by the laws. 5th. If the inventor or the licensee of his rights, on any grounds, shall violate the obligations attached to the use of his patent.

ART. 39. In all cases where the patent shall go void or lapse, from any cause, the provision of Art. 27 will be applied.

ART. 40. Every patentee must undertake to submit to the laws of the country on all occasions with regard to his patent and must expressly reject all complaint or diplomatic intervention.

ART. 41. All patentees who have patents already in the Republic are subject, as regards the conditions involving the lapse of such patent, to the provisions of this present law.

GUATEMALA.

ARTICLE 1. Every discovery or invention, in whatsoever description of industry, gives to its author exclusive right to utilize his invention or improvement, for the time and subject to the conditions stipulated by this law.

ART. 2. Every Guatemalan or stranger domiciled in Guatemala who shall invent or improve any machine, instrument or mechanical appliance, manufacture of any kind or process of useful application for the arts or sciences shall be able to obtain from the Executive a "Patent of Invention" or "Patent of Improvement," which shall secure to him for a period of from five to fifteen years the possession of his invention or improvement.

ART. 3. In order to obtain this patent, the person interested must apply to the Ministerio de Fomento, personally or by proxy, making declaration of his invention or improvement, setting it forth clearly and requesting the privilege.

ART. 4. If the patent be granted, the grantee is required to file within 40 days an accurate drawing of the respective machine or mechanical appliance or a detailed description of the new process, accompanying same by a sample of the manufacture or product if this be possible, and if the same be capable of being preserved, in order that they may be deposited in the archives of the Chamber, under the charge of the official intrusted therewith, and may serve as evidence in case of dispute arising as to the patent.

ART. 5. Patents may be granted to persons who have obtained the same in other countries, as long as their discovery has not become public property and provided there exist a convention thereon between the nation from which the application proceeds and Guatemala. These patents will cease and determine at the same time as the foreign patents; but if such period should be more than 15 years, the privilege can not exceed this space of time.

ART. 6. Every privilege conceded will be registered in a special book, which shall be kept by the respective secretariats.

ART. 7. In the patent which is granted there shall be inserted, in case of the grant of the concession, the citation of this law, the invention or improvement of which it treats, the duration of time comprised and the declaration of possession of the privilege, and it shall be sealed with the seal of the Ministry of Commerce.

ART. 8. The Executive, by the concession of a patent, does not guarantee that the discovery or invention be the property of the person who appears as inventor or author, nor yet its correctness or utility. It will be for those interested to prove the contrary before a court of law.

ART. 9. Every application for a patent shall be published four times in one month in the Official Gazette, and the patents granted shall be published at least twice in the same publication.

ART. 10. Patents become void, in addition to the case provided for in Art. 4, in the following circumstances:

1. When they have been granted to the prejudice of the rights of a third party in the opinion of a competent tribunal.

2. When a year shall have elapsed without the industry or improvement for which they were granted being put into practice.

3. When after commencement the industry or improvement be abandoned for more than one year.

4. When products are supplied inferior to the samples filed by reason of adulterations made in them.

ART. 11. Patents will not be granted in the following cases:

1. When the invention or improvement is contrary to prior rights, to public safety and order or to morality and good customs.

2. When the formalities prescribed by the law have not been fulfilled.

ART. 12. The patent granted will be solely for the process or means of making and producing; not for the products which manufactured according to other methods may be freely prepared and sold.

ART. 13. Every person has a right to improve upon the invention of another but not to use the invention itself except with the consent of its owner; in the same way the inventor can not make use of improvements and additions made by a subsequent inventor without the consent of the latter.

ART. 14. The grant of a patent causes in favor of the National Treasury a tax of five to fifty pesos for each year of the concession, which the patentee must pay annually in advance.

ART. 15. When the prescribed term of the patent has elapsed, the specifications of the author or inventor and copies of the drawings or models will be

furnished, at his own expense to any person requiring them; and it will be henceforth permissible to manufacture according to this system or process.

ART. 16. The offenses of falsification, imitation, and so forth, against the patented articles will be punished according to the provisions of the penal code.

ART. 17. The Executive may grant concessions in favor of works of public utility which may be established in the country or of persons who propose to establish new industries or to improve those already existing.

ART. 18. These concessions may be: exemption from or diminution of the amount of the fiscal duties for the introduction of machinery or material, the loan gratuitously of public buildings or lands during the term of the concession, exemption from military service of the operatives engaged in the industry to which the concession relates, actual subventions and premiums, according to the circumstances of the case.

In case of remission or diminution of the duties, the principals or administrators of the favored undertakings must present, in order to obtain delivery of the goods, a petition to the respective custom-house which sets forth the following details:

1. That the undertaking is included among those which enjoy a concession.
2. That the goods of which the delivery is desired are not in excess of the necessity or requirements for the existence of the said undertaking.
3. Give the name of the vessels conveying the goods, marks and number of packages.
4. An inventory of the goods existing in their warehouses or stores, previously imported.

The officials intrusted with the forwarding of these goods will adopt the necessary precautions to assure themselves of the conformity thereof with the application and may suspend the arrangement if any discrepancy appears. If the undertaking favored with exemption from payment of duties shall cease by reason of the concession having terminated or for any other cause, it shall present to the respective custom-house a copy of the formal inventory of the articles in existence belonging to the undertaking, and if the said articles are destined for the consumption or use of a third party it remains responsible for the payment of the corresponding dues.

ART. 19. Any person who desires to obtain a concession for the establishment of an undertaking of public utility or introduction or improvement of a special industry shall address himself to the Secretariate of Commerce setting forth fully and explicitly the conditions of the undertaking or industry or improvement which he may desire to introduce.

The Ministry, with the assistance of two or more experts, will report upon the application to the Council of State. The decision of this body having been pronounced, if it be favorable, the concession will be granted, subject, however, to the confirmation of the Assembly, which will take it into consideration during the next following ordinary sessions. The grantee will be permitted to commence to use the concession granted as soon as it has been allowed; but in case the same be not confirmed by the Assembly, he will have no claim to any compensation.

Every application for a concession shall be published four times during one month in the Official Gazette, before being submitted to the consideration of the Council of State in order that if there should be any one whose rights would be prejudicially affected he may present himself before the same Secretariate.

ART. 20. No especial concessions shall be granted for the introduction of machines for domestic use and other objects of ordinary commerce.

ART. 21. The concession granted in favor of a given enterprise will be annulled if it is discovered that the grantee traffics with the raw materials or articles which he imports.

ART. 22. In the case provided for by the preceding article, in addition to the forfeiture of the concession, the grantee shall pay the duties corresponding to the whole of the importations which he shall previously have made thereunder together with forty per cent. upon the total amount.

ART. 23. Concessions also become void in the following cases:

1. When the time has expired within which the grantee was obliged to introduce the industry or improvement, or to commence the works to carry the same into practice.

2. When after the planting it should be abandoned for more than one year.

HAITI.

(The Republic of Haiti has no law or practice on the subject, having never yet had occasion to apply either. Should it ever feel the want of such a law it would probably base its legislation on the French system.)

HAWAII.

Be it enacted by the King and Legislative Assembly of the Hawaiian Islands in the Legislature of the King assembled, That section 255 of the civil code be, and the same is hereby, amended so as to read as follows (laws from 1879):

The Minister of the Interior, with the approval of his Majesty the King, may

issue a patent to the inventor or improver of any machine, manufacture, or work of art calculated to improve the interests of science, agriculture, or manufactures, and may therein grant to such inventor or improver for any term of years, not exceeding ten, that may be specified in such patent; and upon the granting of such patent the sum of one hundred dollars shall be paid by the patentee to the Minister of the Interior for the use of the royal Exchequer.

Every such inventor or improver shall, before receiving a patent, deliver to the Minister of the Interior a full and clear description in writing of his invention or improvement, together with the mode of using or applying the same to the purpose for which it is intended, and the manner and process of making and constructing or compounding the same; and in case of any machine, he shall also furnish, in addition to the written description, accurate drawings and a complete model thereof, and shall also at the same time, if a citizen of this kingdom, deposit with the Minister of the Interior the sum of thirty dollars, and if a foreigner the sum of one hundred (\$100.00) dollars, for the use of the royal Exchequer.

Any person who shall have invented any new art, machine, or improvement thereof, and shall desire further time to mature the same, may file in the office of the Minister of Interior a caveat, setting forth the design and purpose thereof, its distinguishing characteristics, and praying protection of his right until he shall have matured the same; and such caveat shall, upon payment by the applicant of the sum of thirty (\$30.00) dollars to the Minister of Interior, be filed in the confidential archives of the Department of the Interior and preserved in secrecy; and within one year thereafter, if the applicant shall desire to avail himself of the benefit of his caveat, he shall file his description, specification, drawings, and model, and pay the fee, as provided in applications for patents.

JAMAICA.

Applications for patents must be addressed to the governor and lodged with the executive council. They must be verified by the oath of the petitioner or his agent, and must allege that he has "invented or discovered some new and useful art, machine, manufacture, or composition of matter not theretofore known or used within this island, or some improvement in any such invention or discovery, and praying to obtain an exclusive property in such new invention and discovery or improvement, and that Letters Patent be granted for the same."

Exclusive rights may be granted for a period not exceeding fourteen years.

All petitions are referred to the attorney-general for examination and approval. In case he approves he certifies them to the executive committee; in case of disapproval he reports his reasons to the governor.

Models are to be filed whenever practicable, but where, from the complicated nature of any machinery, the cost of a model may be so great as to prevent an ingenious but poor inventor from furnishing it, the governor and council may authorize it to be dispensed with.

All patents granted must be put in operation within two years.

Patentees in other countries are not debarred from obtaining patents in Jamaica, provided the invention has not been brought into general use in the colony prior to the application.

A penalty of \$250 is imposed for counterfeiting or imitating patented articles.

The stamp duties amount to about \$30.

MEXICO.

ARTICLE 1. Any Mexican or foreigner, who is the inventor or improver of any industry or art or of objects destined therefor, has the right, by virtue of article 28 of the constitution, to the exclusive use thereof, during a certain number of years, under the rules and regulations prescribed in this law.

In order to acquire this right, one must obtain a patent of invention or improvement.

ART. 2. Every discovery, invention, or improvement that may have for its object a new industrial product, a new manner of production, or the new application of means, already known, for the obtainment of a result or of an industrial product, is susceptible of being patented. Chemical or pharmaceutical products are likewise susceptible of being patented.

ART. 3. An invention or improvement shall not be considered new when in this country or abroad, and prior to the petition for the patent, it may have received a sufficient publicity to be put into practice. Excepting, however, the case when the publicity may have been made by a foreign authority empowered to issue patents, and when the invention or improvement may have been presented in expositions held within the territory of the Republic or abroad.

ART. 4. The following can not be patented:

I. The inventions or improvements whose working shall be contrary to the laws forbidding them or regarding public security.

II. Scientific principles or discoveries while they are merely speculative or be not put into practice by means of a machine, apparatus, instruments, mechanical or chemical proceedings of a practical industrial character.

ART. 5. The concession of a patent does not guaranty the novelty nor the usefulness of the object to which it relates, nor does it solve questions that may arise therefrom. Consequently, it must be granted without previous examination as to the novelty or utility of the invention or improvement, or of the sufficiency or insufficiency of the descriptions that may accompany the petition.

ART. 6. The concession of a patent can only be made with reference to one object or industrial process. When two or more can be combined among themselves to produce the same industrial result, there must be asked the number of patents that may be necessary therefor.

ART. 7. The rights granted by virtue of the patents issued in the Republic for objects or processes, that may have been or may hereafter be protected by foreign patents, are independent of the rights that the same may grant, and of the effects or results that they may produce.

ART. 8. The effects of a patent are :

I. To deprive every person, without permission from the owner of the patent, of the right to produce, through industrial means, the object of the invention, or to place it in the market and from selling it.

II. With reference to a process, machine, or any other manner of working an instrument or other means of operation, the effect of the patent is to deprive others of the right to apply the process or to use the object of the invention without the permission of the owner of the patent.

ART. 9. The patent does not produce any effect whatever, as regards a third party that was already secretly working or had made the preparations necessary for working within the Republic the invention or process before the presentation of the patent.

ART. 10. The effects of the patent do not comprise the objects or products that may cross in transit the territory of the Republic or may remain within its territorial waters.

ART. 11. The right of petitioning for a patent for objects or processes that may be protected by foreign patents can only be granted to inventors or improvers or to their legitimate representatives.

ART. 12. Inventors shall have the period of one year from the date of the patent within which they shall have exclusive right to petition for patents for improvements.

ART. 13. Patents may be granted for 20 years from the date when the same

shall have been issued; nevertheless, when the patents shall be asked for objects or processes already protected by foreign patents, the terms of duration can not exceed what may be wanting for the expiration of the first patent issued in favor of the petitioner.

ART. 14. The term of a patent may be extended for 5 years at the discretion of the Executive. The extension of the term of a patent of invention involves the extension of the term of the supplementary patents of improvement relative thereto.

ART. 15. On payment of a fair indemnification the Executive may appropriate a patent on the ground of public policy or on account of the patented article being of such a nature that its free use is capable of proving an important source of public wealth. However, this can only be done under one of the following circumstances:

I. When the patentee refuses to allow his patent to be worked.

II. When the machine, apparatus, instrument, or process is capable of being produced or used in the country.

The regulations will determine the formalities and procedure to be observed in the appropriation of patents for the public good.

ART. 16. In order to obtain the protection of this law, application must be made in due form to the department of public works, to which the power to grant patents belongs.

ART. 17. The first applicant for a patent shall have in his favor the presumption of being the first inventor, and moreover enjoys the right of possession.

ART. 18. Inventors, whether citizens or foreigners, who are unable to apply personally to the department of public works, may appoint attorneys in fact to act for them, both in obtaining the patent and in lawsuits and other matters relative thereto.

Citizens may appoint an attorney in fact by a common letter of authorization, but foreigners must grant a regular power of attorney duly registered.

The effects of the power of attorneys cease with the issue of the patent, unless it be otherwise stated in the power.

ART. 19. Petitions for the granting of letters patent shall be published in the official journal of the Federal Government during a period of 2 months, at intervals of 10 days.

ART. 20. During the period of time mentioned in the foregoing article, interference proceedings may be instituted by any one with a view to prevent the granting of the patent solicited.

After the said period of time has elapsed no proceedings of interference will be allowed.

ART. 21. Interference proceedings can only be instituted on the following grounds:

I. That the alleged invention or improvement is not properly patentable under the provisions of this law.

II. That such alleged invention or improvement has been taken from descriptions, drawings, models, devices, apparatuses, or methods invented by another, or from processes already reduced to practice by another, or, in general, on the ground that the applicant is not the original inventor or his legitimate assignee.

ART. 22. If two or more persons claim the same invention, the first inventor shall be entitled to the patent, but if priority of invention can not be determined, the patent shall be granted to the first petitioner.

ART. 23. If interference proceedings be instituted, as determined by articles 20 and 21, the department of public works shall summon the parties and endeavor to reconcile their conflicting claims. But if this is not obtained, the department shall suspend all further executive proceedings and shall transmit all the evidence in the case to the proper judicial authority. The party instituting interference proceedings shall be allowed two months to make good his action in court, but if he fail to do so within this time, his claim shall be disallowed.

ART. 24. All sentences given by the judicial authority shall be transmitted to the department of public works that they may be duly enforced.

ART. 25. The decrees of the department of public works granting a patent can only be canceled by a judicial sentence, and only owing to the nullity of the patent.

ART. 26. At the expiration of the 2 months referred to in article 19, and after the Government tax has been paid into the treasury of the nation, the letters patent shall be issued with reference to the invention or improvement sought, provided always that letters patent covering the same invention have not previously been granted by the department of public works.

ART. 27. Letters patent issued in the name of the nation shall have subscribed thereto the signature of the President of the Republic, be countersigned by the secretary of public works, and bear, besides, the great seal; furthermore, they must contain in clear language a description of the discovery or improvement patented.

The letters patent, with one of the copies of the drawings, samples, models, and other matters under seal, together with the documents presented with the petition duly certified by the subsecretary, shall constitute the title of property of the person who may obtain the patent.

ART. 28. Letters patent shall be recorded in a special record wherein the appropriate entries relative thereto shall be made.

ART. 29. All letters patent that may be issued shall be published in the official journal; and, furthermore, every year, a special book shall be published which must contain a clear and exact description of the inventions or improvements, as also copies of the drawings.

ART. 30. All inventions protected by letters patent shall bear a mark stating that fact and the number and date of the letters patent.

ART. 31. Letters patent shall require the payment of a fee amounting to from \$50 to \$150, payable in Mexican dollars or in bonds of the national consolidated debt.

ART. 32. In case of the extension referred to in article 14, a new fee shall be paid in conformity with the foregoing article.

ART. 33. The owner of letters patent for an invention or improvement must prove before the department of public works, within the period of 5 years after the date of the patent, that the objects or processes protected thereby are manufactured or employed in the Republic or that everything necessary has been done for the purpose of having them so employed or manufactured.

The term within which these facts must be proved can not be extended.

ART. 34. The department of public works shall make an entry in the registry of letters patent of the fact that the requirement referred to in the foregoing articles has been complied with.

ART. 35. Letters patent are null and void—

I. Whenever they may have been issued in contravention of what is prescribed in articles 2, 3, and 4. Nevertheless, when letters patent shall have been obtained, in conformity with a petition wherein the petitioner has presented and obtained more than what he is entitled to as the first discoverer or inventor, his letters patent shall be valid in so far as it relates to whatever he may be entitled to, provided it does not infringe the provisions of the following subdivision and that no fraud shall have been committed upon making the petition. In this case the letters patent shall be limited to what it should only comprise, the proceedings relating thereto to be in conformity with what is prescribed in article 39.

II. Whenever the object for which the patent has been asked is different from that which is obtained by virtue of the letters patent.

III. Whenever it is proved that the main object sought in the petition for the letters patent is comprised within one of the cases referred to in subdivision II of article 21.

The proceedings to invalidate letters patent have to be commenced within the term of 1 year after the date when the patent shall be put in operation in the Republic.

ART. 36. An action for the purpose of declaring invalid letters patent before the courts may be instituted in the name or on behalf of the district attorney.

Whoever may work or have in operation the same industry shall have the right to interpose an exception and take part in the proceedings of interference.

ART. 37. Letters patent shall lapse—

I. Whenever the term for which they were granted shall have terminated and they may not have been extended.

II. When they shall be given up in part or in their entirety.

III. Whenever compliance shall not have been made with the prescriptions of article 33.

ART. 38. The department of public works shall declare the invalidity of the patent in the two first cases referred to in the foregoing article; in the third case that can only be done by the court at the instance and request of the district attorney or of the party in interest by instituting an action of interference proceedings therefor.

ART. 39. The determinations of nullity and lapse of letters patent shall be published in the official journal of the Federal Government and entered in the record of inscriptions of the department of public works.

ART. 40. The determinations of nullity and lapse of letters patent produce the effect of subjecting the inventions or improvements to the use thereof by the public in general.

In case of giving up any letters patent, if only a portion of the same is given up, then the public has merely the right to use the portion thus abandoned, the letters patent remaining valid as to the rest thereof. The abandonment shall be made by writing and be entered in the record.

ART. 41. The ownership in letters patent may be assigned by any of the means established by law with regard to private property, but no act of assignment or any other that implies the modification of the right of property shall be prejudicial to the rights of third parties, if the same shall not be recorded in the office of the department of public works.

ART. 42. Everything relating to the fraudulent infringement of letters patent shall be subject to the prescriptions of the penal code of the federal district and to those established by the codes of procedure.

ART. 43. The proceedings relating to letters patent at present pending shall be continued and decided in conformity, in all particulars as to the part not terminated, with the prescriptions of this law.

ART. 44. All those at present enjoying privileges by virtue of letters patent now in full force, may avail themselves of the provisions of this law upon paying beforehand the fees herein set forth.

ART. 45. The executive of the union may issue rules of practice appropriate to this law, and may establish, if he deems it proper, a patent office in connection with the department of public works.

ART. 46. The law of May 7, 1832, and every part thereof, and all other provisions of law adopted relative to this subject, are hereby repealed.

NICARAGUA.

The resolutions of the Spanish Cortes, of 21st September, 1821, regulating the right of property in inventions, are nominally in force in this republic.

Decree 43 declares as to this right—to consider as proprietor of his work him who should invent, import, or introduce.

The Government, by means of the proper minister, will issue to the said proprietor a certificate, in which will appear his name as inventor, improver, or introducer of the work, a description of it (the invention), and the duration of the exclusive right. This certificate will serve as a sufficient title; but in order to obtain it it is necessary that the petitioner should address himself to the prefect of the department or to the municipality, giving an account of his work, describing it with the greatest exactness possible in conformity with the model, which the same law establishes.

The said authorities, in their turn, shall be obliged to give to the petitioner testimony of everything which may serve for the information of the minister of the department.

The inventor shall have ten years of exclusive property, the improver seven, and the introducer five. These terms may be extended by the sovereign power, on the proposition of the Government, to fifteen, ten, and seven years, respectively.

The inventor, improver, and introducer, apart from the aforesaid terms, will cease to be considered as sole proprietors, first, if they cede their right for the public good; secondly, if they let six months pass without taking up the certificate; thirdly, if they let two years pass without putting in execution their invention, perfection, or improvement.

This is, in substance, that which is decreed by the Spanish Cortes.

Article XLII, section 22, of the constitution of Nicaragua, however, confers

on Congress power to grant rewards and privileges to inventors, and in practice the rules of the decree cited above are not followed

He who wishes for a reward or privilege seeks it from Congress, which concedes it, if it sees fit to do so.

PERU.

ARTICLE 1. Any discovery or invention in any branch of industry whatsoever gives the author the exclusive right to work it to his profit, under the conditions and during the time determined by this law. This right is derived from a patent granted by the Government.

ART. 2. The following are considered inventions and discoveries: 1st. New industrial products. 2nd. New processes or the new application of known processes for obtaining an industrial product.

ART. 3. The following can not be patented: 1st. Pharmaceutical preparations or remedies of any kind whatever. 2nd. Plans or combinations of credit or finance. 3rd. Processes having for their object the use of known methods for the improvement of an industry the exercise of which is free within and without the territory of the Republic.

ART. 4. In the third case of the preceding article, will be admitted and then only in cases of necessity, proposals relating to contracts allowed by the law.

ART. 5. The duration of the patents cannot exceed the term of ten years, and the proprietors shall pay every year a tax of (100) one hundred solés (dollars).

ART. 6. The applicants for patents of invention or of importation must present themselves at the Prefecture of the department in which they may desire to establish their industry or at the Prefecture of the department in which they reside if it is to be established in two or more departments.

ART. 7. The application must contain: 1st. The specification of the invention or of the object which it is proposed to introduce. 2nd. The drawings or models necessary for understanding the same. 3rd. The list and explanation of the models presented. 4th. The clear and precise indication or determination of the principal object and of the details which constitute the invention and the specification of its methods of application. 5th. The duration of the patent. 6th. The indication of the guarantees presented for the realization of the product.

ART. 8. This application shall be written in Spanish and, in conformity, as

regards the metric system of weights and measures, with that in use in the Republic. In the case of an application for patent bearing the signature of a foreigner, this latter must expressly reject all diplomatic intervention with regard to the patent applied for, and must submit absolutely and exclusively to the laws and tribunals of the Republic. Without this condition his application will not be taken under consideration.

ART. 9. The prefects will, with regard to the application for patent, take the opinion of the municipality, the treasury or agent of the treasury, or other functionaries according to the nature of the case and will consult experts it required. After having fulfilled these formalities they will forward the documents, with the specification, plans, models, &c., to the proper authorities at the expense of the person interested.

ART. 10. The Minister of the said department will take the opinion of the treasury, of the Supreme Court, and of any other functionaries which he may consider necessary to consult and, according to the information he may receive, will grant or refuse the patent.

ART. 11. A prolongation of the duration of patents as well as changes or alterations in the terms of the same can only be granted by a resolution of the legislature, made at the request of the persons interested and for just causes founded on proved facts and authentic documents.

ART. 12. The proprietor of a patent alone may work such patent during the period of its duration. Any other person desiring to do so must be authorized by him or must be put in his place and stead by a contract of transfer or by any other means provided by the laws.

ART. 13. The patents are void and of non effect in the following cases: 1st. If the discovery, invention or application be not new. 2nd. If the object of the patent do not come under the terms of Art. 2. 3rd. If the patent refer to principles, methods systems, or theoretical or scientific discoveries for which no industrial application is shown. 4th. If the discovery, invention or application be contrary to order and public safety, or to the laws without exemption, in this case, from the penalties imposed upon manufacturers or merchants of prohibited objects. 5th. If it should appear that the applicant for a patent has fraudulently obtained privilege for an object different to and distinct from the invention. 6th. If, on working the invention it be found not to agree with the specification annexed to the application. 7th. If the patent have been obtained in infraction of any of the provisions of the present law. 8th. If, at the same time as the patent there be given pecuniary grants not included in the budgets of the Republic, or contrary to the laws. Authorizations relating

to changes, additions or improvements not contained in the original patent are also void and of non effect.

ART. 14. A discovery, invention or application will not be considered new which prior to the date of application for the patent shall have had, in Peru or elsewhere, sufficient publicity to enable it to be put in practice.

ART. 15. The proprietor will forfeit his rights if, 1st, he do not pay the annuity or tax fixed in Art. 2. 2nd. If he do not put in practice the discovery or invention within two years or any term which may be stated on the Letters Patent unless he can legally justify his delay. 3rd. If he introduce objects manufactured abroad and similar to those protected by his patent with the sole exception of the models of machines the introduction of which may be authorized by the Government after due investigation.

ART. 16. Whoever shall by means of advertisements, prospectuses marks or otherwise give himself the title of proprietor of a patent without legally possessing such patent or after it has gone void shall be punished by a fine of fifty (50) to a thousand (1000) solés (dollars) without exempting him from the penalties incurred for the crime of forgery.

ART. 17. All persons who may be justly interested will have the right to demand the voidance or lapsing of a patent. The public prosecutor will take part in the action and if the patent be declared null or lapsed, from whatever cause, notice will be given thereof by the said prosecutor.

ART. 18. Any infringement of the rights of a proprietor of a patent, whether in the manufacture of the products or in the use of processes mentioned in the application will constitute the crime of adulteration and will be punished, according to the importance of the case, by a fine in favor of the person interested and by the confiscation of the objects manufactured.

ART. 19. All privileges or patents at present in force and which have been granted in conformity with provisions prior to this law, will remain in force for the whole period for which they have been granted.

SALVADOR.

The Constitution of Salvador confers power upon the Executive to concede privileges to the authors of useful inventions. No secondary law has been passed defining or restricting the terms on which those privileges should be granted.

VENEZUELA.

Any person, the author of a discovery or invention in matters of industry, or of an improvement not before used or known, or who introduces from abroad any kind of manufacturing process or industrial improvement known in other countries, but not in use in Venezuela, can obtain a patent or industrial privilege.

To obtain the patent above alluded to a petition must be addressed direct to the minister of the interior, stating, in a clear and precise manner, the principal and essential points of the discovery, invention or improvement, accompanied by so complete, clear, and correct a description that any one acquainted with the art could obtain the result or manufacture the article if employing the means of proceeding in the manner indicated.

Provisional declarations unaccompanied by the above-mentioned description are not taken into consideration.

On the petition having been presented, the day and hour of its having been made are noted on the margin, in order to insure to the petitioner the priority of the discovery or invention.

Should the patent be in dispute between the persons, the first who had applied for it is entitled to it; and if both applications were made the same day and hour, the question is decided by arbitrators, one named by each interested party and another by the minister of the interior. Should one of the interested parties refuse to name an arbitrator, the patent is issued to the other; and should there be more than two contending parties, and these should not agree in the nomination of three arbitrators, the nomination is then made by the minister of the interior.

In the case of death of an inventor before obtaining a patent for his invention, his lawful heirs may obtain it in conformity with law.

The petitioner for a patent has to make oath to the effect that he believes himself to be the true inventor of the art, machinery, &c., with reference to which he applies for a patent.

The patent is issued by the president of the republic, and in it is mentioned the name of the inventor, and that he has made oath according to law; the art or machine, &c., invented, (fully described as above stated,) and the number of years during which he is allowed the exclusive right to exercise the industry, or manufacture the machine, or sell the article invented; the government, however, not guaranteeing the priority or merits of the invention.

The patent for a discovery, invention, or improvement, insures to the author the exclusive right to exercise the industry, or manufacture the machine, or

sell what he invented, for the number of years stated in the patent, in all the states of the republic; but in the case of the introducing of some kind of industrial invention or improvement from abroad, known in other countries, but not in use in Venezuela, an exception is made with regard to such states of the republic where such invention or improvement may have been known and in use before the patent was issued.

The owner of a patent may make such establishments or shops as may be required for the working of the patent; may employ all sorts of workmen; have partners; establish everywhere deposits for the sale of the productions of his patent, and he may freely dispose of his secret and patent and transfer it to others in legal form, although the person to whom it may be transferred, under the penalty of losing the right, is bound to inform the minister of the interior of the transfer.

A patent issued for an improvement of an invention already patented is limited to its special object, according to the distinctive points indicated in the description, and confers no right to any part of the invention that may have been the subject of a prior patent or of a process previously known; but the owner of the prior patent can not either avail himself of the improvement or the subject of the later patent without coming to an understanding with its owner.

No privileged industry can, according to law, be subjected to any national or municipal contribution or tax exceeding one per cent. per annum on the original cost of the edifice with all its machinery; and so soon as fabrication is in activity the interested party must present to the minister of the interior the documents proving the said cost, and the definitive amount is to be advertised in the gazette of Venezuela.

Primary materials required for a patented industry are exempt from all import duties for the whole period for which the patent has been granted; and, in order to avoid abuses, the patentee must inform the government, on commencing to work his patent, of the primary materials he proposes importing, and the government issues the necessary orders to the customs; and if it be proved that the patentee, abusing the exemption, has introduced such materials for sale without applying them to the patented industry, independently of his having to pay the duties for the materials sold as above stated, he loses for the future the right to the exemption from duties.

Any violation or sale of an article of the patent of invention, without the consent of the owner, is forbidden as an attack upon his prerogative, and entitles him to obtain the intervention of the police to put a stop immediately to any ulterior violation and to provisionally embargo the falsified articles, be they in the hands of the manufacturer himself, or in the hands of any one

commissioned to sell them, or be they imported from abroad, and all under penalties established by law.

The utmost duration of the exclusive rights of the patent is fifteen years, and the least is six years, to count from the date on which the patent was issued; but as regards the prohibition to sell articles of the kind of the patented industry, the term of years is to be reckoned from the date on which the patented industry is brought into operation.

In order to facilitate the trying of experiments, patents may be issued for a less time than fifteen years; and if application be made before the lesser term be completed, it is extended to the fifteen years; but if the application be not made the patent ceases.

Every one is at liberty to make use of the invention, discovery, or improvement when the term of a patent ceases, as well as whenever the inventor, discoverer, improver, or importer ceases to be considered to be the owner of the patent, which happens under the following circumstances:

When it is proved that, by adding or suppressing part of the description he is required to furnish, the patentee conceals the true means for the working of his patent.

When it is proved that he employs secret means, not comprised in the description he is required to furnish, and which he did not add to it by any subsequent declaration.

When it is proved that he applied for and obtained a patent for more than there was in reality of discovery, invention, improvement, or to be imported

When it is proved, with respect to discoveries, inventions, or improvements, that they had been in use before in Venezuela or elsewhere, or are described in some work previously published, the description being sufficiently clear and precise to enable any one acquainted with the art to carry out the invention; and, with respect to those introduced from abroad, that they had already obtained a patent in Venezuela. Also, when it is proved that the patentee has failed, in the former case, within the term of two years, and, in the latter case, within that of one year, to carry the invention into effect.

When the inventor, within six months of his invention having been freely made use of, has not applied for a patent.

When the patent has been obtained through usurpation of the discovery or invention of another person.

When the patent has been transferred to another person, and this person has not notified the transfer to the minister of the interior.

The above points must be proved in a regular suit at law, and if proved the patent is annulled.

A register for patents issued, with other information relating to them is, according to law, to be kept at the department of the interior.

On a patent being issued, the circumstance is, according to law, to be published in the gazette of Venezuela.

When the term of a patent lapses, or when a patent is annulled, a circumstantial description of the invention is, according to law, to be published in the gazette of Venezuela.

The violation of a patent is punishable, according to law, by a penalty of from three months' to two years' imprisonment, and a fine of from 50 to 500 pesos, say \$50 to \$500.

Port Charges.

The following statement shows the port charges of the United States, Mexico, Central and South America:

THE ARGENTINE REPUBLIC.

Wharfage of the Riochuelo, from 4 to 5 cents per ton. Port dues of entry, 10 cents to 60 cents per ton only for entrance. Steamers pay one-half. Pilotage (compulsory), \$40 to \$130, and \$50 to \$150, according to distance. Light house, 8 cents per ton. Captain of port, \$20. Health visit, \$25. Bill of health, \$25. Port dues, national or nationalized, \$3; foreign, \$4.

BRAZIL.

Port and customhouse regulations are very explicit and rigorously enforced not only to prevent disorder and preserve health, but to check smuggling. Consular legalization for vessel of 200 tons and under, \$6.75. The maximum charge is \$15.75. Authenticating crew list and bill of health, \$2.25. Consular passport, \$2.25.

No vessel is allowed to remain in port more than fifteen working days unless for some good reason, when she is granted an extension of ten days, after which she must pay a fine of 200 milreis per ton.

Anchorage, 25 cents per Brazilian ton, which is an increase of 33 per cent. over an American ton. Vessels in free pratique only pay 20 reis per metrical ton.

The general charges in the principal ports of the Republic are as follows:

Rio de Janeiro.—Light and anchorage dues are collectable only six times in any one year. Port dues: Three-masted vessels, 12,800 reis; two-masted vessels, 9,600 reis. Seal dues, 40 reis for each mast. Hospital dues: Vessels of three masts, 600 reis; vessels of two masts, 400 reis. Each man on board,

400 reis. Visit of doctor, 8,200 reis. If vessel is sent into quarantine when it enters into free pratique, 8,200 reis. The official charges on a foreign vessel of 220 tons is about 210 milreis.

Pernambuco.—Pilotage compulsory: Varies, according to capacity of the vessel, from 11,000 to 34,000 reis, and 1,000 reis more for each additional 50 tons. Lighthouse dues, from 20,000 to 50,000 reis, according to tonnage of vessel. Fort pass, 6,000 reis. Hospital charges: Vessels of three masts, 6,000 reis; vessels of two masts, 4,000 reis; each person of crew, 640 reis. Stamp dues: On outward freight to Brazilian ports, on each 1,000 milreis, 2 milreis; from ports of Brazil, 4 milreis. Translation of manifest: First three pages, 5 milreis; each additional page, 3 milreis. Notarial signature, 5 milreis. Bill of health, 2 milreis. Wharfage: For each meter of vessel's length, 400 reis per diem while vessel is loading; when idle, 200 reis per diem. Mooring compulsory: Mooring boats, 8 milreis; pay of crew, 4 milreis.

Rio Grande do Sul.—The official charge of vessels of 245 tons, including pilotage, would be about 255,380 reis.

CHILE.

Crew list, \$2. Hospital, 10 cents per registered ton, payable but one time yearly; but if port is entered after December, 10 cents additional per ton.

COLOMBIA.

Tonnage, \$1; pilotage, \$5 to \$10; harbor dues, \$6; lighthouse, 5 cents per ton register for first 100 tons, and 2½ cents per ton additional.

Vessels that come from other ports of the Republic only pay one-half. Mail steamers do not pay port dues. In Panama wharfage ranges from 75 cents to \$3.75 per ton, according to tonnage of vessels.

COSTA RICA.

Foreign steamers are free of tonnage, and only pay \$25 for entering and clearing. Sail vessels pay 25 cents per ton register and \$10 for entry and clearance.

ECUADOR.

Wharfage, from \$8 to \$10 per day; pilotage, from \$2 to \$2.50 per Spanish foot. Tonnage, 50 cents per ton. Anchorage, \$10. Lighthouse, 37½ cents per ton. There is, in addition, captain of port, \$4; permit of entry, \$6; crew list, \$1; bill of health, \$8; harbor dues, \$4.

PORT CHARGES.

GUATEMALA.

Anchorage, \$2 ; tonnage, 25 cents per ton.

HAITI.

Tonnage, \$1 per ton, if there is a reciprocal treaty ; if not, \$1.50. Wharfage, 1 per cent. on total dues payable by vessels. Telegraph, \$2 to support the line. Pilotage varies. Health visit, \$5 ; bill of health, \$1. Entry, 6 cents per ton. Loading vessel, 50 cents per ton. Anchorage, \$25 if leaving port within twenty-four hours, and from \$200 to \$300 for privilege of going to a second port. Hire of coach, \$2 per day. Interpreter, \$4.

HONDURAS.

Manifest, \$2. Tonnage, 25 cents per ton.

MEXICO.

Sail vessels, \$1 per ton ; steamers, no charge ; vessels loaded with coal, no charge Lighthouse : Sail vessels, \$25 ; steamers, \$100 each entrance and \$100 each clearance ; vessels loaded with coal, \$25.

NICARAGUA.

Tonnage, 10 cents per ton ; lighterage, \$1 per ton ; pilotage, \$3 per foot draught.

PARAGUAY.

Manifest of discharge of vessels coming from foreign ports : Not exceeding 50 tons, \$5 ; from 51 to 100 tons, \$10 ; from 101 to 200 tons, \$20 ; entry and clearance for vessels of 200 tons, \$25 ; and for each additional 50 tons, \$5. Vessels navigating between ports of the Republic pay one-half of the preceding charges. Bill of health, \$2 ; legalization of documents, \$1. There are no port, pilot, anchorage, and lighthouse charges.

PERU.

Wharfage, 12 cents per ton entry, and 75 cents per ton on all cargo discharged or embarked. Tonnage, 25 cents per ton every six months. Lighthouse, 1 1/4 cents per ton each time vessel enters. Hospital, 4 cents per ton register every six months.

SALVADOR.

Entry, \$5 to \$15. Tonnage, 15 cents per ton.

UNITED STATES OF AMERICA.

Tonnage, 3 to 6 cents, not to exceed 15 cents in any one year. Entry fee: Vessels of 100 tons and upwards, \$2.50; vessels under 100 tons, \$1.50. Clearance: Vessels of 100 tons and upwards, \$2.50; vessels under 100 tons, \$1.50. Bill of health, 20 cents.

URUGUAY.

Tonnage, 10 cents per ton; vessels coming regularly, 4 cents per ton. Pilotage, conventional but compulsory, varies from \$50 to \$100; vessels from Buenos Ayres must carry pilot to Port Indio; the price varies according to draught, from \$6 to \$9. Anchorage: Tonnage from beyond seas, foreign vessels, 30 cents; national vessels, 20 cents. Pratique: Foreign vessels, \$8; national vessels, \$2. Lighthouse, 4 cents per ton on every vessel from or to places outside the capes. Hospital, \$2 for vessel, 40 cents for captain, 20 cents for each seaman, and \$1 for each passenger.

Paysandu.—Pilotage from Montevideo, \$60 to \$100. Light dues, 15½ cents per ton. Customhouse charge varies from \$24 to \$60; notarial, \$4.80; bill of health, \$4; stamps, \$4 to \$5. A foreign vessel will probably pay \$70 to \$80.

VENEZUELA.

Tonnage, 50 cents per ton, payable on entry and on clearance. Pilotage \$4 per draught foot entry and on clearance. Lighthouse, 6 cents per ton. Wharfage, \$4 to \$40. These charges vary according to port. There are other charges, such as measuring, interpreter, doctor's visit, bill of health, sea pass, etc.

Consular Fees and Regulations.

The following are the consular fees and regulations of the several American Republics:

ARGENTINE REPUBLIC.

The consular regulations of the Argentine Republic are of the simplest possible nature, with a view of facilitating the commercial relations with foreign countries. No consular invoice or other form of declaration is required, the shipper having merely to present each set of bills of lading for goods to be exported to the consul at port of exportation to receive his certificate.

Bills of lading must be presented to the consul at the port of shipment for certification. They must show:

- (1) Name of the captain and of the vessel, etc.
- (2) Name of the shipper.
- (3) Name of the consignee, if the bill of lading is not to order.
- (4) Full description of the contents of each package.
- (5) The quantity of goods in each package, *i. e.*, the net weight, and, in the case of textile manufactures, the number of yards. In shipments of a large number of packages of the same class of goods the total weight may be given in bulk, and one description may be made to apply to all.
- (6) Amount of freight, etc.

BOLIVIA.

Bolivia has at present no seaport in its possession. Imports from the west pass through Chile or Peru, and exports eastward pass through Brazil or Paraguay. The port preferred for importations is Mollendo, Peru, and both the Chilean and Peruvian consuls sign the manifests for this port under the regulations which govern the consulates of Chile.

BRAZIL.

A decree of the Provisional Government of Brazil, dated January 31, 1891, establishes the following fees and charges for its consulates abroad:

Legalization of the manifest or manifests of a vessel's cargo, counting the tonnage according to the regulations of the respective countries:

Up to 500 tons, five and four-tenths cents per ton.

Above 500 up to 3,000 tons, fifty-four one-hundredths cents per ton.

Certificate of vessel coming in ballast.....	\$6.48
Visé to bills of lading	.54
Legalization of consular invoices (when adopted).....	2.70
Bill of health of each in such ports as have no official to issue the same.....	5.40
Visé to bill of health	2.70
Visé to list of crew.....	1.62
Indorsing clearance of a vessel.....	1.62
Passport granted a person.....	8.24
Visé to passport	1.62
Inventory of a vessel.....	12.96
Official inspection of a vessel	12.96
Official inspection of merchandise on board.....	12.96
Official inspection of merchandise on shore	8.10
Drawing up a will	10.80
Approval of a will	5.40
Official record of opening of a will	5.40
Inventory of property on account of death.....	16.20
Power of attorney or transfer of same	5.40
Official record of purchase and sale, and formation of partnership	5.40
Protest or declaration	5.40
Interrogation of witnesses.....each..	5.40
Consular certificate to be used in any instance	2.16
Registration of any document in the books of the consulate, except a manifest, bill of health, crew list, and passports, per page or part of page...	1.08
Recognition of signature or legalization of any document not made in the consulate.....	1.62
Certificate.....per page or part of page....	1.08
Translation of any document.....do....	2.70
Attendance of the consul at acts which require his absence from the consulate, for each day or 3 miles distance, above the expenses of the journey, if any.....	5.40
Money received or deposited for account of private individuals, a commission of 2½ per cent.	
Attendance of consul, when required, at any sale, a commission of 2 per cent.	
Taking charge of articles belonging to the cargo and hull of a shipwrecked vessel, on the total value or sum, 2½ per cent.	
New crew list.....	5.40

Authorizing the opening of a new log book and putting the official mark on every page of same, five and four-tenths cents per page.	
Appointing experts	each... \$2.70
Changing the flag of a vessel from Brazilian to foreign, including the register and reception of vessel's papers in deposit, besides the imposts for transfer of property	16.20
Changing of flag, foreign to Brazilian, besides the impost for transfer of property	5.40
Changing of flag, Brazilian to foreign, including deposit of vessel's papers, on the annual rental, 1 per cent.	
Changing of flag, foreign to Brazilian, on the annual rental, 1 per cent.	
Appointment, or approval of appointment, of a captain, and his registration	2.70
Writing and registration of any contract:	
Up to \$2,700, 1 per cent.	
Above that sum, $\frac{1}{2}$ per cent.	
Visé to certificate of nationality	1.08
Life certificate	2.70
Decision in arbitration, involving the determination of values:	
Up to \$270	1.08
Up to \$540	2.16
Up to \$1,620	4.32
Up to \$2,700	6.48
Up to \$5,400	10.80
From \$5,400 upwards, for each \$540	1.08
When the determination of values is not involved, or the decision is made in reference to things without value.	5.40
Dispatch (clearance) of merchandise by land routes (yet to be determined).	
Visé to log book	1.08
Changes in list of crew, for each man	.54
Charter party	5.40
Public sale of damaged merchandise or others belonging to vessel's cargo:	
Up to \$540, $1\frac{1}{2}$ per cent.	
Above that sum, 1 per cent.	
Any official document or instrument not named in this table:	
Not exceeding 100 words	2.70
Each 100 additional words	1.08
Contract of dissolution of partnership	10.80
Copy of any document written in a foreign language:	
For the first page	1.08
Each additional page	.54
Money expended for account of private individuals, 5 per cent.	
Legalization of copy or examination of translation made outside of the office, per page, first	1.08
Each subsequent page	.54

CHILE.

The consuls are authorized to collect for the various services the following fees:

For registering births, marriages, or deaths.....	\$1.00
For other registration concerning the civil status of a person	1.00
For judicial consular services	1.00
For attending, out of his office, to take an acknowledgment, etc., if the transaction does not take more than 3 hours	3.00
For each additional hour.....	1.00
For writing out wills, etc	4.00
For issuing clearance papers to a ship, or a bill of health	2.00
For viséing ship's papers	.50
For receiving and returning the deposit of the papers of every Chilean ship which measures more than 150 tons	2.00
If the vessel measures less than 150 tons.....	1.00
For certificate of inspection of a vessel	2.00
For intervening in the fixing of the wages of members of the crew, and for authorizing same.....	1.00
For rendering an opinion upon questions as to passage money	1.00
For a provisional license for a vessel to take the Chilean flag and sail for some port of the Republic, to be registered there	20.00
For the sale of a vessel of more than 150 tons.....	20.00
For a maritime protest.....	2.00
If the declarations of members of the crew or passengers on the vessel are to be taken, for each declaration	.50
Should the writing exceed one sheet, for each additional sheet....	1.00
For each annotation of additions to or withdrawals from the crew list, or mention on the roll of passengers, etc	.50
For a consular certificate in bottomry proceedings, etc	5.00
For procuring a loan on bottomry, $\frac{1}{2}$ per cent. upon the amount of the loan.

For assisting in case of shipwreck or other accident to a national vessel, the traveling expenses and \$5 a day for (general) expenses.	
For issuing passports	1.00
For certificates of continued life	2.00
For certificates of registration, of nationality, of destination, of disembarkation, or any other, and for viséing a passport.....	.50
For authenticating documents.....	1.00
For depositing or withdrawing documents in or from the archives of the consulate.....	.50
For authenticated copies of documents executed before him, or of any other document there is desired a copy authenticated by the consul, for each half-sheet	.50
For certifying manifests	2.00

COLOMBIA.

Every captain or master of vessel or steamer bound for Colombian ports must present to the respective consul at the port of shipment, to be certified by him, a manifest, signed by the captain or master, in triplicate form, which shall contain the following details:

- (1) The port of clearance, the port of destination.
- (2) The class, nationality, name, and tonnage of the vessel.
- (3) The name of the agent, the name of the shippers, and of the consignees.
- (4) The marks and numbers of each package, and the gross weight of each shipment.
- (5) The number of packages of every shipment.

Merchants shipping goods to the ports of Colombia must present to the respective consul an invoice in Spanish, in triplicate form, stating therein:

- (1) The name of the shipper, the port of shipment, the name of the consignee, the port of destination, and the name of the vessel or steamer.
- (2) The mark, number, kind, description of contents, and gross weight of each package. In regard to packages of the same kind and contents, it is sufficient to give only their total weight.
- (3) The total value of the invoice, it not being necessary to specify the value of each package.

It is not necessary to number such articles as bricks, tiles, lumber, undressed stone, wood for building purposes, grindstones, lime in barrels or sacks, sea salt, lead in sheets or bars, pig and sheet iron, rods, hoops, chains, anchors, iron stamps for mines, empty demijohns, large iron and copper boilers, and live stock.

In order to describe the contents of the packages, it is sufficient merely to specify the name, quality, quantity, and materials composing the merchandise, but when an article is classified in the tariff according to its quality, or any other circumstance which distinguishes it from any other mentioned under a different class, such quality or circumstance should be expressed in the respective invoice. The *exact* gross weight of the packages must be stated.

If a manifest or invoice not containing the above requirements is presented to the consul, he must return it, without certification, to the interested party, stating the details which are wanting; but if the interested party insists upon having the consular certification, the consul will extend it, expressing therein the circumstances under which he has done so.

The consular fees are the following:

For certifying manifests for each port of destination	\$20.00
For certifying invoices of 4 packages and under	4.00
For certifying invoices of 8 packages and over	8.00

Manifests for the free ports of Panama, Colon, and Bocas del Toro are not subject to any consular fee.

COSTA RICA.

Shippers of merchandise destined for the Republic of Costa Rica are notified that invoices for each shipment of goods destined for that country must contain the following particulars: The name of the vessel; the port of destination; the names of consignees; the date; the signature of the shipper; the mark and number of each package; the quantity, both in figures and in writing, of bales, cases, barrels, bundles, or any other class of package in which the merchandise may be contained; the name and kind of merchandise; the gross weight of each package, except machinery, iron, lumber, etc., the total gross weight of which can be specified in kilogrammes. When a package contains more than one kind of merchandise, each kind must be made into a separate bundle, with its gross weight stated separately. Invoices must be made out in triplicate, two of which will be retained by the consul, and one copy will be returned to the shipper, with a receipt for the other two copies; the copy returned and the consul's receipt are to be sent by the shipper to the consignee at the port of destination; the invoices should be made out in the Spanish language. No invoices will be admitted with erasures, alterations, or interlines.

All invoices for Costa Rica presented for certification must contain, besides the marks, numbers, contents of packages, gross weight, and value of each package, in pounds or kilogrammes, as heretofore, also the amount of charges to the port of destination, such as freight, insurance, commission, etc. These charges can be added either in separate items or in a lump sum under the head of "charges to the port of destination."

There will be required from the captain of every vessel or steamer touching at any of the ports of Costa Rica a general manifest of the cargo destined for the port, made out in the Spanish language, and to contain the name, class, and nationality of the vessel; the registered tonnage of the vessel, in figures and in writing; the name of the captain, the port of departure, the port of destination, and the name of the consignee; the marks and numbers of the bales, cases, barrels, bundles, or other class of packages on board; the quantity of each, both in figures and in writing; the names of the shippers of the goods and of the consignee; the date and signature of the captain.

The Government of Costa Rica has decreed that the same fines and penalties as imposed on the captains and owners of vessels who do not present their papers and manifests in accordance with the requirements of the law of 14th

of July, 1884, will be imposed upon the owners or consignees of goods imported into the Republic in every case where the consular invoices do not express the gross weight of each package separately, or in which may be omitted any of the other requirements of said law, as to marks, numbers, specified contents, and value of the packages.

As the fines and penalties alluded to vary from \$50 to \$500 for each infraction of the law, attention is called to the importance of making out the consular invoices of all shipments destined for Costa Rica in strict accordance with the requirements of the law as specified.

CUBA AND PUERTO RICO.

Captains of all vessels, whether in ballast or with cargo, coming from a foreign port, be the cargo in transit, to be entered in bond, for transshipment, or for immediate consumption, are obliged, on arrival at any Spanish port, to present a manifest declaratory of all cargo, including parcels and small wares, signed by said captain, with *visé* of the Spanish consul at the port of departure, or, should there be no Spanish consul, by the local authorities of the port.

Vessels proceeding from Spanish ports shall exhibit the register and manifest viséed by the customs authorities of the place of departure.

The manifest shall be considered as the basis for all future consultations or operations, and must necessarily express—

(1) The rig and name of the vessel, her tonnage, flag, where owned, number of crew, name of captain and consignee of the vessel, and the port or ports whence she comes.

(2) Port or ports for which the cargo is destined.

(3) The quantity, class, or kind, marks and numbers, and gross weight of all packages on board, inclusive of the small wares or parcels belonging to the crew, class and kind of merchandise, name of shipper and consignee, or, if to order, each separately, and their port of destination. The numbers and weights to be expressed in figures and in writing. The terms merchandise, provisions, groceries, goods, articles, or any other equally vague description will not be tolerated.

(4) Cargoes in bulk must be declared on the manifest either by number, weight, or measure, as they may be classed according to the tariff of duties; it not being necessary to state the weight unless the article pays in accordance.

(5) Cargoes of lumber in bulk are to be declared by the number of boards or pieces which constitutes the same.

(6) Packages containing dry goods shall be declared separately, without including them with other goods, though all be shipped or destined for the same

person. If a package contains, besides other merchandise, either of those mentioned in the previous paragraphs, the kind, quantity, and weight of such must be stated.

(7) The manifest of a cargo carried by a foreign vessel may be expressed in the language of the nation to which the vessel belongs.

(8) When the ship touches at several foreign ports the captain is at liberty to draw up and have his entire manifest viséed at the last one he arrives at and from which he proceeds direct to a Spanish port, or bring as many manifests as ports for which the ship carries cargo. In the latter case the consul shall put a note on the manifest embracing the others, in order to insure the presentation of them all.

(9) The consuls shall be careful not to *visé* any manifest that does not comply with the regulations, and shall make valid, by note and seal, as many alterations, corrections, or erasures as the manifest contains, rendering useless all blank lines and sealing all the pages.

(10) Any addition, alteration, or writing between the lines shall be of no effect unless authorized and made valid by the consul.

(11) Should the owners, shippers, or consignees become aware of any discrepancy or error on the manifest, certified to by the consul, and of which the captain is the bearer, they should immediately inform the collector of customs of the port to which the vessel is bound, and it is his duty to report the matter and forward the document in question to the director-general.

(12) The director-general is at liberty to admit or not the rectification asked for, provided the vessel has not touched at any Spanish port prior to the receipt of the correction by the collector of customs to whom it may have been forwarded.

(13) If a vessel puts into a Spanish port in distress, she will not be required to present a certified manifest, but shall be obliged to make and deliver a manifest within the time prescribed by the collector.

Immediately on arrival, and on delivering his manifest, the captain must give a note specifying:

(1) The pigs of iron he may have on board for ballast.

(2) The provisions and stores on board, say, oil, fish, rum, spare anchors and chains, rice, sugar, candles, coffee, hemp, mineral and vegetable coal, fresh and salted meats, beer, cordage, chocolate, hard bread, grains, meals, eggs, dry vegetables, preserved food in tins, firewood, dressed timber for masts and spars, lard, butter, bread, potatoes, paste for soup, salted fish, salt, tallow, cider, tobacco, tea, canvas, vinegar, wine, and arms and ammunition for the vessel.

Likewise, a list of the total number of passengers on board, the amount of their baggage, and their destination.

Captains must mention, at the time of the customs visit, whether they have lost any part of their cargo on account of bad weather.

Twenty-four hours after arrival, whether a working day or a holiday, the captain must deliver to the custom-house authorities two copies of his general manifest, written in the Spanish language.

Should the vessel carry merchandise for more than one Spanish port, the captain shall present at the first, in addition to the copies already mentioned, one copy of the partial cargo destined for the said port.

One of the copies of the general manifest, authorized by the custom-house and stating thereon whether the original has been viséed or not, shall be carried by the captain and presented at each of the ports in turn for comparison with the partial manifests, and will serve as the basis in all operations, being viséed by each custom-house in transit and filed at the last port of destination.

Having presented at the first port the general manifest and corresponding copies, the captain will be obliged to present at each port, in turn, three copies of the partial cargo destined for each.

Vessels shall discharge immediately on their arrival after obtaining landing permits, embracing all the cargo declared in the manifests for each port, in the same order and form as expressed in the latter.

The discharge shall be effected within the period that the collector of customs may specify, and shall not exceed twelve working days; only in special cases and for good reasons shall the collector grant an extension of time on the solicitation of the consignee.

If the time allowed or the extension granted pass before the discharge has been effected, the collector shall order that it be made officially and at the expense of the captain.

This regulation is obligatory also with cargoes bound for one port, whose dispatch may be solicited in another, when they come consigned to order, or are to be forwarded to a foreign port, being obliged in a contrary case to leave port immediately.

Operations for discharging shall only take place between sunrise and sunset; discharging at night shall not be allowed, except in the case explained in the following article.

The interior circulation of merchandise, that is, the transportation of goods from one point to another on the island, is free.

The only authorized bonded warehouse on the Island of Cuba is that at Havana.

Foreign and domestic merchandise that has not paid a duty of importation may be admitted in the bonded warehouse.

The following shall not be admitted: Products of the island, foreign and Spanish goods that have paid a duty of importation, merchandise that is free of duty, goods liable to spontaneous combustion, malodorous merchandise that might damage other goods, voluminous effects, and inflammable materials.

CUSTOM-HOUSES IN THE ISLAND OF CUBA FOR GENERAL IMPORTATION, EXPORTATION, TRANSIT, AND COASTING TRADE.

Havana (the only one at which tobacco from Puerto Rico can be imported); Matanzas; Sagua la Grande; Cienfuegos; Nuevitas; Santiago de Cuba; Cardenas; Trinidad.

THOSE ESTABLISHED FOR GENERAL EXPORTATION AND IMPORTATION, EXCEPTING DRY GOODS, HOUSEHOLD HARDWARE, OPIUM, AND COMMON JEWELRY.

Caibarien; Gibara; Baracoa; Zaza; Manzanillo; Guantanamo; Santa Cruz.

CUSTOM-HOUSES ESTABLISHED IN THE ISLAND OF PUERTO RICO.

First grade: San Juan; Mayaguez; Ponce; Humacao; Aguadilla; Arroyo; Arecibo; Vieques.

Second grade: Fajardo; Naguabo; Cabo-rojo; Salinas; Guayanilla; Guanica.

ECUADOR.

By a decree of date September 16, 1890, the consular officers of Ecuador within the United States were authorized to charge for certifying invoices in proportion to the values invoiced, as follows:

For invoices amounting to \$200 or less.....	\$2.00
For those exceeding \$200 but not exceeding \$400.....	4.00
For those exceeding \$400 but not exceeding \$1,000.....	6.00

A charge of \$10 is made for certifying a manifest for any Ecuadorian port. The invoices must specify the marks, numbers, and kinds of the packages; their contents, value, and weight in kilogrammes; the name of the ship, of the captain, and of the shippers and consignees; and lastly, the ports of departure and destination.

Manifests must be presented for certification in triplicate, and must show the following:

The kind of vessel, whether a steamer, brig, schooner, or bark; its flag or

nationality, number, and tonnage; the port of departure and that of destination; the names of the shippers and consignees, and the marks and numbers of the packages.

GUATEMALA.

All that is required by the consular regulations in regard to merchandise shipped from the United States to any port of Guatemala is for shippers to take the invoices to the Guatemala consulate for certification. These invoices must specify the number of parcels, their mark, their contents, the weight, both rough and net, and the price of the articles, whether by the pound, or the dozen, the yard, etc., as the case may be; and they shall be accompanied by the corresponding bill of lading, which shall also be signed and sealed by the consul.

Vessels sailing for any port or ports of Guatemala must present their manifests to the consul, so as to have them signed and sealed by him; and if the first port of their destination is a Guatemalan port, then the bill of health must be presented to the consul, together with the manifests.

The consular fees are \$2 for each invoice and \$5 for each manifest.

HAITI.

The captains of vessels proceeding to Haiti must present to the consulate at the port from which they sail four copies of the ship's manifest, declaring the same to contain a true and faithful account of all the cargo on board their vessels.

All vessels must be furnished with a bill of health.

Shippers to Haiti must present to the consulate their original invoice and four copies of the consular invoice, the original and one consular invoice being certified and forwarded by the shippers to the consignee, whose name must in all cases be given. The consulate forwards one copy to the administrator of finance at the port of destination and another to the minister of finances at Port au Prince, with copy of ship's manifest.

Documents relating to goods shipped for Haiti have to be signed at the consulate at the port of departure of the vessel. At ports where no Haitian consulate exists documents can be signed by a notary public.

On arrival in Haitian ports, captains have to enter their vessels at the custom-house, presenting manifest of cargo and consular documents, addressed to the administrator of finance at the port.

Passengers to Haiti have to be provided with regular passports, issued or viséd by the consulate at the port of their embarkation for Haiti.

HAWAIIAN ISLANDS.

There shall be attached to all invoices of goods imported into this country from any port within the consular jurisdiction of any of Her Majesty's consuls or commercial agents, an oath and a certificate in the following form:

CERTIFICATE TO INVOICE.

I, ———, of ———, do solemnly and truly swear that the invoice now produced and hereunto annexed, amounting to ———, contains a true and full account of the goods, wares, and merchandise therein described, at their market value at ——— at the time the same were procured, and of all charges thereon, and that the said invoice contains no discounts, bounties, or drawbacks but such as have been actually allowed.

(Signed) ———.

I, ———, Her Hawaiian Majesty's consul for ———, do hereby certify that on the ——— day of ———, of the year ———, personally appeared before me ———, who subscribed and made oath to the above; and I further certify that I am satisfied that ——— is the person he represents himself to be, and that he is a credible person, and that the statements made by him under said oath are true.

(Signed)

—————,
Her Hawaiian Majesty's Consul.

In addition to the above form of certificate there is required a "certificate of origin of goods," in the following form, with oath, to be attached to all invoices of merchandise free by treaty with the United States of America:

CERTIFICATE OF ORIGIN OF GOODS.

I, ———, of ———, do solemnly and truly swear that the invoice now produced and hereunto annexed, amounting to ———, contains a true and faithful account of the goods, wares, and merchandise therein described; and that the said goods, wares, and merchandise are the growth, produce, and manufacture of the United States of America.

(Signed) ———.

I, ———, Her Hawaiian Majesty's consul for ———, do hereby certify that on the ——— day of ———, of the year ———, personally appeared before me ———, who subscribed and made oath to the above; and I further certify that I am satisfied that he is the person he represents himself to be; that he is a credible person, and that the statements made by him are true.

(Signed)

—————,
Her Hawaiian Majesty's Consul.

And it shall be lawful for such consul or commercial agent to charge and receive from the person requiring a "certificate to invoice," as his own proper fee or reward, the sum of \$1 on all invoices under \$500, and \$2 on all invoices of \$500 and upwards; and for the "certificate of origin of goods," the sum of \$2.

It shall be lawful for any collector of customs in this kingdom, on the presentation of any invoice purporting to be shipped at any port where one of Her Majesty's consuls is resident, when such invoice be not attached to the oath and certificate, or certificates, as set forth above, to cause to be added to the invoice 25 per cent., and the duties shall be collected on the said increased valuation.

The collector of customs shall be authorized to grant a further time of six months to parties not having a consular certified invoice, upon their filing a bond, with good security, to produce the same within that time, the charge of which bond shall be \$2.

Every consul or vice-consul of the Hawaiian Islands in any foreign country may take and certify under his official seal all acknowledgments of any deed, mortgage, lease, release, or other instrument affecting the conveyance of real or personal estate in this kingdom, and such acknowledgment shall entitle such instrument to be recorded. Such consuls and vice-consuls shall have power to take acknowledgments of powers of attorney, to administer oaths, and to take depositions and affidavits to be used in this kingdom.

FEES.

The consul is to charge the following fees and no more, viz:

Shipping sailors, for each	\$1.00
Discharging sailors, for each	1.00
Signature of ship's manifest, when required	2.00
Signature of muster-roll, when required	2.00
Ship's bill of health	2 50
Certificate of invoice of goods to be landed in Hawaiian ports, \$1 on all invoices under \$500, and \$2 on all invoices of \$500 and upwards.	
Certificate of the landing of goods exported from Hawaiian ports	3.00
Certificate of origin of goods shipped for Hawaiian ports, or of ship	2.00
Attestation of a signature, when required	1.00
Administering an oath, when required	.50
Seal of office and signature to any document, when required	1.00
Noting a protest	1.00
Bottomry or arbitration bond	2.00
Order of survey	2.00
Extending a protest or survey	1.00

Registrations in book of consular record	1.00
Every passport to parties bound for Hawaiian ports	2.00
<i>Visé</i> of every passport	1.00
Valuation of ships, goods, etc., 1 per cent.	
Sale of ships, goods, etc., when employed to do so, $2\frac{1}{2}$ per cent.	
Attending such sales, in cases where there has been no charge for valuation, 1 per cent.	
Attendance at place of shipwreck, or where the wrecked ship and property may be, over and above traveling expenses, 5 per cent.	
Attendance on opening a will	5.00
Extending a will, where the value exceeds \$100	2.00
Attesting a will, where the value exceeds \$100	1.00
Administering to estates of Hawaiian subjects, when required or when dying intestate, $2\frac{1}{2}$ per cent.	
On amount of disbursements on account of the Hawaiian Government, when not in funds, besides interest thereon at the rate current in the place of the consul's residence, $2\frac{1}{2}$ per cent.	
On receiving and paying away money by order of the Hawaiian Government, $2\frac{1}{2}$ per cent.	

HONDURAS.

Articles of merchandise shipped from the United States to Honduras do not require consular invoices, but the manifests of the vessels must be presented to the consul for certification.

Fees are \$5 per manifest.

MEXICO.

Consular invoices are to be made out in quadruplicate, and signed by the Mexican consul-general, consul, vice-consul, or consular agent at the port of shipment, and should be presented to him before the departure of the vessel; otherwise they will be refused.

To make out a consular invoice properly, great care must be taken to have the marks, numbers, number of packages in figures and in writing, gross, net, and legal weights in figures and in writing, class of goods contained in each package, place of manufacture, and value of the goods correctly stated. At the end of the invoice the shipper must declare that he "proceeds with legality and in good faith," after which the date and signature of the shipper is to follow.

In declaring the class of goods the tariff *must* be consulted, as each kind of goods pays a different rate of duty. One copy of the consular invoice, duly certified, must be sent with the bill of lading to the consignee of the goods at the port of destination.

The charges for consular services are:

For certifying ship's manifest	\$10.00
For certifying manifest if ship is in ballast	4.00
For certifying each set of invoices	4.00
For certificates to captains or shippers	2.00
For duplicate certificates	1.00

NICARAGUA.

No consular certification of invoices is required by Nicaragua. Invoices are made out in triplicate, and valuation and customs duties are regulated in the custom-house of the port of debarkation. Duties are levied according to weight.

URUGUAY.

(1) In the shipment of goods for Uruguay no invoices are required. One bill of lading of each set must be left, accompanied by the fee of \$1.00, with the agent of the vessel, whose duty it is to present at the consulate the bill of lading and to pay the fee for each on clearing the vessel.

(2) The bills of lading must contain marks, number of packages, and contents of same.

(3) All goods leaving a port for Uruguay, directly or otherwise, must be accompanied by certified bill of lading.

(4) The consular fees for clearing a vessel are as follows:

Papers.....	\$8.00
Tonnage (500 tons and upward).....	15.00

For each 50 tons less, \$1.50 is deducted.

From 250 tons down there is no further reduction.

(5) The charge made on the certification of any signature is \$2.00.

(6) A passport, whenever desired, is extended at a charge of \$1.00.

(7) The consulate is open from 10 a. m. to 4 p. m.

VENEZUELA.

CONSULAR FEES.

For the certification of the manifest of a vessel of—

Less than 20 tons	\$0.50
From 20 to 200 tons	2.00
From 200 to 400 tons	4.00
From 400 tons upwards	6.00

Any invoice with bill of lading representing a value of—

Less than \$1,600	4.00
From \$1,600 to \$3,200	5.00
From \$3,200 to \$4,800	6.00
From \$4,800 upwards	8.00

RULES TO BE OBSERVED BY SHIPPERS.

Shippers of merchandise in foreign countries, except the Antilles, consigned to Venezuela, must deliver to the Venezuelan consul, or the person in charge of the consulate, the invoice in Spanish, triplicated and signed, in which the following shall be set forth:

The names of the consignor, consignee, the place where the merchandise has been shipped, the port of destination, the class, nationality, and name of vessel, and also the name of the captain of same.

The marks, number, and kind of each package, its contents, gross weight expressed in kilogrammes, and value of package. The contents of the package must be specified, giving the name of each article, the material of which it is made, and the quality or anything else by which it is distinguished from another article of the same name that may appear in the tariff under a different classification.

ARTICLE 27. Added to these various requisites there are others to be observed, thus: The consul will not certify any invoice when the shipper fails to deliver three copies of same.

When the three copies are not exactly alike.

When on said copies there are any erasures, interlineations, or corrections, without having made the corresponding explanation on a foot note to be written before the date.

When the person signing the invoice should fail to swear before the consul that the value declared in the invoice is the one that the merchandise really has.

Travelers' Guide.

(See also steamship lines, page 426, for additional information.)

TO THE ARGENTINE REPUBLIC.

Minimum amount for which bill of lading will be signed..	5.00	5.00	9.00
Parcel receipts (see third paragraph below) (no primage)..	3.00	3.00	6.00

Ten per cent. primage will be added to all these rates, excepting on flour shipped at New York and on live stock.

Locomotives, machinery, and other heavy or bulky goods will be taken at special rates. No goods (except valuables) received on sailing day. Freight and primage must be prepaid upon signing of bills of lading.

Goods taken by weight, measurement, or valuation, at the option of the steamship company, subject to all the conditions in its bill of lading. When two or more classes of merchandise are contained in one package, freight will be charged at the rate applicable to the highest class. Shippers must pay the cost of elevating grain.

Parcel receipts given for single packages not exceeding 5 cubic feet measurement, 100 pounds weight, or \$10 valuation.

At all ports consignees must pay all extra expenses incurred in landing articles weighing over 2 tons, and upon all goods "in transit" for ports to which this company does not issue bills of lading.

On live stock for ports to which the steamers of this company do not run, shippers must pay transfer charges, expenses while awaiting reshipment, and quarantine expenses, if any incurred, either at port of transfer or at final destination. In all cases, stalls, pens, or other fittings of sizes designated by the steamship company, must be furnished by shippers.

RULES AND CONDITIONS OF SHIPMENT.

All freight must be prepaid and is payable in the United States gold. No bill of lading signed for less than \$5 (to Panama \$4). Goods taken as above by weight or measurement at carrier's option. Freight charged on gross weight or measurement. Special rates for car load lots (20,000 pounds or 500 cubic feet) of any one article to one consignment.

Horses, cattle, mules, and live stock, as also all packages of unusual bulk, will be taken only by special contract.

Owner's risk.—Oils and all other liquids are taken only at owner's risk of leakage. Glass and queens ware, china and crockery, earthenware, looking glasses, window glass, and all other fragile property concealed in packages, only at owner's risk of breakage. All perishable property only at owner's risk of frost, heat, and decay, and all goods in improper or insufficient packages only at owner's risk of chafing, wet, and waste. All baled goods will be carried only at owner's risk of chafing.

Dynamite, blue powder, or high explosives of any kind, not taken.

Refined petroleum taken only when put up in tin cans, boxed and strapped, and marked as required by United States law.

Shippers are required to send receipts in duplicate, giving contents, one of which will be signed, the other retained, and must accompany the bills of lading when presented for signature.

Bills of lading signed only upon company's forms furnished at the office. No other forms recognized. Bills of lading will not be signed until duly stamped by Colombian consul at New York.

Shippers of goods must comply with all consular regulations for manifests, invoices, certificates, etc., and any fine imposed by authorities at port of destination, or damage resulting from failure in this respect, or for errors or omissions therein, shall be at risk and expense of the consignees of the goods, and shall be paid by them. Freight received at pier foot of Canal street, North River, until 5 p. m. day previous to steamer's sailing, unless steamer sooner full. The company reserves the right to alter this tariff at their option without further notice.

Rates of freight from ports of west coast of South America to New York.

AMERICAN COUNTRIES IN THE POSTAL UNION.

Argentine Republic, including eastern parts of Patagonia and Terra del Fuego, and Staten Island; Bahamas; Barbadoes, W. I.; Bermudas; Bolivia; Brazil; British Colonies in West Indies, viz, Antigua, Dominica, Montserrat, Nevis, St. Christopher, the Virgin Isles, Grenada, St. Lucia, Tobago, and Turk's Island; British Guiana; British Honduras; Canada; Chile, including western parts of Patagonia and Terra del Fuego; United States of Colombia; Costa Rica; Danish Colonies of St. Thomas, St. Croix, and St. John; Republic of Dominica (Santo Domingo); Ecuador; Falkland Islands; French Colonies in America, viz, French Guiana, Guadeloupe and dependencies, Martinique, St. Bartholomew, St. Pierre, and Miquelon; Greenland; Guatemala; Haiti; Hawaii; Republic of Honduras, including Bay Islands; Jamaica; Mauritius and dependencies (the Amirante Islands, the Seychelles, and Rodrigues); Mexico; Netherlands Colonies in America, viz, Dutch Guiana (Surinam), Curaçao, Aruba, Bonaire, part of St. Martin, St. Eustatius, and Saba; Newfoundland; Nicaragua; Paraguay; Peru; Salvador; Spanish Colonies in America, viz, Cuba and Puerto Rico; St. Vincent, W. I.; Trinidad, W. I.; United States of America; Uruguay; Venezuela.

NOTES.

Mexico.—All articles of every kind or nature which are admitted to the domestic mails of either country will be admitted under the same conditions to the mails exchanged between the two countries, except that articles of miscellaneous merchandise (fourth-class matter), not sent as bona fide trade samples, are required to be sent by "parcels post," and that commercial papers and bona fide trade samples are transmissible in the regular mails at the postage rate applicable to those articles in Postal Union mails, and except also the following articles, the transmission of which is absolutely prohibited under any circumstances, viz, sealed packages, which from their form and general appearance evidently are not letters; publications which violate the copyright laws of the country of destination; packets, except single volumes of printed books, which exceed 4 pounds 6 ounces in weight; liquids, poisons, explosive or inflammable substances, fatty substances, or those which easily liquefy; live or dead (not dried) animals, insects (except queen bees) and reptiles; confections, pastes, fruit, and vegetables which quickly decompose, and substances which exhale a bad odor; lottery tickets or circulars; all obscene or immoral articles; and other articles which may destroy or damage the mails or injure persons handling them. Articles other than letters, in their usual and ordinary form, on their arrival at the exchange post-office of the country of destination will be inspected by customs officers of that country, who will levy the proper customs duties upon any article found to be dutiable under the laws of that country. Dutiable articles received in the United States under this arrangement will be treated in accordance with the regulation. Official correspondence, which is entitled to pass in the domestic mails of either country free of postage, is likewise entitled to transmission free of postage between the United States and Mexico. Any article of mail matter may be registered upon the payment of the domestic registration fee in addition to the ordinary postage thereon; and a "return receipt" will be furnished free of additional charge for any registered article which has indorsed on the cover the words "return receipt demanded," and only for articles so indorsed. The return receipt will be attached to the article by the exchange post-office which dispatches it. When "return receipts" accompany registered articles which are delivered the receipts are required to be returned to the office of origin bearing the addressee's signature. All registered articles, ordinary letters, postal cards, and other articles manifestly of value to the senders, which are found to be undeliverable, are required to be returned to origin through the dead-letter office of the country of destination; except that fully prepaid "request" letters, and fully prepaid letters which bear on the cover the sender's full address (but no request for return) may be returned direct to the dispatching exchange office, instead of being sent to the dead letter office; the former at the expiration of the time named in the "request," and the latter at the expiration of 30 days after receipt. The sender of any article may cause its return, or its address to be changed, provided application therefor be made through the Post-Office Department of the country in which the article was mailed.

POSTAL GUIDE.

RATES OF POSTAGE.

Rates of postage chargeable in the United States on mail matter for foreign countries.

[Unless otherwise stated, the absence of rates under headings of this table indicates that the correspondence designated by said headings is not transmissible. The condition of optional prepayment in the second column of this table applies only to ordinary letters; other articles must be prepaid.]

* Correspondence addressed for delivery in Canada, is subject to the same postage rates and conditions as if it were addressed for delivery within the United States, except that certain articles are absolutely excluded from the mails, without regard to the amount of postage prepaid or the manner in which they are wrapped, viz:

At least one single rate of postage (2 cents) must be prepaid on ordinary letters. Other printed matter for Canada is liable to domestic rates of postage.

† Matter mailed in the United States addressed to Mexico is subject to the same postage rates and conditions as if it were addressed for delivery within the United States, except that articles of miscellaneous merchandise (fourth-class matter), not sent as bona fide trade samples, are required to be sent by "Parcel Post," and that certain articles are absolutely excluded from the mails, without regard to the amount of postage prepaid or the manner in which they are wrapped, viz:

At least one rate of postage (2 cents) must be prepaid on ordinary letters.

REGULATIONS RESPECTING FOREIGN MAILS.

The limit of weight for a single rate of postage on letters for Mexico is 1 ounce. On letters for other Republics of Central and South America the limit of weight for a single rate remains at a half-ounce. Letters conveyed in vessels not regularly employed in carrying mail (commonly called "ship letters") are subject to double rates of domestic postage (now 4 cents per ounce) on delivery.

Postage can be prepaid upon articles only by means of postage stamps of the country in which the articles are mailed.

Matter to be sent in the mails at less than letter rates of postage must be so wrapped that it can be easily examined at the office of delivery, as well as at the mailing office, without destroying the wrapper. Newspapers and periodicals sent in the mails by publishers to regular subscribers in Mexico are transmissible as in domestic mails, except that packages must not exceed 4 pounds 6 ounces in weight.

Mexico is the only country to which periodicals from publishers for regular subscribers (second-class matter in domestic mails) may be sent at the bulk or pound rate of postage. Periodicals for all other foreign countries, whether "transient" or for regular subscribers, are required to be prepaid with the postage stamps at the rate applicable to "newspapers" or "other printed matter" for those countries. United States postmasters are required to notify publishers in Mexico (but not in other Republics) when subscribers fail to take newspapers or periodicals from the post-office. All packages of printed matter received from foreign countries which, from any cause, prove to be undeliverable, must be sent to the Dead Letter Office.

Postal cards are exchangeable between all the Republics of this hemisphere. The United States 2-cent postal card should be used for card correspondence with Republics of Central and South America (1-cent card being transmissible to Mexico); but where these cards can not be obtained, it is allowable to use for this purpose the United States 1-cent postal card with a 1-cent United States adhesive postage stamp attached thereto.

If the owner of any copyright granted by the United States, or his authorized representative, should file an authenticated list of publications thus protected by law with any exchange office, requesting the postmaster to prevent the forwarding of any of them in the mail, the postmaster must examine imported publications to see if any of such protected list is included, and if such be the case, should advise the person so interested, and hold the copy or copies for a reasonable time to permit proceedings for confiscation.

Packets of patterns or samples of merchandise for dispatch in the mails to foreign countries are restricted to bona fide trade samples or specimens having no salable or commercial value in excess of that actually necessary for their use as samples or specimens. Goods sent for sale, in execution of an order, or as gifts, however small the quantity may be, are not admissible at sample rates and conditions. Pairs of articles, such as gloves, shoes, socks, etc., are not transmissible by mail to foreign countries at the postage rate and conditions applicable to "samples of merchandise," but one article of a pair may be so transmitted.

Articles not specifically enumerated in postal conventions or in the United States postal laws and regulations as transmissible in the mails to foreign countries, or

which are not homogeneous with those therein enumerated, are not entitled to be sent at the reduced rates of postage fixed for correspondence other than letters, but may be transmitted at letter rates of postage, fully prepaid, provided they are not absolutely excluded from the mails by the provisions of postal conventions, or by the laws and regulations. Articles of merchandise of all kinds are transmissible in unsealed packages by parcel post to Jamaica, Barbadoes, the Bahamas, British Honduras, Mexico, the Hawaiian Kingdom, the Leeward Islands, the Republics of Colombia and Salvador.

Articles other than letters and postal cards, addressed for delivery in any foreign country embraced in the Universal Postal Union, which contain writing in the nature of personal correspondence, or which do not conform to all the conditions prescribed for such articles to entitle them to transmission in Postal Union mails at reduced rates of postage, are not allowed to be dispatched from the United States unless they are fully prepaid at the letter rate of postage, viz, 5 cents per one-half ounce or fraction of one-half ounce.

Electrotypes and cuts for advertising purpose are not transmissible by mail to any foreign country except Mexico, and by parcels post to Jamaica, Barbadoes, the Bahamas, British Honduras, Mexico, the Hawaiian Kingdom, the Leeward Islands, the Republics of Colombia and Salvador, unless fully prepaid at the rate of postage applicable to letters for that country.

All correspondence with foreign governments or administrations relating to alleged losses of mail matter, of either domestic or foreign origin, is conducted through the office of the Chief Post-Office Inspector.

No sealed package can be broken open nor refused upon the suspicion that it contains unmailable matter.

The letter "T" stamped upon the wrapper of an article received in the mails from a foreign country indicates that it was considered in that country as not fully prepaid, and that additional postage is to be collected on delivery. An "O" at the side of the postage stamp indicates that the stamps were of no value for prepayment of postage in the country in which the article was mailed. Wholly unpaid letters are liable to a charge of 10 cents per one-half ounce (double the prepaid rate); and insufficiently paid articles of all kinds are liable to a charge of double the amount of the short payment, which amount is indicated by the stamp, "Due — cents," or "U. S. charges to collect, — cents," impressed thereon at the United States exchange post-office which received the article from abroad, and is required to be collected by the postmaster who delivers the article.

Mail matter of all kinds received from any country of the Postal Union is required to be reforwarded at the request of the addressee from one post-office to another, or to any foreign country embraced in the Postal Union, without additional charge for postage.

Senders are cautioned that in order to insure prompt and safe transmission to destination of articles addressed to foreign countries, they should (1) make the address legible and complete, giving the name of the country as well as that of the town or post-office; (2) avoid using flimsy paper for envelopes, as they are liable to be torn or destroyed in long transits; (3) avoid using sealing wax on the covers, as letters so sealed often adhere to each other, and the addresses of the articles are destroyed by the tearing of the covers in the attempt to separate the articles; (4) see that the

postage stamps affixed to the covers of articles of printed matter do not adhere also to the articles themselves, thus virtually sealing the packages, and thereby subjecting them to additional postage, at the letter rate, on delivery.

POSTE RESTANTE LETTERS.

The following are the regulations which determine in the different countries of the Universal Postal Union the length of time for retaining in the offices of destination unclaimed correspondence addressed "poste restante:"

Costa Rica, 10 days.

Peru and Salvador, 1 month for correspondence of domestic origin, and 2 months for correspondence of foreign origin.

Netherlands, West Indies, 1 month if originating in Venezuela or the West Indies, and 2 months when of any other origin.

Bahamas, Bermuda, Barbadoes, British Honduras, 2 months.

Dutch Guiana, 2 months for domestic correspondence. No legal limit for retention of international correspondence.

British Guiana, 2 months as a general rule, and 3 or 4 months in exceptional cases.

San Domingo, 2 months for domestic correspondence, and 3 months for international correspondence.

Jamaica, 8 weeks for international correspondence, and 4 weeks for domestic correspondence.

Brazil, Colombia, United States of; Danish West Indies, 3 months.

Guatemala, Hawaii, Mexico, 6 months.

Chile, 3 months in the office of destination, and 6 months longer in the dead letter office of the central administration.

Nicaragua, 6 months in the office of destination, and 6 months in the central administration.

Argentine Republic, 9 months in the office of destination, and 3 months longer in the central administration.

Honduras, Haiti, and Uruguay, 1 year.

Venezuela, 2 years.

REGULATIONS GOVERNING DUTIABLE ARTICLES.

When letters, sealed packages, or packages the wrappers of which can not be removed without destroying them, are received in the United States from a foreign country, and the postmaster of the exchange office at which they are received has reason to believe they contain articles liable to customs duties, he shall immediately notify the customs officer of the district in which his office is located, or the customs officer designated by the Secretary of the Treasury for the purpose of examining the mails arriving from foreign countries, of the receipt of such letters or packages and their several addresses; and if any letter or package of this character be addressed to a person residing within the delivery of his office, the postmaster shall also at the time of its arrival notify the addressee or addressees thereof that

such letter or package has been received and is believed to contain articles liable to customs duties, and that he or they must appear at the post-office at a time in said notice to be designated, not exceeding 20 days from the date of said notice, and receive and open said letter or package in the presence of an officer of the customs.

Letters and sealed packages, or packages the wrappers of which can not be removed without destroying them, which are supposed to contain articles liable to customs duties, and which are addressed to persons residing outside of the delivery of the United States exchange office where they were first received from abroad, shall be forwarded, without longer detention than 24 hours, to their respective destinations, marked "Supposed liable to customs," and upon their receipt at the offices of destination the postmasters thereof shall notify the nearest customs officer and the parties addressed in the manner and to the same effect as hereinbefore provided in the case of similar letters or packages addressed for delivery at the United States exchange office where they were first received: *Provided, however,* That nothing hereinabove contained shall authorize or allow customs officers to seize or take possession of any letter or sealed package while the same is in the custody of a postmaster, nor until after its delivery to the addressee; and provided further, that no letter or sealed package shall be detained at the office of delivery a longer period than may be necessary for the appearance of a customs officer and the addressee in pursuance of the notices hereinbefore provided to be given.

Unsealed packages received in the mails from foreign countries, which are found on examination by customs officers to contain articles liable to customs duties, shall be delivered by the postmaster at the exchange office of receipt to the proper officer of the customs for the collection of the duties chargeable thereon, with notice of such delivery to the person addressed. But books received from countries or colonies of the Universal Postal Union, all unsealed packages of merchandise received in mails from Mexico and Canada, and all packages received by "parcel post" from any foreign country, which are found to be dutiable, shall, when addressed to a post-office other than the exchange office of receipt, be promptly transmitted by mail to the addressees charged with the amounts of customs levied thereon respectively, which amounts postmasters at the office of destination will collect of the addressees on their delivery, and remit by first mail thereafter, under registration, to the collector of customs of the district in which the exchange post-office of receipt is situated. In case of the refusal or neglect of addressees of such dutiable books or packages of merchandise from Mexico and Canada to apply for them at the post-office of destination within a period of 30 days from the date of their receipt at said office and pay the customs duties and any postage charges levied thereon, the postmaster of said office will specially return the same to the collector of the customs of the aforementioned district; but in the case of packages received by "parcel post" from foreign countries, which appear to be undeliverable, postmasters at post-offices of destination shall, at the expiration of 30 days from date of their receipt, report to the "Superintendent of Foreign Mails, Post-Office Department," that said packages are undeliverable, giving the reason therefor, and stating the names and addresses of both senders and addressees of the packages, dates and places of mailing, dates of receipt, and what the packages are said to contain, and will hold the packages subject to the further orders of the Department.

Postmasters are instructed to collect the customs duties on such books and packages forwarded to their offices for delivery to addressees, and promptly remit the sum so collected by them to the collectors of the customs in registered letters, using penalty envelopes, and omitting the registration fee, as for all other official matter, under section 622 Postal Laws and Regulations, 1887: but the postal revenues are not in any manner to be credited or charged with such duties.

All sealed packages, other than letters in their usual and ordinary form, forwarded to the United States in the mails from Mexico and Canada contrary to the provisions of the postal conventions between the two countries, shall be immediately returned from the United States exchange offices of receipt to the Mexican or Canadian exchange offices from which they were dispatched.

Postmasters are expected to extend to customs officers, specially designated for that duty by the Secretary of the Treasury, such facilities as may be necessary to enable them to examine mail matter arriving in the mails from foreign countries in order to protect the customs revenues.

Postal clerks on railway post-offices exchanging mail with Canada are also directed to carefully examine Canadian mails coming in their hands for distribution, and to turn into the nearest exchange post-office where there is a custom-house officer all books and packages of merchandise found in such mails known or supposed to be liable to customs duty, in order that appropriate action may be taken by the postmaster, in conjunction with the customs officer, concerning their disposition.

The General Superintendent of the Railway Mail Service will see that full and explicit instructions are given to all postal clerks on railway post-offices exchanging mails with Canada as to the examination of the mails from Canada, and as to the post-offices to which all intercepted packages containing dutiable articles are to be turned in.

He will also require of such postal clerks daily reports and monthly reports to be transmitted to the Department by the superintendents of the several railway mail divisions, showing the number and character of all articles subject to customs duty which they may intercept and turn in under the requirements of this order.

Postmasters, post-office inspectors, and other postal employes will promptly report to this Department every case coming to their notice where the foregoing instructions are in anywise violated.

CUSTOMS DUTIES.

The Department has not been advised what articles (other than those so designated in the preceding list of "prohibited articles") are liable to customs duties in foreign countries, and consequently does not exclude articles of merchandise from the mails for foreign countries because they may be liable to customs duties in the countries to which they are addressed.

Customs duties can not be prepaid by the senders of dutiable articles; they will be collected of addressees if the articles are delivered.

Newspapers and other periodical publications received in the mails from abroad under the provisions of postal treaties or conventions are free from customs duty.

Books and printed matter bearing the address of the chief of a foreign mission

in the United States, and imported through the mails, may be delivered without payment of customs duties.

Duitable books forwarded to the United States from countries in the Postal Union are delivered to addressees at post-offices of destination upon payment of the duties levied thereon.

The Secretary of the Treasury has instructed collectors of customs that the act of March 3, 1883, imposes a duty of 25 per cent. ad valorem on all printed matter not therein otherwise provided for, without regard to mode of importation; and that under said act all printed matter, except newspapers and periodicals, and except printed matter other than books imported in the mails for personal use, is subject to the regular duty of 25 per cent. ad valorem.

Sample copies of musical publications imported by dealers or agents of foreign publications are held to be not exempt from United States customs duties.

PROHIBITED ARTICLES.

1. To all foreign countries:

(a) Liquids, poisons, explosives and inflammable articles, fatty substances, live or dead insects—especially Colorado beetles—reptiles, fruits or vegetable matter liable to decomposition, confectionery, pastes or confections, and substances exhaling a bad odor, excluded from transmission in domestic mails, as being in themselves, either from their form or nature, liable to destroy, deface, or otherwise injure the contents of the mail bags or the persons of those engaged in the postal service, are prohibited from transmission in the mails exchanged with foreign countries, as are also obscene, lewd, or lascivious books, pamphlets, etc., and letters and circulars concerning lotteries, so-called gift concerts, etc., also excluded from the domestic mails.

(b) Certain articles other than those above mentioned, which, from their nature or form, are liable to destroy, deface, or injure the contents of the mail bags or the persons of those engaged in the postal service, may be transmitted in the mails to foreign countries, if bona fide trade samples, and exchangeable in the mails with said countries, when inclosed in the form prescribed for such articles in domestic mails.

(c) All articles prohibited from domestic mails are also excluded from circulation in the mails to or from foreign countries.

(d) Postal cards or letters addressed to go around the world.

2. To all countries of the Postal Union:

(a) Letters or packets containing gold or silver substances, jewelry, or precious articles. This does not apply to Mexico.

(b) Any packet whatever containing articles liable to customs duty in the countries addressed. This does not apply to Mexico, or to articles forwarded by "parcels post."

(c) Articles other than letters which are not prepaid, at least partly, or which do not fulfill the conditions required in order to enjoy the reduced rates.

(d) Articles other than letters and postal cards addressed for delivery in any foreign country embraced in the Universal Postal Union, which contain writing in the nature of personal correspondence, or which do not conform to all the con-

ditions prescribed for such articles, to entitle them to transmission in Postal Union mails at reduced rates of postage unless they are fully prepaid at the letter rate of postage, viz, 5 cents per one-half ounce or fraction of one-half ounce.

(e) Articles of a nature likely to soil or injure the correspondence.

(f) Packets of samples of merchandise which have a salable value or which exceed in weight or measure the prescribed limits are not transmissible at the rates fixed for samples.

(g) Packets of commercial papers and printed matter of all kinds the weight of which exceeds 2 kilogrammes (4 pounds 6 ounces), or the size of 18 inches in any direction, except rolls of printed matter.

(h) Postal cards not of United States origin, except as letters, and except also the reply halves of double postal cards received from foreign countries.

(i) There is, moreover, reserved to the government of every country of the union, the right to refuse to convey over its territory, or to deliver, articles liable to the reduced rate in regard to which the laws, ordinances, or decrees which regulate the conditions of their publication or of their circulation in that country have not been complied with, as well as correspondence of every kind which evidently bears inscriptions forbidden by the legal enactments or regulations in force in the same country.

3. To Mexico:

(a) Letters not prepaid one rate—2 cents. Articles other than letters in their usual and ordinary form, which are wrapped so that their contents can not be easily examined.

(b) Other exchangeable matter not fully prepaid.

(c) Publications which violate the copyright laws of Mexico.

(d) Merchandise other than bona fide trade samples, unless sent by "parcels post."

(e) Liquids, pastes, confections, vegetables, etc., without regard to the manner in which they are wrapped.

4. The United States of Colombia:

Books and nonperiodical publications which, to judge from their number, are not intended for the personal use of the persons to whom they are addressed, but are intended for sale, and consequently are liable to customs duties upon entering the United States of Colombia.

PARCELS POST.

Parcels post conventions having been concluded between the United States and Jamaica, Barbadoes, the Bahamas, British Honduras, Mexico, the Hawaiian Kingdom (Sandwich Islands), the Leeward Islands, Colombia, and Salvador, the attention of postmasters and others is called to the following provisions thereof, which apply in the United States to parcels of merchandise (other than samples) and all other articles not prohibited, which are exchanged between the United States and Jamaica through the post-offices of New York and Kingston; between the United States and Barbadoes through the post-offices of New York and Bridgetown; between the United States and the Bahamas through the post-offices of New York and

Nassau; between the United States and British Honduras through the post-offices of New Orleans and Belize; between the United States and Mexico, Colombia, and Salvador, through the post-offices of those countries designated as exchange offices; between the United States and the Hawaiian Kingdom through the post-offices of San Francisco and Honolulu; between the United States and the Leeward Islands through the post-offices of New York and Antigua.

POSTAGE.

For a parcel not exceeding 1 pound in weight..... 12 cents.
For every additional pound or fraction of a pound 12 cents.

The postage must, in all cases, be prepaid, and by means of postage stamps which must be affixed by the sender; and no parcel will be accepted for transmission which is not sufficiently prepaid.

DIMENSIONS AND WEIGHT.

The dimensions allowed for Mexico and Colombia are:

Greatest length 2 feet.
Greatest girth 4 feet.

The dimensions allowed for the other countries are:

Greatest length 3 feet 6 inches.
Greatest length and girth combined 6 feet.
The maximum weight for all destinations 11 pounds.

PARCELS—HOW TO BE PUT UP.

Parcels must be securely and substantially packed, so they can be safely transmitted in ordinary mail sacks, but must be so wrapped or inclosed as to permit their contents to be easily examined by postmasters and customs officers.

Any article admitted to the domestic mails of the United States may be sent, except those mentioned in the next paragraph.

A letter or communication of the nature of a personal correspondence must not accompany, be written on, or inclosed with any parcel. If such be found, the letter will be placed in the mails, if separable and if the communication be inseparably attached, the whole package will be rejected. If, however, any such should inadvertently be forwarded, the country of destination will collect double rates of postage according to the Universal Postal Union Convention.

No parcel may contain parcels intended for delivery at an address other than that borne by the parcel itself. If such inclosed parcels be detected, they must be sent forward singly, charged with new and distinct parcel-postage rates.

PROHIBITED ARTICLES.

The following articles are prohibited from transmission under this arrangement: Publications which violate the copyright laws of the country of destination; poisons and explosive or inflammable substances; liquids and substances which easily liquefy; confections and pastes; live or dead animals, except dead insects and reptiles,

when thoroughly dried; fruits and vegetables, and substances which exhale a bad odor; lottery tickets, lottery advertisements, or lottery circulars; all obscene or immoral articles; articles which in any way damage or destroy the mails or injure the persons handling them.

ADDRESS AND MODE OF POSTING.

Each parcel must be plainly directed, giving the name and full address of the person for whom the parcel is intended. It must bear the words "Parcels Post," in the upper left-hand corner, and the name and address of the sender.

A parcel must not be posted in the letter-box, but must be taken into the post-office, and presented at the counter to the postmaster or person in charge, between the hours of 9 a. m. and 5 p. m.

The sender will, at the time of mailing the parcel, receive a certificate of mailing from the post-office.

All parcels may be liable to customs duties, and the sender of each parcel will therefore be required to make a CUSTOMS DECLARATION, giving a general description of the parcel, an accurate statement of the contents and value, date of mailing, and the sender's signature and residence, and the place of address. This declaration must be pasted upon every parcel, upon a special form which the postmaster at the mailing office will furnish the sender. Postmasters will apply to the Department for these forms.

RETURN RECEIPTS FOR ORDINARY PARCELS.

The sender of an unregistered parcel addressed to Jamaica, Barbadoes, the Bahamas and British Honduras, may obtain a return receipt for the same by paying a fee of 5 cents in addition to the postage on each parcel, to be affixed to the parcel in stamps.

REGISTRATION.

The sender of a parcel addressed to any of the countries named in the first paragraph of this article, except Barbadoes, may have the same registered by paying a registration fee of 10 cents, and will receive the RETURN RECEIPT without special charge therefor; but the Post-Office Department will in no case be responsible for the loss or damage of any parcel.

DELIVERY OF PARCELS.

The addressee of a registered parcel must be advised of the arrival of a parcel addressed to him, by a notice from the post-office of destination. Postmasters will see that such notices are promptly given in all cases.

POSTAGE TO BE COLLECTED ON DELIVERY.

On the delivery of a parcel to the addressee a charge of 5 cents must be collected on each single parcel of whatever weight; and if the weight exceed 1 pound, a charge of 1 cent for each 4 ounces of weight, or fraction thereof, will be collected.

Postage-due stamps to the amount of this charge on each parcel will be affixed and canceled before delivery. See sections 557 and 559, Postal Laws and Regulations.

DUITABLE ARTICLES.

Duitable articles received in the United States by parcel post mails will be rated and charged with the proper amount of customs duty by the customs officer at the United States exchange post-office at which said mails are received from abroad, and these duties will be collected and remitted to said customs officer by the postmaster who delivers the article, according to section 622, Postal Laws and Regulations.

REDIRECTION OF PARCELS, AND UNDELIVERABLE PARCELS.

Parcels redirected from one address to another will be charged a fresh postage, at the prepaid rates; and an order for such redirection must be accompanied by the amount due for the necessary postage (at the rate of 12 cents a pound or fraction of a pound).

If a parcel can not be delivered as addressed, or is refused, the postmaster at the office of address will notify the Superintendent of Foreign Mails, giving full particulars, and the sender will be communicated with through this Department, as to the manner in which he desires the parcel to be disposed of; and if no reply be received from him within a period of 3 months from the date of this notice, the parcel must be returned by the postmaster, pursuant to advices from the Department, under registration, to the collector of customs, according to the second paragraph of section 622 of the Postal Laws and Regulations, to be sold for the benefit of whom it may concern.

Similar action will be taken in Jamaica and Barbadoes in respect to parcels sent from the United States.

Postmasters will take pains to assist the public to an understanding of this service and to its convenient use.

MONEY-ORDER SERVICE.

The United States maintains a direct exchange of money orders with the Islands of Jamaica, Bahamas, Barbados, Grenada, St. Vincent, Santa Lucia, Antigua, St. Christopher-Nevis, Dominica, Montserrat, and the Virgin Islands.

Money orders issued in the United States for payment in any of these islands are drawn in sterling money (pounds, shillings, pence) at the rate of \$4.87 to the pound sterling.

Each order must be sent by the remitter, at his own expense, to the payee, who must present it at the paying office to obtain payment of the amount.

In the case of money orders payable in the Windward or Leeward Islands, the maximum amount for which a single order may be drawn is 20 pounds 10 shillings and 8 pence (equivalent to \$100), but for orders payable in Jamaica the maximum is 10 pounds 5 shillings and 4 pence (equal to \$50).

A convention for the exchange of postal money orders between the United States and the Republic of Chile, and one for a similar exchange for the Republic of Ecua-

dor, have been negotiated and signed by the Postmaster-General of the United States and the diplomatic representatives of those two countries at this capital. Each of these conventions awaits, before being put into operation, the approval and ratification of the home government.

A convention for the exchange of money orders between Mexico and the United States has been concluded and will go into operation July 1, 1891.

Negotiations are in progress for an exchange of postal money orders between the United States on the one hand and the Republic of Salvador (Central America), the British Colonies of Trinidad and Tobago, and the Bermuda Islands on the other.
